The quotation of recorded birdsong in orchestral music was introduced in Respighi's *Pini di Roma* (1923–4; the nightingale accompanied by the orchestra). In *Gli uccelli* (1928) Respighi reverted to adding conventional woodwind embellishments to tonal music. With the advancement of electroacoustic technology, the musical potential of recorded birdsong has increased. Even a simple transposition downwards may bring interesting effects (James Fassett, *Symphony of the Birds*, 1955). François-Bernard Mâche has explored connections between bird vocalizations and music, for example by borrowing birds' rhythmic patterns in *Rituel d'oubli* (1968), blurring the distinction between recorded birdsong and voice in *Korwar* (1972) and creating a birdsong counterpoint in *Naluan* (1974). In Michaël Lévinas's opera *La conférence des oiseaux* (1985) singer-actors display a grotesque mixture of human and avian characteristics while the tape part includes sonorities derived from birdsong. Many electroacoustic works quote or stylize birdsong (e.g. François Bayle's *Trois rêves d'oiseau*, 1971; Joan la Barbara's *Urban Tropics*, 1988). However, recorded birds reiterate their song with each playback of the tape, thus sharing the main shortcoming of birdsong representation, that is, the loss of variability of real birds' voices. More diversity can be created in live-electronic music with manipulation of recordings (e.g. Cage's *Telephones and Birds*, 1977) and with the use of improvisation, sampling and computer processing of recorded birdsong.

MARIA ANNA HARLEY

**Bird warbler.** *See* SWANEE WHISTLE. *See also* BIRD INSTRUMENTS, §3.

**Biret, Idil** (*b* Ankara, 12 Nov 1941). Turkish pianist. She began piano lessons at the age of three, later studying the piano with Cortot and Kempff and composition with Boulanger. At 15 she graduated from the Paris Conservatoire with three *premiers prix* and embarked on an international career which has included appearances with most of the world's leading orchestras and conductors. In 1993 she became the first pianist to record the complete works of Chopin. Her other complete recordings include the solo piano works of Brahms and Rachmaninoff, Liszt's transcriptions of the Beethoven symphonies and the piano sonatas of Boulez. Known mainly for her interpretations of the great Romantic composers, she possesses an encyclopedic repertory and a formidable technique. In addition to the complete, or near-complete, piano works of Beethoven, Schumann, Debussy, Ravel, Skryabin, Prokofiev and Stravinsky, Biret has performed all of the principal keyboard works of Bach, Schubert, Liszt and Bartók, the complete keyboard concertos of Beethoven, Tchaikovsky, Rachmaninoff and Prokofiev, most of the Mozart concertos, many contemporary works (she gave the première of Jean Françaix's Piano Sonata in 1960) and reams of chamber music. Notable ensemble partners have included Kempff, Maurice Gendron and Yehudi Menuhin. Like many leading players, Biret is an uneven artist, capable not only of rhythmically prosaic and tonally opaque playing, but also of profoundly inspired interpretations.

JEREMY SIEPMANN

**Birgisson, Snorri Sigfús** (*b* Copenhagen, 29 April 1954). Icelandic composer and pianist. He studied the piano with Jón Nordal and Árni Kristjánsson and composition with Thorkell Sigorbjörnsson at the Reykjavík College of Music, graduating as a pianist in 1974. He continued piano studies with Barry Snyder in the USA at the Eastman School of Music (1974–5). In 1975–6 he studied composition with Mortensen in Oslo, electronic music with Lasse Thoresen and sonology with Thoresen and Olav Anton Thommessen. He then pursued further composition studies with Ton de Leeuw in Amsterdam (1976–8). On returning to Iceland in 1980 he became active as a pianist, composer and teacher in Reykjavík.

Birgisson's compositions span a wide stylistic range, from the 11 slow-moving, meditative movements of *Hymni* (1982) to the experimental choral work *Aevintýri* (1983–5), in which the musical material is determined by punctuation marks in the text, an old Icelandic fairy tale. One of several works inspired by extramusical elements, *Aefingar* ('Etudes', 1981) is a set of 21 piano pieces based on the imagery of the 'major arcana' tarot cards. His four volumes of *Piano Pieces for Beginners* (1984) introduce young students to various techniques of contemporary composition and performance, including aleatory procedures and the interaction of tape with live performance. In 1996 he was the soloist in the première of his Concerto for piano and orchestra, a work notable for its gentle lyricism, particularly in the central slow movement. More stylistically diverse, his *Seven Portraits* for solo piano (1997–8) are musical depictions of seven unnamed friends and colleagues.

ÁRNI HEIMIR INGÓLFSSON

**Birimbao.** A small JEW'S HARP with a pear-shaped iron or copper frame to which a steel tongue is attached. In Spain, where it is also called *guimbarda*, it is a shepherd's instrument. In parts of the Basque country it was found until the end of the 19th century under the local names *trompa*, *mosu-gitarra* and *mosu-musika*; it is now almost obsolete there. In Latin America it is commonly used in children's games. It is found in Cuba and Brazil, and among the Venezuelan Guajiro (where it is known as *trompa*), the Chilean and Argentine Araucano (known as *trompe*) and the Mataco of the Gran Chaco.

JOHN M. SCHECHTER

**Biriotti, León** (*b* Montevideo, 1 Dec 1929). Uruguayan composer, conductor and oboist. He studied the violin with Antonio Maiquez and Juan Fabbri, then the oboe at

the local municipal music school. He later concentrated on his oboe studies with Jean-Louis Le Roux and studied composition with Enrique Casal Chapi (1950–55). While in France on a Karolyi Foundation scholarship he studied conducting with Jean Martinon. In 1969–70 he studied composition with Ginastera at the Di Tella Institute in Buenos Aires; he attended Ligeti's composition course in Darmstadt in 1976.

As a soloist, conductor and composer, Biriotti has been an active and influential promoter of contemporary music in Uruguay and Brazil. He founded and directed a string orchestra and conducted the Uruguayan Jeunesses Musicales chamber orchestra and the SODRE SO; he has conducted some of the main orchestras in South America. As an acclaimed virtuoso oboist, he has performed throughout North and Latin America, Europe and the Middle East, playing his own works and giving premières of those of his Latin American colleagues. Many composers have dedicated oboe works to him. The strong reputation he has enjoyed as a composer, especially since the late 1970s, has taken him to numerous international festivals and congresses.

In general, Biriotti's music developed from a preoccupation with craftsmanship (the *Suite concertante*, 1953, and *Sinfonía Ana Frank*, 1964) to a total serialist style and the use of electronics. In the early 1970s he was particularly concerned with questions of set theory, which he referred to as a system of structures through permutations of ordered sets. For him, a set comprised not only the usual possible transformations of a 12-note row, applied horizontally as well as vertically, but a series of internal, numerical relationships and interactions among the various forms of the rows. This combinatorial method applied, in works including *Espectros* (1970), *Permutaciones* (1970) and *Laberintos* (1970), frequently produced a total chromatic cluster, each time different, with internal timbral variety. While this technique of composition allowed the most varied diversity of aesthetic and stylistic idioms, it also provided a cohesive means of internal structure.

Biriotti often expressed his deep sorrow over the Jews' historical plight (as in the *Sinfonía Ana Frank*, *Treno por Auschwitz*, the 'Jerusalem' Symphony and *Sinfonia da Requiem*, the last of which was written in 1998 to commemorate the victims of the Holocaust). His works of the 1980s and 90s show structural skill, virtuoso instrumental writing, genuine expressiveness and a sense of humour, as in *Voyage autour de mon nombril* or *Prélude à l'après-midi d'un dinosaure*.

**Birkenshaw, John.** *See* BIRCHENSHA, JOHN.

**Birkenstock** [Birckenstock, Birkenstok, Berkenstock], **Johann Adam** (*b* Alsfeld, Hessen, 19 Feb 1687; *d* Eisenach, 26 Feb 1733). German violinist and composer. In 1700 his family moved to Kassel where he studied music for five years with the Italian Kapellmeister Ruggiero Fedeli. Impressed by his progress, the Landgrave sent him to Berlin to study with Volumier. After a year in Berlin, Birkenstock spent a year at Bayreuth as the pupil of Fiorelli. He then went to Paris in 1708 to perfect his violin technique under the guidance of François Duval. The following year he became a member of the court orchestra at Kassel, and in 1721 was promoted to the position of first violin. During the year 1722 he undertook a concert tour, spending seven months in Amsterdam where his first violin sonatas were published. While in Holland Birkenstock refused a lucrative appointment at the King of Portugal's establishment. Returning to Kassel, he was subsequently (1725) appointed Konzertmeister, with a salary of 200 thalers and gifts in kind. After the Landgrave's death in 1730, Birkenstock moved to Eisenach as Hofkapellmeister, a position he held until the end of his life.

Birkenstock was regarded in his own day as one of Germany's leading violinists. He was also widely respected as a composer of instrumental music. Although his main publishers were Roger & Le Cène of Amsterdam, some of his compositions appeared in England and seem to have enjoyed considerable success: John Walsh's edition of the op.1 set was reissued several times between 1727 and 1746. These sonatas are all in four or more movements. The basic plan is that of the *sonata da chiesa* with its alternating slow and fast movements, but Birkenstock also introduces various dances (allemande, sarabande, gigue) within this framework. Contrapuntal

movements (e.g. the Alla breve from no.1) are included alongside dances of a lighter character. Stylistically, the music is firmly rooted in Baroque traditions: the airs and sarabandes are occasionally reminiscent of similar Handelian movements, while the thematic material of the gigues and the quality of the string writing in allegro movements show the influence of Corelli. The sonatas do not make excessive technical demands but are well written for the violin. Virtuoso runs and idiomatic passages of double stopping are common in the allegro movements. Birkenstock's training in the French school is apparent in such movements as the 'Rondau' from the fourth sonata.

It is not clear how many of Birkenstock's sonatas were published. The op.1 set appeared in 1722, but J.G. Walther also mentioned another set of *XII. sonate à violino solo e continuo* together with *XII. concerti à 4 violini obligati, alto viola, violoncello e basso continuo* which Birkenstock sent to Amsterdam to be printed in 1730. There is however no record of these works in catalogues issued by Roger & Le Cène, and the concertos mentioned have been variously attributed to Pergolesi, Ricciotti and Unico Wilhelm van Wassenaer.

PIPPA DRUMMOND

**Birmingham.** City in England. Known for the music festivals that began there in the mid-18th century and achieved international renown in the 19th, the city has enjoyed a return to its 19th-century musical status in the 1980s and 90s, and notably with the opening of its widely admired Symphony Hall in 1991.

1. CHURCHES. In 1392 Birmingham merchants established the Gild of the Holy Cross, which appointed priests to sing at services at St Martin's, the parish church, and an organist whom they housed by the church. The last organist appointed before the dissolution of the guild in 1547 was Sir William Bothe (Booth). The 1503–4 Churchwardens' Accounts for Halesowen Parish in North Worcestershire mention an organ maker and repairer in Birmingham.

The population rose from 3000 to 15,000 during the 17th century. A second church, St Philip's (now Birmingham Cathedral), was consecrated in 1715 and given a fine organ, built by Schwarbrick (replaced in 1929 by a Nicholson organ). The first organist there, Barnabas Gunn, was also organist at Gloucester Cathedral (1730–40) and finally at St Martin's, Birmingham, the town having reinstalled an organ there in 1725. Later organists at St Martin's were Joseph Harris (from 1787) and Thomas Munden, who in 1822, 1825 and 1828 presented occasional Sunday 'selections of Sacred Music' by Palestrina, Orlando Gibbons, Handel, William Boyce, William Crotch, Mozart, Beethoven and a Mozart pupil, Thomas Attwood. St Martin's had fully choral services from the 1880s.

Michael Broome (1700–75) arrived at St Philip's as Parish Clerk in about 1733. He trained the adult males of the choir (some were paid) and the children of the neighbouring Blue Coat School (established 1724), who sang the treble parts at St Philip's. Broome also taught privately and was a member of the Musical and Amicable Society, which met at a coffee-house for practice and music-making. This society was vital to Birmingham's musical development. Drawn at first mainly from the men of St Philip's choir, it attracted other choristers and was large enough by 1762 to warrant its formal name and a constitution. Between 1733 and 1760, Broome published collections of metrical psalm tunes and simple anthems, which were distributed in the Midlands for the use of Anglican and Dissenting churches. James Kempson (*b* 1742) produced four similar collections between 1770 and 1780; also a member of the Musical and Amicable Society, he was clerk to St Bartholomew's church, which was opened in 1749, subsidized by the iron-master John Jennens and his wife (relations of Charles Jennens, Handel's librettist).

2. OPERA AND THEATRES. At the Moor Street Theatre, open by 1740, Barnabas Gunn promoted concerts. The Smallbrook Street Theatre was open from 1747, and the first purpose-built house, the King Street Theatre, opened in 1751 and closed in 1779. All three took a regular flow of London productions; not being licensed, they sold tickets for concerts with the drama presented free, supposedly, in the interval. This suited the scenes-with-music format of current theatre pieces: for example Molière's *Le médecin malgré lui*, adapted by Henry Fielding in 1732, came to Birmingham in 1746 as *The Mock Doctor*, with music by Richard Jones and songs by Seedo and Henry Carey. Local musicians generally joined the visiting orchestra in the pit.

In 1774 the New Street Theatre (later the Theatre Royal) replaced the King Street Theatre. It was not licensed until 1807. Operatic concerts there, associated especially with Mrs Billington, Catalani (many visits, 1807–28) and John Braham, were vastly popular. Recently composed operas by Rossini, Bellini, Donizetti and Verdi were brought to Birmingham by visiting companies from about 1827 onwards, including those of Sims Reeves, Pyne and Harrison, the Drury Lane Theatre and some simply named 'An Italian Company' bringing well-known singers. The Theatre Royal had its own orchestra which, in the 1840s, was trained and directed by an excellent Birmingham musician, the violinist Alfred Mellon, soon lured away. From Mellon's day until 1939 the town was visited regularly by all the major touring companies of the time. They played the Theatre Royal, the Grand Theatre in Corporation Street and the Prince of Wales Theatre in Broad Street, the last having excellent acoustics. At the old Repertory Theatre in Station Street, Barrie Jackson presented some opera in the 1920s, including Rutland Boughton's *The Immortal Hour* (1922) and the premières of operas by Messager, Ethel Smyth and Bantock. These theatres have gone or, in the last case,

found a new home; the Birmingham Hippodrome is now the principal opera and ballet venue, and a second home since 1968 to the Welsh National Opera company. They and the Birmingham Royal Ballet (from 1990) each present three two-week runs every season.

A Baroque opera was staged annually between 1959 and 1985 at the University of Birmingham, in the Barber Institute of Fine Arts (opened in 1939 with a seating capacity of 370); a Cherubini piece was given in 1991. Inspired by Anthony Lewis (holder of the Chair of Music, 1947–68), performances continued under his successor Ivor Keys, with eleven operas by Handel (many of them modern premières) and others by Alessandro Scarlatti, Rameau, Keiser and Lully, as well as Gluck, Haydn, Mozart, Berlioz, Bizet and Bellini. Janet Baker, in the early stages of her career, appeared in 1964 and 1966 in Handel's *Ariodante* and *Orlando*.

The City of Birmingham Touring Opera (CBTO) started in 1987, funded jointly by the city and the Arts Council. It uses young performers and plays suburban venues in Birmingham and elsewhere, aiming to reach a new audience for opera. In 1989 the company gave the première of Ravi Shankar's *Ganashyam* and in 1997 performed Britten's three church parables at Aldeburgh with the Birmingham Contemporary Music Group. Amateur grand opera companies, once popular, have declined in number since 1972, but amateur light opera companies have doubled their numbers to 40 in the same period.

3. Benefit concerts and festivals. In 1759 and 1760 the organist of St Martin's, Richard Hobbs, presented three-day early-autumn oratorio festivals at the New Theatre, King Street, with 24 chorus singers, 40 instrumentalists and well-known solo singers. In 1762 an oratorio performance, including some Purcell and Handel and conducted by Hobbs, was given at St Bartholomew's to celebrate the end of the Seven Years' War. The peace, however, caused a slump in Birmingham's trade; to assist those most stricken by unemployment, James Kempson organized a similar performance at St Bartholomew's Christmas morning service in 1766, a collection being taken. Capel Bond from Coventry conducted an oratorio festival in 1767. The Musical and Amicable Society created an offshoot, the Chappell Society, to sing for charitable purposes. The St Bartholomew's Christmas festival continued until 1838. Noting its success, and no doubt aware of Hobbs's and Bond's recent commercial festivals, Kempson suggested to the Hospital Trustees, whose building plans lacked funds, the idea of a three-day festival in aid of the General Hospital. Held between 7 and 9 September 1768, it ushered in Birmingham's great era of Music Meetings (1768, 1778, 1780, 1784 and 1787), from 1790 called Musical Festivals. Their three-yearly pattern was established in 1784, with breaks in 1793 (a theatre fire) and between 1829 and 1834, while awaiting completion of the Town Hall. Profits passed to the Hospital Trustees rose from £300 (1768) to between £5000 and £6000 (1820–1900), declining thereafter.

Capel Bond was the first Music Meetings conductor. In his time, Handel oratorios monopolized the three morning performances at St Philip's, with the Thursday morning *Messiah* early established as a tradition; the three evening Grand Miscellaneous Concerts afforded a contrast. Music by composers then living included an Abel symphony in 1780 and a Haydn overture and extracts from William Boyce's *Solomon* in 1784. The magnetic Thomas Greatorex, well-connected socially and musically, followed Bond (conductor 1796–1829), with breaks in 1808 and 1811 when William Crotch and Samuel Wesley took charge. Programmes became more adventurous: music by Purcell, Boyce, Crotch, William Croft, William Shield and Samuel Arnold was included, and in 1805 the first part of Haydn's *Creation* (1798) was given. From then on major works, including symphonies, by Haydn, Mozart and Beethoven were performed.

A *St Matthew Passion* chorus given in Birmingham in 1837 evidently inspired a London performance of extracts from Bach's *Magnificat* and B minor Mass only months later, the link being Lord Burghersh, founder of the Royal Academy of Music, a Birmingham Festival patron and director of the Concert of Ancient Music in London. William Knyvett, singer and conductor (1834–43), was followed as festival conductor by Ignaz Moscheles (1846), Michael Costa (1849–82), Hans Richter (1885–1909) and Henry Wood (1912). Costa consolidated the new system of a single conductor on a podium, controlling all and visible to every performer. Singers with European reputations were employed, among them Billington, Mara, Catalani, Malibran, Braham, Grisi, Mario, Novello, Reeves, Patti, Santley, Butt and Muriel Foster (esteemed by Elgar). Costa's programmes naturally had an Italianate flavour, though he was generous to native composers. Richter introduced Palestrina, Wagner, Berlioz, Bruckner, Glazunov, Dvořák and a great deal of Brahms. In 1900 he dared to replace *Messiah* with Bach's *St Matthew Passion*, but only for that year. He did succeed in presenting Bach's Mass in B minor in 1903.

Joseph Moore directed festival affairs from 1799 to 1849. With a business in Birmingham's die-sinking trade, Moore was the driving force behind the building of the Town Hall, Paradise Street (cap. 2323), in 1834, sorely needed for large public meetings as well as for the Triennial Musical Festivals and an increasing number of public concerts (see §4 below). Moore's European researches enabled him to advise on the size and shape of the hall and its equipment, including the organ. The new venue encouraged ever more ambitious programmes and, with Moore's influence, the commissioning of works, notably Mendelssohn's Piano Concerto in D minor (1837) and his *Elijah* (1846; fig.1), conducted by the composer. Arthur Sullivan, Max Bruch, Niels Gade, Saint-Saëns, Gounod, Hubert Parry, C.V. Stanford and Elgar were all commissioned to write for the Birmingham Music Festival and visited Birmingham personally. Of these works, only Elgar's *Dream of Gerontius* (1900) is regularly performed. Sibelius's Symphony no.4 in A minor op.63 and Skryabin's *Prometheus* (*Poem of Fire*), both composed in 1911, were given performances at the 1912 festival.

High taxation bore heavily on the earned income of a large proportion of festival supporters; donations declined as costs rose, World War I finally putting an end to this illustrious period in Birmingham's musical history.

4. Concert life. From the mid-18th century, regular summer concerts were given at the Vauxhall Gardens at Duddeston, promoted by Barnabas Gunn, with music by Handel, Arne and others writing for Vauxhall Gardens in London, and also at the Apollo Gardens in Deritend, particularly associated with a singer, Holte Bridgman, and offering somewhat lighter fare. An oratorio benefit performance was given for Gunn and another composer,

*1. First performance of Mendelssohn's 'Elijah' at Birmingham Town Hall, 26 August 1846: engraving from the 'Illustrated London News' (29 Aug 1846)*

Musgrave Heighington, at the Moor Street Theatre in 1740. After his death Gunn's widow, with his successor at St Philip's, John Eversman, continued to present musical entertainments at the gardens. Eversman launched an annual subscription series of ten concerts at Mr Sawyer's Rooms in the winters of 1759 to 1764. A Dilettanti Music Society promoted concerts from 1780. John Freeth (1730–1808), a local balladeer, wrote topical verses fitted to well-known tunes of the day, which made his coffee-house a mecca for businessmen. A collection of these was published as *The Political Songster* (Birmingham, 1790).

During the Musical Festival era, promoters sought to encourage concerts between festivals and to have a change from the choral repertory. The manufacturer Matthew Boulton supported Joseph Moore in the presentation of a series at Dee's Hotel with music by Mozart and Beethoven. Theatres occasionally presented instrumental stars such as Paganini, as well as famous singers, and Dee's Hotel was also used by touring 'concert-parties', as when Liszt visited in November 1840.

For many years, regular Thursday morning organ recitals were given at the Town Hall. Thomas Munden (1834–7) and George Hollins (1837–41) were in practice, if not officially, the earliest Town Hall organists; their successors, James Stimpson (1842–86), C.W. Perkins (1888–1923), G.D. Cunningham (1924–48), George Thalben Ball (1948–83) and Thomas Trotter, were all officially appointed. In 1844, a ten-year series of popular, cheap-entry Monday evening concerts was initiated at the request of some factory employees, to be held at the Town Hall, with the organ, as both accompanying and solo instrument, the mainstay of the programmes (possibly the earliest 'Monday Pops' in the country). Louis Jullien brought his sensational Monster Promenade Concerts, often featuring Beethoven symphonies as well as lightweight items, to the Town Hall between 1844 and 1859. These enterprises were replaced between 1853 and 1916 by Harrison's Celebrity Concerts, which brought every vocal and instrumental star of the day to Birmingham. The festival singers used the concerts for return visits, notably Adelina Patti, who appeared for Harrison in Birmingham 15 times. Among instrumentalists were Clara Schumann, Wilma Neruda (Lady Hallé), Joseph Joachim, the cellist Alfredo Piatti, Hans von Bülow, I.J. Paderewski, Eugène Ysaÿe and Wilhelm Backhaus. After 1873, the Hallé, London Symphony and Queen's Hall orchestras were regular visitors. Held monthly during the winter season, most concerts were at the Town Hall and a small number at the Masonic Hall, New Street.

After 1916, Harold Holt's International Celebrity Series brought Amelita Galli-Curci, Maria Jeritza, Rachmaninoff, Alfred Cortot, Fritz Kreisler and others, who performed to packed houses; but this was ended by World War II. The occasional Vincent Celebrity Concerts represented a brave later attempt, in the 1970s, but they foundered for lack of public funding and publicity. From 1920 the city orchestra began to fill the concert scene. From 1991, concert seasons were held in the new Symphony Hall, featuring world-famous orchestras and performers.

An increasing number of chamber concerts was promoted after 1850. The Birmingham Musical Union presented excellent local performers, some associated with the Midland Institute School of Music. Its work was carried on towards the end of the century by Charles

Swinnerton Heap. The pianist Stephen Stratton and the clarinettist T.E. Pountney gave admirable programmes in the 1880s. The Drawing Room Concerts, held between 1898 and 1925 at the Grand Hotel by an ex-Concertgebouw violinist, Max Mossel, were the best supported and the most durable. Mossel promoted well-known musicians as well as young artists, among them Dorothy Silk, William Primrose and Gerald Moore. The Royal Birmingham Society of Artists (RBSA) Gallery in New Street was often the venue for chamber music. Oscar Pollack, a *Birmingham Mail* music critic, used it between 1904 and 1909 for soloists and small ensembles; Clarence Raybould's Birmingham Chamber Concerts Society began there in 1914, its mainstay the Arthur Catterall Quartet; and a Mme Minadieu promoted excellent performers there from 1914 to 1920. Other performers were the pianist Wilfred Ridgeway, the violinist Herbert Downes and the cellist Johann Hock. From 1968 to 1978 there was a further series at the RBSA Gallery, promoting musicians from the Midlands.

The Midland Chamber Players Concerts Society gave concerts elsewhere in the city from 1966. The Birmingham Chamber Music Society was founded in 1952 by Wilfred Mellers, linked to Birmingham University; now independent, it continues to present international chamber ensembles of the highest quality. Since 1992, there has been an annual Early Music Festival, held in the autumn. This followed the smaller-scale St Alban's Festival, started in 1984.

The main concert venues are the 2200-seat Symphony Hall, the Adrian Boult Hall (cap. 529) at the Conservatoire, two small theatres at the Birmingham and Midland Institute (cap. 290 and 118), the Town Hall and Birmingham Cathedral. The city-owned Birmingham Hippodrome receives large-scale opera and ballet, and the arena at the National Exhibition Centre and the National Indoor Arena are occasionally the scene of 'spectaculars' or celebrity appearances. The Alexandra and Repertory theatres have occasional musical productions. The Midland Arts Centre in Cannon Hill Park, supported by the city, has a dance centre in its Randle English wing, opened in 1987. Its activities, including performances by jazz, swing, wind and steel bands, strongly reflect the cultures brought into the city from the late 1950s onwards by people from the New Commonwealth.

5. Orchestras. The first Festival orchestra consisted of some 25 virtuoso players, with the usual tripartite direction from principal violin, keyboard and chorus-master. The great cellists James Cervetto, John Crosdill and Robert Lindley, the clarinettists T.L. Willman and the Mahons and the oboists Parke, Erskine and Griesbach were leading players. Thomas Pinto (1768), Wilhelm Cramer (1778–1802) and his son Franz Cramer (1805–43) were distinguished principal violinists, with Weichsel, Mori and Loder leading the evening performances during the 1840s. By 1814, players numbered 82; in 1834 there were 151, contributed by the Concert of Ancient Music, the Vocal Concerts, the Philharmonic Society and the Italian Opera. Each presumably played its own repertory, given the different pitches still used for different musical genres. When Michael Costa became Festival Conductor in 1849 Prosper Sainton led the orchestra, while during Richter's tenure the Hallé Orchestra supplied the leader and most of the players.

William Stockley, appointed Birmingham Festival Choral Society conductor in 1855, was determined to establish a permanent orchestra to match the renowned Choral Society. At some financial risk to himself, he gave three orchestral concerts a year between 1873 and 1897, building a repertory of some 35 symphonies, 27 concertos and various suites and overtures. Elgar played in the first violins from 1882 to 1889 and had three early works performed at Stockley's concerts. The orchestra made an occasional Festival appearance. From 1897 to 1899 Stockley's efforts were continued by Rowland Winn, admired by Richter. Winn's enterprise was, however, eclipsed by George Halford's symphony orchestra, which presented ten concerts a season between 1897 and 1906. In spite of programmes that encompassed all the Beethoven symphonies and some Bruckner, Richard Strauss and Rachmaninoff, this series also ran into financial difficulties and was reduced to four concerts a season from 1907 to 1909.

The gap left by the curtailing of Halford's concerts was filled from 1906 to 1920 by an assortment of ten orchestras consisting of local or visiting players. The newly formed Birmingham SO gave popular Saturday night concerts between 1907 and 1918 conducted by Richter, Wood, Landon Ronald and Halford. At Granville Bantock's initiative, the Birmingham Philharmonic was set up in 1910, using some Birmingham SO players. Ronald also presented annual promenade concerts in late spring at the Theatre Royal, and Beecham brought the Hallé in the 1916–17 season. Beecham's New Birmingham SO followed in 1917–18, with Beecham, Wood and Ronald conducting. The Midland Concert Promoters Association, established in 1916, drew all these strands together. Its leading light was the current Lord Mayor, Neville Chamberlain, keen to establish an orchestra funded by the city. In 1920 the City of Birmingham Orchestra (CBO) came into existence. 40 of its 75 players came from an orchestra recently established by T. Appleby Matthews, which had already played 40 Sunday evening concerts in each of two seasons from 1918 to 1920 at the Scala Theatre and the new Futurist Cinema. The orchestra thus launched was the country's first municipally funded symphony orchestra, its initial civic grant £1250.

Matthews was its first conductor. His laudable ambitions outran the budget; he was replaced in 1924 by Adrian Boult, who oversaw an expansion of activities, with more out-of-town engagements, school concerts and broadcasts. Boult's replacement when he left for London in 1930 was the equally gifted Leslie Heward, with whom the orchestra made nine recordings. Heward's early death (1943) from tuberculosis at the age of 46 and the wartime blackouts and bombing made progress difficult. The popular George Weldon (conductor 1943–51) nonetheless recruited players of a consistently high standard, and in 1944 the seasonal engagement of players ceased with the city's annual grant. At his request the orchestra became the City of Birmingham Symphony Orchestra (CBSO) in 1948. The financial situation was bad, and the committee, perhaps thinking that a new conductor would generate interest, appointed Rudolf Schwarz and dismissed Weldon in 1951. Neither Schwarz nor his successor Andrzej Panufnik (conductor from 1957), in spite of their gifts, brought the necessary commitment to the building of an orchestra. Hugo Rignold's qualities as an orchestral trainer, however, were exactly what were required; with

his appointment in 1960 signs of potential began to emerge. There were foreign tours and some recordings. Rignold's successor from 1969, Louis Frémaux, brought flair and panache which enhanced the orchestra's growing reputation, increased Birmingham audiences and brought more outside work, including a Prom appearance after a long gap.

The militancy of some players in the 1970s led to a seating dispute in 1978, which precipitated Frémaux' decision to leave. In any case, he was unhappy with the uneven acoustics and spartan conditions of the 160-year-old Town Hall, and had called in vain, as had many others, for a new concert hall. He departed before the expiry of his contract; the two-year interregnum was filled by distinguished visiting conductors, notably Erich Schmid, who was then invited to be principal guest conductor from 1979–82.

In 1980 the young Simon Rattle was appointed principal conductor. His rigorous selection of players, and sectional rehearsals under a charismatic musician of the highest quality with a long-term commitment to the orchestra, made the city orchestra surpass in international fame the Birmingham Musical Festivals of the 19th century. Since 1991, Symphony Hall has provided a worthy home (cap. 2200; fig.2) which, in its turn, has required from the orchestra even higher standards of playing. The CBSO's new headquarters, housing a rehearsal and concert room (cap. 300) and offices, opened in 1998. In the same year Sakari Oramo succeeded Rattle as principal conductor.

Throughout its history, in spite of the periodic need to resort to the popular, the orchestra has presented new and recent works. Vaughan Williams conducted his own seven-year-old *London Symphony* in 1920, and Sibelius his Symphony no.3 (1907) in 1921. The John Feeney Charitable Trust has commissioned some 35 works, given first performances by the CBSO since 1955, including Tippett's Piano Concerto (1956) and Thomas Adès's *Asyla* (1997). Mark-Anthony Turnage (1991–5) and Judith Weir (1995–) have worked with the orchestra as composers-in-residence. The Birmingham Contemporary Music Group (established 1987), consisting of CBSO players, promotes and performs new music. In 1989 it combined with Birmingham Jazz to launch an enterprise known as The Series. In addition, the CBSO provides string players for the Birmingham Ensemble, a small string orchestra. Led by the CBSO leader, Peter Thomas, it gives concerts mainly of Baroque and Romantic repertory.

Birmingham youth orchestras are the Midland Youth Orchestra (established 1956), the Birmingham Schools SO (established 1964) and the Academy of St Philip's (established 1976). The Birmingham PO (established 1941), with 80 players, gives some dozen concerts annually in the Midlands.

*2. Symphony Hall, Birmingham, designed by Percy Thomas Partnership and Artec Consultants Inc., opened 1991; among the many acoustic refinements is the canopy above the stage, which can be raised or lowered to suit the scale of performance*

6. CHOIRS. The chorus of 45 for the Music Meeting of 1768 consisted of the men of the Chappell Society and women choralists from Lancashire. By 1808 there was a Choral Society of the Town, which in 1811 was evidently designated the Birmingham Oratorio Choral Society, its director Samuel Buggins himself a singer. By 1814 there were 120 singers, including some from other towns. The organist and director, Thomas Munden, prepared the local singers from 1820 to 1840; there was a chorus of 184 voices at the 1834 festival in the new Town Hall, Birmingham providing 114 of them. Munden was succeeded by the Town Hall's first official organist, James Stimpson, who trained them from 1843 to 1849. In 1840 local choirs had formed the Birmingham Musical Institute, directed by a St Philip's organist, Henry Simms, which gave three concerts a year between festivals. They ceased after a quarrel with Munden's Oratorio Choral Society; the Birmingham Festival Choral Society (established 1843) replaced both bodies. William Stockley's appointment as its conductor in 1855 began a phase of regular concerts every year, the number of singers rising from 70 in 1855 to 200 in 1859. By 1861, the chorus had little need for outside help; *The Times* called them 'champion choralists of England'. In 1879, Saint-Saëns praised them in the French press. Stockley was succeeded in 1895 by Swinnerton Heap, whose first-class musicianship was lost to the choir by his early death in 1900. His role was taken over by George Robertson Sinclair, organist of Hereford Cathedral and friend of Elgar. The Festival Choral Society survived the 1916 demise of the festivals themselves, being conducted by Beecham, Wood and Boult between 1918 and 1930. After some difficult years, the appointment in 1969 of Jeremy Patterson resulted in a rise in the number of singers. Since 1975 the society has given the premières of 13 works, of which nine were commissioned by the society.

The Midland Music Society gave popular oratorio concerts, with low ticket prices, from 1889 to 1940. A dozen or more other choirs were active in Birmingham between 1882 and World War II, and the large suburbs also formed choirs in the period 1905–10. The Birmingham Choral Union (established 1887) is still active, as is the City of Birmingham Choir (established 1921), which usually gives its concerts with the CBSO. The CBSO Chorus itself was established in 1973; now the City of Birmingham Symphony Chorus, it has a reputation worthy of its orchestral parent. Trained by Simon Halsey, it was joined by the CBSO Youth Chorus in 1994, and the City of Birmingham Young Voices in 1998.

The Birmingham Bach Club, started in 1925, was replaced in 1947 by the Birmingham Bach Society, still active. Other choirs are the Birmingham Singers (1937), the Canoldir Male Voice Choir (1966), the Birmingham Hospitals Choir, the Birmingham Youth Choir and, for older pupils, the Birmingham Chorale, the last two organized by the city's Music Education Service. The successful women's gospel choir, Black Voices, started in Birmingham in 1988. The chamber choir Ex Cathedra, about 40 strong, has a growing national reputation.

7. EDUCATION. Private teaching was offered by Michael Broome, Jeremiah Clarke and others in the 18th century, and they may well have had earlier predecessors in the Gild organists. A musical magazine was announced in 1783, planned as a species of music dictionary, delivered in monthly instalments.

'Music and Singing' were introduced into all the King Edward VI Foundation Elementary Schools from 1851, and into the syllabus of the Board Schools set up in 1870. There was a large Tonic Sol-fa Festival in Birmingham in 1859, and the Sunday Schools Choral Union, active between 1865 and 1878, was drawn from a dozen Anglican churches. One of Granville Bantock's initiatives was the biennial Musical Competition Festival (1912–32). Elementary schools sent thousands of entrants to compete in solo singing, choral and folkdancing classes.

A move towards advanced education in music was made in 1859 when the Birmingham and Midland Institute offered classes in singing and later in most instruments. This became the Midland Institute School of Music in 1886. By 1900 the school was attracting outstanding teachers, among them Swinnerton Heap and Max Mossel, and producing noted musicians, including the Wagnerian tenor Walter Hyde. In 1900 Bantock became its principal, and two years later, Elgar its Honorary Visitor. Staff members included Ernest Newman and Rutland Boughton; among students were Julius Harrison and Clarence Raybould. Separately constituted as the Birmingham School of Music in 1949, it was still part of the Birmingham and Midland Institute until 1965 when city rebuilding forced the Institute into a building too small to accommodate the school. Under the aegis of the City Education Department from 1965, the school moved to purpose-built premises in 1973, becoming part of what is now the University of Central England. It was renamed Birmingham Conservatoire in 1989.

In 1905 a Chair of Music was established at the University of Birmingham, Elgar its first holder. He resigned in 1908, Bantock taking his place and building up a respected department. A demanding balance between the academic and the practical was established by Ivor Keys between 1968 and 1986, enhancing the department's reputation. One or two academics at the University and the Conservatoire are active composers.

Private teaching still provides a vital foundation for music education, supported by the Birmingham Centre of the Incorporated Society of Musicians and the Birmingham Competitive Music Festival (established 1937). School music teachers' courses and public lectures on music are provided by the College of Education (now part of the University of Central England) and the Birmingham University School of Continuing Studies. In addition to the usual provisions of school music syllabuses, gifted pupils can also have instrumental and orchestral training through the city Music Education Service. The CBSO's education department has links of various kinds, often through individual players, with city schools. Since September 1994 the Conservatoire has had a Junior Department.

8. BROADCASTING. As the nerve-centre of the Midland region, Birmingham had BBC radio studios from the earliest days, broadcasting soloists and the City of Birmingham Orchestra. After the BBC started its own studio orchestra, membership of both orchestras was barred, but in the 1930s the BBC ensemble was small, leaving the field to the CBO. The popular BBC Midland Light Orchestra was formed after World War II, working from studios in Islington Row, Broad Street and Carpenter Road, Edgbaston. In the 1960s, chamber concerts were started; they have become a regular series, free and open

to the public, relayed from Pebble Mill, the television and radio studio complex opened in 1971.

MARGARET HANDFORD

**Birnbach.** German firm of music publishers. It was founded in 1911 in Berlin by Richard Birnbach (1883–1953) who quickly developed a successful catalogue, publishing a wide variety of works, including educational music, music for salon orchestra, and contemporary instrumental and vocal music. In 1919 he expanded his publishing enterprise by acquiring the catalogue of C.A. Challier & Co., a notable Berlin publishing company. It had been founded by Carl August Challier (*d* Berlin, 17 July 1871) and Karl Gaillard in 1835 and had published works by Gluck, Haydn and Mozart as well as composers from Berlin. From 1844 Challier and Gaillard edited the *Berliner musikalische Zeitung*, which in 1847 merged with the *Neue Berliner Musikzeitung* (founded by Gustav Bock). Challier's son, Willibald (*b* Berlin, 29 July 1849; *d* Berlin, 25 Jan 1926), managed the firm from 1865 until its acquisition by Birnbach who carried it on under its original name. Birnbach's catalogue was further extended with the purchase in 1934 of Verlag Dreililien, through which he acquired some of Schoenberg's early works (opp.1–4, 6–7). Other composers published by the firm include Rezniček, Richard Strauss, Weingartner, Leon Jessell, Oscar Straus and Gerhard Winkler. Important editions of piano music by lesser-known composers were also published. After Birnbach's death the company passed to his widow Hanna and son Richard. In 1990 Richard Birnbach became the sole general partner of the firm and since then has taken over the music publishers Risi-Ton, Friedrich Wilhelm Fröhlich and R. Erdmann. (*Musikverlage in der Bundesrepublik Deutschland und in West-Berlin*, Bonn, 1965)

ALAN POPE/WILLI KAHL

**Birnbaum, Eduard** (*b* 1855; *d* 1920). Austrian-Jewish musicologist and liturgiologist. *See* JEWISH MUSIC, §I, 2.

**Birnstein, Renate** (*b* Hamburg, 17 Nov 1946). German composer. In 1966 she entered the Staatliche Hochschule für Musik, Hamburg, where she studied music theory and composition with Diether de la Motte and Ligeti. From 1973 to 1980 she taught music theory at the Hochschule für Musik in Lübeck and from 1974 at the Hamburg Hochschule, where in 1988 she became a professor of composition and music theory. She has received many prizes and grants, including a three-month stay at the Boswil Künstlerhaus in Switzerland and a year at the Villa Massimo, Rome. Birnstein's output includes orchestral, choral and chamber music. Her rigorously structural, crystalline and linear thought processes were originally stamped by the music of Webern, but it was Steve Reich's minimalism, first encountered by her in 1972, that provided new inspiration at a time of disenchantment with the Darmstadt School. Her choral piece *In terra* (1978) is an example of how she used a form of 'pattern technique' based on small motivic units to produce her own minimalist style. In the 1980s she wrote a number of multi-layered compositions, including the Sextet (1981) for six orchestral ensembles and the Octet (1984). In the 1990s, in a process of rediscovery of the piano, she began to compose more for the instrument (only a single piano composition existed before then).

WORKS
(*selective list*)

Orch: Imaginations, 1972; Scatola, 1978–9; 5 Pieces, str, 1979–80; Sextet, 6 orch ens, 1981; Intrada, str, 1987; 5 Lieder (A. von Droste-Hülshoff), S, orch, 1990–91

Chbr: 4 Pieces, cl, trbn, vc, 1971; Ribambelle, cl, perc, 1972; Ossia, qnt, fl, cl, S, vn, vc, 1974; Idem, sextet, fl, a fl, cl, vn, va, vc, 1974; Inter pares, qnt, fl, vn, vc, vib, pf, 1975; Peram, trio, fl, gui, vib, 1976; Variations, vn, va, vc, 1977; Duo concertante, vc, b cl, 1980; Str Qnt, 1982; Pf Music II, cl, pf, 1977–84; Trio in 12 pts, fl, vn, vc, 1984; Octet, fl, cl, trbn, vn, va, vc, perc, 1984; Str Qt, 1986; Schattenspiele, b fl, basset-hn, 1986; Septet, fl, cl, vn, va, vc, db, pf, 1988; '...und aus Abend und Morgen...', cl, va, vc, 3 perc, 1993; Musique pour les fleurs de givre, fl, ob, bn, vn, vc, 1997; Les formules magiques, pf trio, 1998

Solo inst: Heptagon, pf, 1976; Quasi fantasia, gui, 1983; Wie ein Kondukt, b fl, 1985; Kassiopeias Lied, cl, 1989; Kurwenal, vc, 1990; Les pendules, pf, 1994; Les horloges, pf, 1995; Les grains de sable, pf, 1998

Choral: In terra, 24vv, 1978; Ich rufe an mit meiner Stimme, sacred conc., SATB, vn, org, 1980–81

ROSWITHA SPERBER

**BIRS.** The British Institute of Recorded Sound, later the NATIONAL SOUND ARCHIVE.

**Birtner, Herbert** (*b* Hamburg, 16 June 1900; *d* Voronezh, 27 Sept 1942). German musicologist. After beginning medical studies at Hamburg and Freiburg (where he also studied music under Gurlitt, 1919–20), he turned to history and art history at Heidelberg and Leipzig and continued his musical studies under Kroyer. He took the doctorate in Leipzig in 1924 with a dissertation on the 16th-century German composer Joachim a Burcke, and was assistant lecturer at the musicology institute until 1927. He went to Heidelberg in 1928 to work on his *Habilitation*, which he completed in 1930. He was named reader at the University of Marburg in 1938 and at the University of Graz in 1941. Conscripted in 1942, he was killed in action. Despite his comparatively early death, Birtner had already shown himself to be one of the foremost scholars of his generation, particularly in his contributions on music of the Reformation. He set out to concentrate on German music of the Renaissance, searching for distinct German traits in an age of musical dominance by the Netherlands, later focussing on Isaac and Schütz. He was active as director of the collegium musicum and spearheaded a campaign to incorporate musicology into music education. He was named a member of the Staatliches Institut für Deutsche Musikforschung, and from 1936 until his death he was president of the Neue Schütz-Gesellschaft.

MALCOLM TURNER/PAMELA M. POTTER

**Birtwistle, Sir Harrison** (*b* Accrington, Lancs., 15 July 1934). English composer. Along with his soft Lancastrian accent, his North Country origins have never entirely left him – indeed, they continue to colour his distinctive musical voice. This colouring is at its most obvious in a work such as the opera *Yan Tan Tethera* (1984), which draws on a folktale concerned with the rivalry between a northern and a southern shepherd. Birtwistle's description of the piece as a 'mechanical pastoral' is telling: it implies that the natural coexists with the man-made, that the rural is somehow tempered by the urban. The composer's childhood home was a small-holding on the edge of Accrington, at the point where the rural and the urban met, and he grew up knowing both natural and industrial landscapes. Examples of pure pastoral are rare in his work. More usually, the pastoral and the urban complement one another, as in *Panic* (1995), a celebration of the nature god Pan for the decidedly urban soloists of saxophone and drum kit plus an orchestra of wind and percussion (fig.1). At the age of seven, with the local bandmaster as teacher, he began to play the clarinet, eventually joining the Accrington military band. So it was that his formative musical experiences were more of (typically northern) industrial working-class music-making – later to re-emerge, for example, in two works for brass band, *Grimethorpe Aria* (1973) and *Salford Toccata* (1989) – than of middle-class concert halls. And it is these sounds – of wind, brass and percussion (he has a self-confessed discomfort with writing for strings) – that have dominated his sonic imagination throughout most of his creative life.

1. To 1969. 2. The time of *The Mask of Orpheus*. 3. After 1986.

1. To 1969. It was as a clarinettist that Birtwistle won a scholarship in 1952 to the RMCM, where he studied with Frederick Thurston (clarinet) and Richard Hall (composition). Arguably a more important influence on him than his teachers, however, were his fellow students, an exceptionally rich coming-together of the brightest musical minds of his generation. Among his contemporaries were the composers Alexander Goehr and Peter Maxwell Davies, the pianist John Ogdon and the trumpeter Elgar Howarth. In 1953 they formed the New Music Manchester Group, which, at a time when even the music of the Second Viennese School was rarely heard outside London, provided an important opportunity for

*1. Harrison Birtwistle (centre), with Paul Clarvis and John Harle, at a rehearsal for the world première of 'Panic' at the Last Night of the Proms, 1995*

them to explore significant 20th-century works. Birtwistle undertook his National Service in London between 1955 and 1957 as a clarinettist with the band of the Royal Artillery, after which he embarked on a postgraduate year of clarinet studies with Reginald Kell at the RAM (1957–8), followed by a brief period with the Royal Liverpool PO.

None of his student compositions survive publicly. While at Manchester he did not consider himself an active composer, partly, no doubt, because he remained in the shadow of Davies and Goehr. Nonetheless, he must have experimented with 12-note methods under Hall's tutelage and encountered the music that was most strongly to make its mark on his own work, that of Stravinsky, Webern and Varèse. While on National Service he first heard Boulez's *Le marteau sans maître* and Stockhausen's *Zeitmasze*, which, along with *Gruppen*, made a profound impression. On New Year's Eve 1957 he completed *Refrains and Choruses* for wind quintet, his first acknowledged work. It was written very quickly and is through-composed without any obvious large-scale repetitions or compositional systems: 'I wrote it completely off the top of my head. I can't justify a single note'. It clearly sets out the musical path Birtwistle was to follow in having a straightforward overall structure based in part on verse-refrain patterns, an acute awareness of the possibilities of wind writing (Varèse is a clear model), an interest in instrumental role play (after Stravinsky) and an assured and imaginative control of musical materials. It was selected by the SPNM for performance at the 1959 Cheltenham Festival. On hearing the news, so the story goes, Birtwistle made the symbolic decision to sell his clarinets and devote himself entirely to composition.

In 1962 he took up the appointment of director of music at Cranborne Chase School, a girls' boarding school at Wardour Castle, Dorset. It was there in 1964, with Goehr and Maxwell Davies, and with Michael Tippett as president, that he set up the first of two Wardour Castle summer schools, at least partly to provide an outlet for his and his colleagues' own music. The second gathering saw the première of his ensemble work *Tragoedia* (1965), a milestone in his development and the score which was to suggest most clearly his future direction. Its title literally means 'goat dance', suggesting a wild Dionysian ritual (evident in some of the work's aggressive material), but its model was the formality of ancient Greek tragedy, to which he was to return on many future occasions. It is an abstract drama which, according to the composer, 'is intended to bridge the gap between "absolute music" and theatre music'. Birtwistle took the principal formal divisions of Greek choric ode – Prologue, Parados, Episodion, Stasimon, Exodos – and organized them into a cyclic structure. *Tragoedia* signals an overt fascination with the theatre – particularly ancient, stylized, ritual theatre – and with symmetrical structures, often employing verse-refrain patterns and involving instrumental role play. In these respects it is clearly a study for his first opera, *Punch and Judy* (1966–7), in which all its music was to reappear.

A Harkness Fellowship, won in 1966, enabled him to spend some time at Princeton, where he composed *Punch and Judy*. From Babbitt's serialism he moved on to a period of Schenkerian study at the University of Colorado at Boulder. Both experiences were necessary, he argues, in order for him to reject both post-Webernian serialism and Schenkerism. Nonetheless, both left their mark – the former in the kind of pitch and rhythmic mechanical schemes he occasionally employs (such as the 'pulse labyrinth' which prefaces *Silbury Air*), the latter in an increasing interest in a sustained linearity in more recent works (such as the 'fundamental melodic line' on which he has suggested *Gawain* is built).

The première of *Punch and Judy*, at the 1968 Aldeburgh Festival, was a landmark in 20th-century opera (fig.2). The ritualized, cyclic structures Birtwistle had been working with up to this point found their match in Stephen Pruslin's sophisticated libretto, described by Auden as 'one of the most outstanding and original libretti of the century'. Pruslin took the principal features and characters of the traditional English Punch and Judy plays (a fine example of urban folk drama) and cross-fertilized them with other equally stylized dramatic structures, such as Greek tragedy, Baroque opera and the Bach Passions, in order to produce what he described as 'a source opera which, though written after them, would give the illusion of having been written before them'. The result is a

*Scene from Birtwistle's 'Punch and Judy', Jubilee Hall, Aldeburgh, 1968*

complex structure of over 100 self-contained numbers (arias, chorales, dances, 'travel music', 'weather reports' etc.) organized into repetitive, ritual cycles. Birtwistle takes a 'Baroque' approach to his music, where each number adopts a distinct musical affect, successfully balancing the violent (e.g. 'Punch's War-Cry') and the lyrical (e.g. 'Judy's Aria'). *Punch and Judy* is clearly not a traditional opera: its small cast doubling roles and its chamber scoring suggest a music-theatrical lineage stemming from Stravinsky's *Histoire du soldat*. It marks definitively Birtwistle's interest in a non-narrative kind of music theatre, which was to reach its apogee in *The Mask of Orpheus*.

The two years Birtwistle spent in America were punctuated by occasional trips home. On one such occasion, in 1967, he set up the Pierrot Players (with Davies, Stephen Pruslin and the clarinettist Alan Hacker) to provide among other things the opportunity for experiment with small-scale music theatre. The latent theatre of Schoenberg's *Pierrot lunaire* offered a suitable model as well as a flexible instrumental grouping which, with the addition of percussion, the Pierrot Players adopted. The group's first concert included Birtwistle's *Monodrama* (1967), to a text by Pruslin drawing once more on Greek tragedy, where a single actor takes on a number of roles and functions. As a highly abstract drama, it did not, it seems, succeed in the concert hall, and Birtwistle withdrew it. He nonetheless remained involved with the Pierrot Players until 1970, when, as a result of increasing tensions between personnel, he resigned.

If *Punch and Judy* was one consequence of the musico-dramatic possibilities suggested by *Tragoedia*, Birtwistle's next significant work, *Verses for Ensembles* (1968–9), was another. Here he invented an 'instrumental theatre' (precedents for which can be found in, for instance, Berio's *Circles* of 1960) where the players move about the concert platform according to their changing musical roles. Though not explicitly derived from Greek tragedy, the overall scheme of *Verses for Ensembles*, like that of *Tragoedia*, is highly formal: a ritual cycle of repetitions organized around a central sequence of verses and refrains. Its language is bold, involving the stark and dramatic juxtaposition of distinct blocks of musical material, and draws together the formal concerns of Stravinsky, the extreme sonorities of Varèse and the ritual structures of Messiaen. At the same time, Birtwistle was writing a different kind of theatre piece: *Down by the Greenwood Side* (1968–9). Like *Punch and Judy*, this is the retelling of a folk myth, but now a rural one based on the medieval English Mummers' Play and versions of the Ballad of the Cruel Mother. It is a vivacious and often witty entertainment, more in the manner of the English pantomime tradition; yet Birtwistle's preoccupations are still evident: myth, ritualized violence, seasonal renewal. Many of its themes were to be fully developed in larger stage works, such as *Yan Tan Tethera* (pastoral folk ballad), *Gawain* (turning of the seasons, the Green Man) and *The Mask of Orpheus* (ritual presentation of a myth from changing perspectives).

2. THE TIME OF 'THE MASK OF ORPHEUS'. *Verses for Ensembles* marked the end of one phase of development in Birtwistle's music. *Down by the Greenwood Side* represented a renewed interest in the pastoral and was followed by a series of works in which this notion was pursued in music more obviously lyrical, melodic and continuous, most notably *Nenia: the Death of Orpheus* (1970), *The Fields of Sorrow* (1971), *An Imaginary Landscape* (1971) and *The Triumph of Time* (1971–2). These, and other works from the 1970s, explored the idea of the 'processional', which, in relation to *The Triumph of Time*, Birtwistle described as 'a (necessarily) linked chain of material objects which have no necessary connection with each other'. The title of this orchestral work is taken from an engraving by Pieter Breughel the Elder which Birtwistle encountered only once he had begun writing the piece, but which seemed entirely apt. The engraving depicts a procession of allegorical figures – Time, Death and Fame – moving across a desolate landscape, trampling over the ephemeral objects of earthly life, while in the background are represented eternal events such as the turning tides and seasons. Similarly, the music suggests a slow procession of musical ideas in the context of repeated events (amplified english horn and soprano saxophone melodies) and familiar objects (quotations from *The Fields of Sorrow* and *Chorale from a Toy-Shop*). It confirms Birtwistle's preoccupation with a new kind of non-narrative temporality, where recurrent musical objects are viewed in different lights and from constantly changing perspectives.

Along with a continuing fascination with subject matter drawn from Greek mythology, such concerns marked the start of the composer's massive project *The Mask of Orpheus*, which was originally commissioned by Covent Garden in 1970 but which eventually passed to the ENO. The composition of the first two acts was undertaken during Birtwistle's next visit to America (1973–5), when he taught first at Swarthmore College, Pennsylvania, and then (at the invitation of Feldman) at the State University of New York, Buffalo. Because of the hiatus in the

commissioning process, there was a gap before he began work on the final act, but he resumed work in 1981 and the whole score was finished by 1984. In the interim (1975–82) he took up what was to prove to be a decisive appointment, first as music director and then as associate director, at the new National Theatre in London. There he produced music for a wide variety of plays, but his most important contribution was to Peter Hall's production of the *Oresteia* (1981) in a translation by Tony Harrison. Hall produced the plays in the Greek manner, employing a masked, all-male cast. Birtwistle's sparse, ritualistic music, exploiting pulse and rhythmic recitation for the chorus, and scored predominantly for percussion over simple drones, had the quality of being utterly modern and yet appearing as ancient as the text itself. It was perfectly in tune with Hall's production, and showed a composer utterly at ease in the theatre.

During his period at the National Theatre Birtwistle continued to produce important concert works, but they now showed the influence of his theatrical enterprises. *For O, for O, the Hobby-Horse is Forgot* (1976), written for Les Percussions de Strasbourg, takes its title from *Hamlet*, and instrumental role play is again in evidence: two of the six percussionists are denoted 'King' and 'Queen', while the other four play the 'Chorus'. Their physical movements are prescribed in the score, though the musical material is often provided only in outline, to be realized by the players. Like the *Oresteia* score, a concern with pulse is pre-eminent, as it was to become in many subsequent pieces, notably *Silbury Air*, *Pulse Field* and *Carmen arcadiae mechanicae perpetuum* (all 1977) and *Pulse Sampler* (1981). *Pulse Field* (originally, *Frames, Pulses and Interruptions*), written in association with Jaap Flier and the Ballet Rambert, was Birtwistle's first ballet score, for which he pared his materials down to the basics of pulse and drones, and concentrated on coordinating music and movement as precisely as possible. At the same time, he was working on a new theatre piece with Tony Harrison, *Bow Down* (1977), scored for four musicians and five actors. In this case it was the formality, the hieratic, non-narrative ritual of Japanese nō drama that provided the model – and that can be seen to have had an important bearing on much of Birtwistle's work, not least *The Mask of Orpheus*.

A more elaborate exploration of pulse was attempted in *Silbury Air*, which took its title from the prehistoric Silbury Hill in Wiltshire – another mysterious hill, replete with its own music, was to reappear in *Yan Tan Tethera*. The score is prefaced with a 'pulse labyrinth' which controls the changes of metre and tempo (metronome marks) in the piece, ensuring smooth 'metric modulation' (to appropriate Carter's term) and focussing attention on pulse as a foreground feature – issues to be followed up in . . . *agm* . . . (1978–9). Birtwistle's concern with the basics of his vocabulary is again apparent: the opening of *Silbury Air*, which recurs on two further occasions, always begins with an elementary pulsation at a very soft dynamic level and on a unison E, so often a focal point for Birtwistle. The 'air' of the work's title is a melody which seems to override the cycles of recurrence in the piece, and is a sign of the growing importance to him of melody throughout the 1980s and 90s. The result is what Birtwistle calls an 'imaginary landscape' (after Paul Klee), a musical parallel to the man-made landscape of Silbury Hill. A painting by Klee, *The Twittering Machine* (1922), was the model for *Carmen arcadiae mechanicae perpetuum*, almost a companion piece to *Silbury Air* and another example of a mechanical pastoral, as its title suggests. Like *Silbury Air*, it is concerned with pulse, but in this case without any attempt to modulate between different tempos: in the composer's words, 'it consists of six mechanisms which are juxtaposed many times without any form of transition'.

With the passing of the commission of *The Mask of Orpheus* to the ENO, Birtwistle resumed work on the project, and its première took place at the London Coliseum on 21 May 1986. It is a central work in Birtwistle's output, and has come to be understood as equally central in the development of postwar opera, a work which extended the boundaries of what was possible in lyrical theatre. Though the gap in composition meant that the third act is very different in character and style from the first two, the work as a whole is an extraordinary synthesis of Birtwistle's compositional, dramatic and aesthetic preoccupations developed over 25 years.

Like *Punch and Judy*, *The Mask of Orpheus* has a formal structure of many discrete events – in this case 126, always grouped in threes, with such titles as 'Song of Magic', 'Poem of Reminiscence', 'Orphic Hymn' and 'Hysterical Aria'. Each is given a conventional operatic designation (usually recitative or aria) which defines its 'ritual situation', its musical and dramatic personality. In other respects, however, *Orpheus* is very different from *Punch*: 'I wanted to invent a formalism which does not rely on tradition in the way that *Punch and Judy* [did]

*3. Harrison Birtwistle at a rehearsal for English National Opera's production of 'The Mask of Orpheus', 1986*

. . .. In *The Mask of Orpheus*, I didn't want to hark back any more; I wanted to create a formal world that was utterly new'.

Peter Zinovieff, the librettist, argued that Orpheus never existed as an individual but as a collective inheritance (the same mythical events have often been retold from many different perspectives). So we are presented in *Orpheus* with multiple versions of the legend. One way in which this multiplicity is achieved is through the threefold representation of each of the three principal characters as Man/Woman (singer), Hero/Heroine (mime) and Myth (giant singing puppet). All wear masks in order to emphasize the work's ritual dimension. Key events are presented more than once, either simultaneously or successively (in 'Time Shifts'), so that the drama discloses a central concern with time itself, with the exploration of a multiple present containing both past and future. Working with myth absolves Birtwistle from conventional narrative responsibilities, tied to a singular, linear concept of time, and thus the precise subject matter becomes unimportant (*Orpheus* actually began life as a Faust opera) because the focus is on the ritual, repetitive structures. The most significant of these lies in Act 2, which is dominated by a vast, allegorical scheme of 17 arches. This scheme is not to be seen: it is an imaginary device that both symbolizes and gives order to Orpheus's dream of his descent to and return from the underworld.

Another important aspect of *The Mask of Orpheus* is its electronic dimension. Six interludes, named 'Passing Clouds of Abandon' and 'Allegorical Flowers of Reason', interrupt the main action and are mimed to a tape realized at IRCAM by Barry Anderson, the music sounding, in Birtwistle's words, like that of 'a mad, mechanical percussion instrument'. The disembodied voice of Apollo, speaking in an invented language, is also electronic (manufactured using the CHANT program at IRCAM), and there are electronic 'auras' – background sounds representing, among other things, summer, winter and the tides.

The immense achievement of *The Mask of Orpheus* lies in its imaginative and ambitious fusion of music, song, drama, myth, mime and electronics, in the convergence of an extraordinarily rich dramatic concept with music of a deep expressive power. The work met with universal critical acclaim and won for Birtwistle the Grawemeyer Award (1987), as well as the 1986 *Evening Standard* Opera Award. Other honours quickly followed: he was made Chevalier des Arts et des Lettres in 1986, and knighted in 1988. In 1995 he won the Siemens Music Prize, the first British composer to receive the award since Britten in 1973. In 1994 he was appointed Henry Purcell Professor of Composition at King's College, London and director of contemporary music at the RAM, positions he holds simultaneously with that of composer in residence to the LPO, to which he was appointed in 1993.

3. After 1986. The period of the later 1980s and early 90s was particularly rich and productive, and was dominated by three large operatic projects – *Yan Tan Tethera*, *Gawain* and *The Second Mrs Kong* – interspersed with several major ensemble and orchestral works. In many respects *Yan Tan Tethera*, first performed in the same year as *The Mask of Orpheus*, is its complement. Though on a much smaller scale, it shares with *Orpheus* its retelling of a pastoral myth, its viewing of the same events from different perspectives, its stylization (including singing sheep), its themes of birth, imprisonment and seasonal renewal, and its musical and dramatic structure of ritualistic cycles of repetitions. The title alludes to an ancient English way of counting, used by northern shepherds to number their sheep. Ritual counting, the mystery of number, forms much of the substance of the work and constitutes one aspect of the 'mechanical' part of this pastoral. Birtwistle's other major composition of 1984 was the ensemble work *Secret Theatre*. Its title, taken from a poem by Robert Graves, could stand for so many of his pieces which engage covertly with some sort of theatre or drama, where the audience witnesses a ritual whose meaning is only half-revealed. In *Secret Theatre*, as in *Verses for Ensembles* before it, players move about the concert platform to give physical substance to their changing musico-dramatic roles. In this case, Birtwistle distinguishes between two basic musical categories: cantus and continuum, representing the individual and the collective (never mere 'melody' and 'accompaniment'). It is the changing relationship between these two categories that forms the dramatic as well as the musical argument of the piece. The cantus takes on the aspect of an 'endless melody', a line which is present virtually from the start to the end of the piece, and a feature which, in a different way, was to reappear in *Gawain* as well as explicitly in *An Interrupted Endless Melody* (1991).

But before Birtwistle started on his next opera, another important work appeared: *Earth Dances*, his first large orchestral work since *The Triumph of Time*. The lines in *Earth Dances* appear as layers, or 'strata' as Birtwistle calls them, relying once again on a topographical metaphor. As in *Secret Theatre*, it is the shifting relationship between these strata (where the 'earth' literally 'dances') that forms the music's substance, though there are many more layers of material moving in and out of focus. Each stratum is distinguished by a different interval collection and a distinct register. The overall form, as in other large-scale works of the later 1980s and 1990s, is hard to define. Events recur and are transformed, but the logic of these recurrences is not explicit; forms remain open-ended and a way out of the labyrinth is rarely disclosed: the relatively simple symmetries and formal plans of the 1960s are long gone. In the case of *Endless Parade* (1986–7), Birtwistle used the analogy of wandering through an unfamiliar city, continually encountering the same carnival procession from different viewpoints, and this image might be equally appropriate to most of his works of this period. There is a 'rightness' about the overall shape of *Earth Dances*: its climaxes are perfectly timed. It is a monumental work of primeval power, a work which has drawn fruitful comparisons with *The Rite of Spring*.

As on so many previous occasions, Birtwistle turned to English mythology as the source of his next opera, based on the medieval alliterative poem *Sir Gawain and the Green Knight* – a text he had first used as early as 1963 in *Narration: a Description of the Passing of a Year*. Its subject matter of ritual beheading, seasonal renewal and courtly love is familiar Birtwistle territory. David Harsent's libretto offered many opportunities for Birtwistle's favoured rituals, especially the large-scale cyclic structures which dominate each act – the turning of the seasons in Act 1 and the hunt/seduction in Act 2 – in addition to smaller-scale verse-refrain structures. However, in other respects *Gawain* marks a distinctly new development in

that it has a strong narrative line, paralleled by a fundamental musical line. Punch and Orpheus, for example, are archetypes, not individual operatic characters, and are therefore incapable of development; Gawain grows, matures, changes as a result of his experiences: we witness his progress from Parsifal-like innocent fool to experienced adult who comes to recognize his own limitations ('I am not that hero', he sings at the end, on his return to Arthur's court). Musical characterization is strong. Furthermore, Birtwistle relies to a greater extent than before on motivic recurrences to structure the musico-dramatic argument, such as the motifs associated with the axe and with Gawain himself. The orchestra, dominated by the sounds of the brass (especially two tubas) and using a cimbalom as continuo, is organized, as in *Earth Dances*, in rich layers, which complement rather than literally accompany the stage action.

Birtwistle's next opera, *The Second Mrs Kong*, continues the tendency towards a more direct narrative. Absent are the familiar large-scale repetitive cycles; instead we are presented with a more conventional operatic two-act structure, where the episodic first act sets up characters, ideas and situations, while the second is a 'quest' narrative as Kong journeys to find Pearl (the subject of Vermeer's *Head of a Girl with a Pearl Earring*; fig.4). The work's starting point was the popular 1933 film *King Kong*, though the opera is actually about 'the idea of Kong', i.e. the 'mythical' Kong as archetype (the 'wild and wordless, lost and lonely child of all the world'). Russell Hoban's eclectic libretto moves rapidly between high drama and farce, while its *dramatis personae* is as varied (and as unlikely) as that of a variety show. It explores ideas and characters Hoban had been working with as a novelist for many years, and Birtwistle was clearly drawn to him because their preoccupations seemed to coincide (myth, cinema, story-telling, even Orpheus and Eurydice). Despite Kong's being only an 'idea', the central theme of this opera is a very human one – 'the yearning for what cannot be' – and, in Kong, Birtwistle and Hoban present us with a believable operatic character who, like Gawain, grows and develops as the narrative unfolds. The balance between words and music is skilfully handled, especially at comic moments such as the Act 2 scene with Madame Lena, where Hoban's text dominates in a kind of recitative; elsewhere, in lyrical moments of 'aria', the music comes to the fore. At the very end, when Kong has found Pearl but realizes they can never be united, it is as if time stands still: all that remains to the characters is their shared memories. Where words are no longer useful or meaningful, music takes over. Birtwistle layers 'remembered' musical fragments over a long pedal E, and so poignantly and powerfully captures the dramatic situation. All through the work his exploration of different kinds of time, musical and dramatic, remains as fresh and as challenging as ever.

A number of works since *The Second Mrs Kong* have continued to explore aspects of the musical world established in that opera, most notably the strikingly lyrical tuba concerto *The Cry of Anubis* (1994), where the soloist plays the role of the mythical character from the opera, and *Panic*, which takes up the urban soundworld of saxophone and percussion from the 'Death of Kong' scene in Act 2. The première of *Panic* received wide critical attention, much of it negative, for the alleged inappropriateness of a modernist work in the reactionary context of the Last Night of the Proms; by contrast, nothing but positive critical acclaim, both in England and in Germany, was bestowed on *Pulse Shadows* (1996), a

*4. Scene from the original production of Birtwistle's 'The Second Mrs Kong' (designed by Tom Cairns) by Glyndebourne Touring Opera, 1994, with Philip Langridge as Kong, Helen Field as Pearl and Omar Ebrahim as Vermeer, in the box*

generally restrained but powerfully expressive interweaving of the Nine Settings of Celan (1989–96) and the Nine Movements for string quartet (1991–6).

Though the origins of Birtwistle's musical language lie clearly in the European modernist tradition of Stravinsky, Varèse, Webern, Messiaen, Boulez and Stockhausen, these influences are synthesized and reworked to produce a music of striking independence and authority. In some respects that music has not changed in four decades, in that Birtwistle's preoccupations with myth, ritual, theatre, time and with certain musical fundamentals of pulse and pitch have remained a consistent feature, a fact evident even in his latest opera, *The Last Supper* (1998–9). In other respects his music has become very different: having passed through distinct periods concentrating (in very general terms) on violent, formalist oppositions in the 1960s, lyrical processionals in the 1970s, and an exploration of the basics of rhythm, melody and gesture in the 1980s, Birtwistle is writing music which confidently balances dramatic confrontation with narrative continuity, harmonic and rhythmic boldness with melodic expressiveness, and doing so in significant works for opera house and concert hall that are among the most individual produced during the second half of the 20th century.

WORKS

DRAMATIC

The Visions of Francesco Petrarca (allegory, Petrarch sonnets, trans. E. Spenser), Bar, mime ens, 9 insts, school orch, 1965–6, York, St Michael-le-Belfrey, 15 June 1966; withdrawn
Punch and Judy (tragical comedy or comical tragedy, 1, S. Pruslin), 1966–7, Aldeburgh, Jubilee Hall, 8 June 1968
Down by the Greenwood Side (dramatic pastoral, 1, M. Nyman, after English Mummers' Play and Ballad of the Cruel Mother), 1968–9, Brighton, West Pier, 8 May 1969
Pulse Field (Frames, Pulses and Interruptions) (ballet, choreog. J. Flier), 6 dancers, 9 insts, 1977, Snape Maltings, 25 June 1977
Bow Down (music theatre, T. Harrison, after versions of the Ballad of the Two Sisters), 5 actors, 4 musicians, 1977, London, Cottesloe, 5 July 1977
The Mask of Orpheus (lyrical tragedy, 3, P. Zinovieff), 1973–5, 1981–4, London, Coliseum, 21 May 1986
Yan Tan Tethera (mechanical pastoral, 1, T. Harrison), 1984, London, Queen Elizabeth Hall, 7 Aug 1986
Gawain (op, 2, D. Harsent, after *Sir Gawain and the Green Knight*), 1990–91, rev. 1994; London, Covent Garden, 30 May 1991
The Second Mrs Kong (op, 2, R. Hoban), 1993–4, Glyndebourne, 24 Oct 1994
The Last Supper (op, R. Blaser), 1998–9, Berlin, Staatsoper, 18 April 2000

*incidental music*

Hamlet (W. Shakespeare), 1975
Tamburlaine (C. Marlowe), 1976
Julius Caesar (W. Shakespeare), 1977 [collab. D. Muldowney]
Volpone (B. Jonson), 1977
Herod (P. Mills), 1978 [collab. Muldowney]
The Cherry Orchard (A. Chekhov), 1978 [collab. Muldowney]
As You Like It (W. Shakespeare), 1979 [collab. Muldowney]
The Oresteia (Aeschylus, trans. T. Harrison), 1981
The Trojan War Will Not Take Place (J. Giraudoux, trans. C. Fry), 1983

*film score*

The Offence (dir. S. Lumet), 1973

ORCHESTRAL

JONATHAN CROSS

**BIS.** Swedish record company. It was founded by Robert von Bahr (*b* Solna, 1943) in 1973. Bahr took degrees in law and music in Stockholm and appeared as a conductor and flautist. He established Grammofon AB BIS, known simply as BIS, after he had attempted to find a record company to release an album featuring his wife, the flautist Gunilla von Bahr. Record sales were growing in Sweden in the 1970s, but there was relatively little domestic production of classical music, and BIS gradually established itself as the leading label in its field in Sweden. Annual output has varied between 70 and 90 new albums; the company has a policy of keeping all its issues available. Its repertory has a Scandinavian bias, with complete surveys of Nielsen, Stenhammar, Sibelius, Kokkonen and Aho in progress during the 1990s. The company has also published an extensive selection of Baltic and Russian music including a planned complete Schnittke series. However, it also issues a wide selection of music from other countries, often works outside the standard repertory. It supports the idea of 'original dynamics recordings', with minimum interference from the sound engineer.

PEKKA GRONOW

**Bisbigliando** (It.: 'whispering'). (1) A special effect used in harp playing, available only on the double-action pedal instrument. The term was first used in various solo harp works by Elias Parish Alvars (1808–49), who is credited with its invention. Easily performed, yet sounding extremely virtuoso, it involves setting the pedals so that the strings to be played can be doubled at the same pitch by their enharmonic equivalents, with both hands playing alternately on adjacent strings, e.g. D♭–F–A♭ in the right hand alternating with C♯–E♯–G♯. Most typically played very fast and *pianissimo*, it is most effective in the harp's middle and upper registers. Notable orchestral examples include Chabrier's *España* (1883), Strauss's *Don Juan*

(1888–9), where it is spelt 'bispiglando', and Leoncavallo's *Pagliacci* (1892), where there is an extended *bisbigliando* passage in Nedda's Act 1 scene ii aria 'Stridono lassu'.

(2) Term used for a timbral trill in woodwind playing, achieved by oscillating between alternative fingerings producing the same pitch.

ANN GRIFFITHS

**Biscardi, Chester** (*b* Kenosha, WI, 19 Oct 1948). American composer. He studied electronic music with Bert Levy and composition with Les Thimmig, receiving the MM in composition from the University of Wisconsin, Madison, in 1974. He spent the summers of 1974 and 1975 studying with Davidovsky at the Composers' Conference (Johnson, Vermont). He later studied with Morris, Penderecki, Takemitsu and Wyner at Yale (MMA 1976, DMA 1980). In 1977 he joined the faculty at Sarah Lawrence College (Bronxville, New York). His many awards include a Prix de Rome (1976–7), a Guggenheim Fellowship (1979–80), a New York Foundation for the Arts Fellowship (1990) and numerous grants.

Timbral and spatial concerns play an important role in Biscardi's music, especially in his early works. Often a single word or poetic phrase generates the central idea of a composition, though his works are never overtly programmatic. The Italian *tenzone* [dialogue] inspired *Tenzone* (1975), while T.S. Eliot's 'Burnt Norton', with its interplay of form and time evoked *At the Still Point* (1977). In the 1985 opera *Tight-Rope*, and the later song cycle *The Gift of Life* (1990–93) Biscardi's musical lyricism is more pronounced. *Resisting Stillness* (1996), an intimate, strikingly spare work, is autobiographical in nature.

JAMES CHUTE

**Bischof, Rainer** (*b* Vienna, 20 June 1947). Austrian composer, aesthetician and music administrator. He studied conducting with Swarowsky at the Vienna Music Academy (1965–7), and theory and analysis privately with Apostel (1967–72). He completed the PhD in philosophy at Vienna University in 1973. He has taught philosophy and aesthetics at the Alpbach Forum (1983, 1985), philosophy at the Vienna Music Academy (from 1987) and composition at the Vienna Conservatory (1996–). He has also served as musical advisor to the Vienna Festival (1984), head of the music section of Vienna's Department of Culture (1986–8), vice-president of the Alban Berg Foundation (1986), secretary general of the Vienna SO (1988) and president of the International Gustav Mahler Society (1991).

Bischof's precise formalism and his consistent use of note row techniques reflects the influence of the Second Viennese School. He regards serialism as an open system capable of further development and uses it as a framework for musical expression. This is particularly evident in *Largo desolato* (1985), a tribute to Berg, and ... *stracci* (1988–9). His works often project melancholy, despair and anger at the world. In his chamber opera *Das Donauergeschenk* (1990–91), for example, an attempt by three 'do-gooders' to force an individualist to accept 'reality' proves fatal. His lieder cycles evoke impressions reminiscent of Schubert. (*LZMÖ*)

LOTHAR KNESSL

**Bischoff, Hans** (*b* Berlin, 17 Feb 1852; *d* Niederschönenhausen, nr Berlin, 12 June 1889). German pianist, teacher and editor. He was a piano pupil of Theodor Kullak and

Richard Wüerst in Berlin, and studied philosophy and modern languages at Berlin University (1868–72), taking the doctorate at Göttingen in 1873 with a dissertation on Bernart de Ventadorn. He taught the piano and (from 1879) theory at Kullak's Neue Akademie der Tonkunst (1873–8), and later at the Stern Conservatory, where he remained until his death. He also had an active career as a concert pianist, playing mainly chamber music; with the violinist W. Helmich he organized the Monday Concerts at the Berlin Sing-Akademie. He was a leading figure among 19th-century German critical editors. He edited Adolf Kullak's *Aesthetik des Klavierspiels* (1876). His editions of piano music were exemplary for their time and encompass keyboard works of Bach, Handel, Mozart, Clementi, Weber and Schubert, including the first variorum edition of Bach's *Das wohltemperirte Clavier*.

CHRISTOPHER FIFIELD

**Bischoff, John (Lee)** (*b* San Francisco, 7 Dec 1949). American composer. He studied at the San Francisco Conservatory (1968–70) with Robert Moran, Robert Helps and Ivan Tcherepnin, at the California Institute of the Arts (BFA 1971), where his teachers included James Tenney and Morton Subotnick, and at Mills College (MFA 1973) with Robert Ashley, 'Blue' Gene Tyranny and David Tudor, among others. In 1978 he co-founded, with Jim Horton and Rich Gold, the League of Automatic Music Composers, the world's first computer network band. He was also a founding member of the computer network band The Hub in 1985. In 1989 with Chris Brown and Tim Perkis, he co-founded Artifact Recordings, a label specializing in experimental electronic and computer music. He was appointed studio coordinator at the Center for Contemporary Music and lecturer in computer music at Mills College in 1992. A composer of live electronic and computer music, he has created software instruments with rich and somewhat unpredictable sonic behaviours. He interacts with these in performance within predefined structures that leave room for exploration. The quirks and challenges of the devices he creates are incorporated into his music.

CARTER SCHOLZ

**Bischoff, Ludwig Friedrich Christian** (*b* Dessau, 27 Nov 1794; *d* Cologne, 24 Feb 1867). German music critic, writer and teacher. After participating in the Napoleonic Wars, he studied philology in Berlin, had a notable career as teacher and school director that included 26 years in Wesel, and moved in 1850 to Cologne to become music critic of the *Kölnische Zeitung* and to found the *Rheinische* (later *Niederrheinische*) *Musikzeitung*, which he edited and to which he contributed until his death. His writings, distinguished by their musical acuity and vivid expressiveness, strove to raise the public's musical standards and served as a voice for the lower Rhineland.

Bischoff venerated certain values in the music of the past as representing the highest in musical art. His writings reflect the then growing enthusiasm for Handel and Bach, while his aesthetic ideals were realized in the music of Haydn, Mozart and Beethoven. He held an ambivalent position towards Romantic music, admiring its expressive qualities but decrying a perceived decline in the accessibility, formal integrity and universality that he most valued. While he supported contemporary composers active in Cologne (e.g. Ferdinand Hiller, Carl Reinecke, Eduard Franck, Reinthaler, Bargiel and Bruch), his encounter with the progressive New German School of Liszt and Wagner, supported by a dedicated band of critics and essayists, impelled him to become one of its first and most outspoken opponents.

ROBERT CURTIS

**Bischoff** [Bischof, Episcopus], **Melchior** (*b* Pössneck, Thuringia, 20 May 1547; *d* Coburg, 19 Dec 1614). German clergyman, hymn writer and composer. He attended several Gymnasiums in central Germany, in 1563 sang in the Arnstadt Kurrende (a choir consisting of the poorer boys of the town) and from 1564 studied at Jena University. In 1565 he became headmaster of the school at Rudolstadt, in 1567 Kantor at Altenburg and in 1570 minister in his native town. In 1573, refusing to assent to

Calvinist articles, he was deprived of his living. He became minister at Geckenheim, near Uffenheim, Central Franconia, in 1574 and at Thundorf, near Bad Kissingen, in 1579 before returning to his post at Pössneck in 1585. In 1590 he went to Coburg as court chaplain to Duke Johann Casimir and in 1597 to Eisfeld as superintendent. From 1599 he again lived at Coburg, this time as superintendent-general; he was a friend of Melchior Franck there from 1602. His few compositions are all occasional sacred pieces; they show that he was familiar with the expressive polyphony of his Dutch contemporaries and with Venetian double-choir techniques, but lack any marked individuality. They appear in five prints (RISM 1568[11], 1603[1], 1618[1] and 1631[2], and *Cantionale sacrum*, Gotha, 1646), while *Christi agonisantis precatio* was published separately (Coburg, 1608); others are in manuscript (at *D-Dl*). They comprise five Latin motets for six to eight voices, three German motets for four, six and eight voices and two four-part German hymns.

FRANZ KRAUTWURST

**Biscogli, Francesco** (*fl c*1740). Italian composer. His sole extant work is an extended concerto in D for trumpet, oboe, bassoon, two violins and continuo (*F-Pc*), unless a flute concerto (*S-Uu*) attributed to Don Antonio Biscogli is by the same man. The absence of a viola part in both works suggests Neapolitan provenance. From the extreme difficulty of the wind parts it can be deduced that the triple concerto was written as a showpiece for particular players, perhaps conservatory pupils.

MICHAEL TALBOT

**Biscroma** (It.). *See* DEMISEMIQUAVER (32nd-note). *See also* NOTE VALUES.

**Biseghino, Giovanni** (*b* Mantua; *fl* 1613). Italian composer and organist. In 1613 he was an organist at Porto Gruaro, Lombardy. His only known work is the *Missarum quaternis vocibus liber primus* (Venice, 1613). Three of the five masses in this book are based on popular madrigals of the second half of the 16th century, a fourth is for equal voices and the last is an *alternatim* setting of extreme simplicity. The volume is rounded off with a Marian litany and a version of the devotional hymn *Pange lingua gloriosa*, designed for performance while carrying the sacrament in procession on the feast of Corpus Christi. These too are composed in an uncomplicated and largely homophonic manner, which makes them approachable by choirs of modest ability. This concern with accessibility contrasts with the earlier masses in the book, which are not only more densely written but also contrary to Tridentine orthodoxy in their reliance upon secular models. Fétis also recorded a book of five-voice madrigals (now lost; *FétisB*).

IAIN FENLON

**Bishop.** English firm of organ builders. It was founded in 1807 by James Chapman Bishop (*c*1783–1854), who is remembered as the inventor of the Clarabella, an 8′ open wood-flute stop, which he frequently used on his own instruments, and often added to old organs, removing Cornets to do so. He claimed to have invented the COMPOSITION PEDAL (as did his former masters FLIGHT & ROBSON) and the CONCUSSION BELLOWS (also attributed to W.M. GOODRICH). His Pedal Organs were somewhat in advance of those of his contemporaries. He added an octave of large pedal pipes to Father Smith's organ at St Paul's Cathedral in 1826, at the same time adding a separate bellows to ensure steadiness of wind. At St James's, Bermondsey (1829), he built a remarkable three-stop Pedal Organ (*G′–g*) which could also be played from an independent manual keyboard. Tonally, his work of the 1820s and 30s, with its refinement and fondness for foundational effects, anticipated the taste of the mid-century. His use of closed shallots for chorus reeds was also ahead of his time. His later organs were less successful, though the *C*-compass organ with 39 stops at St Giles's, Camberwell (1844), built in collaboration with Samuel Sebastian Wesley, who drew up the list of stops, is fascinating evidence of a conservative builder wrestling with new ideas.

On Bishop's death a partnership was formed between his son, Charles Augustus Bishop (*b* 1821) and John Starr (*c*1808–*c*1878); a third partner, William Ebenezar Richardson, was added in 1857 but withdrew four years later. The firm built a number of significant instruments during the third quarter of the century (Brompton Oratory, London, 1857; St Mary's, Nottingham, 1871; Bombay Town Hall, 1873) but the business got into financial difficulties and was acquired in 1880 by Edward Hadlow Suggate. It is still in existence, with offices in London and Ipswich, and was responsible for the reconstruction of the Thamar organ at Framlingham (1970) and the new organ for Lancaster University (1979).

GUY OLDHAM/NICHOLAS THISTLETHWAITE

**Bishop** [née Riviere], **Anna** (*b* London, 9 Jan 1810; *d* New York, 18 or 19 March 1884). English soprano. Her father, Daniel Riviere, was a drawing master of Huguenot descent. She studied the piano with Moscheles and singing with Henry Bishop, entering the RAM as a foundation student in 1824. She soon distinguished herself by her singing, and made her professional début at the Ancient Concerts on 20 April 1831, shortly before her marriage to Bishop on 9 July. During the next few years her reputation quickly grew, especially in the provinces, where she made several tours with her husband and the harpist Nicholas Bochsa. At this time her singing was confined to sacred music and to English songs, including many by her husband. In 1839, however, she began to give 'dramatic concerts' with Bochsa in which she sang Italian opera excerpts, first at Dublin, then at Edinburgh, and finally, on 5 July, at Her Majesty's Theatre, London. Four weeks later she eloped with Bochsa to Hamburg (deserting her husband and three children) and began a long tour of the Continent with him. Bochsa had a somewhat unsavoury reputation as a forger and bigamist.

For the rest of her life 'Madame Bishop', as she was now universally known, travelled almost incessantly, first with Bochsa and, after his death, alone. From 1839 to 1843 she visited all the principal towns in Europe (except in France, where Bochsa would have been arrested), including, for a year, St Petersburg; during this time she sang in 260 concerts. In summer 1843 she arrived in Italy, where she was engaged for 27 months at S Carlo, Naples, appearing in 20 operas. Her Italian admirers were many, though they did not include Verdi, who had heard her in *I due Foscari* and was unimpressed. Despite a press campaign in her favour (prompted, in Verdi's opinion, by bribery) he refused to engage her for *Alzira* in 1845.

She returned to London in 1846, and was well received despite the scandal of her elopement. The *Morning Post* (9 October) described her:

> Madame Anna Bishop, after a lengthened and prosperous career as prima donna in the great capitals of Europe, made her debut last night as Isoline in Balfe's opera of 'The Maid of Artois'. This lady has rare qualifications for the stage, a soprano voice of excellent quality, unerring intonation, facile execution, artistic feeling, and, what is uncommon even among the best vocalists, perfect musical accent. Her register extends from E flat on the first line to D flat in alt. She is of the middle size and symmetrically formed – her eyes are large, lustrous, and full of fire – her actions free, graceful and dramatic. We welcome Madame Bishop as a rich addition to the English lyrical drama.

But within a few months she was off again, to Dublin and then to New York, where she appeared on 12 July 1847 at a private reception held in her honour, and made her public début in Donizetti's *Linda di Chamounix* at the Park Theater on 4 August. A long tour with Bochsa followed, with engagements in Mexico, Cuba and California; in 1850 she was back in New York, where on 1 November 1852 she produced and sang in the first American performance of Flotow's *Martha*, at Niblo's Garden. In 1854 she was in San Francisco; in the following year she sailed for Sydney, Australia. After Bochsa's death there on 6 January 1856 she toured Chile, Argentina and Brazil and returned to New York in 1858, where she married a diamond merchant, Martin Schultz. She was in England again for the season of 1858–9, then began another long American tour, this time including Canada. From California in 1866 she set sail across the Pacific, where on 18 February she was shipwrecked on a coral reef. After more than a month the small boat in which she and her husband had survived reached Guam, from which they travelled to Manila; but she had lost all her music, clothes and jewellery. The indomitable singer continued her tour in Hong Kong, Singapore and India, then returned to England via Australia. She then went back to New York, but before retiring made yet another world tour between 1874 and 1876, this time including Sydney, Cape Town and Madeira. She was in London for three years, then returned finally to New York, where she made her last public appearance on 22 April 1883.

Anna Bishop was one of the most popular English singers of her generation. Her voice was brilliant, her technique masterly; but she lacked the expressive power of Jenny Lind or Clara Novello.

NICHOLAS TEMPERLEY

**Bishop, Sir Henry R(owley)** (*b* London, 18 Nov 1786; *d* London, 30 April 1855). English composer. In his day he enjoyed a commanding reputation as the guardian of the best traditions of English song, and for a time he kept English opera alive almost single-handed. Yet he is now remembered for little but the song *Home, Sweet Home*.

1. LIFE. His father, Samuel Bishop, came from a Shropshire family and was a London watchmaker and later haberdasher. Such education as Henry Bishop received was gained at Dr Barrow's Academy at 8 Soho Square. By the age of 13 he was already in business as a music seller with his cousin Charles Wigley, at 6 Spring Gardens, Charing Cross, and his first songs and piano pieces were published by this firm (*c*1801–4). Bishop then went to Newmarket to train as a jockey, but his patron, the racehorse owner Thomas Panton, finding the boy physically unsuited to this occupation, agreed instead to pay for his musical education. He returned to London and studied harmony under Francesco Bianchi. Meanwhile his earliest dramatic compositions had appeared, with some success. He wrote the music for several ballets at the King's Theatre and Drury Lane Theatre. His first fully fledged opera, *The Circassian Bride*, was performed at Drury Lane on 23 February 1809; the score was destroyed when the theatre burnt down the following day, but the music had made an impact. Several notably successful works followed, including *The Maniac* (26 performances). As a result Bishop was offered the post of musical director at Covent Garden in 1810. There, in the next 14 years, he supervised the composition and performance of dramatic musical works of all kinds, from original operas to collections of songs interpolated in mangled versions of Shakespeare's plays. Despite the immense amount of musical hack-work that Bishop was compelled to perform in this job, he found time for several excursions to the Continent, for a season at the Dublin Theatre (1820), and for direction of many of the Lenten Oratorio concerts from 1819. In 1813 Bishop was one of the founder-members of the Philharmonic Society, and he took his turn as conductor of its concerts. He was also one of the original professors of harmony at the RAM, though he did little teaching there.

In 1824 Bishop left Covent Garden because of a dispute over his salary, and became musical director at Drury Lane. His most ambitious opera, *Aladdin*, was put on there in a futile attempt to steal the thunder of Weber's *Oberon* at the rival house. Shortly after this he was engaged to succeed Tom Cooke as 'director and composer' to Vauxhall Gardens, in an effort to revive the fading popularity of the resort; he continued to write theatre music on a regular basis until 1840. Meanwhile in 1833 he was awarded a prize by the Manchester Gentlemen's Glee Club for his glee *Where shall we make her a grave?* and in the following year the Philharmonic Society commissioned and performed his cantata *The Seventh Day*. He applied for, but failed to secure, the post of organist of St George's, Windsor (1835), and the Gresham Professorship of Music (1837). In 1839 he took the BMus degree at Oxford. In 1841 he was elected to the Reid Professorship at Edinburgh University, but he resigned in 1843, having given a total of two lectures. From 1840 to 1848 he was the principal conductor of the Ancient

Concerts. He was knighted on 1 June 1842 on the instigation of Prince Albert. In 1848 he was appointed to the chair of music at Oxford in succession to Crotch, and in 1853 he was awarded the DMus for his ode on the installation of the Earl of Derby as chancellor.

Bishop was twice married, first, on 30 April 1809, to the singer Elizabeth Sarah Lyon (1787–1831), by whom he had two sons and a daughter, and second, on 9 July 1831, to Anna Riviere (1810–84), another singer, who bore him two daughters and a son, but left him for Bochsa in 1839 (*see* BISHOP, ANNA). During his later years Bishop almost ceased to compose, but he edited a number of works, including Handel's chamber duets and cantatas (for the Handel Society) and Lord Mornington's glees. He died after an operation to cure the cancer from which he had long suffered.

2. WORKS. Bishop's reputation has altered more than that of almost any other composer. In 1820 he was considered 'one of the few modern composers whose writings will survive' (Hunt); in 1851 George Hogarth thought that the best of his operas 'are in many respects worthy of the greatest masters of the German school, and justify the title which was bestowed on him of "the English Mozart"; in 1895 he was still 'one of our ablest and most elegant composers of vocal music' (Baptie). But Fuller Maitland in 1902 dismissed his 'so-called operas' – 'the low taste of the public was pandered to in each and all of them'. To Percy Young (1967) he was 'a quite negligible composer'.

A glance at the list of Bishop's dramatic works suggests an almost incredible productivity, especially during the years 1813–20. This impression is misleading. Only one of his works, *Aladdin*, is anything like a full-length opera: even this is not through-composed, for the autograph score contains cues indicating spoken dialogue. In the rest Bishop provided set pieces in what was essentially a spoken play, numbering anything from 25 (in *The Maniac*) to one (in *The Vespers of Palermo*). Many of his works are adaptations, or medleys of well-known airs; in some he collaborated with other composers. Frederick Corder boiled down the entire corpus of 70 published stage works to 48 overtures, 190 airs and ballads, 53 display songs, 73 duets and trios, 150 glees and ensemble pieces, and 340 melodramas, marches and ballet airs. None of these pieces shows any suggestion of that cumulative effect that is the stuff of real opera; often they are not even apt in their dramatic context. Bishop may therefore be dismissed as an opera composer in any sense that is valid today. Nevertheless he could provide the musical part of an evening's entertainment in the theatre with considerable skill and taste, and occasionally with brilliance.

Bishop's mutilations of Mozart and Rossini have been condemned and ridiculed by critics from his day to ours; they are indeed abominable, but the 'blame' falls not so much on Bishop – who carried out his task with professional unconcern – as on the managers who, sure of their public, tried in this way to snatch some of the takings of the Italian Opera House. His musical versions of Shakespeare are more worthy of respect. True, the texts were corrupt, the songs often irrelevant: with singular perversity Bishop was generally asked to set lyrics from other plays. In *Twelfth Night* (1820), for instance, one of the most successful, the two great lyrics in the play, 'Come away, death' and 'O mistress mine', were ignored in favour of 'Bid me discourse' (from *Venus and Adonis*),

*Henry Bishop: detail of a mezzotint (published 1822) by Samuel William Reynolds after Thomas Foster*

'Who is Sylvia?' (*Two Gentlemen of Verona*) and 'Crabbed age and youth' (from Marlowe's *The Passionate Pilgrim*). Bishop set 'Who is Sylvia?' as a quintet, taking the melody of the first verse from Ravenscroft and that of the second verse from Morley. Elsewhere music of Mozart and Winter was incorporated. Despite all this, one of the most enlightened critics of the time, Leigh Hunt, treated *Twelfth Night* as a masterpiece:

> [It] is interspersed with songs, glees and duetts, taken from the German and English masters; and Mr. Bishop, besides adapting these to the scene with his scientific hand, has added some compositions, of which though a high, it is no undeserved praise to say, that a hearer must be nicely acquainted with the varieties of musical style to distinguish it from the rest ... [He has] adapted the songs to the several characters 'with difference discreet'. Viola's are deep and tender; Olivia's, like her rank and pride, more vehement, gorgeous, and wilful; those of the others as wilful too, but light, festive, and seasonable.

Such words could only have been written of a man who had attained mastery of his medium and of his audience. Bishop's medium was the incidental set piece; his audience was not unmusical, but more attached to a good tune than to a profound masterpiece.

Thus Bishop's most popular songs and glees were usually first associated with a dramatic work, but survived as separate numbers long after the show was forgotten. Examples are 'The pilgrim of love' (from *The Noble Outlaw*, 1815), 'The chough and the crow' (glee, from *Guy Mannering*, 1816), 'Lo, here the gentle lark' (*The Comedy of Errors*, 1819), 'Tell me, my heart' (*Henri Quatre*, 1820), 'Bid me discourse' (*Twelfth Night*, 1820), 'Should he upbraid' (*Two Gentlemen of Verona*, 1821) and 'O well do I remember' (*Maid Marian*, 1822). An exception is *The Bloom is on the Rye* ('My pretty Jane'), not from an opera, highly regarded by Corder, but not by Baptie nor (according to Fitzball) by Bishop himself.

Corder felt that Bishop was at his best in duets (such as 'As it fell upon a day'), trios (such as 'The sailor's welcome', which he reprinted) and glees (such as 'Blow, gentle gales'). Macfarren and others regarded Bishop as one of the greatest glee composers; certainly his glees are sweet and fluent, and pay careful attention to expressive word-setting.

The overtures, marches, dances and ballads are generally quite trivial. A few have shown powers of survival: 'The Dashing White Sergeant' (from *The Lord of the Manor*, 1812) is still a popular dance, while the 'Pastoral Dance' (from *John of Paris*, 1814) is well known as a regimental march. Eclipsing all else in popularity is the ballad *Home, Sweet Home*. It was foreshadowed in *Who Wants a Wife?* (1816) and as a 'Sicilian Air' in a volume of *National Airs* which he edited in 1821. Then he used it as the theme-song of *Clari* (1823), with the now famous words by the American poet John Howard Payne, and repeated it in various transformations throughout the opera. Its fame was immediate, and spread quickly through Europe. It was used not only in the overture of Bishop's *Home, Sweet Home* (1829) but also as a leading motif in Donizetti's *Anna Bolena* (1830), and it appears to have taken a permanent place in European and American folksong. It reached its height of popularity after 1850, when Jenny Lind made it her own and it became the staple item of every ballad concert. The tune seems to have little to recommend it beyond the effective rise to the upper tonic: harmonically, nothing could be more unenterprising. Yet it had some magic by which Bishop reached the heart of his public.

His excursions into sacred music were unsuccessful, and his instrumental music amounts to very little, with the exception of a vigorous and surprisingly inventive string quartet that could easily bear revival. Despite his academic positions he never gained recognition as a scholar: his lectures show that he could not entirely overcome the shortcomings of his early education. In later life he was a sad and lonely figure. Not only his wife but his public had deserted him. The craft that had exhausted his youthful talent was no longer valued, and it had not even left him with enough means to support a dignified retirement. He had only that fame which, as he wrote in 1840, he had worked so hard to attain.

WORKS

*all printed works published in London*

STAGE

*descriptions of works, taken from original sources, often omit 'grand'*

*unless otherwise stated, all in MS at GB-Lbl, and all published (vocal score) shortly after first performance*

NICHOLAS TEMPERLEY (text, bibliography), BRUCE CARR (work-list)

**Bishop, John** (*b* *c*1665; *d* Winchester, 19 Dec 1737). English cathedral musician. According to Hawkins (*History*), he was a pupil of Daniel Roseingrave. Hawkins's further statement that he was a lay singer of King's College, Cambridge, is supported by the name of one 'Bishop' in the college books as lay clerk from 1687 and Master of the Choristers from 1688. In 1696 he was appointed organist of Winchester College, retaining this post until his death. In 1697 he became also lay clerk of Winchester Cathedral, and was organist of the cathedral from 1729, likewise until his death. His music for the Winchester College graces was printed by Philip Hayes in *Harmonia Wiccamica* (1780). In 1700 Bishop published *A Sett of New Psalm Tunes*, and a supplement thereto in 1725. A small amount of church music by him is found in manuscript (*GB-Lbl*, *Lcm*, *Ob*, *Och*). (B. Matthews: 'Winchester Cathedral and its Music', *MT*, cxx (1979), 333–4)

**Bishop-Kovacevich, Stephen.** *See* KOVACEVICH, STEPHEN.

**Bisiach.** Italian violin makers. Leandro Bisiach (i) (*b* Casale Monferrato, 16 June 1864; *d* Venegono, 1 Dec 1945) took an interest in the violin at an early age, becoming a pupil of Riccardo Antoniazzi in Milan in 1886. He soon showed considerable business acumen, and promoted under his own name not only Antoniazzi's work, but also that of his teacher's father and brother, Gaetano and

Romeo Antoniazzi. Later collaborators included Luigi Montanari, Giuseppe Ornati and Gaetano Sgarabotto, followed by Bisiach's four sons and, among others, Sesto Rocchi. Bisiach was also a prominent dealer in old instruments. Instruments made by him and his partners before 1914 are much preferred to the later ones, which tend to be heavy and to lack individuality, both tonally and visually.

Andrea Bisiach (*b* Milan, 16 Dec 1890; *d* Milan, 25 Aug 1967) was Leandro's eldest son, and learnt his craft from his father. His workshop was at 23 corso Monforte, Milan. He was keenly interested in early instruments; as custodian of the family collection he took a delight in the rich variety of Italian violins that surrounded him in his shop, and in showing them to visitors. Carlo Bisiach (*b* Milan, 9 March 1892; *d* Florence, 23 April 1968) was Leandro's second son, and was also his pupil. He worked on the outskirts of Florence, and his instruments acquired a high reputation. Giacomo Bisiach (*b* Milan, 28 Dec 1900; *d* 9 May 1995) and Leandro Bisiach (ii) (*b* Milan, 29 Feb 1904; *d* Venegono, 11 Feb 1982), also sons of Leandro Bisiach (i), made new instruments under their father's direction and from 1934 worked together at 27 corso Magenta, Milan, until their retirement in 1973. They were also restorers and dealers in old instruments. Their violins have a pleasing and distinctive style and are well known. For further information see E. Blot: *Un secolo di liuteria italiana, 1860–1960*, ii (Cremona, 1995).

CHARLES BEARE/CARLO CHIESA

**Bismantova** [Bis Mantoua], **Bartolomeo** (*b* Reggio nell'Emilia, before 1675; *d* ?Ferrara, after 1694). Italian writer on wind instruments, cornettist and composer. A few biographical details are in his correspondence with the princes of Este, preserved in the Modena state archive. He was educated in Reggio nell'Emilia at the Servite convent and joined the Servite order; after studying away from home (possibly in Bologna, according to Cavicchi) he returned to Reggio nell'Emilia, then went to Ferrara in 1675 and lived in the Servite convent there. He was a musician at Ferrara Cathedral and a cornett virtuoso at the Accademia dello Spirito Santo. His *Compendio musicale*, its foreword dating from 1677, survives as a manuscript (*I-REm*). Dedicated to his patron, Abbot Ferrante Bentivoglio, it was probably intended for publication; a postscript of 1694 implies that it was not printed because of his patron's death. It is mostly rather conservative; its significance lies in the detailed instructions on playing the recorder, the flageolet and especially the cornett, as practically no other wind instrument tutor is known from Italy or France for the period between 1638 (Fantini's instruction book for trumpet) and 1700 (Freillon Poncein's for oboe). The 1694 postscript to the contents of the *Compendio* mentions a 'Regole del oboè'; this is missing in the surviving copy, but appears entitled 'Regola generale per suonare l'oboè' as a supplement to Bismantova's 66 *Duetti à due trombe da camera* (for two trumpets or cornetts) of 1688–9. It represents the earliest known fingering tables for the Baroque oboe; while the playing instructions are similar to those found elsewhere, the fingerings are highly developed. It is difficult to tell whether Bismantova's knowledge of oboe playing was purely theoretical. He may have received information on the instrument from the French; his fingering chart is greatly similar to Freillon Poncein's of 1700. Bismantova's book of duets is subtitled *Libro secondo*; no other compositions survive, and the addition *Libro principale* on the cover of the *Compendio musicale* suggests that this counts as the first book.

**Bispham, David (Scull)** (*b* Philadelphia, 5 Jan 1857; *d* New York, 2 Oct 1921). American baritone. He studied in Milan (1886–9) with Vannuccini and Francesco Lamperti and then in London with William Shakespeare and Albert Randegger. He made his operatic début in 1891 as Longueville in Messager's *La basoche* at the English Opera House, where his comic acting ability and singing brought him immediate success. He sang Kurwenal (*Tristan und Isolde*) the following year at Drury Lane, and later sang at Covent Garden as well. He made his début at the Metropolitan Opera as Beckmesser in 1896 and remained with the company until 1903. Much in demand in England and the USA in opera and oratorio and on the recital stage for several decades, he excelled in the Wagnerian roles, of which he considered Kurwenal and Beckmesser to be his best.

Bispham was ardently in favour of using the English language in operas and songs, and to this end helped to form the Society of American Singers in 1917, which presented comic operas in English using American casts; he toured with the troupe for several years both as singer and administrator. He also developed lecture-recital programmes, in which he promoted the works of English and American composers.

A highly skilled actor, Bispham appeared as Beethoven in Hugo Müller's play *Adelaide* (1898) in both England and America. In his later years he developed a repertory of monologues of poetry and prose which he performed to musical accompaniment, often provided by famous groups of the day. From 1902 he was also an influential teacher in Philadelphia. Bispham's musical memorabilia are in the New York Public Library.

RICHARD ALDRICH/DEE BAILY

**Bisquertt (Prado), Próspero** (*b* Santiago, 8 June 1881; *d* Santiago, 2 Aug 1959). Chilean composer. He studied music privately in Santiago and was self-taught in

composition. The Chilean government enabled him to stay in Paris from 1929 to 1933. His harmonic and orchestral style was strongly influenced by French Impressionism; most of his works are programmatic, and some are based on themes and rhythms drawn from Chilean folk music.

WORKS
(*selective list*)

Stage: Sayeda (op-ballet, Bisquertt, after The 1001 Nights), Santiago, Municipal, 20 Sept 1929)
Orch: Taberna al amanecer, sym. poem, 1922; Procesión del Cristo de Mayo, sym. poem, 1930; Destino, sym. poem, 1934; Nochebuena, sym. triptych, 1936; Misceláneas, suite, 1936; 2 emocionales, 1940; Metropolis, sym. poem, 1940; Jugueteria, suite, 1943; 1945, sym. poem, 1945

JUAN A. ORREGO-SALAS/LUIS MERINO

**Bisschop, Ludovicus de.** *See* EPISCOPIUS, LUDOVICUS.

**Bisson, Loys** (*fl* Paris, 1561–8). French composer and editor. He worked as a corrector and transcriber for the press of Nicolas Du Chemin between 1561 and 1568 and was commissioned to prepare a series of selections from existing anthologies: four volumes duly appeared in 1561 and 1567. Among others he drew on pieces in the two *Trophée de musique* collections printed at Lyons in 1559. According to Du Verdier, in 1567 he adapted for two voices a collection of four-voice chansons, retaining the original melodies intact except for the insertion of an occasional rest, and edited a set of 30 similar duet reductions of pieces by E. (? *recte* A.) Gardano and Antoine de Villers. Neither has survived, but the latter must surely have been modelled on a collection already published by Le Roy & Ballard (RISM 1555[24]). The only original piece by Bisson which has survived is the lively, imitative four-voice chanson, *Devenu suis amoureux depuis trois moys*, found in another Du Chemin anthology which he corrected for publication in February 1568.

EDITIONS

Premier (–Quart) livre du recueil des recueilz des chansons à quatre parties, les plus excellentes qu'on a peu choisir tant aux livres des trophées, qu'en plusieurs autres par cy-devant imprimés, veues et corrigées par Loys Bisson (Paris, 1561) [all lost]
Seiziesme livre contenant vingt chansons nouvelles . . . veuës et corrigées par Loys Bisson (Paris, 1568[10a])

**Bistropha.** *See* DISTROPHA, TRISTROPHA.

**Biteryng.** *See* BYTTERING.

**Bitetti (Ravina), Ernesto (Guillermo)** (*b* Rosario, Argentina, 20 July 1943). Argentine guitarist. He began to play the guitar at the age of five, and studied in Santa Fé with Graciela Pomponio and Jorge Martínez Zarate; at 15 he made his début in Rosario. He then built a national reputation, becoming a professor at the Instituto Superior de Música de la Universidad Nacional del Litoral, Santa Fé, in 1964. In 1965 he first played abroad, subsequently touring North and South America, Europe (including the former USSR), the Middle East, Asia and Australasia, and in 1966 he began a prolific recording career. He settled in Spain in 1968.

Bitetti's strong, brilliant yet sensitive style is at its most impressive when he performs with orchestra, but he is also much in demand as a recitalist, especially for his interpretations of Spanish and South American music. The many composers who have written for him include Castelnuovo-Tedesco, Tomás Marco, Rodrigo and Moreno Torroba. He became professor of guitar at Indiana University, Bloomington, in 1989, and has edited the complete works of Gaspar Sanz and music by Albéniz.

PETER SENSIER/GRAHAM WADE

**Bitgood** [Wiersma], **Roberta** (*b* New London, CT, 15 Jan 1908). American composer, organist and choral director. After graduation from Connecticut College for Women (BA 1928), she studied theory and organ at the Guilmant Organ School (1930), attended Columbia University (MA 1932) and was the first woman to take the doctorate at the School of Sacred Music, Union Theological Seminary (MSM 1935; DSM 1945). Her principal composition teachers included J. Lawrence Erb, Howard Murphy, Edwin Stringham (1933–5), T. Tertius Noble (1943–5) and Wayne Bohrnsted (1957–60). During her career as organist and director of music she held positions in Protestant churches and temples in New York, New Jersey, California, Michigan and Connecticut. She was the first woman president of the American Guild of Organists (1975–81). As a composer she has focussed exclusively on church music, writing many anthems for young people and giving special attention to practicable works for small church choirs (e.g. *Hosanna*, 1935). Her style is triadic, using seventh chords, but often avoiding dominant 7ths. The harmonic motion and part-writing of her music are influenced by organ playing, with frequent common-note progressions, planing and pedal points, as found in *The greatest of these is Love* (1934) and *Be still and know that I am God* (1940), two of her most popular works. Modulations are frequent and generally move to the sixth or flattened third degree of the scale, producing false relations, for example in the Chorale Prelude on 'Jewels' (1942) and *Ye Works of the Lord*.

WORKS
(*selective list*)

Choral: Hosanna (Moravian liturgical texts), children's chorus, chorus, org (1935); Give me a Faith (C.L. Reynolds), S, Bar, mixed chorus, org, 1945, arr. 1v, pf (1950); Job (cant., Bible, D. ben Judah, trans. N. Mann and M. Landsberg), S, 2 T, Bar, chorus, org, 1945; Let there be Light (cant., M.L. Kerr), children's SA chorus, org, 1965; Ye Works of the Lord (Bible, W. Blake), chorus, org, 1993; *c*75 other sacred works

Other vocal: The greatest of these is Love (Bible: *1 Corinthians*), 1v, pf/org, 1934, arr. SSA/chorus, arr. (S, A)/(T, B); Be still and know that I am God (Bible), 1v, pf/org, 1940, arr. chorus

Org: Chorale Prelude on 'Jewels', 1942; On an Ancient Alleluia, 1962; Offertories from Afar, 7 pieces based on folk melodies (1964); Meditation on 'Kingsfold', 1976

Principal publishers: Choristers Guild, Flammer, H.W. Gray, Sacred Music Press, Westminster

J. MICHELE EDWARDS

**Bithner, Jacob.** *See* BITTNER, JACOB.

**Bitogu.** The syllabic names given to the first three notes of the C major scale in the 'Tonwort' system devised by Carl Eitz and employed as a popular name for the system itself. *See* EITZ METHOD.

**Bitonality.** The simultaneous, superimposed presence of two distinct tonalities. In practice the term is applied not only to compositions which employ two unambiguously diatonic keys, but also to those which superimpose contrasted modal segments, or two conventionally unrelated triads without other elements of diatonic progression. Techniques loosely categorized as bitonal are often passing effects within a harmonic language that is subtly balanced between traditional hierarchies and new symmetries.

Ives was probably the first composer to experiment with the strong dissonances that could result from bitonal and polytonal writing (*Psalm 67*, *c*1898–1902). In the first of Bartók's *Bagatelles* for piano (1908) the right hand uses a six-note mode on C♯, the left a five-note mode on C: although the primary effect is the exploitation of the C♯–C polarity, the two modes share the pitches C♯/D♭ and D♯/E♭, and the piece ends consonantly, with E over C. In a famous passage from Stravinsky's *Petrushka* (1910), arpeggios of C major and F♯ major are superimposed; however, there is no extended harmonic progression in these keys, and the combined arpeggios are best thought of as an instance of a musical idea derived from a single modal construct. This is the OCTATONIC scale, whose effect when Stravinsky employs it is to generate a kind of 'extended' or even 'floating' tonality (to use Schoenberg's terms). The feeling for interactive polarities in such contexts is far more dynamic and sophisticated than that achieved in the rare attempts to sustain the invariant identities of two different tonalities over complete structures. Even a composer as interested in the possibility of combining conflicting diatonic tonalities as Milhaud could move from superimposition of two keys to final resolution into one of them (e.g. 'Botafogo' from *Saudades do Brasil*, 1920).

Interest in bitonality can be linked to the broader 20th-century concern with the superimposition of complementary textural strata, such as is promoted by Schoenbergian combinatoriality, generating 12-note music which often has a high degree of tonal allusiveness. In addition, bitonality's ability to suggest a fractured psyche or diametrically opposed traits of character gives it a particular, small-scale appropriateness in contexts like the duet in the Prologue of Britten's opera *Peter Grimes*. Even here, however, bitonality (four flats for Peter, four sharps for Ellen Orford) is only the preliminary to an eventual, if insecure, progression from opposition to agreement. Similarly, in *The Turn of the Screw* (1954), the crisis embodied in the conflict between the Governess's A and Peter Quint's A♭ is resolved in favour of the former, though with bitter irony in the sense that, with the death of the boy Miles, Quint might be said to have won the contest.

The failure of bitonality to win wider acceptance confirms that it is a distinctly mechanical way of deriving something new from something traditional. Many significant 20th-century composers explored the interaction between tendencies to symmetry and hierarchy, focussed and freely floating textures and therefore, in the widest sense, between tonality itself and forces undermining it, rather than employing two inflexible manifestations of tonality in its simplest form.

ARNOLD WHITTALL

**Bitter, Carl Hermann** (*b* Schwedt an der Oder, 27 Feb 1813; *d* Berlin, 12 Sept 1885). German musicologist. His name has sometimes been incorrectly given as Heinrich. After studying at the universities of Berlin and Bonn he entered the Prussian civil service in which he held several important posts until 1882. In spite of his many professional duties, Bitter gave much of his spare time to the study of music history. He discovered important documents concerning the life and works of J.S. Bach, though he often quoted his sources imprecisely or not at all, a practice which brought criticism from Spitta and Chrysander. Of equal importance are his contributions to the catalogue of Bach's works, especially those on questions of authenticity and the problem of parody. He also studied Bach's sons, in particular C.P.E. Bach, whose work Bitter judged and classified with unusual objectivity for his day. In spite of all his errors in printing and transcribing and his imprecision in quotation, he laid the foundation for Bach research with a historical-philological orientation. It was only eight years after the appearance of his *Johann Sebastian Bach* (1865) that the first volume of Spitta's parallel work was published.

From 1850 to 1855 Bitter was active as a concert promoter and choral conductor in Minden. He put on Sunday afternoon concerts and initiated amateur concert series for charity; he also founded a mixed-voice choir, which he conducted himself. Their repertory included works by A. Lotti, Palestrina, Pergolesi, Handel and J.S. Bach.

RENATE FEDERHOFER-KÖNIGS

**Bitti, Martino** (*b* Genoa, 1655/6; *d* Florence, 2 Feb 1743). Italian violinist and composer. He entered the service of the Grand Duke Cosimo III of Tuscany as a violinist on 1 March 1685. His duties during his first years in Florence included performing in the numerous operas and private concerts arranged by Prince Ferdinando de' Medici. From 1696 to 1720 he frequently appeared in oratorio performances at Florentine religious companies. By 1726 he had apparently retired as principal court violinist in favour of G.M. Fanfani, though he received his salary until he died. His surviving music shows that he was a composer of modest talent and limited imagination.

WORKS

VOCAL

*music lost unless otherwise stated*

Il martirio di S Agata (orat), Florence, 1693
L'accademia festeggiante nel giorno natalizio del Ser.mo Principe Ferdinando di Toscana, Florence, 1693

JOHN WALTER HILL

**Bittner** [Bithner, Büttner], **Jacob** [Jacques] (*fl* 1680). Austro-Bohemian lutenist and composer. The few lines devoted to him in Baron's *Untersuchung* (1727) are misleading as regards his publications. His *Pieces de lut* (1682), engraved by G. de Groos, then residing in Prague, and with a title-page by Karel Skreta, contains 53 technically demanding pieces for 11-course lute. The collection is dedicated to Johann Peter Pedroni, a wealthy citizen and tradesman in Prague. The pieces are grouped into ten suites, generally following the allemande–courante–sarabande–gigue pattern, each (except the second) preceded by a *prélude non mesuré*. French influence is evident, for example in the ornamentation, but the cantabile style of the music, praised by Baron, reveals the aesthetic approach of the Germanic school initiated by Esaias Reusner (ii).

WORKS

Pieces de lut (?Nuremberg, 1682/*R*); minuet from suite in G ed. in Kiesewetter
Allemande, lute, *US-NH*, MS appx to copy of *Pieces de lut* formerly in D. Plamenac's private collection [other pieces in the appx may be by Bittner, see Rave]
Sarabande (recte gavotte), Bourrée, tr, *A-Wn*, suppl. mus. 1813

CLAUDE CHAUVEL

**Bittner, Julius** (*b* Vienna, 9 April 1874; *d* Vienna, 9/10 Jan 1939). Austrian composer. He was essentially self-taught as a musician, but received some formal instruction from the Bruckner disciple Josef Labor. He composed mainly in his spare time while pursuing a career as a lawyer and judge in Wolkersdorf (from 1905) and Vienna (from 1908). After World War I he was counsel for the Ministry of Justice (1920–22). He subsequently gave up his legal career and devoted himself to music.

Although Bittner's output embraces orchestral and chamber music, a large-scale Mass and several lieder and choruses, he devoted most of his creative energies towards writing for the stage. His passion for opera was fuelled by attending a performance of *Lohengrin* at the age of 12, and, following the precedent set by Wagner, he wrote the librettos for 15 of his own operas. Although his early attempts at the genre were not performed publicly, his friendship with the conductor Bruno Walter proved decisive in establishing his reputation, primarily with the opera *Der Musikant* produced in Vienna in 1910. His most successful work was *Das höllisch Gold* (1916) in which he emulated the example of his older compatriot Wilhelm Kienzl in attempting to merge the principles of German Singspiel with a post-Wagnerian harmonic language.

After the break-up of the Austro-Hungarian Empire, Bittner's work ceased to arouse much interest. Attacked mercilessly in the Viennese press for his dilettantism and lack of sophisticated musical technique, he eventually turned to operetta as a more appropriate vehicle for his musico-dramatic gifts. But his achievement in this genre failed to match the melodic memorability of such composers as Lehár and Kálman. Nonetheless, a collaboration with Korngold in the Johann Strauss-inspired operetta *Walzer aus Wien* (1930) proved to be enormously popular. During the 1930s Bittner returned to opera and also composed a Requiem which was left unfinished at his death. Praised by the Nazis for his patriotism and his resistance to the influence of modernism, he achieved greater prominence through his work after the Anschluss, though the revival of some of his earlier music was short-lived.

WORKS

OPERAS

*librettos by Bittner unless otherwise stated*

Die rote Gred (3), Frankfurt, 26 Oct 1907
Der Musikant (2), Vienna, Hofoper, 12 April 1910

Der Bergsee (prelude, 2), Vienna, Hofoper, 2 Nov 1911, rev. 1938
Der Abenteuer (Spiel, 4), Cologne, 30 Oct 1913
Das höllisch Gold (Spl, 1), Darmstadt, 15 Oct 1916
Der liebe Augustin: Szenen aus dem Leben eines wienerischen Talents (4), Vienna, Volksoper, 11 June 1917
Die Kohlhaymerin (3), Vienna, Staatsoper, 9 April 1921
Das Rosengärtlein (Legende, 3), Mannheim, 18 March 1923
Die silberne Tänzerin (Operette, 3, L. Hirschfeld and P. Frank), Vienna, Carl, 1 Feb 1924
Général d'amour (Operette, 3, J. Wilhelm and Frank), Vienna, Volksoper, 3 March 1926
Der unsterbliche Franz (Operette, 4 scenes, E. Decsey), Vienna, Volksoper, 24 April 1928
Mondnacht (3), Berlin, Staatsoper, 13 Nov 1928
Das Veilchen (3), Vienna, 8 Dec 1934
Other ops unperf.

OTHER WORKS

3 Männerchöre (1913); Str Qt, A (1913); Sonata, vc, pf, perf. 1915; Vaterland; sym. poem (1915); Str Qt, E♭ (1917); Tänze aus Österreich, pf/orch (1918); Sym., f (1918); Grosse Messe mit TeD, D, solo vv, chorus, orch, org, 1925; Das Lied von den Bergen, sym. poem, male chorus, orch (1930); Sym., c, perf. 1934; Requiem, inc.; other patriotic choral pieces and songs

ERIK LEVI

**Bittoni, Bernardo (Raimondo)** (*b* Fabriano, 20 Aug 1756; *d* Fabriano, 18 May 1829). Italian composer. He studied music in Fabriano, first under his father, Mario Gaetano Bittoni (*c*1723–1798), *maestro di cappella* from 1743 at the cathedral, and later under a teacher named Lombardi. In March 1779 Bernardo was named *maestro di cappella* at Rieti Cathedral. In 1798 he became *maestro di cappella* and organist at Fabriano and also took over the music school founded by his father. He was invited back to Rieti in 1815, but did not go. Bittoni was a noted improviser on the organ and an excellent violinist. He composed several oratorios and a large amount of church music (in *I-FAd, MAC, RI*), most of it with instrumental accompaniment. In his time he was regarded as a great contrapuntist. His brother Luigi Bittoni (*b* 1753) was from 1774 to 1789 *maestro di cappella* at Macerata Cathedral and later at Camerino.

**Biumi** [Bimio], **Giacomo Filippo** (*b* ?Milan, *c*1580; *d* Milan, 24 Nov 1653). Italian composer and organist. He was organist of at least two churches in Milan, first of S Maria della Passione, afterwards (certainly in 1612) of S Ambrogio. On 30 March 1623 he was appointed organist at the second organ of Milan Cathedral, succeeding Cesare Borgo, and he held this post until his death. In January 1651 the cathedral chapter saw that he was too old to do the job alone and gave him an assistant, Francesco Fumasio. His contemporaries praised Biumi as an excellent organist. In his sacred music he followed the polyphonic tradition strictly, whereas he showed a freer inventiveness in his instrumental *canzoni alla francese*. The four-part canzonas and the correntes in this volume are rich in modern stylistic elements, while the eight-part canzonas show the influence of Giovanni Gabrieli and the Venetian polychoral style.

MARIANGELA DONÀ

**Bi-virga, tri-virga** [double virga, triple virga]. In Western chant notations, groups of *virgae* of the same pitch. *See* VIRGA.

**Biwa.** Generic term for necked bowl-lutes of Japan. Discussed here are construction and tunings; for history and schools, *see* JAPAN, §V, 3. Forms of *biwa* have been played in Japan since at least the 8th century. Early forms used for *gagaku* derived from China, but *biwa* subsequently developed in Japan have been played in the performance of various kinds of oral narrative and Buddhist ritual texts (*sūtra*s). While structural dimensions and playing techniques vary, all *biwa* share a shallow, pear-shaped body and neck cut from a single piece of wood, four or more wooden frets, a shallow cup-shaped wooden bridge that transmits the vibrations of four or five strings of entwined silk, and a large plectrum. With the exception of the *gogen-biwa*, an archaic instrument played in *gagaku* until perhaps the 9th century (*see also* JAPAN, §§II, 3(i); V), the strings of *biwa* are secured to tuning pegs inserted into a pegbox bent back nearly perpendicular to the neck. Common to most forms of *biwa*, moreover, is a distortional timbral element, a buzzing quality (*sawari*) that is produced by contact between a short length of fretted or open string with the upper surface of either a fret or the joint of the neck and pegbox (see illustration).

The *gaku-biwa* is the largest of all forms (Table 1). Unlike *biwa* used for vocal performance, its timbre lacks *sawari*. The strings are touched lightly against the upper edge of each of four frets, without use of additional pressure to produce higher pitches at a given fret. A relatively thin, round-tipped plectrum is wielded at an acute angle to the four strings, which are tuned differently for each of the principal modes of the modern *tōgaku* and *saibara* repertories.

The *heike-biwa* is closest in form to the *gaku-biwa*, although it is much smaller and is sounded by a larger, sharp-tipped plectrum. In modern practice both Nagoya and Tsugaru tradition instruments have five frets, but the positioning of frets differs. Unlike *gaku-biwa*, left-hand

*Satsuma-biwa player: the plectrum (bachi) is far broader than that used for any other genre of biwa or shamisen music*

pressure is applied between the frets, and is used to produce pitches raised by a major 2nd or less at some frets. The tunings used in the Nagoya and Tsugaru traditions of *heikyoku* differed until the mid-1960s, but have since been identical, with the exception of a revised tuning used by the Tokyo-based performer Hashimoto Toshie.

Until the 20th century it seems that there was little or no standardisation of instruments formerly played by blind priests (*mōsō*) and blind professional narrative performers (*zatō*) in south-western Japan. Common to all instruments of the region, however, are four strings, strong *sawari* and relatively tall frets that allow for manipulation of pitch by up to a minor 3rd at some frets. *Mōsō* and *zatō* have required a collapsable instrument for both seasonal ritual work and itinerant secular performance. One of two relatively small, light forms was the *sasa-biwa*, named for its slender shape (*see* JAPAN, fig.1). The others are what scholars have dubbed *uguisu-biwa*, and *hyōichi-biwa*; both are shorter, rounder-bodied instruments. A large form of *sasa-biwa* with a relatively deep resonating chamber was used by *zatō* in the Higo region. On such instruments, various techniques were employed to regulate *sawari*, including the insertion of a detachable strip of bamboo between the strings and the bridge, and the insertion of extra soundposts. Plectra and tunings vary by region, but extant data point to a distinction between tunings used for performing *sūtras* (usually called *rokuchōshi*) and those for secular narrative repertory (*honchōshi* tuning). From the early 20th century, many *mōsō* and *zatō* started to use standard four-string *chikuzen-biwa* and *satsuma-biwa* (albeit with carrying straps, often made from a string of *juzu* prayer beads).

The *satsuma-biwa* and *chikuzen-biwa* both derive from instruments formerly played by *mōsō*. The foremost distinguishing features of the *satsuma-biwa*'s structure are its large, thin plectrum (see illustration), tall frets and its slightly convex soundboard. The hardwood plectrum is often intentionally struck against the soundboard, either by itself or concurrently with a plucked string. The outward curve of the soundboard is said to have been an innovation of the putative designer of the modern instrument, and may have been influenced by the form of European string instruments introduced by Jesuit priests in the 16th century. The four-string variety is now often called the *seiha* instrument, for many Kinshinryū and all

* Tuning is relative to the pitch of the voice in all cases except *gaku-biwa*, which is tuned relative to the fixed pitches of the *shō*

Nishikibiwa school and Tsurutaryū players have adopted a five-string instrument, also called the *nishiki-biwa*. The *seiha* instrumental technique is distinguished by the production of ornamental figures through left-hand regulation of pressure during the decay period of plucked tones.

The four-string *chikuzen-biwa* was a little-altered version of a form of *biwa* played by *mōsō* in the Chikuzen region. Its tuning is the same as the *shamisen*'s basic tuning, *honchōshi*, for all repertory except a small number of advanced pieces taught to chosen students. It also inherited from the *mōsō* instrument a strong *sawari*, enhanced by the placement of bamboo strips across the top of its frets. Popular among many thousands of amateurs between about 1900 and 1920, the four-string instrument was produced and sold cheaply, but was gradually displaced by the five-string instrument, which provided a far larger range of melodic and technical possibilities. The ornate instrumental patterns developed for both varieties of *chikuzen-biwa* require rapid left-hand movement over the frets, as well as subtle microtonal inflection of individual pitches in the course of melodic phrases.

HUGH DE FERRANTI

**Bizcargui, Gonzalo Martínez de.** *See* MARTÍNEZ DE BIZCARGUI, GONZALO.

**Bizet, Charles.** *See* BIZEY, CHARLES JOSEPH.

**Bizet, Georges (Alexandre-César-Léopold)** (*b* Paris, 25 Oct 1838; *d* Bougival, nr Paris, 3 June 1875). French composer. Bizet might have surpassed all the many composers active in France in the last third of the 19th century had it not been for his untimely death at the age of 36. *Carmen*, first performed three months before his death, has become one of the most popular operas of any age.

1. Life. 2. Stage works. 3. Vocal works. 4. Orchestral music. 5. Piano music. 6. Posthumous reputation.

1. LIFE. Both of Bizet's parents were musical. His father, Adolphe-Armand Bizet (1810–86), came from a family of artisans in Rouen. He had set up in Paris as a hairdresser and wigmaker, but by the time of his marriage in 1837 he had become a singing teacher. He was also a modest composer, with a few published works, but he was evidently not very highly regarded as a musician, even by his son, who leaned more towards his mother's guidance. She, born Aimée Delsarte (1815–61) in Cambrai, came to Paris to stay with her brother François Delsarte, a singing teacher of much greater eminence than his brother-in-law and a champion of the works of Gluck and of classicism in general at a time when such things were receding from fashion. Delsarte was a musician of eccentric and unorthodox tastes who exercised an important influence on his brilliant nephew, and his wife, a professor of solfège at the Conservatoire, was yet another musician in the family. Bizet's mother taught him to read music alongside his other early lessons, and she probably taught him the piano too.

Bizet was his parents' only child, and he took the name Georges in preference to his three grander baptismal names. The family lived in the northern part of Paris, and the proximity of six Delsarte cousins provided the boy with company. Bizet's musical gifts were evident at an early age. He liked to listen outside the door of the room in which his father was teaching. At the age of eight his father called him in and was astonished to hear him sing a song he had heard without looking at the music. The following year Bizet's father decided to enrol him at the Conservatoire, and there is little doubt that he was admitted on merit alone, even without the support of Delsarte and his connections. He enrolled on 9 October 1848, while still nine years old.

For the next nine years the Conservatoire, not far from his home, was the centre of his life and the focus of his rapid musical development as pianist and composer. He was never in danger of becoming too narrowly wedded to music since he was already an avid reader and a boy of unusual intelligence. Of Auber, the Conservatoire's elderly director, Bizet always had a poor opinion, but he was blessed with sympathetic teachers. He started in Marmontel's piano class, and won a *premier prix* for solfège within six months of his arrival. Zimmerman, Marmontel's predecessor now in retirement, took an interest in the boy and gave him private lessons in piano and solfège. Marmontel's efficacious teaching turned Bizet into a brilliant pianist, soon to be well known for his exceptional gifts as a sight-reader. He won a *second prix* for piano in 1851 and a *premier prix* the following year.

In 1852 Bizet entered Benoist's organ class and a year later he began to take the composition class of Fromental Halévy, a composer of distinction with an enquiring mind. Unlike many other Conservatoire teachers, Halévy had a busy career in other spheres, for his operas were regularly staged at the Opéra and the Opéra-Comique, and in 1854 he became Permanent Secretary of the Institute, a position of immense prestige in French academic circles. Bizet was undoubtedly drawn by Halévy's interest in a wide range of intellectual pursuits, and he was soon to be on intimate terms with his family; Geneviève, Halévy's daughter, later became his wife. In 1854 he won a *second prix* for both organ and fugue, and in 1855 a *premier prix* for both.

Equally important for his development, and more crucial to the growth of his musical style, was the figure of Gounod, certainly the leading influence on Bizet in his formative years. Bizet probably encountered Gounod through Zimmerman, whose daughter Gounod married in 1852. Gounod is said to have deputized for the ailing Zimmerman on a number of occasions and thus acted as Bizet's teacher. The works which most impressed Bizet

1. *Autograph MS of the opening of Bizet's Symphony in C, composed 1855 (F-Pn)*

were *Sapho*, played at the Opéra in 1851, the choruses for Ponsard's tragedy *Ulysse*, played at the Comédie-Française in 1852, and the First Symphony (1855). 'You were the beginning of my life as an artist. I spring from you', Bizet told Gounod in later years. Each took a close interest in the other's work for many years, although there were times when their friendship was less close. A substantial correspondence survives.

Bizet's impressive record at the Conservatoire led inexorably to the institution's highest accolade, the Prix de Rome. With Halévy's encouragement he entered in 1853, when he was 14, but was eliminated after the preliminary round. He did not compete again until 1856 when he reached the final round. Although his cantata *David* was judged to be the best, he was awarded only a *second prix*; there was therefore little surprise in his winning the Prix in 1857, when two *premiers prix* were awarded, to Bizet and to Charles Colin. His cantata *Clovis et Clotilde* was performed at the Institute ceremony on 3 October 1857, and he left for Rome the following December. He was 19 years old.

Behind this successful academic record Bizet was rapidly maturing as a composer and pianist. His first surviving works are a handful of piano pieces from before 1854. In that year three of his songs appeared in print, two of them in a collection that included one of his father's. Again through the agency of his father in all probability, three piano pieces were published in *Le magasin des familles*, beginning with a *Méditation religieuse* in 1854 or 1855 and two further piano pieces in 1856. Bizet's true gifts as a composer spring into view in 1855 with the composition of his first opera, *La maison du docteur* (although little is known about its origin or precise date), an overture in A major, and with his earliest work to have entered the repertory, his Symphony in C. Not performed until 1935, this symphony reveals an extraordinarily accomplished talent for an 18-year-old student, in melodic invention, thematic handling and orchestration (fig.1). Few contest its claim to surpass Gounod's First Symphony, on which Bizet was working as arranger that year and which was clearly his model.

In 1856 Bizet composed his second opera, a setting of *Le docteur Miracle* by Léon Battu and Ludovic Halévy.

Offenbach had picked these two novice librettists to provide a one-act text for a competition designed to raise the status of operetta. Ludovic Halévy was Fromental's nephew just embarking on a remarkable career. He was later to supply Offenbach with many of his successful texts, and won immortality as one of the librettists of *Carmen*. The jury for the competition, which included both Fromental Halévy and Gounod, awarded the prize equally to Bizet and Charles Lecocq, so that the two winning works were staged on consecutive evenings in April 1857 at the Théâtre des Bouffes-Parisiens. The award of the Prix de Rome a few months later confirmed his striking prospects of a successful career.

At the same time Bizet was beginning to earn recognition in the public arena as an arranger of other composers' music for Parisian publishers. This was to become a major source of income in later years and also a tremendous drain on his precious time. Since he did not arrange the *Ulysse* choruses in 1852, as often supposed, his first certain assignment was the vocal score of Gounod's *La nonne sanglante* in 1855, followed by the arrangement for four hands of the Gounod symphony, published by Colombier. He seems to have preferred this labour to giving piano lessons, although it is certain that he was active as a piano teacher during his Conservatoire years.

The sojourn in Rome filled nearly three years, taking him away from Parisian music from December 1857 until September 1860. The events that he most regretted missing were the appearance of three new Gounod works at the Théâtre Lyrique, *Le médecin malgré lui* in January 1858, *Philémon et Baucis* in February 1860, and especially *Faust* in March 1859. But he had a lively taste for Italian music, particularly Rossini, and was not averse to turning his hand to a fresh style. Italy offered Bizet, like most Prix de Rome winners, an opportunity to explore the landscape, drink in Italian art and architecture, listen to Italian opera, and be lazy or hard-working at will. He felt free, perhaps for the first time, to indulge his taste for women and to remain youthful for a few years more. Throughout this period he maintained a regular correspondence with his mother, reporting every fortnight on his doings and providing the most substantial body of letters of his whole career.

The Parisian Bizet had never travelled far from the city, so the impression made by the landscapes of southern France and northern Italy was profound. In addition he set eyes for the first time on the sea. He travelled with a group of fellow *pensionnaires*, sailing from Genoa to Livorno, and stopping in Pisa, Siena and Florence en route. Their destination was the Villa Medici in Rome, home of the French Institute under its director Victor Schnetz, and here Bizet settled in for a long and very agreeable stay. He made regular excursions into the mountains and in his second year went further afield first to Anzio, then to Naples and Pompeii. In his third year he went north to Perugia, Assisi, Bologna and Venice on his way home to Paris. He delighted in the art and architecture that was everywhere to be seen, and enjoyed the company of country people more than the citizens of Rome, especially since the French were politically suspect, thanks to Napoleon III's tireless meddling in Italian affairs.

He was a gregarious member of the French community at the Villa Medici, much in demand for his fluent piano-playing and his lively, rather blunt character. He enjoyed social occasions and made many new friends, especially among the painters and sculptors that shared the premises. In April 1858 a new arrival, Edmond About, boulevardier and travel writer, ruffled a few feathers but became a friend who genuinely admired his music. There were few musicians there to interest Bizet until the arrival in 1860 of Ernest Guiraud, whom he had known before in Paris and who was to remain a lifelong friend.

High spirits and his delight in the Italian way of life could not mask a certain anxiety about his prospects as a composer and the progress of his work. He was frustrated too by the lack of good music to be heard in Rome. He did not grasp the significance of Verdi's striking advances in the 1850s, for he disliked *Un ballo in maschera* (which was first heard in Rome in 1859) and felt that his music was crude and lacking in true style. He was much more attached to Rossini, Mozart and Mendelssohn, forgetting for a moment the basis of his own style in Meyerbeer and Gounod. Conforming with the rather easy-going regulations of the Prix de Rome, Bizet sent one *envoi* each year and started to make a habit of pondering new projects and abandoning them after a little thought (and sometimes a few drafts and sketches).

He composed a *Te Deum* in the spring of 1858 and entered it for the Rodrigues prize, which was open only to Rome prizewinners. Nevertheless he did not win, ascribing his failure partly (and correctly) to his lack of experience in church music, and the *Te Deum* remained unpublished until 1971. His next work was an *opera buffa*, *Don Procopio*, entirely in the Italian style on an Italian libretto by Carlo Cambiaggio which had already been set by the younger Fioravanti in 1844. This was far more congenial to Bizet than choral music, but he submitted it in some apprehension since it did not match the Institute's regulations (he was required to write a mass). In fact it was well received and the judges commented on its 'easy and brilliant touch'. There was no prospect of staging it, however, and it remained unperformed until 1906.

His next step was to attempt a grand opera. Three subjects took his fancy in turn: Hugo's *La Esmeralda*, Hoffmann's *Le tonnelier de Nuremberg* and Cervantes's *Don Quichotte*, but it is unlikely that he composed much, if anything, for any of these. Self-doubt kept intervening, so he moved on each time to another project. An ode-symphony on Homer, *Ulysse et Circé*, was considered then abandoned, then an orchestral symphony, on which he worked for two months. Finally, in 1859, he worked out a scenario from Camoens's *Lusiads* relating Vasco de Gama's adventurous discovery of a sea-route to India. He persuaded a French poet resident in Rome, Louis Delâtre, to write the verses for an 'ode-symphonie' (the model was Félicien David's *Le désert*) in six movements for soloists, chorus and orchestra. When *Vasco de Gama* was ready to be submitted to the Institute, Bizet felt that he had never written anything so good, and it was in due course judged to display 'elevation of style, spaciousness of form, fine harmonic effects, and rich and colourful orchestration'. He planned a symphony on the subject of Rome which was not to be finished until eight years later. What he had achieved during his stay in Rome was not embarrassingly insignificant, yet not truly substantial enough to give him, or anyone else, much confidence about his making his way in Paris on his return. He was perfectly resigned to the struggle that lay ahead, but

curiously blind to the realities of the musical profession and frequently assailed by agonies of doubt.

He left Rome in July 1860 with Guiraud, taking a leisurely detour through north Italian cities and reaching Venice on 5 September. Here he learned that his mother was seriously ill; Guiraud returned to Rome while Bizet, with the architect Heim as his travelling companion, headed on in no particular haste to Paris. He was now thrust back into the routine that was to be his for the remainder of his life: the eternal quest for opera engagements, courting directors, patrons and singers, offering compositions to reluctant publishers, organizing and conducting occasional concerts, working as a rehearsal pianist and accompanist, and making transcriptions and arrangements of other composers' works for money (the vocal score of Reyer's *La statue*, which he greatly admired, occupied him in the spring of 1861). Bizet never again travelled outside France (except to Baden-Baden and Belgium), and rarely left Paris. Without the steady bulletins of his letters home we now have sketchier information about his daily life, and his correspondence is practical and laconic; his handwriting, never good, becomes increasingly illegible. The production of four operas in Paris in the next 15 years are landmarks in his brief career, but between those significant moments it is a tale of struggle, with some successes and many reverses.

For two years, while his Rome scholarship continued, he had no need to worry about money. His mother's illness brought different anxieties, and he was not able to set up separate living quarters as he had hoped. In his first year back in Paris the highlights were the performances of *Tannhäuser* at the Opéra in March 1861, with Wagner's ignominious rejection by a noisy public, and the occasion two months later when Bizet had the opportunity to meet Liszt and display his phenomenal powers as a sight-reader, an event recounted by Pigot with the aura of legend; Liszt is said to have declared Bizet to be the equal, as a pianist, of von Bülow and himself. In September 1861 his mother died at the age of 45; relations with his father, who was to outlive him by 11 years, had never been entirely easy, and they were sharply complicated the following year by the birth of a son, Jean, to the family maid, Marie Reiter. The boy was given to believe that he was Adolphe Bizet's child, yet many years later Marie, who remained in the service of the Bizet household, revealed that the true father was Georges. Another death that affected Bizet deeply was that of his teacher and mentor Halévy in March 1862. For his funeral he collaborated on a setting of the 23rd Psalm.

For his 1861 submission to the Institute Bizet presented two movements from an incomplete symphony and an overture, *La chasse d'Ossian*. The two symphony movements, a Funeral March and a Scherzo, were played at the Institute on 12 October, and while the March was thought to resemble the slow movement of Beethoven's Seventh Symphony too closely, the Scherzo enjoyed some success with three more performances within 16 months. Although the overture has disappeared, the March, still unpublished, was partly absorbed into *Les pêcheurs de perles*, and the Scherzo became part of the symphony *Roma*, completed in 1868.

In the next few years he was extremely productive, and his career prospered. Soon after his return from Rome he had asked Ludovic Halévy for the libretto of a one-act opera to submit as his final *envoi*, but he never followed it up, perhaps because a commission for a one-act opera came his way from the Opéra-Comique. This was *La guzla de l'émir*, to a libretto by Barbier and Carré, Gounod's usual librettists, which he could not refuse. Such a commission was a frequent but by no means guaranteed bonus for returning Rome scholars. The opera was composed in 1862 and submitted as his *envoi* for that year. It was warmly commended for its elevated feeling and vivacious style, and it duly went into rehearsal at the Opéra-Comique, but Bizet was forced to withdraw it when a superior commission, for a full-length work, came from the Théâtre Lyrique, a condition of which was that the recipient should not have had a work previously staged in Paris. This was to be *Les pêcheurs de perles*, composed rapidly in the summer of 1863. *La guzla de l'émir* has disappeared, although it is certain that parts of it were absorbed by *Les pêcheurs de perles* and perhaps other works, and a setting by Théodore Dubois of the same libretto was staged in 1873.

Meanwhile Bizet had composed the bulk of a third opera, *Ivan IV*, whose origins seem to lie in a visit he paid to Baden-Baden in the summer of 1862 where he assisted Reyer with the production of his opera *Erostrate*. Bénazet, who directed the Baden-Baden festivals, intended to mount *Ivan IV* in 1863. Gounod had worked on the same libretto for some years, but to no avail. We may suppose that Bizet's urgent absorption in *Les pêcheurs de perles* in the summer of 1863 prevented the other opera's completion at this time; furthermore parts of it were borrowed for inclusion in *Les pêcheurs de perles*.

In the concert hall Bizet had some success with his Scherzo, for it was played by three different organizations in the winter of 1862–3: the Cercle de l'Union Artistique conducted by Deloffre, the Concerts Populaires conducted by Pasdeloup, and the Société des Beaux-Arts conducted by Bizet himself. On 8 February 1863 he conducted *Vasco de Gama* at a concert of the Société des Beaux-Arts, its only hearing in his lifetime. Despite all this activity he began to feel the pinch of financial insecurity as his scholarship came to an end. He was working as an arranger for Gounod's publisher Choudens, a liaison that was to have far-reaching implications for the fate of his own music since Choudens was also to become Bizet's principal publisher, starting with *Les pêcheurs de perles* in 1863.

This work, Bizet's first full-length opera to be staged and today restored to the repertory, was commissioned by the Théâtre Lyrique in April 1863 for performance that September. Borrowing freely from earlier works, Bizet completed the score in time and had the satisfaction of seeing 18 performances before the end of November (fig.2). This was a respectable number, but Bizet regarded it as a failure, particularly in view of the hostile reaction from the press, who condemned the libretto as absurd and the score as noisy and offensive. Some were shocked by the impudence of Bizet, at the age of 24, appearing on stage at the end to take a bow. The best notice came from Berlioz, writing his last feuilleton in the *Journal des débats*, which recognized Bizet as a serious talent with a great future. Bizet was, reciprocally, thrilled by Berlioz's *Les Troyens à Carthage*, which was put on in the same theatre a few weeks later. He even offered to fight a duel in its defence.

Carvalho, director of the Théâtre Lyrique, with characteristically reckless courage regarded *Les pêcheurs de*

2. *Poster by Prudent Louis Leray for Bizet's 'Les pêcheurs de perles': lithograph printed for Choudens at the time of the original production, Théâtre Lyrique, Paris, 1863*

*perles* not as a failure but as evidence of promise. He scheduled *Ivan IV* for production in the spring of 1864, but unknown delays and difficulties kept it from performance. This state of affairs continued for nearly two years when Bizet, in frustration, withdrew the opera from the Théâtre Lyrique and offered it to the Opéra. It was, after all, more suited to that theatre, being closer to the Meyerbeer style than anything else he ever wrote. But the Opéra never took it up and it remained unperformed until 1946. Fragments of it, according to Bizet's well-established habit, found their way into later works, notably *La jolie fille de Perth*.

The years 1864–6 were disappointingly bleak after the previous two. His father had built two adjacent cottages at Le Vésinet, west of Paris, for himself and his son, where Bizet liked to spend the summer months, while he spent the winters in Paris largely occupied with his work as an accompanist and arranger. He arranged the Bach/Gounod *Ave Maria* for piano solo, and edited Handel's 'Harmonious Blacksmith' variations; he assembled a collection of 150 transcriptions for the publisher Heugel under the title *Le pianiste chanteur*; he arranged six Gounod choruses for piano solo. He also published a little music of his own, including the song *Vieille chanson* and a group of piano pieces, a 'song without words' entitled *Venise*, the virtuoso *Chasse fantastique*, and the six *Chants du Rhin*, based on poems by Méry. Heugel commissioned a collection of six songs, the *Feuilles d'album*. He took a few composition students, to one of whom, Edmond Galabert, we are indebted for some affectionate memories of Bizet in the years 1865 to 1869 and a volume of correspondence that reveals much about Bizet's view of his art. Another student, Paul Lacombe, began to work with Bizet in March 1867 by correspondence and remained a close friend.

Despite his lack of interest in *Ivan IV*, Carvalho still had faith in Bizet's talent. In June 1866 he signed a contract for a four-act opera to be staged at the Théâtre Lyrique. The libretto, based on Scott's *The Fair Maid of Perth*, was by Jules Adenis, a friend of Bizet's, and the eccentric, successful Saint-Georges. Bizet's response was immediate and enthusiastic, and by the end of the year *La jolie fille de Perth* was finished. He was impatient to see it staged, especially since the 1867 Exposition Universelle promised to bring big summer crowds to Paris. In fact it was to be Gounod's *Roméo et Juliette* on which Carvalho relied for his summer success, so *La jolie fille de Perth* after several postponements did not open until December. It was well received, and Bizet was delighted, yet it did not draw the public and enjoyed only 18 performances, the same number as *Les pêcheurs de perles* in the same theatre four years before. The precarious state of the theatre's finances was reflected in the recycled sets and costumes that did not escape notice. A production in Brussels followed in April 1868, but Bizet disliked the performance and it made little impact there. Pierre Berton later recalled that it was disappointment over this opera that marked Bizet's brow henceforth with 'furrows of anxiety that he never lost'.

1867 had brought a crop of new competitions, one from each of the three main Paris opera houses, and one for a cantata for the Exposition. Bizet, one of 823 contestants for the cantata, came within the first 15, but his cantata was not performed and is now lost. The winning cantata by Saint-Saëns did not receive a performance either. At first Bizet did not intend to enter the Opéra's competition since he was negotiating for a contract with that theatre for an unnamed opera on a libretto by Sauvage and Leroy. Instead he encouraged his pupils Galabert and Lacombe to set the selected libretto, an appealing story called *La coupe du roi de Thulé* by Blau and Gallet. The correspondence with Galabert discusses the dramatic potential of the libretto in some detail. Eventually Bizet was prevailed upon to set the text too, which he did between October 1868 and the early months of 1869. But his opera was rejected, like Massenet's, in favour of Eugène Diaz's setting, played in 1873 and instantly forgotten. The dismemberment of Bizet's score, of which only fragments remain, is one of the most galling features of his posthumous fate.

Since 1866 his creative activity had returned to the level of 1862–3. He now completed the symphony *Roma*, first conceived in 1860. It was performed (lacking the scherzo) in February 1869 by Pasdeloup at the Cirque Napoléon, its only hearing in Bizet's lifetime. He contributed the first act of a composite operetta *Marlbrough s'en va-t-en guerre* played at the Théâtre de l'Athénée two weeks before *La jolie fille de Perth*. He composed three songs for Choudens to publish, including the masterly *Adieux de l'hôtesse arabe*, and an unusual piano piece, the *Variations chromatiques*, which he dedicated to a composer he greatly admired, Stephen Heller. A huge amount of time in 1867 was devoted to arranging the whole of Thomas's *Mignon*, the current success at the Opéra-Comique, first for piano solo and then for piano duet; the following year he performed the same two laborious tasks for Thomas's *Hamlet*.

It is not known when Bizet first met Geneviève, the younger daughter of his teacher Fromental Halévy, although he must have known her as a little girl when he was Halévy's student at the Conservatoire. When her father died in 1862 she was 13. Her sister died two years later, and her mother, who suffered from recurrent mental disturbance, thereafter entrusted her care to relatives. She was a beautiful young woman with whom Bizet was in love by 1867 and they were engaged in October of that year. But the family, prosperous Jewish bankers on her mother's side who were in the strange position of being both wealthy yet currently hard up, disapproved of her marriage to an unsuccessful composer and the engagement was broken off. Had her father been alive, Bizet's path to marriage might have been smoothed. In the event they were married in a civil ceremony (Bizet had no tolerance for established religion) in June 1869 and were very happy for a while. But Bizet's lack of serious success, his brusque character and her persistent neurosis touching on mental disorder, made the last years of Bizet's short life less than tranquil. A son Jacques was born to them in 1872, destined for a turbulent and tragic career.

Immediately after his marriage Bizet paid homage to his father-in-law by completing and revising the opera *Noé*, which Halévy had left unfinished at his death. With his usual parsimonious instincts he used up some old music for this purpose, including sections of *Vasco de Gama*, but certain parts of it were newly composed. The extent of Bizet's contribution has never been fully established, and the vocal score published when the opera was finally performed in Karlsruhe ten years after Bizet's death has confused the issue further. The opera was supposed to have been staged at the Théâtre Lyrique under its new director Pasdeloup, but the usual financial problems and the outbreak of war in 1870 made it impossible. With *Noé* done Bizet started to plan a number of new works, some of which he had been contemplating for years; none of them were ever completed, some not even started: an opera on the life of Vercingetorix, an opera on Mistral's *Calendal* for the Opéra-Comique, an opera on Richardson's *Clarissa Harlowe*, an opera on the Indian epic *Ramayana*, and a setting of Sardou's libretto *Grisélidis*.

Lack of any firm commitment from opera managements and a chronic indecision about the direction of his own career would probably have left all these projects in limbo even without the outbreak of the Franco-Prussian War in July 1870. It was assumed that Napoleon III, like his uncle, would throw the German armies into retreat, but the realities of defeat, siege and humiliation quickly cast France into chaos. Bizet, who, like Saint-Saëns, Massenet and many others, enlisted in the National Guard, greeted the proclamation of the Third Republic with enthusiasm. He and Geneviève endured the hardships of the siege with grim determination. At the armistice on 26 January 1871 they were free to leave the city, so they travelled to Bordeaux to visit Mme Halévy. This caused distress of a quite different but equally severe kind, since the meeting of mother and daughter triggered hysterical outbursts on both sides. They hurried back to Paris with Geneviève in need of lengthy recuperation. Next came the two months of Commune and civil bloodshed from which they escaped by going first to Compiègne and then to Le Vésinet, within earshot of gunfire in Paris.

The restoration of peace in June brought with it the prospect of reinvigorating French music from within. Thomas took over the direction of the Conservatoire and Saint-Saëns put his energies into the new Société Nationale de Musique with the aim of building a new concert repertory by French composers. Within the year Bizet had completed two small masterpieces, leaving all his other projects on the shelf. The first was a one-act opera, *Djamileh*, commissioned by the new directors of the Opéra-Comique to a libretto by Gallet based on de Musset's *Namouna*. It was staged in May 1872 and was poorly sung and poorly received, with only 11 performances, at some of which it shared the bill with Saint-Saëns's *La princesse jaune*, his first opera to be staged. The other work of 1871 was the suite of 12 pieces for piano duet, *Jeux d'enfants*, with six of them also orchestrated. The orchestral suite (containing just five pieces) was rehearsed by Pasdeloup in 1872 but withdrawn by Bizet, then performed by Colonne a year later. The four-hands suite was published by Durand in 1872 and has remained popular among duettists to this day. Durand also published at this time Bizet's transcription for piano solo of Schumann's op.56 Etudes for pedal piano.

Despite the obscurity of *Djamileh*'s passing, Bizet was soon engaged to write his final two masterpieces, *L'arlésienne* and *Carmen*. The indefatigable Carvalho, Bizet's patron at the Théâtre Lyrique, was now director of the Vaudeville theatre, where he planned to mount a production of Daudet's play *L'arlésienne*. As with most incidental music of the period, the orchestra was small and the musical insertions mostly short. Bizet relied a good deal on the device of *mélodrame*, much used in *opéra comique* since the 1850s, where music is played under spoken dialogue. It was particularly well suited to this Provençal drama. The music was composed quickly in the summer of 1872 and the play opened on 1 October. It was not well received, and both Daudet and Bizet were bitterly discouraged. The musical press took little notice of incidental music for plays and the theatrical press found Bizet's music too complex and demanding, but one or two musicians whose discernment Bizet appreciated, among them Reyer and Massenet, understood the special qualities of this music in the context for which it was designed.

Bizet quickly arranged four extracts from the music as a suite for full orchestra, and this was played by Pasdeloup in November. Its success was immediate and lasting, and the general familiarity of this music has generated occasional revivals of the play. His next task was to work once again for Gounod, preparing *Roméo et Juliette* for its revival (in a revised form) at the Opéra-Comique in January 1873. Gounod, who had fled to England to escape the siege of Paris, was entangled in London affairs and unable to be present himself. Bizet was then able to embark on the opera that du Locle and de Leuven, the Opéra-Comique directors, had proposed with Meilhac and Ludovic Halévy as librettists. *Carmen*, Mérimée's novel from 1845, was Bizet's own suggestion, but its risqué character and the fact that Carmen meets a violent death on stage at the end of the opera caused misgivings that split the two directors and held up the opera's prospects of being staged.

We have little information about progress on the opera, although it is likely that much of it was composed if not

orchestrated by the summer of 1873 when he began to discuss the choice of singers for the title role. But then he set the work aside, first to stand in again for the absent Gounod, assisting with his incidental music for Barbier's play *Jeanne d'Arc*. Bizet helped with rehearsals, arranged the vocal score and transcribed the complete work for piano solo. He was also approached to write a new work for the Opéra. This was something that he could scarcely refuse, for the great baritone Faure was to play the leading role and the subject was to be based on the legendary Spanish hero El Cid, with a libretto by Gallet. Bizet could not have asked for a better proposition and he worked at incredible speed. *Don Rodrigue*, as the opera was called, was drafted by October of that year. Then the misfortune that never seemed to be far from Bizet's heels struck again. The Opéra's celebrated theatre in the rue Le Peletier, where the genre of grand opera had held sway during Meyerbeer's long reign, burned down on 28 October. *Don Rodrigue* had always, in any case, been Faure's idea, not that of the director, Halanzier, who felt no obligation to pursue it now that he had no theatre of his own.

In the winter of 1873–4 Bizet composed a 'dramatic overture' *Patrie*, which was played by Pasdeloup on 15 February 1874 and was well received. Its main theme came from Act V of *Don Rodrigue*. He could then turn his whole attention to *Carmen*. In December 1873 Galli-Marié was engaged to sing the title role, which pleased Bizet since he considered her right for the part and since she had enjoyed enormous success at the Opéra-Comique in Maillart's *Lara* in 1864 and even more in the title role of Thomas' long-running *Mignon* since 1866. Rehearsals were repeatedly postponed, for de Leuven found the libretto unacceptable, a dilemma which was resolved by his resignation early in 1874. Du Locle, now sole director of the Opéra-Comique, was more sympathetic to the work, though never free of misgivings about the music or the public's response to something so at odds with the conventional family entertainment for which the theatre was thought to exist.

Bizet's marriage was clearly under strain at this time, and it probably never recovered. Georges was often moody, Geneviève in need of constant attention. They separated for at least two months, although they spent the summer of 1874 together in a villa in Bougival, not far from Le Vésinet. There she is said to have enjoyed the attentions of the eccentric pianist Delaborde, their neighbour, and gossip later linked Bizet's name with Galli-Marié, a liaison which is not impossible in the backstage turmoil which the production of *Carmen* was to undergo, although neither of these suppositions can be substantiated with any certainty. The Halévy family later destroyed many papers and letters from this period, but who that action was intended to protect is not clear.

*Carmen* was orchestrated at Bougival in the summer of 1874 and rehearsals began in September. Bizet arranged the piano score himself and played the piano for rehearsals. There were objections from both the orchestra, who found Bizet's forthright style of scoring beyond their reach, and the chorus, who were expected to act convincingly as individuals rather than respond in unison as a group. The women objected to having to both smoke and fight on stage (fig.3). Fortunately Bizet was firmly supported by Galli-Marié and by Lhérie, the Don José, so that few compromises had to be made. The rehearsal period was prolonged and difficult, and the first performance was not given until 3 March 1875. The conductor was Deloffre.

Despite the outraged response of many of the audience and the generally hostile response of the press, *Carmen* was not a failure. It ran for 45 performances in 1875 and three more the following year, a respectable number. As many were attracted as were repelled, perhaps, by its scandalous tone, and the appalling misfortune of Bizet's death may have awoken the curiosity of others.

Soon after the opening night Bizet suffered a recurrence of quinsy, which had often afflicted him before. He was undoubtedly depressed by the uncomprehending and ignorant tone of many of the reviews. This exacerbated the melancholy mood that had often beset him and may well have weakened his resistance to ailments from which in other circumstances he might have recovered. He was soon battling rheumatism and pain in his ears as well as the throat. Towards the end of May he moved with his family to Bougival, where he rashly went for a swim in the Seine, and on 30 May he suffered a severe attack of rheumatism followed by two heart attacks. He died in the early hours of 3 June, a few hours after the 33rd performance of *Carmen*. He was 36 years old. The funeral took place two days later at the church of La Trinité in Paris, and he was buried in the Cimetière Père-Lachaise.

In his *Portraits et souvenirs* Saint-Saëns spoke warmly of Bizet's openness and lack of guile: 'Loyal and sincere, he never hid either his friendships or his antipathies. This was a characteristic we both shared, although in other respects we differed completely, with different ideals. He was in search of passion and life, while I ran after the chimera of stylistic purity and formal perfection. Our endless conversations had a vivacity and delight that I have never enjoyed with anyone since.' He admired the dogged resolution with which Bizet refused to be discouraged by misfortune. There was an impetuous, youthful element in his nature and a driving energy which concealed the thoughtful intelligence which was always at work.

2. Stage works. Of the many operas that Bizet at one time planned or projected (30 in Winton Dean's enumeration) only six now survive in a performable version, and only five were performed in his lifetime, none with any real success. Yet he was unmistakably a dramatic composer and *Carmen* is one of the great operatic masterpieces of the 19th century. It is true that he was dogged by ill-fortune, that he was not well provided with librettos, and that press reception was consistently unfair. Some of his best material came to nothing through no fault of his own. At the same time he suffered from deep uncertainties about the direction of his career and was inclined to spend a good deal of time on projects which he might have been wiser to avoid. There was little point in writing operas that would not be performed, yet the state of Parisian theatres was such that almost no guarantee could ever be given that a work once composed would receive any performances at all. He lacked Wagner's dogged determination and he never enjoyed Verdi's commanding authority over theatre managements even though the Théâtre Lyrique, in the person of Carvalho, served him well and showed a perceptive faith in his talent.

His operatic taste was wide: he could as readily compose farce as high drama; he admired both French and Italian opera; he was less troubled than modern critics by theatrical absurdities (in *La jolie fille de Perth*, for

*3. Scenes from the first production of Bizet's 'Carmen', Opéra-Comique, Paris, 1875: engraving by Burn Smeeton and Pierre-Emile Tilly after Lamy, from 'L'illustration' (13 March 1875)*

example), and except in *Carmen*, which opened the door to a new genre of realistic opera, he was no reformer or visionary. He came to maturity at a time when the traditional genres of French opera, both at the Opéra and at the Opéra-Comique, were falling into obsolescence, yet his operas belong unmistakably to his time. He owed various debts to Rossini, Meyerbeer, Berlioz, Gounod and Thomas, but he was more advanced than any of them in harmony and orchestration. His critics saw only Wagner in any technical advances they might observe but his brilliant touches of harmonic and orchestral colour owe nothing to Wagner.

His habit of self-borrowing is a reflection of his uncertain, even casual, attitude to the setting of texts. From *Don Procopio* to *Carmen* he constantly pilfered his scores for pieces to re-use in later settings. The result can be awkward declamation (as in Don José's Flower Song), which never troubled him as it did Saint-Saëns or Massenet. He attached more importance to the sentiment and colour of words than to their metrical properties, and like Mozart, whose career his own in some respects resembles, he had a wonderfully sure feeling for the human voice. He thought deeply about the problems of dramatic music, as his letters testify, and had trenchant opinions about contemporary composers.

His first opera, the one-act *La maison du docteur*, exists only in vocal score and may not have been orchestrated. It was evidently written while he was a student. *Le docteur Miracle*, of 1856, also in one act, is an example of the newly emerging style of French operetta, spear-headed by Offenbach, a composer Bizet later came to despise. The centrepiece of the comedy is the 'Omelette Quartet' with its solemn and mock-heroic invocations to a poorly cooked omelette.

The next opera, *Don Procopio*, in two acts, is entirely Italian in style and spirit, with Cimarosa and Donizetti as its models. It is a brilliant, youthful work of great wit and invention. He infused a familiar idiom – vocal coloratura, patter declamation, swift-moving ensembles, and so on – with frequent original touches in harmony, orchestration and melodic style. One piece, a march, was borrowed from the Symphony in C; other sections were later used in *Les pêcheurs de perles* and *La jolie fille de Perth*, including the famous Serenade from that opera.

Several operatic schemes passed through his mind before the next complete work, *La guzla de l'émir*, on a traditional Turkish story, the loss of which is much to be regretted. In all likelihood it was substantially re-used in *Les pêcheurs de perles*, composed immediately afterwards in 1863. This three-act opera, set in Ceylon in ancient times, was originally designed as an opéra-comique with dialogue, and is now, after *Carmen*, Bizet's best-known work for the stage. The duet for Zurga and Nadir 'Au fond du temple saint' has become a popular hit familiar even to people who know nothing of opera. It is a noble melody accompanied with bald root-position triads and scored, on its first appearance, for flute and harp, a symbol of sanctity in French music of the time. Bizet relies heavily throughout on his great melodic gift, close in style to Gounod in this work, yet there is abundant evidence of his growing subtlety with harmonic and tonal colouring. The drama has a strong basis in the conflict between love and duty in the heart of Leïla, a priestess of Brahma, but it is inevitably weakened by its dependence on two separate vows pledged many years before, and the potential for conflict between jealousy and brotherly feeling is not given full scope, partly because space had to be found for the conventional apparatus of priests, dancing and incantation. The action strains credulity at times, although the ending, which shows an act of noble self-sacrifice by Zurga on behalf of the lovers who have deceived him, is powerful.

*Ivan IV*, Bizet's longest work, is a grand opera conceived for a large cast and orchestra, with a setting in the Caucasus and the Kremlin in the 16th century. The action is full of villainy, usurpation, revenge, vows of fidelity to race and family, poison, dissembling and scenes of entertainment and fantasy. There is no attempt to disguise the grand opera clichés. Bizet's invention is prodigal but without any real conviction, and some scenes are perfunctory or sentimental. He used many passages in later works. The orchestration of the last act is missing.

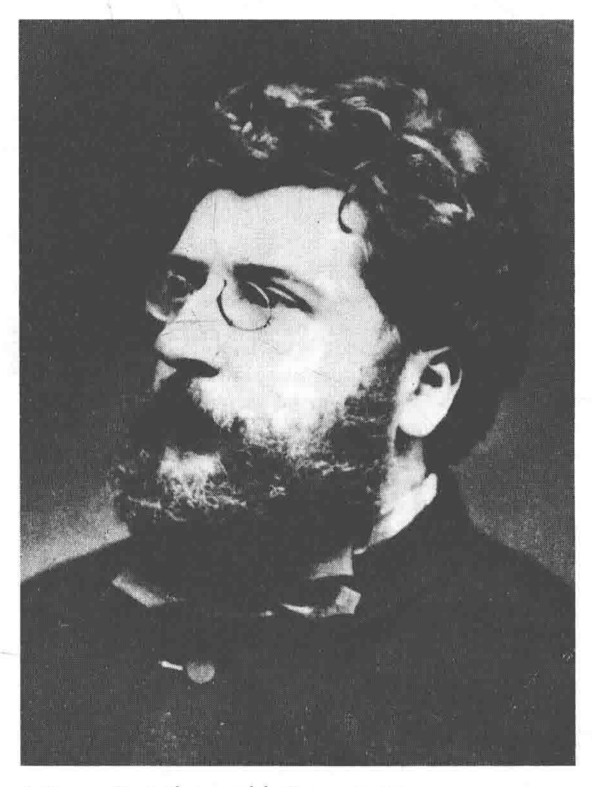
Of the shortcomings of *La jolie fille de Perth*, Bizet's next opera, he was well aware, although he was probably not troubled by the remoteness of the libretto from Scott's original. A persistent criticism, with which he privately agreed, was that the music had been 'sacrificed to the false gods of the quadrille, the *roucoulade*, and the concessions of coloratura'. The soprano role of Catherine was written for the coloratura of Christine Nilsson, who never sang it. Making Catherine coquettish justified her treatment as a coloratura, which in turn required a mad scene in the last act. Bizet did not attempt any Scottish colour at all. The strength of the opera lies in the vitality of its set pieces and individual numbers. Scenes of festivity, ensembles of bewilderment or challenge, duets and solos of different types: all this draws out the best of his gifts, full of wonderful melodic, harmonic and instrumental invention. It is hard to accept that such a fresh score belongs to an unstageable opera, but its fate is always more likely to be in the form of extracts than as a dramatic continuum. Smith's Serenade, the best-known piece from the opera and well worthy of its celebrity, was borrowed from *Don Procopio*.

The dismemberment of *La coupe du roi de Thulé* is a grave misfortune, since the 15 fragments that remain provide evidence of Bizet's acute sense of the stage and his growing maturity. In Winton Dean's words, it 'gives the first unmistakable sign of a tragic power that was to culminate in *L'arlésienne* and *Carmen*'. There are similar indications in the little that remains of *Clarissa Harlowe* and the more susbtantial fragments of *Grisélidis*. If Bizet had been able to complete and perform these three works, his legacy would have been infinitely richer. *Don Rodrigue*, too, survives in a tantalizingly incomplete form.

*Djamileh*, slight though its one-act *opéra comique* form and conventional orientalism may be, is a truly enchanting piece, full of inventive touches, especially of chromatic colour. There are opportunities for oriental melodies and dances, a comic servant and a dash of real passion. The role of the slave girl Djamileh is characterized from the beginning by a darkly expressive melody. Her main solo, the 'Ghazel', blends exotic colour, chromatic side-slips, suppressed passion and the key of D minor to give a strong foretaste of the Habanera in *Carmen*.

The nature of *L'arlésienne* forced Bizet to be economical, with only short passages of music for the most part and only a small orchestra, and in this he was triumphantly successful. The Prélude-Ouverture is an extended piece like the entr'actes that introduce each act, but elsewhere

the music consists for the most part of brief *mélodrames* under dialogue. They succeed superbly in delineating character with pointed and expressive themes, while the longer movements suggest a Provençal tone, using genuine melodies from the region. Daudet's drama has certain parallels with the story of Carmen, since the girl from Arles, who is never seen, bewitches Frédéri in rivalry with Vivette, a local girl of good family. On the eve of his wedding Frédéri is driven mad by thoughts of the unfaithful girl from Arles and he throws himself to his death. There is some lively music for the chorus, and the scoring is deft and apt, using a saxophone and a solo viola for special effects, plus the 'tambourin', a Provençal drum. The orchestral suite which Bizet fashioned out of four of the movements is scored for a larger orchestra. A second suite was put together by Guiraud after Bizet's death, incorporating a Minuet from *La jolie fille de Perth*.



In *Carmen* the promise of dramatic genius sporadically but increasingly displayed by all his operas since *Les pêcheurs de perles* attains magnificent fulfilment. The characteristic handling of chromatic harmony and subtle scoring seen in the *Jeux d'enfants* suite and *L'arlésienne* is the foundation of a fully mature style on which a whole series of great works might have been built, had he lived. He reached maturity at the same age as Verdi and Wagner but was tragically deprived of the opportunity to explore and exploit it. But at least *Carmen* is recognized as one of the greatest of 19th-century operas, and certainly the most popular. Its tunes are familiar to millions, and its evocation of Spain, where Bizet never set foot, has done as much to propagate the elements of the style as Spanish music itself.

*Carmen*'s framework is that of a traditional *opéra comique*, with spoken dialogue, two-verse couplets with choral refrains, some comic relief, and opportunities for local colour and exotic dances. The subsidiary characters were familiar to the genre: the comic pair Le Dancaïre and Le Remendado belong to a tradition going back to Auber's *Fra diavolo*, and the secondary leading roles Escamillo and Micaëla have kindred characters in Gounod. But Bizet went far beyond expectations in fashioning a drama of high tension thanks largely to the outstanding characterization of Carmen herself and to a lesser extent that of Don José, the passionate lover driven to despair. The literature abounds in interpretations of the opera, from Nietzsche's attempt to use it as a stick with which to beat Wagner, to more recent feminist readings which raise questions about patriarchal morality and the treatment of women as victims. Carmen's brazen personality is starkly contrasted with Micaëla's purity and innocence, but the contrast is not simply one of goodness and badness. Escamillo is the irresistible lure that entices Carmen from Don José, although the bullfighter, unlike the soldier, would never shed a tear over her infidelity. In *Carmen* the combination in abundance of striking melody, deft harmony and perfectly judged orchestration ensures the opera's immortality. It magnificently transcends both the genre of *opéra comique* and the norms of 19th-century French music.

The world success of *Carmen* began with the production in Vienna in October 1875, with Guiraud's recitatives. Before its revival at the Opéra-Comique in 1883 it had reached 20 other cities from St Petersburg to Melbourne, since which time it has never been out of the repertory. It has been adapted in a bewildering variety of different screen and stage presentations and its music has been arranged for every imaginable ensemble.

3. VOCAL WORKS. Much of Bizet's early vocal music was written as exercises in composition and was not intended for performance. Such, for example, are the settings of Prix de Rome texts from earlier years: *L'ange et Tobie* is the beginning of a setting of the 1847 text; *Herminie*, a similar effort on the 1828 text; of *Loyse et Montfort*, a setting of the 1840 text, and *Le chevalier enchanté*, the 1843 text, only fragments remain, although they were once evidently substantial works. *Le retour de Virginie*, on the 1852 text, is complete, and so is Bizet's winning cantata of 1857, *Clovis et Clotilde*. This is a lengthy dramatic cantata for three solo voices and orchestra which confirms Bizet's skill and invention in this genre, and one passage, Clotilde's 'Prière! prière!', stands out from the rest as a page of marvellous imagination and suggestiveness. An undated *Choeur d'étudiants* is a lively setting for male voices of a text from Auber's *Le lac des fées* of 1839. Two choruses with piano accompaniment composed for the Prix de Rome preliminary rounds in 1856 and 1857 were published posthumously: *Le golfe de Baïa*, with a text by Lamartine, and *La chanson du rouet*, a light-hearted piece on a poem by Leconte de Lisle.

The *Te Deum*, composed in Rome in 1858, is Bizet's largest choral work, but the genre of sacred choral music had little appeal for him and the music is disappointing. The lack of conventional counterpoint (except in the fugal 'Fiat misericordia tua') gives it an operatic flavour, and the soloists' music is more rewarding that that for the chorus. His other choral music is scanty and miscellaneous. *Saint-Jean de Pathmos* is a setting for male voices of

*4. Georges Bizet: photograph by Etienne Carjat*

a poem by Hugo, and *La mort s'avance!* is a strange setting of a pious text for chorus and orchestra, almost unrecognizably based on two Chopin études.

The 'ode-symphonie' *Vasco de Gama* reflects its model, David's *Le désert*, with some *mélodrame* for the opening narration and its evocation of the broad open sea, but it has too many characters and too little narrative for so brief a work. It contains two fine numbers, a Boléro for the young officer Léonard (a soprano), hinting at the lively Spanish colour of many later pieces, and the choral Prière offering thanks for the passing of the storm. Vasco da Gama, a bass, plays little part in the sequence.

In 1874 Bizet planned an oratorio *Geneviève de Paris* in emulation of Massenet's *Marie-Magdeleine*, but he seems to have made no progress on it. His slight attachment to choral music is surprising in view of the high profile and vigorous activity of Orphéons and similar choral societies during his time, but it was a sphere he was never much drawn to, being always more attracted to the stage.

Bizet published some two dozen songs during his lifetime. The best of them were collected in the *Vingt mélodies* of 1873, although the currency of this Choudens collection has overshadowed the high quality of the six *Feuilles d'album*, published by Heugel in 1866. Choudens's second anthology, the *Seize mélodies*, published posthumously in 1886, contains many pieces of doubtful provenance or with inauthentic words. The two early *romances* of 1854 already show Bizet's sleight of hand with keys and a distinct melodic gift. His best songs appeared in the years 1866–8, four from Choudens (including the masterly *Adieux de l'hôtesse arabe*), six from Heugel, and six from Hartmann. He admitted in a letter to Galabert that he composed the Heugel set 'at top speed'. 'I have chosen the words carefully', he added, and indeed his wide choice of poets reflects his broad literary tastes. His treatment is frequently strophic, with the dramatist's sense of effect when called for by the poem. While his accompaniment figures can be repetitive and too persistent and his word-setting less than fastidious, his writing for the voice is instinctively effective, and any suggestion of exotic effect is met with marvellous inventiveness; Hugo's *Guitare* is a fine example, and the setting of a Ronsard sonnet is particularly sensitive.

4. ORCHESTRAL MUSIC. The popularity of the Symphony in C and of transcriptions of *L'arlésienne* and *Jeux d'enfants* has overshadowed Bizet's other orchestral music. The Symphony is indeed a work of remarkable freshness recalling early Mozart, at the same time looking forward to fine lyrical moments in the operas and even to the brilliant energy of *Carmen*. The early *Première ouverture* in A is equally fresh, with an Italian flavour. Bizet's efforts to compose a second symphony in the 1860s left a fine *Marche funèbre* in F minor (still unpublished) and were finally realized in *Roma*, posthumously published as '3me suite de concert' but in fact a symphony in four movements in C major (like the first symphony), completed in 1868 and revised in 1871. Only the last movement, *Carnaval*, a tarantella, is explicitly related to Italy, although much of the symphony was conceived during his Italian stay, and the first and third movements were given titles when the work was played by Pasdeloup in 1869: *Une chasse dans la forêt d'Ostie* and *Une procession*. The latter title suggests that the *Marche funèbre* was then the work's slow movement. Another *Marche funèbre* (the title is probably inauthentic) in B minor, is a forthright and richly scored piece, originally intended as the prelude to *La coupe du roi de Thulé*. Bizet's last orchestral work was the 'dramatic overture' *Patrie* of 1873, a weighty, sectional work with pompous, sentimental and balletic episodes in turn. By scoring some of the *Jeux d'enfants* and re-scoring scenes from *L'arlésienne* Bizet undoubtedly created his most effective and colourful orchestral music, for although his handling of the orchestra is usually deft and wonderfully imaginative, he can equally score with a rather clumsy fondness for octave doublings and exposed brass.

5. PIANO MUSIC. With the exception of the masterly *Jeux d'enfants* for four hands, Bizet's piano music has never entered the pianist's canon. The solo works are miscellaneous in genre and mostly too difficult for the amateur player. His early piano works reflect the Parisian virtuoso school and his own brilliant gifts as a pianist, yet despite the influence of Mendelssohn and Schumann in the *Chants du Rhin*, a set of six picturesque pieces from 1865, he never ventured on the larger forms. The *Chasse fantastique* (1865) is a brilliant virtuoso scherzo worthy of Alkan or Liszt. The only trace of Beethoven (whom Bizet enormously admired) is to be found in the curious *Variations chromatiques* (1868), a set of 14 variations and a coda on a slowly rising and falling chromatic scale. The technical challenge of such a design provoked ingenuity and novelty rather than any deeper musical satisfaction, and the piano writing is sometimes surprisingly awkward. So much of Bizet's energy was devoted to writing piano reductions of operas that he never developed an interest in the solo piano genres. He responded better to the depiction of picturesque or dramatic vignettes, as in *La bohémienne*, the third of the *Chants du Rhin*, and especially in *Jeux d'enfants*. This set of 12 pieces for piano duet, composed in 1871, evokes the child's world with exquisite skill, a fine example of high sophistication in the service of apparent naivety. Writing for four hands, Bizet was not tempted to throw in the big stretches and virtuoso leaps that make his solo works too daunting for many players.

6. POSTHUMOUS REPUTATION. The posthumous misfortunes suffered by Bizet's music are unequalled in the history of music and have yet to be righted. His output is relatively small, yet much of it has circulated in seriously bowdlerized forms; titles and texts are commonly spurious in a multitude of different ways. Many of his autographs have disappeared while many of the surviving autographs are still unpublished. Critical editions exist only of his early piano music, *L'arlésienne* and *Jeux d'enfants*. Bizet was himself careless in handling and presenting his music, complicated by his fondness for transferring music freely from one piece to another. His widow (who later became a society notable as Mme Emile Straus) was no more scrupulous in her concern for her husband's legacy. But most of the blame for this sorry state of affairs can be laid at the door of the publishers Choudens, who issued unauthorized versions of many of the most important works in the years when *Carmen* first became a world success. Vocal scores of *Les pêcheurs de perles*, *La jolie fille de Perth* and *Carmen* were particularly affected, while anthologies of songs, piano transcriptions and orchestral suites included music with cuts and revisions, with new titles and new texts, and without any explanation or

identification. Works published by Heugel or Durand have fared better, but even modern editions, such as Choudens's 1951 score of *Ivan IV*, have been tampered with. The most controversial of modern scores is Fritz Oeser's edition of *Carmen* (1964), which claimed, against powerful evidence to the contrary, to be representing Bizet's intentions. New versions of *Carmen* continue to appear both on stage and in print.

Biographical studies of Bizet have fared better. As early as 1886 Charles Pigot, Bizet's first biographer, had to contend with falsehoods contained in Arthur Pougin's entry in the Fétis *Supplément* of 1878. The most important work of Bizet scholarship is due to D.C. Parker, who unearthed the Symphony in C in 1935, to Mina Curtiss, whose purchase of an enormous archive of Halévy and Bizet papers formed the basis for her detailed and compelling biography *Bizet and his World* (1958), and to Winton Dean, Bizet's stalwart champion and the author of a number of important studies of his work. Recent work by Lesley Wright and Hervé Lacombe has further extended the range of scholarly enquiry.

The misrepresentation of Bizet's music has persisted partly because Bizet has never been embraced by the French as a great national composer, and there has been little desire to seek out unfamiliar works or question the authenticity of the familiar ones. For many generations *Carmen* was preferred with Guiraud's recitatives rather than with dialogue. It is no endorsement of this state of affairs to acknowledge that Bizet's output is indeed uneven and that he was always capable of mediocre work within the less exalted tastes of his times. Flashes of future potential are to be found from the earliest years, but there is a lack of maturity and of focus until the last five years of his life. His brief fragmented career reveals many hesitations and false starts; his abundant musicality and brusque energy was channelled in many different activities, yet later generations have wished that it was serious dramatic composition that absorbed him wholly, and that his contemporaries might have spotted his genius earlier than they did. The spectacle of great works unwritten either because Bizet had other distractions, or because no one asked him to write them, or because of his premature death, is infinitely dispiriting, yet the brilliance and the individuality of his best music is unmistakable. It has greatly enriched a period of French music already rich in composers of talent and distinction.

HUGH MACDONALD

**Bizey** [Bizet], **Charles Joseph** (*fl* Paris, 1716–*c*1758). French maker of woodwind instruments. He was admitted into the Communautés d'arts et métier de la ville et fauxbourgs de Paris (Paris community of master makers) in 1716 for which he served as *juré compatible* ('expert responsible'). In 1721 he supplied two oboes to the Munich court. By 1734 he was located at rue Mazarine, Saint Sulpice; in that year he served as an 'expert' in the valuing of the instruments and tools of the maker Antoine Delerablée, successor to the Naust workshop. By 1746 his workshop address was rue Dauphine, St André des Arts. A document of 'obligation' dated 18 April of that year shows that Bizey was owed 515 livres for money and merchandise supplied to Nicolas Hannès Desjardins, oboist to the King's chamber.

Bizey was part of a network of makers who were linked by family and professional ties: he married three times (although he remained childless), each time to relations of his apprentice, the Parisian maker Paul Villars (Anne Simonne Villars, Elizabeth Simonne Chalopet and Anne Marguerite Chalopet). Bizey was also the first of a 'dynasty' of woodwind makers that continued at the rue Daulphine until 1812: PRUDENT THIERIOT served a six-year apprenticeship with him, and Bizey came to consider him as his son. Prudent married Bizey's sister-in-law and on Bizey's death became master of the workshop, which was eventually bought by DOMINIQUE PORTHAUX who had also married into the family.

Although this dynasty of makers were renowned for all types of woodwinds, they specialized in reed instruments of the highest quality. Bizey used the marks 'fleur-de-lis/ BIZEY' and 'fleur-de-lis/BIZEY/A PARIS/sun', and both Villars and Prudent adopted the fleur-de-lis of their master's mark. Bizey was noted for his exceptionally fine oboes. An announcement in the *Mercure de France* of December 1749 (ii, 209) credits him with the invention of an oboe descending to *g* and of one an octave below the soprano instrument (a tenor oboe and a baritone oboe survive in the Musée de la Musique, Paris). He was among the first in France to make four-piece flutes. About 31 instruments with his mark survive, including recorders, flutes, a five-key bass flute, oboes, oboes da caccia, bassoons and rackets. These show him to be a maker of the highest order, one of the finest French woodwind instrument makers of the 18th century.

**Bizzarro, Il.** *See* ACCADEMICO BIZZARRO CAPRICCIOSO.

**Bizzossi.** *See* BESOZZI family.

**Bjelinski, Bruno** (*b* Trieste, 1 Nov 1909; *d* Silba, 3 Nov 1992). Croatian composer. He studied law at Zagreb University and then music at the Zagreb Conservatory, where his composition teachers were Blagoje Bersa and Franjo Dugan. Although Bjelinski began by practising law, he was a teacher at the Split Music School (1944–5) and from 1945 to 1977 was professor of counterpoint and fugue at the Zagreb Academy of Music. After his retirement he devoted himself tirelessly to composition. His music moved very rapidly away from the Germanic Romanticism of his teacher Bersa. Bjelinski developed a vivid neo-classical style, notable for its lively rhythms, strong melodic appeal and sharply etched harmonic structure. The brilliant and entertaining Divertimento (1948) was followed by a series of three sinfoniettas and five symphonies that are the best of his early works. Programmatically conceived, they include powerful funeral marches and dance movements, often moving from one to the other abruptly and sardonically. His old age was marked by the composition of nine symphonies (a number with voices) and many orchestral works, all written from the age of 70. His excellent handling of instruments is reflected in his numerous concertos, which have been used as advanced studies, but are also valuable contributions to the repertory. His dry, unsentimental style has proved readily adaptable to children's works, of which Bjelinski has made a specialism. These include the operas *Pčelica Maja* ('Maya the Bee') and Slavuj ('The Nightingale') after Hans Christian Andersen, puppet plays based on Kipling and Andersen, and the ballets *Pinocchio* and *Peter Pan*.

WORKS
(*selective list*)

STAGE

Pčelica Maja [Maya the Bee] (children's op, 2, M. Koletić, after W. Bonsels), 1952, Rijeka, 9 Feb 1963, vs (Vienna, 1957)

NIALL O'LOUGHLIN

**Bjerre, Jens** (*b* Århus, 13 Oct 1903; *d* Copenhagen, 3 Jan 1986). Danish composer and organist. He studied at the Copenhagen Conservatory (1919–23) with Christiansen (piano) and Rung-Keller (organ and theory). After passing the organists' examination in 1925 he studied in Paris (1925–7), notably with Lazar Levy (piano), and served as organist at the Danish church there. From 1933 he was organist at the Stefans Kirke in Copenhagen, and from 1955 to 1973 at the Garnisons Kirke. Much of his music, such as the Piano Trio (1947), is marked by a lyrical and light style influenced by French neo-classicism and in accordance with the prevailing mood of Danish music in the 1930s. However, the density of musical argument in later works such as the dramatic *Diapsalmata* for cello and piano (1953), inspired by Kierkegaard, suggests that he was also influenced by Hindemith.

WORKS
(*selective list*)

*dates are of first performance unless otherwise stated*

Dramatic: Hans og Trine (song-play, P.M. Møller), S, T, pf, 1939; Danserinden (ballet, P. Lange), S, orch, 1957; Kameliadamen (ballet), Copenhagen, 1958; En sjael efter Døden (television score, J.L. NIELS MARTIN JENSEN/DANIEL M. GRIMLEY

**Björk (Gundmundsdottir)** (*b* Reykjavik, 21 Nov 1966). Icelandic pop singer and songwriter. Although her earliest recordings date back to her eponymous debut album in 1977, it was with the Icelandic indie band the Sugarcubes, formed in 1986 with Einar Orn Benediktsson, that Björk made her initial impact outside her homeland. Her eccentric, mannered vocal style was captured perfectly on the band's debut single *Birthday* (1987) which was a minor UK hit. The group secured moderate commercial

success with their guitar-based style, only to disband in 1992 after their most successful UK hit single, *Hit*.

It was not until Björk's excellent solo album *Debut* (1993), largely produced by Nellee Hooper (of Soul II Soul and Massive Attack), that the singer truly established herself as a major musical force. *Debut* contained songs which fused dance, non-western, jazz and ballad styles into a seamless whole, and yielded five UK hits, including 'Human Behaviour' and 'Venus as a Boy'. Björk's breathy, shrill, melismatic vocal style is instantly recognizable, and her unusual accentuation and distinctive lyricism highlight a bizarrely naive and poetic use of English. Her lyrics play around with metre and syntax, and possess an almost child-like symbolism. *Post* (1995) was more disparate, bolder and with a greater reliance on contemporary dance rhythms (two tracks were written with the trip hop producer Tricky). The tracks 'Hyperballad' and 'Isobel' stood out, while the cover, 'It's oh so quiet', was a typically eccentric take on 1940s big-band music and became her biggest hit to date, reaching number four in the UK singles chart. *Telegram* (1996) was primarily a remix album of *Post*, while *Homogenic* (1997) was starker still, and showed the singer moving farther away from the pop mainstream (and, perhaps, into self-parody). A talented and unique artist, Björk's refreshingly eclectic approach to music-making has made her one of the most important artists of the 1990s. For further information see M. Aston: *Björk: Björkography* (London, 1996).

DAVID BUCKLEY

**Bjørkvold, Jon-Roar** (*b* Oslo, 2 May 1943). Norwegian musicologist. After studying musicology and singing at the Leningrad Conservatory, he completed the MA (1969) with a thesis on the songs of Glinka and the doctorate (1981) at Oslo University with a dissertation on children's songs. In 1970 he was appointed to teach at the institute of musicology of Oslo University, where he was made full professor in 1982 and was chair of the institute, 1983–5. His work focusses mainly on Russian composers of the 19th and 20th centuries and children's music; he has also compiled collections of children's songs, including *Barnas egen sangbok* ['Children's Own Songbook'] (Oslo, 1979), and made the documentary film *When the Moment Sings: the Muse Within, with Africa in the Mirror*, 1995.

WRITINGS

*Den spontane barnesangen vårt musikalske morsmål* [Children's spontaneous singing: our musical mother tongue] (diss., U. of Oslo,1981; Oslo, 1985)

'Ivan Susanin, en russisk nasjonalopera under to despotier', *SMN*, viii (1982), 9–44

'En drofting av russiske trekk i Igor Stravinskijs musikk' [Discussing Russian traits in Igor Stravinsky's music], *SMN*, ix (1983), 151–79

'Sostakovic's opera *Nesen* i spenningsfeltet mellom folketradisjon, intonasjonsteori og kulturpolitikk' [Shostakovich's opera *Nos* suspended between folk tradition, the theory of intonation and cultural politics], *Tvärspel: festskrift till Jan Ling*, ed. Å. Blomström and others (Göteborg, 1984), 313–24

*Komponist og samfunn: Hans Eislers musikk i lys av lif og skrifter, Schönberg og Brecht* [Composer and society: the music of Hans Eisler in light of his life and the writings of Schönberg and Brecht] (Oslo, 1985)

KARI MICHELSEN

**Björling, Jussi** [Johan] (**Jonaton**) (*b* Stora Tuna, 5 Feb 1911; *d* Stockholm, 9 Sept 1960). Swedish tenor. He was first taught by his father, David Björling (1873–1926), a professional tenor, and from 1916 made many concert tours with his father and two brothers as a treble in the Björling Male Quartet, which made a few commercial recordings in the USA in 1920. In 1928 he entered the Stockholm Conservatory, where he studied with Joseph Hislop and John Forsell. After a preliminary appearance at the Royal Swedish Opera as the Lamplighter in *Manon Lescaut* (21 July 1930), he made his recognized début there on 20 August 1930 as Don Ottavio, shortly afterwards singing Arnold in *Guillaume Tell* and Jonathan in Carl Nielsen's *Saul og David*. Until 1938 he was a regular member of the Stockholm Opera, and always maintained his connection with that house. He was soon in general demand in the leading European operatic centres (Vienna début as Radames, 1936); and his international status was confirmed by his successful débuts at Chicago in *Rigoletto* (8 December 1937), in New York in *La bohème* (24 November 1938), at Covent Garden in *Il trovatore* (12 May 1939) and at San Francisco in *La bohème* (18 October 1940). Covent Garden had to wait until the last year of his life for another chance to hear him (in *La bohème*), whereas in America he became an indispensable favourite, returning regularly to the Metropolitan and other houses except during the war years of 1941–5, which he spent in Sweden.

Although Björling's repertory had by this time become almost entirely Italian, his appearances were infrequent in Italy itself, where the purity and restraint of his style may perhaps have disconcerted a public used to a more

*Jussi Björling as Des Grieux in Puccini's 'Manon Lescaut'*

overt and impassioned display. His voice was a true tenor of velvety smoothness, though capable also of ringing high notes; admirably schooled, it showed remarkable consistency from top to bottom of his register and throughout the 30 years of his career. To the end, the glowing tone and impeccable musicianship provided ample compensation for a stage presence that was rather a matter of deportment than of acting. His smooth legato and plangent tone were particularly well suited to Gounod's Faust and Romeo; but the centre of his repertory consisted of Verdi's Manrico, Riccardo and Don Carlos and Puccini's Rodolfo, Cavaradossi and Des Grieux (see illustration). He was also a notable soloist in Verdi's Requiem, of which he made three recordings (the finest is with Toscanini at Carnegie Hall in 1940) and an appreciable interpreter of songs, especially those of Richard Strauss. Having a voice ideally adapted to the gramophone, he made a large number of delightful and valuable records, including many complete operas, among which his Rodolfo in the famous Beecham set of *La bohème* well illustrates the distinction of his tone and phrasing. Björling can also be heard on several live recordings from the Metropolitan and the Royal Opera in Stockholm. He published a volume of memoirs, *Med bagaget i strupen* [Travels with my larynx] (Stockholm, 1945).

DESMOND SHAWE-TAYLOR/ALAN BLYTH

**Björnsson, Árni** (*b* Lóni, Kelduhverfi, 23 Dec 1905; *d* Reykjavík, 3 July 1995). Icelandic composer, flautist and pianist. Largely self-taught, he studied at the Reykjavík College of Music (1930–35) with Victor Urbancic and Franz Mixa (theory, composition and piano), while earning a living playing in Rejkjavík dance bands. He studied at the RMCM (1944–6), graduating with an associate's diploma. A prominent musician in Reykjavík in the years following World War II, he taught the piano and the flute at the Reykjavík College of Music (1946–52), and was a flautist in the Iceland SO from its formation in 1950. In 1952 he was the victim of a violent attack that left him permanently brain damaged, leading to the abandonment of his professional career.

Björnsson's early works are often playful and elegant, in a tonal style permeated by chromaticism. His experience in writing dance and band music occasionally informs his concert works. Among the best-known of these, the two violin romances consist of central sections in a popular vein framed by more lyrical, expansive themes. Although still able to compose after 1952, his compositional style was severely affected, and his later output consists mostly of simple songs and arrangements. Among the large-scale works aborted following the attack was *Gunnlaugur ormstunga*, which would have been the first full-scale opera by an Icelandic composer.

ÁRNI HEIMIR INGÓLFSSON

**Blacher, Boris** (*b* Niu-chang, China, 19 Jan 1903; *d* Berlin, 30 Jan 1975). German composer of Baltic descent.

1. LIFE. In 1922 he went to Berlin, where he initially studied architecture and mathematics at the wish of his parents. He studied composition with Friedrich Ernst Koch at the Berlin Hochschule für Musik (1924–6) and read music under Schering, Blume and von Hornbostel at Berlin University (1927–31). Thereafter he worked in Berlin as a composer and arranger until his appointment in 1938 as director of a composition class at the Dresden Conservatory, a post he was obliged to relinquish the following year because his teaching was not in accord with Nazi cultural policy. After World War II he returned to his work as a composition teacher, first at the Internationales Musikinstitut in Berlin-Zehlendorf and then, from 1948, as a professor at the Berlin Hochschule für Musik, which he directed from 1953 to 1970. He gave lectures and seminars at the summer courses in Bryanston (1949, 1950), at the Salzburg Mozarteum (1950, 1951) and at Tanglewood (1955) and wrote the textbook *Einführung in den strengen Satz* (Berlin, 1953). Also in 1955 the West Berlin Academy of Arts appointed him a regular member of its music section, the direction of which he assumed in 1961; from 1968 to 1971 he was president of the academy. His composition pupils include Ballif, Burt, von Einem (Blacher had a decisive hand in writing the libretto of *Der Prozess*), Erbse, Klebe, Reimann and Sheriff. Among the many awards he received were the Bach Prize of Hamburg and the Grosse Kunstpreis of North Rhine-Westphalia.

2. WORKS. Blacher's music is playful in character, with an avoidance of brooding and tragedy. His ideal is a light, transparent texture with delicately traced and coloured ornamental lines; his best works are dominated by brightness of tone and an unobtrusive logic that reveals both agility of mind and a sure sense of formal proportioning. The themes and motifs are terse and often witty and caustic: Blacher's ideas often give the impression of throwaway instrumental *bons mots*, but closer examination reveals their careful intervallic shaping. In working his material, particularly from the 1950s onwards, he starts with a single cell, clearly defined in its intervals and rhythm, and subjects it to processes of expansion and contraction. In this way the music achieves a quality of organic growth and decline. There is a connection between his playful approach to construction and the tendency to high spirits always present in his music, though this can equally modulate into irony or attain an Apollonian spirituality.

In general Blacher's work is based on the poles of dynamism and lyricism, but even his lyricism is more animated than dream-like and characterized by understatement. His allegro-type compositions are dominated by a subtle play of motoric rhythms, pauses and shifts of metrical emphasis, techniques that give his language flexibility and rhythmic variety, two unmistakable attributes of his style. His lyricism aims at immediate communication, favouring the mimetic over the rhetorical, and is determinedly anti-Romantic, recalling Satie's notion of 'expression dépouillée'. Blacher's tendency towards the greatest possible reduction of musical means became increasingly pronounced, and with this the pictorial and ornamental elements in his work took on greater importance, though this tended to rob the linear writing of a sense of direction and necessity. Blacher was influenced relatively little by the Austro-German tradition, but rather by French composers (Satie and Milhaud), Stravinsky (above all in the field of rhythm) and jazz (in melodic construction and musical rhetoric).

Harmonically Blacher's compositions remained until the late 1940s within the bounds of tonality, extended and defamiliarized by dissonance and polytonality. After 1948 he began to come to terms with the 12-note method, but in this he was attracted more by its possibilities of interval ordering than by its atonal features. Characteristic of Blacher's approach was his concern from the outset to achieve a correspondence between 12-note serial motivic writing and rhythmic and metrical organization. The result was a development of his earlier practice, in that alternating time signatures which, under Stravinsky's influence, had become a general principle in Blacher's work shortly after 1940, were now systematized, their succession being determined by rows that are also subject to retrograde operations. These so called 'variable metres', which Blacher introduced in *Ornamente* for piano (1950), created a great deal of interest at the time and were taken up by other composers, among them Hartmann. But Blacher, by nature anti-orthodox, never used the principle as his sole means of durational organization.

Blacher's works for the theatre, both operas and ballets, are particularly important. Given the playful quality of his music, its precision and its almost gestural, graphic character, it was perhaps inevitable that Blacher should feel a strong affinity for the dance. The subjects of his stage works (as well as the range of texts he has set) reflect varied intellectual and literary interests. First in the series of major ballets were *Hamlet* (1949) and *Lysistrata* (1950), two highly contrasted works. Blacher had been considering a ballet on *Hamlet* shortly before World War II; at the time it remained unrealised, and Blacher subsequently reworked the existing music into a symphonic poem, composing anew for the 1949 score, whose melodic, rhythmic and harmonic permutations prefigure the move to dodecaphony and variable metres. *Lysistrata* was his first major 12-note composition. Of the later ballets, *Der Mohr von Venedig* (after *Othello*) is particularly noteworthy; it was succeeded by *Demeter* and *Tristan*.

The subjects of Blacher's operas are equally fascinating, and again he turned quite early to Shakespeare for the chamber opera *Romeo und Julia* (1943). This piece was affected by the material restrictions of war: it requires only a small number of instruments, though its vocal forces are less modest (eight singers, three speakers and a madrigal chorus). Another chamber opera, *Die Flut*, followed in 1946, this time taking its story, concerning the behaviour of people in extreme situations, from Maupassant. The tendency to social and political criticism that *Die Flut* revealed was pursued in the ballet-opera *Preussisches Märchen* (1949), which, based on the celebrated Wilhelmine affair of the Captain of Köpenick, mocks German trust in authority and veneration of uniforms, using a consciously operetta-like manner.

With *Rosamunde Floris* (1960) the drama moves into surrealist realms from which Blacher's music stands at a certain distance. *Zwischenfälle bei einer Notlandung* (1965), which uses electronic means, returns to a portrayal of people under extreme conditions. *Zweihunderttausend Taler* (1969) combines a fairytale atmosphere with social criticism. All of these and Blacher's earlier operas have a more or less straightforward plot, and there is an evident predilection for 'epic music theatre'. But Blacher's output also includes an epic piece abstracted to the highest degree: the *Abstrakte Oper no.1* (1953). Instead of a narrative the work presents basic patterns of human behaviour: love, fear, pain, panic. The text, by Blacher's friend Werner Egk, consists, in all except one scene, of materials that have no semantic meaning but portray an archetypal emotional situation. In this the piece may be considered a precursor of Ligeti's much more complex *Aventures*. Blacher's constructive methods in the *Abstrakte Oper* include variable metres, ostinato forms and 12-note series. On the periphery of opera are the *Gesänge des Seeräubers O'Rourke und seiner Geliebten Sally Brown*, a concert piece with an imaginary scenario. The music has an affinity with jazz, shows pointillist tendencies in its sparseness of texture, and draws on the idiom of Weill. Of Blacher's other vocal works, the oratorio *Der Grossinquisitor* (after Dostoyevsky) and the Requiem are the most significant.

It was Blacher's instrumental works that made his name most widely known. Principal among these is the *Concertante Musik* for orchestra (1937), a three-part composition that brings together instrumental virtuosity, the transparency of chamber music and a jazz-like impulsiveness in a successful and highly effective manner. But it was the *Orchestervariationen über ein Thema von Niccolò Paganini* (1947) that established his international reputation. These 16 variations on the famous A minor theme, also used by Brahms, Rakhmaninov, Lutosławski and others, may be seen as a true reflection of his compositional talents, giving a free rein to his orchestral virtuosity and brilliance, and revealing a mastery that can clothe the most complex contrapuntal writing in the guise of 'faire plaisir'. Other major, large-scale instrumental works include the *Orchester-Ornament* (1953), in which the technique of variable metres is applied to a large orchestra, the Second Piano Concerto (1952), also in variable metres, and the *Variationen über ein Thema von Muzio Clementi* for piano and orchestra (1961). The considerable output of chamber compositions was, after 1962, supplemented by a series of pieces that use electronic means to modify instrumental and vocal sounds.

JOSEF HÄUSLER

**Blachut, Beno** (*b* Ostrava-Vítkovice, 14 June 1913; *d* Prague, 10 Jan 1985). Czech tenor. He came from a poor mining family and at 14 worked in the iron works. He sang in a church choir, and in the Ostrava opera chorus. He studied at the Prague Conservatory under Louis Kadeřábek (1935–9) and made his début as Jeník with the Olomouc Opera in 1939. Under the director, Karel Nedbal, he studied 18 parts, notably Laca in *Jenůfa* and the Prince in *Rusalka*. He joined the Prague National Theatre in 1941 and was soon given Heldentenor roles; an excellent performance of *Dalibor* in 1945 made his name as the leading Czech tenor, whose Smetana roles, Laca in *Jenůfa* and later Ondrej in Suchoň's *The Whirlpool* were regarded as models. He was also in demand for concerts, in which he sang tenor parts in cantatas and oratorios (including Berlioz's *La damnation de Faust*, Dvořák's *Stabat mater* and *The Spectre's Bride*, and Janáček's *Glagolitic Mass*), and songs. His recording of Janáček's *The Diary of One who Disappeared* achieved renown.

Blachut's voice, balanced in all registers, did not lose its lyric character even in Heldentenor parts. He was notable for his beautiful cantilena, a brilliantly mastered *mezza voce*, exemplary enunciation and pleasant dark vocal colouring. At dramatic moments he made use of a careful gradation and expressive accentuation, never at the expense of true vocal line, and always keeping his natural dignity. Towards the end of his career he took *buffo* roles, notably an excellently sung and acted Matěj Brouček in Janáček's opera. He sang with the National Theatre on tours to Moscow, Berlin, Brussels and Edinburgh and as a guest in Vienna, Amsterdam and Helsinki. His many operatic recordings include a classic portrayal of Boris in *Kát'a Kabanová*.

ALENA NĚMCOVÁ

**Black, Andrew** (*b* Glasgow, 15 Jan 1859; *d* Sydney, NSW, 15 Sept 1920). Scottish baritone. He relinquished a post as organist at Anderston United Presbyterian Church, Glasgow, to train as a singer with Alberto Randegger and John B. Welch in London, then in Milan with Domenico Scafati. His London début (Crystal Palace, 30 July 1887) was enthusiastically acclaimed, followed by operatic successes in Britain and America. Real recognition came at the Leeds Festival of 1892, when he sang the role of the Spectre in Dvořák's *The Spectre's Bride*. In constant demand for concerts and oratorios, Black was associated particularly with the title role in Mendelssohn's *Elijah* (1894, Birmingham Festival) and Judas in Elgar's *The Apostles* (1903, Birmingham). When the Royal Manchester College of Music was established in 1893 Black was appointed professor of singing. Later, after touring Australia, he settled in New South Wales.

JEAN MARY ALLAN/RUZENA WOOD

**Black(stone), Don(ald)** (*b* London, 21 June 1938). English lyricist. In the 1950s his various jobs included that of a writer for the New Musical Express, a performer in the rapidly declining variety theatres (billed under such titles as 'Donald Black, the young gangster' and 'Don Black, a living joke') and a song-plugger. He began writing song lyrics in the mid-1950s, gaining success in the 1960s when Matt Monroe recorded his *April Fool* and *Walk away*, Black's English version of the German Eurovision song contest entry *Warum nur warum*. Beginning with the James Bond film *Thunderball* (1965) he worked with the composer JOHN BARRY on many title songs for films, including *Diamonds are Forever* (1971), *The Man with the Golden Gun* (1974), and *Born Free* (1966), for which Black received an Academy Award. Further collaborations with Barry include the musicals *Billy* (1974) and *The Little Prince and the Aviator* (1982), he has also worked with Henry Mancini, Michel Legrand, Quincy Jones, Maurice Jarre and Ron Grainer. Other notable title songs for films include *To Sir with Love* (1967, with Mark London) and *True Grit* (1969, with Elmer Bernstein), while he provided Michael Jackson with the pop hit *Ben* (1972, with Walter Scharf ). He worked with Andrew Lloyd Webber on the song cycle *Tell Me on a Sunday* (1980; later incorporated into the theatrical evening *Song and Dance*, 1982), *Aspects of Love* (1989) and *Sunset Boulevard* (1993). In these last two works Black's direct style that creates strong poetic images from deceptively simple language was hampered by the prosaic needs of narrative in a sung-through structure.

WORKS
(*selective list*)

*composers in parentheses*

Musicals (dates those of first London performance unless otherwise stated): Maybe that's your Problem (W. Scharf), Roundhouse,16 June 1970; Billy (J. Barry), Drury Lane, 1 May 1974 [incl. Some of us belong to the stars]; Bar Mitvah Boy (J. Styne), Her Majesty's, 25 Sept 1978; Tell Me on a Sunday (A. Lloyd Webber), Royalty, Jan 1980, rev. as Song and Dance, 1982; The Little Prince and the Aviator (Barry), New York, Alvin, 1 Jan 1982; Dear Anyone (G. Stephens), Cambridge Theatre, 9 Sept 1983; Merlin (E. Bernstein), New York, Mark Hellinger, 13 Feb 1983; Budgie (M. Shuman), Cambridge Theatre, 18 Oct 1988; Aspects of Love (Lloyd Webber), Prince of Wales, 17 April 1989 [incl. Love changes everything; collab C. Hart]; Sunset Boulevard (Lloyd Webber), Adelphi, 12 July 1993 [incl. With One Look; collab C. Hampton]

*c*100 songs for films (title songs unless otherwise stated), incl. Thunderball (Barry, 1965); Born Free (Barry, 1966); Pretty Polly (M. Legrand, 1967); To Sir with Love (M. London, 1967); On Days like These (Q. Jones; The Italian Job, 1969); True Grit (Bernstein, 1969); Diamonds are forever (Barry, 1971); Wish was Then (Barry; Mary Queen of Scots, 1971); The Man with the Golden Gun (Barry, 1974); Play it again (Barry; The Tamarind Seed, 1974); Wherever Love Takes Me (Bernstein; Gold, 1974); All the Wishing in the World (S. Myers; The Wilby Conspiracy, 1975); Come to me (H. Mancini; The Pink Panther Strikes Again, 1976)

Individual popular songs, incl. Ben (Scharf), 1972; Always There (S. May and L. Osborn), 1986; Amigos para siempre (Lloyd Webber), 1994 [anthem for the Barcelona Olympic Games]

□

**Black, John** (*fl* 1546–87). Scottish composer. In 1546 he was 'singer' of the parish church and 'deput' under John Fethy at the song school in Aberdeen. By 1556 he was master of the song school, but between 1559 and 1570 his name disappears from the burgh records, and in the latter year he is described as 'presentlie absent of the realme'. By 1574 he was back in Aberdeen and in 1577 was again appointed master of the song school, but he died in office shortly before 14 August 1587.

Black wrote a number of interesting compositions for instrumental consort. Some, bearing such attractive titles as *Black called My Delight*, are in fully-fledged fantasy form, but only fragments remain. The Lessons on the Psalms (one of which is known to be by Black; three others are identical in form and style) are more complete, however, and show a real creative talent, elaborating the Protestant psalm tunes as cantus firmi in a characteristically instrumental style, and in a musical form otherwise known only in France. Black may indeed have been in France when he was 'absent of the realme', whether or not the Reformation was the original cause of his departure from Scotland. A 17th-century psalm tune is entitled 'Mr Blaks toone', and some of his psalm settings are incorporated (anonymously) in Edward Millar's psalter of 1635.

KENNETH ELLIOTT

**Black American music.** *See* UNITED STATES OF AMERICA, §II, 2.

**Black bottom** [black shuffle]. A quick-tempo American social dance, particularly of the 1920s. It is thought to have originated in the early 1900s in the 'juke' (black) bawdy houses of the 'Bottoms', the black quarter of Nashville. The movements of the dance as described in Perry Bradford's song *The Original Black Bottom Dance*

(1919) include slides and hobbling steps; the dance also involved a twisting motion of the body similar to the SHIMMY, hops forward and back, side turns, stamps, a skating glide performed with deep knee bends, and according to the Stearns, 'a genteel slapping of the backside'. Its popularity, along with other related dances such as the charleston (*see* CHARLESTON (ii)), developed from the success of the black revue *Shuffle Along* (1921), the first theatrical adaptation of the black bottom occurring in the show *Dinah* (1924). It was Ann Pennington's performance of the dance, however, to the song 'Black Bottom' (music by Ray Henderson, lyrics by Buddy DeSylva and Lew Brown) in *George White's Scandals of 1926* that led to its widespread popularity. In the same year it reached Europe, but its vogue lasted only about two years and it was absorbed into the LINDY and other jazz dances.

PAULINE NORTON

**Blackburn, Bonnie J(ean)** (*b* Albany, NY, 15 July 1939). American musicologist. She graduated from Wellesley College (BA 1961) and studied with Edward Lowinsky and Howard Mayer Brown at the University of Chicago (MA 1963, PhD 1970). She was a lecturer at the School of Music, Northwestern University (1987) and served as a visiting faculty member at the University of Chicago (1986) and SUNY, Buffalo (1989–90). In 1990 she moved to Oxford and became a freelance editor; in 1993 she became general editor of the series Monuments of Renaissance Music.

Blackburn studies 15th- and 16th-century music and music theory, with a special interest in lost sources. Her dissertation on the Lupus problem was followed by an article on the subject and the edition of Johannes Lupi's works. She has researched both written and musical documents, and she frequently collaborated as author and editor of these sources with her husband, Lowinsky; some of these publications appeared after his death in 1985, notably their edition of the Spataro correspondence.

PAULA MORGAN

**Blackburn, (Joseph Albert) Maurice** (*b* Quebec City, 22 May 1914; *d* Montreal, 29 March 1988). Canadian composer. After studying music at Laval University (1937–9) and the New England Conservatory (1939–41), he worked as a staff composer with the National Film Board of Canada (1942–79), continuing to compose freelance for the NFB until 1983. He studied in Paris with Nadia Boulanger (1946–8) and with the Groupe de Recherches de Musique Concrète (1954–5). Blackburn's eclectic style ranged from folksong pastiches to electronic music. While his experimental work was mainly for film, he cited Stravinsky, Honegger and Poulenc as influences on his concert music and Messager as a model for his two comic operas. He created or collaborated on the music for over 400 films, mostly documentaries and short animated films, though some feature films in his later years. Among the film makers with whom he collaborated were Norman McLaren, Jacques Godbout, Gilles Carle and Claude Jutra.

WORKS
(*selective list*)

Dramatic: Une mesure de silence (comic op, 1, M. Morisset-Blackburn), 1955; Pirouette (comic op, 1, Morisset-Blackburn), 1960; Rose Latulippe (ballet), perf. 1953; incid music for theatre, TV and film

ROBIN ELLIOTT

**Blackface minstrelsy.** *See* MINSTRELSY, AMERICAN.

**Blackhall, Andrew** (*b* 1535 or 1536; *d* 31 Jan 1609). Scottish composer. Originally a canon of the Abbey of Holyroodhouse, Edinburgh, he was appointed after the Reformation 'minister of God's word' to a number of charges nearby: first in 1564 to Liberton, then in 1567 to Ormiston in the parish of Dalkeith. About this time he contributed at least one canticle in chordal style (*O Lord, of whom I do depend*) to the important anthology made by THOMAS WOOD (i) (*EIRE-Dtc, GB-Eu, Lbl, US-Wgu*). In 1569 Blackhall composed a more ambitious piece, the anthem *Of mercy and of judgement both*, a setting for five voices of the metrical version of Psalm ci, 'giffin in propyne [i.e. as a gift or tribute] to the kyng'. Preparations were being made in that year for the education of the infant king and for the formation of his royal household. Blackhall's anthem, an extended piece in two sections involving much close imitation, somewhat in late Renaissance English style, may have been a bid for royal favour on the part of the composer.

In 1574 Blackhall was appointed minister of Inveresk Parish Church in Musselburgh. In the following year another anthem was commissioned, a setting for five voices of the metrical version of Psalm cxxviii, *Blessed art thou*, for a wedding in the noble Mar and Angus families – both much involved in power politics during the childhood of King James VI. Blackhall's wedding anthem is cast in one continuous movement, with effective imitation, though perhaps lacking somewhat in rhythmic interest. In the preface to Edward Millar's 1635 printed psalter Blackhall is stated as having composed a 'set' of psalm tune arrangements, although only very few have survived. Three chordal settings are recorded in Wood's anthology, and one imitative setting (Psalm cxxxvii 'in reports') is identified in a 17th-century source. Another two psalms in reports (vi and xviii) have all the features of Blackhall's style and may well be his work. All probably date from about this period.

In 1578 Blackhall received an important commission from Lord Morton to make a setting of Psalm xliii. James, 4th Earl of Morton, and regent for the last six years, had defended the cause of the dead Darnley and the infant prince in 1567, when under a banner emblazoning the words of that very psalm – 'Judge and revenge my cause, O Lord' – he had routed Mary Queen of Scots at Carberry Hill. By 1578, however, his enemies were linking his name with Darnley's death; he seems to have resorted to musical as well as political means to retrieve his good name with the young king – a measure eloquently emphasized by Blackhall in his choice of the *Miserere* plainsong as cantus firmus in this composition. Morton was eventually accused of complicity in Darnley's murder and executed in 1581.

In the 1580s James VI began to set up court in style and gathered together a group of distinguished poets and musicians, known as the Castalian Band. At least one partsong by Blackhall dates from this period: *The Bankis of Helicon*, a beautiful chordal setting of an internationally current tune, *The Nine Muses*, and the vehicle for several fine sets of verses by the Scottish poet Alexander Montgomerie (including *The Cherrie and the Slae* and *Adeu O desie of delyt*). In 1582 King James granted a pension to 'Mr Andro Blackhall, Minister, ane of the Conventuall brether of the Abbay of Halyrudhous'. Other pieces by Blackhall may survive in the many anonymous and fragmentary items in Scottish sources of the later 16th and early 17th centuries, for example the isolated bassus part of *Anna veni*, perhaps composed for the coronation of Anne of Denmark in 1590; and there is some evidence to attribute to him the editing, if not partial composition, of the Twelve Common Tunes that first appeared as a group in the 1615 psalter, published in Edinburgh. Blackhall is mentioned in church records in the 1590s and up to 1608 and according to the inscription at Inveresk church died in 1609, 'aged 73'.

KENNETH ELLIOTT

**Blacking, John (Arthur Randoll)** (*b* Guildford, 22 Oct 1928; *d* Belfast, 24 Jan 1990). British anthropologist and ethnomusicologist. Raised in the Anglican environment of Salisbury Cathedral close, his father, the cathedral architect, was closely concerned with the restoration of the Sarum rite and with the Dolmetsch early music revival. Blacking served as a commissioned officer in the Coldstream Guards, with active service in Malaya (1948–9), where the exposure to Malay, Chinese and Indian cultures was a formative experience. He read anthropology and archaeology at Cambridge (1949–52) with Meyer Fortes and in 1954 he was appointed musicologist in Hugh Tracey's International Library of African Music, Johannesburg. From 1956 to 1958 he carried out 22 months of fieldwork in the Venda area of Northern Transvaal, establishing his international reputation as an ethnomusicologist. In 1959 he was appointed lecturer in social anthropology and African government at the University of Witwatersrand, and in 1965 he was appointed professor and head of the department. In 1970 he was made professor of social anthropology at Queen's University, Belfast, which under his direction became an internationally renowned centre for ethnomusicology, attracting students from many parts of the world, particularly Africa. He was president of the Society for Ethnomusicology (1982–3) and founded the European Seminar in Ethnomusicology.

Blacking's reputation was established by *How Musical is Man?*, a book based on the John Danz Lectures he delivered at the University of Washington in 1971. He championed the anthropological approach in ethnomusicology, while not underplaying the musicological side of the discipline. A keen classical pianist throughout his life, his theorizing about music passed through a number of stages, from functionalism, to structuralism and phenomenological transactionalism, and his thinking was much influenced by his anthropologist colleagues at Queen's. He published significant articles on most of the debated issues in ethnomusicology, and in later years he returned

to a concern with dance that had started with his research on Venda girls' initiation schools.

JOHN BAILY

**Blackmar, A(rmand) E(dward)** (*b* Bennington, VT, 1826; *d* New Orleans, 28 Oct 1888). American music publisher. He worked as a music teacher in Huntsville, Alabama (1845–52), and Jackson, Louisiana (1852–5). In 1858 he joined E.D. Patton's music shop in Vicksburg, Mississippi, which he bought out the following year with his younger brother Henry (1831–1909). They moved to New Orleans in 1860, where they operated publishing firms and music shops jointly, separately and often with others. From 1861 to 1866 Henry also ran a shop in Augusta, Georgia. Armand was imprisoned briefly in 1862 by the Union Army for his espousal of the Southern cause; he issued more Confederate music than any other publisher in New Orleans, including one of the earliest editions of *Dixie* (1861), and *The Bonnie Blue Flag* (1861) and *Maryland! My Maryland!* (1862). He frequently arranged or composed music under the pseudonym A. Noir. Blackmar was in San Francisco between 1877 and 1880, but was publishing again in New Orleans from 1881 to 1888.

JOHN H. BARON

**Black Sabbath.** English heavy metal band. Formed in 1968, it underwent many personnel changes but its classic line-up was Ozzy [John] Osbourne (*b* 3 Dec 1948; vocals), Tony Iommi (*b* 19 Feb 1948; guitar), Bill Ward (*b* 5 May 1948; drums) and Geezer Butler (Terry Butler; *b* 17 July 1949; bass). Although it was hated by rock critics and ignored by radio programmers, it nonetheless became arguably the single most influential heavy metal band. Evolving from the heavy blues-rock of Cream and other 1960s groups, the band echoed the fatalism and occultism of such blues forebears as Robert Johnson and Howlin' Wolf. Black Sabbath helped constitute heavy metal as something separate from rock by moving away from such topics as love, sex, partying and masculine strutting to brooding lyrics that dealt with evil, war, pain and drug addiction, delivered by Osbourne's distinctive paranoid whine. Their music was often ponderously slow, based on straightforward melodic riffs, with a guitar sound that was as distorted and heavy as possible. *Paranoid* (Vertigo and WB, 1971) was probably their most influential album.

ROBERT WALSER

**Black shuffle.** *See* BLACK BOTTOM.

**Blacksmith** [Blakesmit, Blakismet], **Henry** (*fl* *c*1261). English singer. One of three Englishmen described by the late 13th-century theorist Anonymus 4 as 'good singers' of mensural polyphony, who sang with great refinement ('valde deliciose'). The theorist referred to him as 'Blakesmit, at the court of the late King Henry [III]'. He was clerk of the king's chapel in May 1261, and may have held that post since 1258. He was probably one of the members of the royal chapel who accompanied the king to Paris in July 1262 and who were stricken by an epidemic in that September.

IAN D. BENT

**Blackwell, Chris** (*b* London, 22 June 1937). English music producer. The owner of Island Records, he was a key figure in the internationalization of Jamaican popular music in the 1970s, notably through his association with Bob Marley and the Wailers. Island also nurtured the leading rock performers Steve Winwood, Free and U2. Blackwell grew up in Jamaica where he began his musical career, recording local singers. He moved to London in 1962, importing recordings to sell to the expatriate West Indian population in Britain. Blackwell moved into white popular music with Steve Winwood's groups, the Spencer Davis Group and Traffic (producing both), followed by Cat Stevens, Free and others. In 1970 he produced Bob Marley and the Wailers' album *Catch a Fire*, notable for its combination of reggae rhythms and rock guitar playing.

Although he later became involved in film production, Blackwell produced recordings by the singer Grace Jones and the quirky American group the B-52s. Under his leadership, Island issued recordings by numerous other rock, reggae and African musicians. In 1989 the company was bought by the Polygram group but Blackwell retained a musical involvement, notably in the management of the

Bob Marley estate. In 1997 he founded a new record company, IslandLife.

DAVE LAING

**Blackwell, Isaac** (*d* London, 1699). English composer and organist. He was organist of two London parish churches – St Dunstan-in-the-West (1674) and St Michael's, Cornhill (1684) – before becoming a vicar-choral of St Paul's Cathedral on 7 February 1687. From about that same time he combined all these posts with that of organist of the cathedral, continuing as such until his death, whereupon he was succeeded by Jeremiah Clarke (i). He was thus the first to use Bernard Smith's new organ (1697).

John Playford, a fellow vicar-choral, printed some of Blackwell's songs in *Choice Ayres* and three anthems in *Cantica Sacra*. Another five anthems are known, of which three are in the Bing-Gostling partbooks at York (*GB-Y* M. 1. S). They are in the rather cramped idiom of the early 1670s, most convincingly represented by *Bow down thine ear, O Lord*.

WORKS

ANTHEMS

Behold how good and joyful, 1674[2]; Bow down thine ear, O Lord, *GB-Y*; Let my complaints, 1674[2]; Lord, come away, *Y*; Lord, let me know my end, *Ob*; O God, thou art my God, *Y*; O Lord, our governor, *Cu*; See sinfull soul (A Hymn for Good Friday), 1674[2]

SONGS

Edition: *Choice Ayres, Songs and Dialogues*, ed. I. Spink, MLE, A5 (1989) [S]

Cease fruitless hopes lest you convey, 1683[5], S; Give me thy youth the time of love, 1681[4], S; If languishing eyes without language can move, 1673[3], S; I saw fair Chloris, *GB-Gu*; Lovers who in silent anguish, 1678[4]; So pale Amintas does thy looks appear, 1683[5]; Though Sylvia loved too well she knew, 1683[5]; Were Celia but as chaste as fair, 1675[7], S; When Damon saw fair Sylvia's face, 1683[5], S; When first Celinda blessed mine eyes, 1683[5], S;

Setting of Flatman's song for St Cecilia's Day, 1686, lost

INSTRUMENTAL

Trio sonata, *GB-Lbl* (tr pts only)

IAN SPINK

**Blackwell, Otis** (*b* Brooklyn, NY, 1931). American rhythm and blues songwriter and singer. His list of over 900 songs includes several of Elvis Presley's best-known hits. Blackwell's earliest success as a black songwriter came with *Fever*, written for the singer Little Willie John in 1956; this sensual ballad was later taken up by the cabaret star Peggy Lee who added new lyrics. In a different vein, Blackwell composed the gospel-tinged *Daddy Rolling Stone*, which became a favourite of English rock groups such as the Who. For Presley, Blackwell wrote the pulsating *All Shook Up*, *Don't be cruel*, *Paralysed* and the quirky ballad *Return to Sender*. As part of the publishing contract, Presley was credited as co-author of the songs, although he did not contribute to their composition. Blackwell also composed the tempestuous *Great Balls of Fire* and *Breathless* for another rock and roll star, Jerry Lee Lewis; like *All Shook Up*, these songs built up tension through sudden breaks in the flow of the song. During the early 1960s Blackwell also wrote the song *Handy Man* for Jimmy Jones, *Nine Times out of Ten* for Cliff Richard and *Hey Little Girl* for Dee Clark. He recorded his own versions of his best songs on a 1978 album, *These are my Songs*.

DAVE LAING

**Blackwell, Scrapper** [Black, Francis Hillman] (*b* NC, 21 Feb 1903; *d* Indianapolis, IN, 7 Oct 1962). American blues guitarist. *See under* CARR, LEROY.

**Blackwood, Easley** (*b* Indianapolis, IN, 21 April 1933). American composer and pianist. He studied with Messiaen at the Berkshire Music Center (1949), with Hindemith at Yale (1950–54) and, on a Fulbright scholarship, with Boulanger in Paris (1954–7). From 1958 to 1997 he taught theory and composition at the University of Chicago. He has received a first prize from the Koussevitzky Foundation (1958), the Brandeis Creative Arts Award (1968) and commissions from the Chicago SO and the Library of Congress. In the late 1970s he received a grant from the NEH to investigate the harmonic and modal properties of microtonal tunings. As a pianist he has distinguished himself as an interpreter of the contemporary repertory, notably the second sonatas of Ives and Boulez.

After early works in a modernist idiom (dating from 1946), Blackwood adopted in the 1950s a more conservative style, best represented in his First Symphony. During the 1960s and 70s he returned to an atonal language involving complex counterpoint. This phase culminated in his *Twelve Microtonal Etudes* (1980), *Fanfare* (1981) and the Sonata for guitar (1983). In the early 1980s his style again became conservative – radically so – with the adoption of forms and a harmonic language more commonly associated with the 19th century. The most significant work of this period is his Fifth Symphony (1990) which has a conventional sonata-form first movement, developmental sections and clear harmonic progressions; the second movement quotes the Dies irae theme, while the third and final movement combines the characteristics of a rondo or scherzo.

JAMES R. MCKAY

**Bladder and string.** *See* BUMBASS.

**Bladder pipe** (Fr. *vèze*; Ger. *Platerspiel*). A wind instrument in which a reed is enclosed by an animal bladder. The player blows through a mouthpiece into the bladder, which serves, like the bag of a bagpipe, as a wind reservoir. Thus the performer does not directly control the reed with the lips; the instrument probably cannot be overblown, but has a compass limited by the number of finger-holes. The bladder pipe is depicted in a number of late medieval and Renaissance sources, but no specimens survive from that period. It is related to the WIND-CAP INSTRUMENTS of the Renaissance, on which the reed was also enclosed, but in a rigid wooden cap. Bladder pipes occurred in both straight and curved forms, the latter being more common and bearing a superficial resemblance to the CRUMHORN. The bore was mostly conical, though cylindrical bores are also depicted; some instruments had two parallel pipes, with the second pipe apparently serving as a drone or for accompaniments. In most iconographic sources both of the player's hands cover the finger-holes; thus neither would be free to apply pressure to the bladder, which may have been elastic enough to expand and contract by itself. Pictures do not, of course, make clear whether the instrument had a single or a double reed, and the practice may have varied with the locality.

Aristophanes in *Lysistrata* (411 BC) mentioned a wind instrument called a *phusallis* (a word derived from 'bladder'), so the bladder pipe may have originated in the ancient world. The 9th-century epistle to Dardanus by Pseudo-Jerome defines the *chorus* in terms that suggest a bladder pipe. One of the earliest clear references to the instrument is by Seifried Helbling about 1290, and two bladder pipes (illustration) figure among the instruments illustrating one of the late 13th-century Spanish manuscripts of the *Cantigas de Santa María*, a collection of sacred songs written for the court of Alfonso el Sabio (reigned 1252–84). Gerbert (*De cantu et musica sacra*, ii, 1774) reproduced a bladder pipe labelled 'Chorus' after a 13th-century manuscript once in St Blasien, now lost, and the Loenberg family coat of arms (St Gallen, *c*1340) consisted of a curved bladder pipe with conical bore and six finger-holes (illustrated in Becker). Numerous later examples have been cited by Kinsky and Becker.

*Two bladder pipes: miniature from the 'Cantigas de Santa María', Spanish, c1270–90 (E-E b-I-2, f.209r)*

While many medieval depictions suggest a courtly context, by the later 15th century the bladder pipe had become predominantly a folk instrument. It appears quite often in drawings, woodcuts and other pictures by Dürer and other early 16th-century German artists, usually played by itinerant musicians or shepherds. Virdung included a woodcut of a bladder pipe in his *Musica getutscht* (1511), but had nothing to say about it, and Praetorius did not mention the instrument at all. It seems to have made its last appearance in western European art in an engraving by Wolfgang Kilian of the Muse Euterpe, dated 1612, but Kilian in all probability was merely copying Virdung.

The bladder pipe survives today as a toy or folk instrument in various parts of the world, for example in Brittany and Sicily where an ordinary rubber balloon replaces the animal bladder, in Albania where it is played by children, and in Poland where it is sometimes played by shepherds.

HOWARD MAYER BROWN/BARRA R. BOYDELL

**Blades, James** (*b* Peterborough, 9 Sept 1901; *d* Cheam, 19 May 1999). English timpanist and percussionist. He was apprenticed as an engineer, but a youthful passion for drumming led him to join the band of a travelling circus when he was 19. Engagements in orchestras accompanying silent films followed. Here he played a lot of the standard orchestral repertory and accompanied many of the variety acts that performed between films, often having to invent sound effects as he went along. His early career was spent playing in dance bands and making recordings, the most famous of which perhaps being the three Chinese tam-tam notes that heralded the beginning of every Rank film after 1935 and the V-for-Victory morse code signal recorded in 1941 for BBC wartime radio. He became principal percussionist of the LSO in 1940 and until his retirement was a regular freelance player with most of the major British orchestras, notably the Melos Ensemble and the English Opera Group. It was while playing for the latter that he formed a close working relationship with Benjamin Britten who sought his advice on certain sound effects. Blades was able to put his engineering background to good use, often devising one-off instruments to achieve a sound that pleased Britten. These were used mainly in the chamber operas and church parables performed by the English Opera Group.

Following an accident in 1956, which left him in hospital for five weeks, Blades developed a gift for public speaking, and built lectures for school and adult audiences

alike on the history and use of percussion instruments into his working schedule. So successful were these that they were made into a film series, 'We Make Music', and a record, 'Blades on Percussion', issued in 1973. He became professor of timpani and percussion at the RAM in 1960 where he did much to improve the standard of percussion students and was particularly proud of the achievements of Evelyn Glennie, whom he taught. He worked extensively with the handicapped and was awarded the OBE in 1972.

NOËL GOODWIN/MATTHEW DICKINSON

**Blades, Ruben** (*b* Panamá, 16 July 1946). Panamanian popular singer, composer, bandleader and actor. His father was a Panamanian percussionist and his mother was a Cuban vocalist, and he began his career as vocalist in his brother's rock band in 1963. Turning to Latin American styles, he travelled to New York in 1969 and recorded his first album, *De Panamá a Nueva York*, with Pete Rodríguez. He graduated in law from the University of Panamá in 1974 and was also interested in politics. Returning to New York in 1974, Blades worked as a mail clerk for Fania Records, the main salsa label, until he was given a break with the Ray Barretto band in 1975. He subsequently joined forces with salsa 'bad-boy' Willie Colón, recording for Fania a number of albums including *Metiendo mano* (1977), *Siembra* (1978) and *Canciones del solar de los aburridos* (1981). In 1982 he launched his own band, Seis de Solar, with whom he recorded *Buscando América* (1984) and *Escenas* (Elektra, 1985). He resumed his law career while maintaining performance activities, graduating as Doctor of Law from Harvard University in 1985. During the 1980s he also took up acting, appearing in over a dozen Hollywood films and in Paul Simon's Broadway musical *Capeman* (1998). He returned to politics in 1994, running as presidential candidate in the Panamanian elections.

Blades is the most political of *salseros*, fusing salsa with the spirit of Latin American *nueva canción* (protest music). Astute commentary permeates most of his compositions, including his hits *Pablo pueblo*, *Pedro navaja*, *Plástico*, *Buscando América*, *Decisiones*, *Todos vuelven* and *Padre Antonio*. While earning him an enormous following and two Grammy awards, Blades's politically charged songs have garnered criticism in more conservative quarters: *Tiburón*, protesting against US intervention in Central America, earned him the label of communist among Miami Cubans in 1981.

LISE WAXER

**Blado, Antonio** (*b* Asola, nr Mantua, 1490; *d* Rome, 1567). Italian printer. From 1516 until his death Blado printed more than 1200 editions in Rome as well as a few elsewhere. For the popular market he printed guidebooks, prognostications, devotional books and the like, and under clerical or aristocratic sponsorship classical and modern literature, books in Greek and Hebrew, theological works and much else. His books use a variety of ornaments, decorated initials and typefaces, including the Ethiopic type of his *Modus baptizandi* (1549); some are lavishly illustrated. In 1535 he obtained the exclusive right to print Vatican documents and thereafter styled himself 'impressor camerale' or 'stampatore apostolico'. Blado was a dominant figure in Roman printing, and in 1550 his was one of the largest printing shops, with six or seven printers. His printer's mark was a crowned eagle facing left, with wings unfolded, holding a standard in its talons.

Blado was the second Roman printer (after VALERIO DORICO) to print music from movable type in a single impression. He may have printed the 1538 *Madrigale de M. Constantio Festa libro primo*, although the surviving parts are without name or place. The *Exercitium seraficum, madrigali di M. Hubert Naich*, undated but probably 1542, was signed by Blado but uses music type not seen in his later music books. These include Giovanni Animuccia's *Secondo libro de i madrigali* (1551), Guerrero's *Psalmorum quatuor vocum liber primus* (1559), Zoilo's *Libro secondo de madrigali* (1563) and Martelli's *La nuova, et armonica compositione* (1564). For, or with, Antonio Barrè he printed madrigal books by Francesco Menta (1560) and Lasso (1563). He also published Vicente Lusitano's *Introdutione facilissima* (1553), and his type was used in Barrè's 1555 edition of Vicentino's *L'antica musica ridotta alla moderna prattica*. Several of his liturgical books, beginning with *Officium gloriosissimi nominis Jesu* (1539), include plainchant.

Blado's heirs included his widow Paola (*d* 1588) and sons Paolo (*d* 1594) and Stefano (*d* 1585). The latter's marriage to Livia Dorico linked the Blado firm with one of its most important competitors (as had daughter Agnese's marriage to Giovanni Osmarino Gigliotti). The heirs continued to print voluminously (about 1700 editions) both ephemera and serious editions, most notably an 18-volume edition of Aquinas, and a few musical editions: G.D. Petrucci's introits (1568); two books of *laude spirituali*, the *Secondo*, by Animuccia (1570), and the *Terzo*, edited by Francesco Soto de Langa (1577); Florido Zaccardi's *Psalmi vespertini* (1577); and Giulio Cesare Romano's *Motecta* (1580). After Paolo's death the business was continued until 1609 by Paolo's widow Porzia (*d* 1624) and by her daughter Isabella and son-in-law Geremia Guelfi until 1626, although not under the Blado name after 1609.

THOMAS W. BRIDGES

**Blaes, Arnold Joseph** (*b* Brussels, 1 Dec 1814; *d* Brussels, 11 Jan 1892). Belgian clarinettist. The son of an amateur clarinettist, he was orphaned at ten. His guardian discouraged the child's passion for music and sent him out to work as a clerk at the Ministry of Finance when only 13. A few years later relatives overcame the guardian's scruples and the boy was allowed to buy a clarinet. While still earning his living, Blaes enrolled at the Brussels Conservatory as a pupil of Georges Chrétien Bachmann and won first prize in 1834. On his coming of age he rejected commerce for the life of a clarinettist. His career was brilliant, for besides great expressive ability he had a panache which enabled him to hold his own in partnership with performers such as Liszt and Rubinstein. Weber's Grand Duo Concertant (J204) was his favourite showpiece, but he was assiduous in performing new works by his compatriots. He had a delicate, impressive style of playing and was particularly noted for his *pianissimo*.

Blaes went to Paris in 1839 and 1846, and the Société des Concerts du Conservatoire struck a medal in his honour on the first visit. He also visited London in 1841 and 1845. His greatest successes were in Russia in 1842 and 1847; on the first visit he was made director of the Imperial Guard music and remained in the country two years. Many of his appearances as soloist in St Petersburg and Moscow were shared by the soprano Elisa Meerti, whom he married in 1843 (*see* BLAES, ELISA).

The Brussels Conservatory awarded Blaes an honorary post in 1837 and in 1844 he was appointed to the professorship there. His pupils gained 28 *premiers prix* but he bore the conservatory a grudge for inadequate pay and resigned the appointment to Gustav Poncelet in 1871. Blaes wrote a *Méthode*, which was successful only in his own country. He used 14-key clarinets, with Janssen-type rollers made by Bachmann; one was of boxwood, the other ebony. His autobiography is interesting and animatedly written.

PAMELA WESTON

**Blaes** [née Meerti], **Elisa** (*b* Antwerp, 2 Nov 1817; *d* Brussels, 6 Nov 1878). Belgian coloratura soprano, wife of ARNOLD JOSEPH BLAES. Mendelssohn admired her and engaged her for concerts at the Leipzig Gewandhaus in 1839, 1841 and 1842. She first sang for the Philharmonic Society of London in June 1839. After appearances in Dresden, Prague and Weimar she joined her future husband for a tour of Dutch provinces in 1840. In Russia (1842–3) she sang many times with Rubini, and Liszt played her accompaniments. After her marriage to Joseph Blaes on 21 September 1843 the couple settled in Brussels. A child was born in the following year and Elisa resumed concert tours with her husband, making a speciality of the aria 'Parto, parto' with clarinet obbligato from Mozart's *La clemenza di Tito*. In 1846 the Société des Concerts du Conservatoire in Paris awarded her their medal. Later she became a teacher.

PAMELA WESTON

**Blagrave, Thomas** (*b* c1620; *d* London, 21 Nov 1688). English composer, cornett player, violinist and singer. He was the son of Richard Blagrave, wind player at Charles I's court, and joined his father in the cornett and sackbut consort in 1637, inheriting his place in 1641. He shared the role of Mustapha with Henry Purcell the elder in Davenant's *The Siege of Rhodes* (1656), and was one of Cromwell's musicians (probably 1657–8). At the Restoration, Blagrave took up his former post as a court wind player, also receiving a place in the Twenty-Four Violins; his nephew Robert served alongside him in this dual capacity. Thomas was also a member of the revived Chapel Royal, was made Clerk of the Cheque in 1662, and Master of the Choristers of Westminster Abbey (where he was buried) in 1664, though according to Anthony Wood he was 'a player for the most part on the cornet' in the Chapel Royal. Wood thought him 'a gentile and honest man', and Pepys often mentioned him in his diary. His portrait is in the Oxford Music Faculty, and two songs of his survive: *What conscience say is it in thee* (RISM 1669[5]) and an attractive setting of Sir Robert Ayton's *What means this strangeness now of late* (ed. in MB, xxxiii, 1971).

PETER HOLMAN

**Blagrove.** English family of musicians.

**(1) Henry (Gamble) Blagrove** (*b* Nottingham, 20 Oct 1811; *d* London, 15 Dec 1872). Violinist. He was the son of Richard Manning Blagrove, a Nottingham violinist and teacher who wrote *A New and Improved System of the Art of Playing the Violin* (London, 1828) and several lightweight piano pieces. Taught by his father, he was taken in 1817 to London, where he was displayed as a child prodigy and even played in the Drury Lane orchestra. In 1821 he began to have lessons from Spagnoletti, and in 1823 became one of the first pupils of the RAM, studying composition with William Crotch and the violin with François Cramer. He joined Queen Adelaide's private band as soloist and principal second violin in 1832, and two years later went to Cassel to study with Spohr. While abroad he visited several European cities, among them

Paris and Vienna, where he probably witnessed string quartet concerts. He returned to London in 1834 and shortly afterwards (November 1835) set up the Concerti da Camera, the first West End chamber music concerts, at the Hanover Square Rooms. Later that season (March 1836) he began the Quartett Concerts, a regular chamber series which ran under his leadership until 1842. Through these concerts Blagrove introduced much of the Viennese chamber repertory, including Beethoven's middle- and late-period quartets, to London audiences.

Blagrove was also a prominent orchestral leader and soloist, and for many years played at the Italian Opera, the Philharmonic Society, the Handel Festivals at Crystal Palace and other London concerts. From 1831 he was a professor at the RAM. His published compositions include a number of didactic works, violin solos and duets. Although one of the most talented English violinists of the period, with a large tone and good technical facility, Blagrove paled in comparison with such foreign violinists as Sivori, Sainton and Vieuxtemps; Walter Macfarren's assessment that 'though a talented and estimable individual, his temperament, like his violin-playing, was decidedly cold', is borne out by other commentators.

(2) **William (Manning) Blagrove** (*b* Nottingham, 1 April 1813; *d* London, 1 Nov 1858). Violinist and music publisher, brother of (1) Henry Blagrove. He played the violin and viola in several London orchestras, appeared in the Quartett Concerts and other chamber music series, and wrote a few lightweight violin pieces. He was also active as a music publisher from 1843 (in partnership with William Attwater, 1844–6), trading from 1847 at 71 Mortimer Street; the premises, known as Blagrove's Rooms, were also used by the Blagrove family and others for small-scale concerts.

(3) **Richard (Manning) Blagrove** (*b* ?London, 1826/7; *d* Clapham, London, 21 Oct 1895). Viola and concertina player, brother of (1) Henry Blagrove. From 1837 to 1841 he was a student at the RAM, where he had viola lessons from Henry Hill. During the 1840s he regularly played the viola in London orchestras and at chamber music concerts; in 1856 he succeeded Hill as principal viola at the Philharmonic concerts and the Three Choirs Festival, positions he held until 1894. He was professor of viola at the RAM from 1856 to 1890.

While a student at the RAM Blagrove learned to play the concertina (invented by Wheatstone in the late 1820's). One of the first in England to take the instrument seriously, he made his début as a concertina soloist at the Hanover Square Rooms in March 1842, and with Giulio Regondi, George Case and Alfred B. Sedgwick formed a concertina quartet which played in public from 1844, often performing arrangements of classical string quartets. Blagrove composed several short pieces for solo concertina and arranged operatic airs; he also wrote a concertina tutor (London, 1864). G.A. Macfarren wrote two romances and a quintet for concertina and strings for him. In 1876 and 1877 he ran a series of ten Concertina Concerts in London, with the aim of raising money to support concertina composition. Another brother, Charles Frederick Blagrove (bap. London, 16 March 1823; *d* before Nov 1858), was a pianist and composer of piano waltzes and polkas.

CHRISTINA BASHFORD

**Blahetka, (Anne Marie) Leopoldine** (*b* Guntramsdorf, nr Vienna, 15 Nov 1809; *d* Boulogne-sur-Mer, 17 Jan 1885). Austrian pianist and composer. Over a period of more than 60 years she made a major contribution to the image of the professional woman pianist. On the advice of Beethoven, who followed her musical development with interest, she studied the piano with Joseph Czerný; her teachers also included Joachim Hoffmann, Catharina Cibbini, Simon Sechter, and, for a short period, Kalkbrenner and Moscheles. She first performed in public in 1818, and in 1820 was the soloist in Beethoven's Second Piano Concerto. The music critics praised her precise touch, technical brilliance and the 'cantabile performance of the melodies' (*Wiener allgemeine musikalische Zeitung*, 1820). In 1823 she began including compositions of her own in her programmes. During her first major concert tour in 1825–6 she performed in Frankfurt, Brunswick, Bremen, Hamburg, Berlin and Leipzig. In 1828 she appeared in Vienna with Nicolò Paganini. In 1830 she set out on a concert tour of Germany, the Netherlands, Belgium, England and France. On her way back, about 1833, she decided to make her permanent home at Boulogne-sur-Mer on the north coast of France. She lived there until her death, still making occasional appearances as a pianist, but concentrating more on teaching and composition.

To judge by the number of her published works (64), Leopoldine Blahetka was one of the most successful women composers of the 19th century. Although critical reaction to her Singspiel *Die Räuber und der Sänger* (1830, Vienna) was negative, her instrumental compositions, distributed in many editions from 1822, were reviewed favourably. Most of her works are of a virtuoso character, but she also wrote several compositions in the Classical mould, including a Violin Sonata, a Piano Trio and two piano quartets.

WORKS

Stage: Die Räuber und der Sänger (Spl), Vienna, Kärntnertortheater, 22 March 1830

Vocal: 6 deutsche Lieder, 1v, pf, op.16; Ave Maria, S/T, pf, op.57; Pater noster, S, A, T, B, pf/org, op.58; other works

Orch: Variations brillantes, pf, orch/str qt, op.4; Variations brillantes, pf, orch, op.14; Variations brillantes sur un thème hongrois, pf, orch/str qt, op.18; Concertstück, pf, orch/str qt, op.25

Chbr: Pf Trio, op.5; Grande polonaise concertante, vc, pf, op.9; Sonata, vn, pf, op.15; 2 pf qts, opp.43 and 44; sets of variations, pf, str qt; sets of variations, vn, pf; works for fl, pf

Pf: Polonaise, op.19; 3 rondeaux élégants, op.37; 2 nocturnes, op.46; Grand Duo, pf 4 hands, op.47; Capriccio, op.48; Caprice élégant, op.59; Nocturne, op.62; 11 sets of variations; 6 sets of waltzes; other works

FREIA HOFFMANN

**Blahoslav, Jan** (*b* Přerov, 20 Feb 1523; *d* Moravský Krumlov, 24 Nov 1571). Czech music theorist, hymnographer, grammarian and poet. He studied theory under Listenius and Hermann Finck at Wittenberg University from 1544. After a short period at Mladá Boleslav (1548–9) he continued his education at Königsberg and Basle. He was a fine linguist who strove to preserve the purity of his native tongue and succeeded in bridging the gulf between Christianity and humanism. He was ordained at Mladá Boleslav in 1553, and became a bishop of the Fraternity of Czech (or Moravian) Brethren in 1557. In the following year he established himself at Ivančice, where before long he installed a printing press. Towards the end of his life he moved to Moravský Krumlov.

His treatise *Musica: to gest knjžka zpěwákům*, published in Olomouc in 1558 (ed. and Eng. trans. in Sovík), is believed to be the first on music theory in the Czech language, but its information is derived from the writings of Listenius, Finck, Ornithoparchus and Coclico. Blahoslav wrote two entirely new sections for the second edition giving critical and practical advice to singers and choirmasters, and guidance to composers of hymns: he emphasized the need for the musical rhythm to correspond with the *časomíra* system of prosody (i.e. the alternation of long and short syllables) of the verses. He was the chief editor of the *Pisně duchowni ewangelistské* (1561), known as the Szamotuły Kancionál, which comprised 735 hymn texts, 52 of them by Blahoslav, and more than 450 tunes, including a number drawn from secular sources and eight which he may have composed himself. Blahoslav has been greatly esteemed for his Czech translation of the New Testament (1568; ed. J. Konopásek, Prague, 1931–2), which was the initial step in the preparation of the celebrated Bible of Kralice (1588).

JOHN CLAPHAM

**Blaikley, David James** (*b* London, 13 July 1846; *d* London, 29 Dec 1936). English acoustician. He was principally noted for his design and manufacture of wind instruments. He had a long career with the firm of Boosey & Hawkes and when Boosey's took over the business of Henry Distin in 1868, Blaikley was appointed works manager. He became widely known as an authority on woodwind and brass, and in 1874 devised a system of compensating pistons (patented in 1878) which Boosey & Co. adopted (*see* VALVE (i)). The firm continued to use equipment designed by him until the late 1980s. Blaikley also devised other improvements for trumpets, horns and trombones. In 1875 he joined the (Royal) Musical Association and in 1878 read the first of many papers to that society. This highly technical discussion of resonance was followed by others on such subjects as quality of tone in wind instruments (1880), the velocity of sound in air (1883), the trumpet scale (1894) and the french horn (1909). His theoretical and experimental abilities were highly regarded by such famous acousticians as Rayleigh and R.H.M. Bosanquet. From 1884 to 1935 Blaikley served as the Association's honorary auditor; he also gave lectures to the Royal Society of Arts and at Kneller Hall, the RAM and the Royal College of Organists. The vexed question of pitch led him to contribute an authoritative essay to C.R. Day's *Descriptive Catalogue* ... (London, 1891) of the musical instruments included in the Royal Military Exhibition (1890) and in 1910 he wrote a memorandum on the pitch of army bands. Blaikley was a keen collector. In connection with the Music Loan Exhibition organized in 1904 by the Worshipful Company of Musicians he delivered a lecture on reed instruments, published in T.L. Southgate, ed.: *English Music 1604–1904* (London, 1906, 2/1911).

E.D. MACKERNESS

**Blainville, Charles Henri de** (*b* nr Tours, 1711; *d* Paris, 1769). French theorist, composer and cellist. The Marquise de Villeroy was for a time his pupil and patron. He claimed the discovery of a third mode ('mode mixte') between major and minor, and his theories provoked controversy and criticism (from Daquin, La Borde and others); after the performance of his symphony in the newly discovered third mode, on 30 May 1751, Rousseau published a sympathetic comment in the *Mercure de France* (June 1751), and Blainville himself replied (November 1751 and May 1752) to objections such as those of J.A. Serre (January 1752).

In his *L'esprit de l'art* he discussed aspects of vocal composition and performance: recitative, *ariette*, the voice, accompaniment and expression. His last theoretical work, the *Histoire générale et philologique* (dedicated to the Duchesse de Villeroy) has a final section on harmonic

theory, in which he tried to demonstrate that the method of 'counterpoint' (of Corelli, Lully and Campra) is preferable to that of the *basse fondamentale* (of Rameau), citing examples from Rameau's *Talents lyriques* (*Les fêtes d'Hébé*), where Blainville found 'un mélange de bisarrerie & de caprice du vrai beau'.

Among his compositions heard at the Concert Spirituel was an 'Ode de Rousseau' sung by M. Gélin (*Mercure de France*, March 1757). He also played the cello at the Concert Spirituel, but neither his performances nor his compositions met with outstanding success.

WORKS

*all printed works published in Paris unless otherwise stated*

VOCAL

Cantatilles, 1v, acc: Le dépit amoureux (n.d.); Iphise (n.d.); Le serin perdu (n.d.); Les plaintes inutiles (1757); Venus vengée (1758)
Chansons pubd in *Mercure de France* (1752–4): Le retour du printems; Le bonheur de la vie champêtre; Flore en nos champs; D'une aimable bergère; Goutons les douceurs de la vie
Les secondes leçons de Ténèbres (1759)
1er recueil de romances et ariettes, 1v, vn/fl, bc (1769)
1er recueil des récréations lyriques (1771), lost
Bouquet à Mme la Marquise de Villeroy, S, T, B, chorus, orch, 1751, *F-Pn*

LOST VOCAL WORKS

Cantatilles: La prise de Berg op Zoom, 1751; Le rossignol, 1751; La musette, 1751; L'heureuse surprise, 1758; Le bouquet d'Eglé
Thésée (op); Midas, pièce pour le théâtre du collège des Jésuites à Paris, 1753; Ode de Rousseau, perf. Concert Spirituel, March 1757
Regina coeli, motet, 1760; Dixit Dominus, 1765; Confitebor tibi Domine, motet à grand choeur, 1765

INSTRUMENTAL

VI sonates, 2 vn/fl, bc, op.1 (before 1740)

MARY CYR

**Blaise, Adolfe Benoît** (*d* ?Paris, 1772). French bassoonist and composer. He was probably the son of a bassoonist at the Comédie-Italienne in Paris in the late 17th century, who may have been *maître de chapelle* at Limoges in 1717. The younger Blaise was a bassoonist at the Comédie-Italienne by 1737, when (according to the *Mercure de France*) he arranged music for *Le petit maistre*. In 1743 he was *chef de l'orchestre* at the Foire St Laurent, and the next year he took the same post at the Foire St Germain (Boismortier, formerly his deputy, assumed the head position at St Laurent). Blaise continued as bassoonist for the Comédie-Italienne, composing and arranging *ariettes*, divertissements, vaudevilles and dances for 44 parodies, ballet-pantomimes, comic operas and a *spectacle à machines* presented there between 1737 and 1769 (for detailed lists see Brenner, 1947 and 1961, and Barnes). He was listed in the *Almanach des spectacles* and *Etat actuel de la musique* as that orchestra's *maître de musique* (1753–60) and composer (1762–6). He retired in 1767.

The scoring of the popular *ariettes* for Favart's *Annette et Lubin*, first performed at a wedding in January 1762 and at the Comédie-Italienne the following month, is widely attributed to Blaise; numerous 18th-century French song collections contain *ariettes* from the work. The 1765 version of Favart's *Isabelle et Gertrude*, with original music by Blaise except for three Gluck *airs*, was also successful. Some criticized Blaise's music as plain and weak, but others praised the way it fitted the verse and kept pace with the dialogue. The work played in Paris for more than 20 years; by 1767 there was a German adaptation using Blaise's music, and it was given as far afield as Moscow. Grimm wrote of *Isabelle et Gertrude*: 'There is nothing to be said about the music: it consists of chansons – little *airs* that do not merit that name; and as soon as M Blaise attempts to raise himself above the poetry, the music becomes wretched'. Contemporary accounts in the *Mercure de France*, however, claimed Blaise was 'known for his other good works' and that his music was 'always distinctive'. The hundreds of performances at the Comédie-Italienne including music by him attest to his success. He published two *cantatilles*, *Le feu de la ville*, in 1739, and *Le coucher du soleil*, without date; some of his songs and other items were included in contemporary anthologies.

JEFFREY R. REHBACH

**Blaison, Thibaut de.** *See* THIBAUT DE BLAISON.

**Blak, Kristian** (*b* Fredericia, 31 March 1947). Danish composer and musician. He studied music at Århus University from 1966 to 1971, and moved to the Faeroes in 1974, where he soon became an important musical figure. As a music administrator, Blak has in particular played a key role: he took the initiative for, among others, the Musikforbunden, the Komponistforeningen, the festival 'Summartonar', the Tórshavn Jazz Club and the

record company TUTL. He is an active folk and jazz musician, playing the piano in several groups, including Spillemaendene (from 1974). In 1980 he formed the group Yggdrasil, which has had various line-ups and has collaborated with other musicians such as John Tchicai. For this group Blak has written several rhythmic suites which blend jazz and folk music with a more serious 'art' music, creating a crossover 'world' music. One feature common to the suites is their use of different art forms, such as poetry recitation, slides or art works; in addition, several have been performed in conjunction with exhibitions or other special environments, allowing the ambient sounds of indoor or outdoor performance to enter the music. *Brøytingar*, a rhythmic suite for improvisation group and tape (1988), was nominated for the Nordic Council Music Prize in 1998.

Since 1983 Blak has moved away from purely rhythmic composition, and has written chamber music for various ensembles. Most of these works are in a moderate modernist style, with eclectic elements. Faeroese nature and culture is often present in the music, as it is in the rhythmic suites, either through the titles or in the music's mood or melodic lines.

ERIK H.A. JAKOBSEN

**Blake, Benjamin** (*b* Hackney, 22 Feb 1751; *d* London, 1827). English violinist, viola player and composer. Almost all we know of him comes from information he himself supplied for Sainsbury's dictionary in 1824. As a boy he was taught the violin by Antonín Kammel, and later by Wilhelm Cramer, leader of the Italian Opera orchestra at the King's Theatre. Blake himself played the violin in this orchestra from about 1775, as also at the Concert of Ancient Music. It was as a viola player, however, that he came into public prominence. He was principal and soloist at the Professional Concert from 1785 to 1793, appearing regularly in string quartets with Cramer. He also played the viola at the Prince of Wales's musical evenings, and his unusual interest in this instrument led to his publishing 18 duos for violin and viola in the 1780s. After the 1793 season Blake resigned from public performance. He was already studying the piano under Clementi to equip himself as a teacher, and though he continued to play the viola for the Prince of Wales he lived almost entirely by teaching until 1820 when he retired. Some of his duos would merit revival, as also his sonatas for violin and piano, which were published in score and show an interesting taste for minor keys; the violin parts are called 'accompaniments' on the title page, but wrongly.

ROGER FISKE/SIMON McVEIGH

**Blake, Christopher (Hugh)** (*b* Christchurch, 5 Jan 1949). New Zealand composer and administrator. After initially working as a civil engineer, he completed the BMus at Canterbury University, New Zealand, in 1973 and followed this with postgraduate composition studies at Southampton University with Eric Grabner and Jonathan Harvey. Since 1977 he has pursued twin careers in composition and performing arts administration. He was the chief executive of New Zealand's Ministry of Cultural Affairs (1991–7) and in 1997 became National Librarian and Chief Executive of the National Library of New Zealand. The practical knowledge of voices and instruments gained while managing the Canterbury Orchestra (1977–8), National Opera of New Zealand (1979–82) and Auckland Philharmonic Orchestra (1985–90) is evident in his music, which is notable for its clarity of thought and texture. Although underpinned by European organizational techniques, particularly serialism, his works project a strongly New Zealand spirit and imagery and are characterized by a finely judged instinct for theatrical gesture. Many of Blake's major scores reflect his concern for social issues, including the pacifist *Till Human Voices Wake Us* (1986), which featured in a Television New Zealand documentary on his work (1988).

ADRIENNE SIMPSON

**Blake, David (Leonard)** (*b* London, 2 Sept 1936). English composer. He read music at Gonville and Caius College, Cambridge, where his teachers included Patrick Hadley. The award of the Mendelssohn Scholarship in 1960 enabled him to study in East Berlin, at the Akademie der Künste, with Hanns Eisler. During this time he wrote his first acknowledged works, the Variations for Piano and the First String Quartet. Upon his return to the United Kingdom he began a career as a schoolteacher, and composed the children's musical *It's a Small War*. An appointment as the first Granada Arts Fellow at the then new University of York was followed in 1964 with his appointment as one of the founding teaching staff of the new Department of Music, along with Wilfred Mellers and Peter Aston. He became professor in 1976 and was head of department from 1980 to 1983. Among his most important commissions have been two from English National Opera, for *Toussaint* in 1974–7 and *The Plumber's Gift* in 1988. His Violin Concerto (1976) was a BBC Proms commission. Blake is an active perfomer, conducting university ensembles. He has done much to promote the work of Eisler, both in performance and as editor of *Hanns Eisler: a Miscellany* (Luxembourg, 1995).

Blake's music is both highly personal and widely eclectic in style, and he has a natural penchant for expressivity and drama, literal and abstract. His earlier works show his thorough absorption, acquired through Eisler, of Schoenbergian techniques, serial and otherwise; in *Beata L'Alma* this technique is combined with a Straussian lyricism. An interest in non-occidental cultures has also informed his work, but beyond that his music serves a broadly socialist political agenda without, however, compromising artistic integrity. This conscience is manifested on its largest scale in his first opera, *Toussaint*, in which Blake brings together various stylistic strands – here they include vodou drumming as well as an ironic neo-classicism – in his potent retelling of the story of the Haitian black revolutionary and leader. Structurally the opera is united by a broad tonal plan. A second opera, the witty *The Plumber's Gift*, is in some ways the opposite of *Toussaint*, a work based on the everyday world and the hope and fantasy nurtured by those who inhabit it.

STEPHEN PETTITT

**Blake, Eubie** [James Hubert] (*b* Baltimore, 7 Feb 1883; *d* New York, 12 Feb 1983). American ragtime pianist and composer. When he was six years old his parents, who had been slaves, purchased a home organ and arranged for him to have lessons. Later he studied music theory with a local musician, Llewelyn Wilson. Despite the disapproval of his mother, an extremely religious woman, Blake began to play professionally in a Baltimore nightclub at the age of 15, and in 1899 wrote his first piano rag, *Charleston Rag*. In 1915 he met the singer Noble Sissle. The two men formed a songwriting partnership and had an immediate success with *It's all your fault*, performed by Sophie Tucker. Blake and Sissle went to New York and joined James Reese Europe's Society Orchestra, and after World War I they formed the Dixie Duo, a vaudeville act. In 1921 they produced an extremely successful musical, *Shuffle Along*, which ran for more than 14 months on Broadway and subsequently went on tour. Blake continued to write songs with Sissle and other lyricists for several Broadway and London shows during the 1920s and 30s, and toured as musical director for United Service Organizations productions during World War II. He first recorded in 1917, and continued to record as a soloist, including piano rolls, and with his orchestra into the 1930s. He retired in 1946 and returned to the

study of composition at New York University, completing the Schillinger system of courses three years later. During the ensuing years he spent much time notating many of his compositions.

A ragtime revival in the 1950s focussed attention on Blake as the nation's foremost rag pianist and launched him on a new career as a touring player and lecturer. He returned to recording in 1969 with the album *The Eighty-Six Years of Eubie Blake* (Col.), and in 1972 established his own publishing and record company, Eubie Blake Music. He also made piano rolls for the QRS Company (1973). Blake became a legendary figure, constantly performing on television and at jazz festivals in the USA and abroad. He received awards from the music and theatre industries and from civic and professional organizations; he was awarded the Presidential Medal of Freedom (1981) and honorary degrees from Brooklyn College (1973), Dartmouth College (1974), Rutgers University (1974), the New England Conservatory (1974) and the University of Maryland (1979). His life was celebrated in documentary films and on Broadway in such shows as *Eubie* (1978).

Blake's music is distinguished by an enormous diversity, reflecting tastes in popular music in the early and middle decades of the 20th century. Many of his more than 300 songs are infused with the syncopated ragtime rhythms that swept Tin Pan Alley between 1900 and 1920. His tunes tend to have a large melodic range and exhibit disjunct motion, while his harmonic language includes many altered blues chords and chromatic progressions. The broad range of Blake's music can be seen in his ethnic songs (*If You've Never been Vamped by a Brownskin*), which derive from the earlier coon song, in musical-theatre ballads (*Love will find a way*), in spiritual songs (*Roll, Jordan*), or in *double-entendre* novelty songs (*My handyman ain't handy any more*). His piano music, which consists mostly of rags, displays many of the melodic, harmonic and rhythmic characteristics of the songs. With their use of broken-octave basses, highly embellished melodies and arpeggiated figurations, they give a good indication of Blake's own virtuosity at the keyboard. His rags, along with works written in the 1920s by composers such as Fats Waller and James P. Johnson, had a direct influence on the development of the Harlem stride-piano school of the following decade.

WORKS
(*selective list*)

STAGE

*musicals unless otherwise stated; some music written in collaboration with N. Sissle; writers shown as (lyricists; book author); dates those of first New York performance*

Shuffle Along (N. Sissle; F.E. Miller and A. Lyles), 23 May 1921 [incl. Everything reminds me of you, If You've Never been Vamped by a Brownskin, I'm just wild about Harry, Love will find a way]

Elsie (Sissle; C.W. Bell), 2 April 1923

The Chocolate Dandies (orig. title In Bamville) (Sissle; L. Payton and Sissle), 1 Sept 1924 [incl. That Charleston Dance, Bandanaland, Jazztime Baby, The Sons of Old Black Joe]

Lew Leslie's Blackbirds (revue, A. Razaf: Miller and Razaf), 22 Oct 1930 [incl. Memories of You, My handyman ain't handy any more, Who said blackbirds are blue?, Roll, Jordan]

Shuffle Along of 1933 (Miller; Sissle), 26 Dec 1932 [incl. Harlem Moon]

Swing It (C. Mack), 22 July 1937 [incl. Ain't we got love]

Tan Manhattan (revue, Razaf), 1940 [incl. Tan Manhattan, We are Americans too, Weary]

Shuffle Along of 1952 (Sissle, F.E. Miller and J. Scholl; Miller and P.G. Smith)

Others, unperf.

Contribs. to revues in London, incl. London Calling!, 4 Sept 1923 [incl. You were meant for me]; Cochran's Revue of 1924, 1924; Charlot's Revue, 30 March 1925; Cochran's Revue (1926), 29 April 1926

EILEEN SOUTHERN, JOHN GRAZIANO

**Blake, George E.** (*b* England, ?1775; *d* Philadelphia, 20 Feb 1871). American music engraver and publisher. He emigrated to the USA before 1793 and in 1794 began teaching the flute and clarinet. In 1802 he acquired the piano manufactory of John I. Hawkins in Philadelphia, and soon after began to publish and to operate a circulating music library. His production included many American compositions (*c*1808) and political songs (*c*1813); an early piracy of Thomas Moore's *Irish Melodies* (1808–*c*1825); a serial, *Musical Miscellany* (from 1815); and the first American edition of *Messiah* (*c*1830), along with other major vocal works by Handel. Most numerous among his output, however, were songs of the Philadelphia theatre, based on London publications. Blake also issued typeset opera librettos and engraved tunebooks. He remained active throughout the 1830s, in later years issuing minstrel music and excerpts from Italian opera. At the height of his career (*c*1810–30) he was America's most prolific music publisher.

DONALD W. KRUMMEL

**Blake, Howard** (*b* London, 28 Oct 1938). English composer. He studied at the RAM with Harold Craxton (piano) and Howard Ferguson (composition). While serving as a projectionist at the National Film Theatre his enthusiasm for cinema led him to make a film himself. He began his career in London as composer, arranger, session keyboard player and conductor, gaining experience in radio, television and film. As a pianist in recordings for film he worked for major composers including Quincy Jones, Bernard Herrmann and Henry Mancini. His meeting with Laurie Johnson resulted in his being commissioned to compose music for 'The Avengers' television series (1968–9). In 1970, already with numerous assignments in film and television, he spent five years away from the commercial scene in order to develop his own style of concert music, which remains broadly conservative in the interest of accessibility to a non-specialist audience. His major choral work, the dramatic oratorio *Benedictus* (1979, rev. 1985), has been widely performed. His concert music includes the comic opera *The Station* (1987, rev. 1992), the ballets *The Annunciation* (1979) and *Eva* (1995), several concertos, vocal works and chamber music. Music from *The Snowman* (1982) for narrator, boy soprano and orchestra first achieved enormous popularity through its use in a short animated film (1982) of the same name. Blake has written extensively for film and television, scoring for documentaries, commercials and feature films. His return to film began with a romantic orchestral score for *The Duellists* (1977), followed by others including *Flash Gordon* (1980), *The Lords of Discipline* (1983) and *A Midsummer Night's Dream* (1996). His experience of both classical and popular styles has enabled him to score for many different film and television genres. He was Executive Director of the PRS (1978–87), was co-founder in 1980 of the Association of Professional Composers, and was awarded an OBE in 1994.

WORKS
(*selective list*)

DRAMATIC

Op: The Station (1), 1987; rev. 1992, Haywards Heath, Platform, 18 Nov 1992

Ballets: Reflections, 1976; The Court of Love, 1977; Meeting and Parting, 1977; Leda and the Swan, 1978; The Annuciation (1), 1979; The Snowman, 1993 [See VOCAL]; Eva (3), 1995

Incid music for theatre, incl. Henry V, 1985; As You Like It, 1989; The Master Builder, 1989

Film scores (director in parentheses): The Duellists (R. Scott), 1977; Agatha (M. Apted), 1978; Blood Relatives (C. Chabrol), 1978; The Riddle of the Sands (T. Maylan), 1978; S.O.S. Titanic (W. Hale), 1979; Flash Gordon, 1980; The Lords of Discipline (F. Roddam), 1983; Amityville 3D ( R. Fleischer), 1983; The Canterville Ghost (P. Bogart), 1986; A Month in the Country (P. O'Connor), 1986; A Midsummer Night's Dream (A. Noble), 1996

Incid and theme music for TV: The Avengers, 1968–9; The Remarkable Rocket, 1974; Stronger than the Sun, 1977; The Moon Stallion, 1978; Gentle Folk, 1979; Mrs Reinhardt, 1981; Down at the Hydro, 1982; Granpa, 1988–9

VOCAL

Choral: The Song of St Francis (cant., St Francis of Assisi), SATB, orch/org, 1976, rev. 1990; Benedictus (dramatic orat), T, opt. spkr, SATB, treble vv [opt.], orch, 1979, rev. 1985; The Snowman, nar, boy S, opt. SATB, orch/pf duet, 1982, rev. as ballet and stage show, 1993; Festival Mass, double chorus, opt. org, 1987; 4 Songs of the Nativity (medieval texts, trans. B. Stone), SATB, brass ens/org, 1990; The Bells (cant., E.A. Poe), children's vv, orch, 1991; The Land of Counterpane (song cycle, R.L. Stevenson), opt. spkr, young vv, orch/pf, 1994; All God's Creatures (cant., W. Blake, A. Tennyson, J. Bunyan and others), children's vv, orch, 1995; Charter for Peace (after United Nations Charter), SATB, fanfare tpts, orch, 1995; Still Falls the Rain (E. Sitwell), S/treble, SATB, org, 1997

Solo vocal: 3 Sussex Songs (J. Garrett), Mez, pf, 1973; Farewell my Gentle Harp (anon.), high v, hp, str, 1976, rev. 1993; A Toccata of Galuppi's (R. Browning), Bar, hpd, 1978; [9] Shakespeare Songs, T, str orch/str qt/pf, 1987; Sleepwalking, S, 8 vc, 1998 [vocalise]

INSTRUMENTAL

Concs.: Cl Conc., 1984; Pf Conc., 1990; Vn Conc., 1992–3; Conc., fl, str orch, 1997

Orch: Sym. in 1 Movt, 'Impressions of a City', 1967, rev. 1990; Toccata, 1976, rev. 1988; Nursery Rhyme Ov., 1984; The Conquest of Space, concert ov., 1988; A Month in the Country, str, 1989–92

Chbr: Sonata, ob, str qt, 1971; Reflections, vn, va, vc, pf, 1974; The Up and Down Man, suite, 1974, rev. for orch 1985; Str Trio, 1975; Leda and the Swan, str qt, 1977; Dirge for Fidele, cl, str qt, 1987; Serenade, wind octet, 1990

Solo inst.: 8 Character Pieces, pf, 1976; Prelude, va, 1979; Prelude, vc, 1979; Prelude, Sarabande and Gigue, gui, 1995

DAVID KERSHAW

**Blake, Richard** (*fl* late 18th century). Irish ballet dancer and composer. He is probably the 'Riccardo Bleck' described as newly hired who danced at Florence in 1763. He composed a ballet in Parma in 1776 and several for Venice in 1777–8 when librettos refer to him as in the service of the Duke of Parma. He appeared again in Florence both as dancer and composer of ballets in 1779 and 1781–2. Michael Kelly met him in Naples in 1780 and said he 'had gone abroad very young, and had become a very fine pantomime actor, and was considered the best grotesque dancer of his day'. In Naples he danced Artabanes in a ballet called *Artaxerxes* and Sancho Panza in one Kelly called *The Achievements of Don Quixote*. The articles on Kelly in the *General Magazine* for May and June 1788 mention his friendship with Blake, 'a famous dancer now in London, and retired from the profession'. Blake published *Twelve New Country Dances for the Year 1788*, and perhaps was lured out of his retirement by the King's Theatre, for someone called Blake was dancing 'mature' roles as late as 1797–8. Two successful ballets, *La bergère des Alpes* (7 January 1790) and *Les mariages flamands* (13 February 1790) both had music composed and selected by 'Blake'; this may have been Benjamin Blake who was still playing in the theatre band, but Richard Blake seems more likely to have been responsible.

ROGER FISKE/R

**Blakesmit** [Blakismet], **Henry.** *See* BLACKSMITH, HENRY.

**Blakey, Art** [Abdullah ibn, Buhaina] (*b* Pittsburgh, 11 Oct 1919; *d* New York, 16 Oct 1990). American jazz drummer and bandleader. By the time he was a teenager he was playing the piano full-time, leading a commercial band. Shortly afterwards he taught himself to play the drums in the aggressive swing style of Chick Webb, Sid Catlett and

Ray Bauduc, and he joined Mary Lou Williams as a drummer for an engagement in New York in autumn 1942. He then toured with the Fletcher Henderson Orchestra (1943–4). During his years with Billy Eckstine's big band (1944–7) Blakey became associated with the modern-jazz movement, along with his fellow band members Miles Davis, Dexter Gordon, Fats Navarro and others.

In 1947 Blakey organized the Seventeen Messengers, a rehearsal band, and recorded with an octet called the Jazz Messengers. He then travelled in Africa, probably for more than a year, to learn about Islamic culture. In the early 1950s he performed and broadcast with such musicians as Charlie Parker, Davis and Clifford Brown, and particularly with Horace Silver, his kindred musical spirit of this time. Blakey and Silver recorded together on several occasions, including the album *A Night at Birdland* (1954, BN), having formed in 1953 a cooperative group with Hank Mobley and Kenny Dorham, retaining the name Jazz Messengers. By 1956 Silver had left and the leadership of this important band passed to Blakey, and he remained associated with it until his death. It was the archetypal hard-bop group of the late 1950s, playing a driving, aggressive extension of bop with pronounced blues roots. Over the years the Jazz Messengers served as a springboard for young jazz musicians such as Donald Byrd, Johnny Griffin, Lee Morgan, Wayne Shorter, Freddie Hubbard, Keith Jarrett, Chuck Mangione, Woody Shaw, JoAnne Brackeen and Wynton Marsalis. Blakey also made a world tour in 1971–2 with the Giants of Jazz (with Dizzy Gillespie, Kai Winding, Sonny Stitt, Thelonious Monk and Al McKibbon).

From his earliest recording sessions with Eckstine, and particularly in his historic sessions with Monk in 1947, Blakey exuded power and originality, creating a dark cymbal sound punctuated by frequent loud snare- and bass-drum accents in triplets or cross-rhythms. Although Blakey discouraged comparison of his own music with African drumming, he adopted several African devices after his visit in 1948–9, including rapping on the side of the drum and using his elbow on the tom-tom to alter the pitch. His much-imitated trademark, the forceful closing of the hi-hat on every second and fourth beat, was part of his style from 1950–51. A loud and domineering drummer, Blakey also listened and responded to his soloists. His contribution to jazz as a discoverer and moulder of young talent over three decades was no less significant than his very considerable innovations on his instrument.

LEWIS PORTER

**Blamauer, Karoline Wilhelmine.** *See* LENYA, LOTTE.

**Blamont, François Collin de.** *See* COLLIN DE BLAMONT, FRANÇOIS.

**Blanc, Didier le.** *See* LE BLANC, DIDIER.

**Blanc, Ernest** (*b* Sanary-sur-Mer, 1 Nov 1923). French baritone. A student at the conservatories in Toulon and Paris, he made his début in Marseilles as Tonio (1950). At the Paris Opéra (1954–80) he sang a wide variety of roles including Rigoletto, Theogène (which he sang in the première of Barraud's *Numance*, 1955), Valentin, Amonasro, Germont, Renato, Wolfram, Enrico Ashton, Michele (*Il tabarro*) and Andrey Shchelkalov. His large, well-focussed, sensuous voice was soon heard in Milan, Vienna and London, but the turning-point of his career came in 1958, when he sang a remarkable Telramund at Bayreuth (a recording of the occasion reveals that his German declamation was as clear and determined as his French). He made his American début in 1959 at Chicago as Escamillo (a role he recorded, in aptly swaggering fashion, for Beecham) and his British début in 1960 as Riccardo (*I puritani*) at Glyndebourne, where he also sang Don Giovanni. He sang Rigoletto at Covent Garden (1961) and appeared in Milan, Vienna, Brussels and throughout France in a repertory that included Zurga, Scarpia, Luna, Massenet's Herod, Ourrias (Gounod's *Mireille*), the Father (*Louise*), Golaud, Offenbach's Bluebeard and the Count des Grieux. Besides his Telramund and Escamillo, his recordings include Zurga, a sturdy Valentin and High Priest (*Samson et Dalila*), and a resplendent Dapertutto (*Les contes d'Hoffmann*).

**Blanca** (Sp.). *See* MINIM (half-note); *minima* is also used. *See also* NOTE VALUES.

**Blancafort (de Rosselló), Manuel** (*b* La Garriga, Barcelona, 12 Aug 1897; *d* 8 Jan 1987). Spanish composer. Although he was mainly self-taught, he had early lessons with his father, a pianist and composer, and then studied analysis, form and orchestration with Lamote de Grignon. From the age of 20 he travelled throughout Europe and America as a representative for the Victoria piano-roll company, which his father had founded in 1910, and he was music director of the firm from 1917 to 1931, thus coming into contact with music of many different styles and periods. Around 1914 he had been initiated, through his friend Mompou, to the work of the French Impressionists and Stravinsky, and during the course of his travels he came to know many of the young composers of France and Italy. His own music became better known after the première of the piano suite *El parc d'atraccions*, given by Viñes in Paris in 1926 and the piano came to occupy an important position in Blancafort's output. Like Mompou he produced numerous collections of short pieces, conventional large forms replaced by concise ideas within looser structures. His music was often inspired by popular events such as the circus, street festival and jazz bands. It is often sprinkled with refreshing new harmonies and instrumental combination, which owe something to Les Six. Among the awards he received are two prizes from the city of Barcelona (1950 for the Symphony in E, and later for the *Rapsodia catalana*), the National Prize (1949 for the Quartet in C) and the Orféo Català prize (1965 for the cantata *Virgo Maria*). In 1986 he was awarded Barcelona's Golden Medal.

A. MENÉNDEZ ALEYXANDRE/ANTONI PIZÀ

**Blancafort Paris, Alberto** (*b* La Garriga, Barcelona, 1928). Spanish conductor and composer, the son of MANUEL BLANCAFORT. Among Alberto's teachers was Nadia Boulanger. He participated in the emergence of the Spanish avant garde through belonging to the Falla Circle and was one of the founders of the Grupo Nueva Música (Madrid, 1958). His emergence as a composer was early and successful, his Piano Sonata (1955) receiving good reviews; however, his subsequent production was scant and irregular. Among his most memorable works are the *Concertino de camera* (1945) and the *Sinfonietta coral* (1981). He has written a number of arrangements and harmonizations, of choral music in particular, all highly functional, treated with perfect technique and a balanced sense of modernity.

As a conductor Blancafort devoted much time to working with choirs, including the Capilla Polifonica Ciudad de Oviedo and the Spanish Radio and Television Choir. He later tackled orchestral conducting with groups such as the Chamber Orchestra of Pforzheim (Germany).

ANGEL MEDINA

**Blanchard, Antoine** [Antonius] **dit Esprit** (*b* Pernes-les-Fontaines, 28 Feb 1696, *d* Versailles, 10 April 1770). French composer. The son of a doctor, he joined the choir school at the cathedral of St Sauveur, Aix-en-Provence, at the age of eight. His teacher was Poitevin, who had also taught Gilles, Campra and Pellegrin. He was dismissed in 1715 and in 1717 was appointed *maître de musique* of St Victor, Marseilles. Between 1720 and 1721 he spent a few months at Toulon Cathedral, and in 1732 he became *maître de musique* of Besançon Cathedral, where Rousseau sought lessons from him. At this time he was connected with the Concert Spirituel, where his motet *Cantate Domino . . . quia mirabilia* was performed in 1732. On 31 March 1734 he was appointed to Amiens Cathedral, while maintaining contact with Paris. According to Giberti the motet *Laudate Dominum quoniam bonus* was performed before the king in 1737, 'thanks to the friendship of Campra', whom Blanchard had met during the period 1714–16, when Campra was director of the Académie de Musique, Marseilles. In June 1738 he succeeded Nicolas Bernier as one of the four *sous-maîtres* of the Chapelle Royale, Versailles (the others were Gervais, Campra and Madin), a post he held until his death. After Campra's death Blanchard became *maître des pages de la chambre* and after Madin's death he taught the *pages de la chapelle*, but in 1754 he sold back this office, abandoning his clerical collar to marry Magdelaine Jovelet, who bore him two sons. In 1742 he was granted a priory near Saint Malo and the income from an abbey. The reorganization of the *musique de roi* in 1761 effected the change of his title from *sous-maître* to *maître de la chapelle*, a post he shared with the abbé Gauzargues. In 1764 he was ennobled and awarded the Grand Cordon de l'Ordre de St Michel, which had been left vacant by the death of Rameau. He was one of the adjudicators who chose Giroust as the double winner of a competition held by the directors of the Concert Spirituel in 1767. Blanchard's last-recorded public appearance was in 1768, when he conducted his *De profundis* at the funeral of Queen Maria Leszcinska. Three years earlier he had chosen J.-A. Matthieu (1734–1811), a violinist in the royal chapel orchestra, as his successor. There is an engraving of Blanchard by Augustin de Saint-Aubin, after Charles-Nicolas Cochin.

During his life Blanchard was regarded as one of the best composers of church music. His motets 'à grand choeur', which constitute the bulk of his output, were composed for the Chapelle Royale and the Concert Spirituel. The style of the music reflects the evolution of the French style during Louis XV's reign. His early works are organized along the same lines as those of Lalande and Campra, and they reveal melodic originality, a keen sense of harmony and a regard for polyphony. The works composed during the early years at Versailles treat the psalm texts like librettos, with poetic meaning expressed in the music and the suppleness of French melodic writing in the *récits* and duos. The five-voice *grand choeur* is sometimes opposed to a *petit choeur* of three voices; there is contrapuntal interest within each choir, with the occasional use of plainchant themes as cantus firmi. Joyful texts are conveyed through fast movements, Provençal themes and dance rhythms, and some are in rondo form with hemiolas at the ends of phrases (e.g. *Jubilate Deo*, 1743). The use of arpeggios and rapid changes of position for the violins (*Benedicam Dominum*), as well as the violinistic contours of some of the vocal melodies, show the influence of the Italian sinfonia.

The late motets show Blanchard's sensitivity to the new style and his concern for orchestral colour: he used the horn in a second version of *Beati omnes*, the clarinet in *Benedicam Dominum* and pizzicato in *Cantate Domino . . . laus ejus*. After 1760 many movements reflect the framework of sonata form, with special use of the subdominant and expressive use of dynamics, with varied string textures typical of the late 18th-century idiom.

BERNADETTE LESPINARD

**Blanchard, Henri-Louis** (*b* Bordeaux, ?April 1791; *d* Paris, 18 Dec 1858). French violinist, composer, dramatist and critic. His date of birth, given as 7 February 1778 in all reference works since Fétis, is contradicted by Blanchard himself in the *Revue et gazette musicale* (21 January 1838). He was a pupil of Franz Beck in Bordeaux and of Kreutzer (violin), Méhul and Reicha (composition) in Paris. In 1815 he wrote the words and music of a pantomime, *Clarisse et Lovelace*, and was conductor at the Théâtre des Variétés from 1818 until 1829. There he came into contact with the leading actors and entertainers of the day, and composed a large quantity of vaudeville airs, some of which, for example *Tra la la* and *Guernadier, que tu m'affliges*, enjoyed immense popularity. In 1830 he became director of the Théâtre Molière, where a series of his plays appeared, one of which, *Camille Desmoulins*, gave rise to a fashion for wearing deep-lapelled white waistcoats after the manner of 1793. In 1831 his one-act opera *Diane de Vernon*, after Scott's *Rob Roy*, was heard at the Théâtre des Nouveautés. Two further operas, *Arioste* and *Les précieuses ridicules*, were never performed.

Blanchard composed a small number of more serious works, such as quartets, concertinos for various instruments (e.g. violin) as well as couplets, songs and romances, of which 12 are collected in an *Album lyrique* (Paris, 1834). The latter part of his career was devoted to criticism. He contributed to *La Pandore* in 1828 and to *L'Europe littéraire*, *Le foyer* and *Le monde dramatique* in the 1830s. His principal work, however, was as contributory editor of the *Revue et gazette musicale* from 1836 until his death. His biographical notices of Beck, Cherubini and H.-M. Berton were published separately.

**Blanche** (Fr.: 'white [note]'). *See* MINIM (half-note); *minime* and *demie* are also used. *See also* NOTE VALUES.

**Blancher, M.** (*fl c*1556). French composer. He was one of the 'bons et scavantz musiciens' who contributed nine works to two anthologies of four-voice chansons published by Michel Fezandat at Paris in 1556 (RISM 1556[20] and 1556[21]). Most of these chansons are settings of simple rustic poems in popular vein but they also include Ronsard's *Odelette à l'arondelle*. Only the bass partbook of each collection survives.

FRANK DOBBINS

**Blanchet.** French family of harpsichord and piano makers, active from the end of the 17th century to the middle of the 19th. A Nicolas Blanchet, master instrument maker, worked in Paris in the first half of the 17th century, but his relationship to the later family is unknown. The founder of the family firm was Nicolas Blanchet (*b* Reims, *c*1660; *d* Paris, 1731); it is not known where or to whom he was apprenticed, but he was in Paris at the rue des Fosses St Germain when he married in 1686. He was admitted to the guild as a master in 1689 and prospered during the next few years judging by his surviving instruments and guild position. In 1717 he moved to rue St Germain l'Auxerrois. His second son, François-Etienne Blanchet (i) (*b* Paris, *c*1700; *d* Paris, 1761), became a full partner with his father in 1722, and an inventory of the assets of the partnership taken in 1726 shows their wealth to have nearly tripled in four years.

In 1727 François-Etienne (i) married Elisabeth Gobin, who as part of her dowry had a share with her brothers and sisters in a large house in the rue de la Verrerie. Blanchet father and son moved there and set up shop 'vis-à-vis la petite porte de S. Merry', where the workshop of the Blanchets and later Taskin was to remain to the end of the century. Two children were born of the marriage:

Elisabeth-Antoinette (*b* ?Paris, 1729; *d* ?Paris, 1815), who married Armand-Louis Couperin in 1752, and François-Etienne (ii) (*b* Paris, *c*1730; *d* Paris, 1766), who became his father's partner and successor.

The Blanchet relationship with the court began in the 1740s with the building of a harpsichord for Mesdames à Fontevrault and with increased repair work sent by Christophe Chiquelier, keeper of the king's instruments; during the 1750s the firm became 'facteur des clavessins du Roi'. Although harpsichord making and rebuilding dominated the workshop's activities until the 1790s, the firm was one of the first in Paris to make pianos, one of which was owned by the prominent Parisian harpsichordist Claude-Bénigne Balbastre in 1763. On the death of François-Etienne Blanchet (ii) in 1766, the workshop was taken over by his chief workman, PASCAL TASKIN. Blanchet's infant son Armand-François-Nicolas (*b* Paris, 1763; *d* Paris, 1818) was brought up and trained by Taskin. Armand Blanchet wrote a *Méthode abrégée pour accorder le clavecin et le piano* (Paris, 1797–1800/*R*). His son Nicolas (ii) managed the workshop from 1818 and later entered into a partnership with Johannes Roller, a German piano maker active in Paris from about 1808. When Roller retired in 1851, he was replaced by Nicolas's son P.A.C. Blanchet, who succeeded his father in 1855.

Inventories and guild records show the Blanchet shop to have been both financially and artistically successful from the beginning. An inventory taken at the death of François Couperin (1668–1733) lists his large harpsichord as by Blanchet, and instruments made by the firm were prized and commanded considerably higher prices than those of other Paris makers. (For a description of Blanchet harpsichords, *see* HARPSICHORD, §4(i).) The Blanchets were particularly renowned for their reworking of 17th-century Flemish instruments. During the first quarter of the century Nicolas Blanchet replaced keyboards and actions, but later the cases were enlarged to meet the needs of an increased range, and sometimes large harpsichords were made from small Ruckers singles or even from several old soundboards. The *Dictionnaire portatif des arts et métiers* (1767, ii, 7) states: 'It is in the art of enlarging the harpsichords of Ruckers that the late Blanchet has succeeded incomparably well ... a harpsichord of Ruckers or Couchet, skilfully cut and enlarged, with jacks, slides and keyboards of Blanchet, becomes today a very precious instrument'.

The firm built their first upright piano in 1827, and an improved model produced in 1830 was widely imitated by other makers; the high-quality small upright pianos in which the firm specialized were successfully exhibited at many international exhibitions.

WILLIAM R. DOWD/JOHN KOSTER

**Blanchet, Emile-Robert** (*b* Lausanne, 17 July 1877; *d* Pully, nr Lausanne, 27 March 1943). Swiss pianist and composer. After early studies with his father, the organist Charles Blanchet (1833–1900), and then with his mother, Marie Schnyder, an excellent pianist, Blanchet attended the Cologne Conservatory from the age of 18, where his teachers included Gustave Jensen for harmony and counterpoint, Friedrich Wilhelm Frankel and Seiss. In 1898 he left Cologne for Berlin, and subsequently Weimar, to study with Busoni, whose influence was to prove pivotal to Blanchet's future development. At 25 he made his début with the Berlin PO, after which he appeared throughout Germany and elsewhere, including a tour of Switzerland as accompanist to the violinist Henri Gerber. In 1905 he became director of the Lausanne Conservatoire, a position he relinquished in 1908 in order to concentrate more on teaching and composition. In 1909 he was awarded first prize for his *Tema con variazioni* for piano op.13 in a competition in Berlin. As a pianist, Blanchet's virtuoso technique was well suited to his chosen repertory, which was based primarily on the works of Beethoven, Liszt, Brahms and especially Chopin, in addition to those of Debussy, Ravel and Louis Vierne. His playing was particularly admired for its power and control and for the variety of colour and nuance he was able to achieve through a subtle pedal technique.

In 1929 Blanchet's *Concertstück* no.1, op.14, for piano and orchestra was chosen as a compulsory piece for the virtuoso class at the Chicago Musical College. The *Concertstück* and the *Ballade* op.57, originally written for two pianos but later arranged for piano and orchestra by Ansermet, are the only two of Blanchet's published works to involve the orchestra; and, with the exception of some works for voice and piano, violin and piano, and a single composition for organ, Blanchet's output was exclusively for the piano. In addition to the *Tema con variazioni* op.13, of which he later made a revised version, his most characteristic compositions include the Suite *Turquie*, comprising opp.18, 50 and 51, which adumbrates his interest in orientalism; the ten-movement *Suite Romantique* op.54b; the Suite in A minor op.87; and, especially, the Sonata op.108, a highly concentrated work, dedicated to his colleague, Josef Turczynski. Blanchet also devoted a considerable portion of his output to études, in which the poetic and expressive content evolves directly from the featured technical elements. Like Godowsky, he also used figurations from other composers' works, for example Liszt, Schumann and particularly Chopin, as the starting point for original études of his own. Blanchet's students included Germaine Schmidt, Francis Lombriser, François Olivier and Irène Bächtold-Hertig.

CHARLES HOPKINS

**Blanchet, Joseph** (*b* Tournon, 10 Sept 1724; *d* Paris, 1778). French writer. He was the author of a treatise on singing entitled *L'art ou les principes philosophiques du chant* (Paris, 1756). He was not a musician; he referred to himself as 'un homme de lettres amateur'. His work is largely concerned with physical aspects of singing, such as sound production and breathing, based upon the earlier work of a physician and anatomist, Antoine Ferrein (*De la formation de la voix de l'homme*, Paris, 1741). In a lengthy preface he accused the author of *L'art du chant* (Paris, 1755), Jean-Antoine Bérard, of incorporating his material, and listed corrections to Bérard's work. The two treatises include many passages which are nearly identical

(particularly the first and third chapters, 'La voix considérée par rapport au chant' and 'La formation de la voix'), but La Borde discounted the accusation, criticizing Blanchet's work for its 'balourdises'.

**Blanckenmüller** [Blanckmüller, Planckenmüller], **Georg** [Jörg] (*b* 1480–1500). German composer. As nearly all his known compositions survive in Augsburg and Nuremberg sources, he may have lived in Bavaria, perhaps in Augsburg, and have been one of Senfl's contemporaries. He dedicated his *déploration, Erravit primus nomen mihi*, to the Augsburg singer Joannes Jordanus, mentioned by Tinctoris. Blanckenmüller may have had Protestant sympathies, for the collection *Concentus novi* (Augsburg, 1540) contains two Protestant lieder by him. Technically and stylistically he is indebted to the older cantus-firmus lied, but his technique is not particularly varied. His pieces are balanced and the parts, often consisting of familiar melodic formulae, are melodious and very singable.

**Blanco (Rodríguez), Juan** (*b* Mariel, nr Havana, 29 Jan 1929). Cuban composer. After private tuition with Leonor Feliú he moved to Havana (1935) and studied at the Peyrellade Conservatory, and was then taught composition by José Ardévol at the Conservatorio Municipal de La Habana. He formed part of the Sociedad Cultural Neustra Tiempo (1950), a multi-disciplinary group that aimed to recover the cultural values of the past and also promote the new. In the same year he won the music prize of the Cuban Movement for Peace with his *Cantata de la Paz*, and in 1951 won the choral music prize with *Tríptico Coral*. He was director of the Ministry of Education's radio broadcasting station, CMZ, and then professor of music history at the Alejandro García Caturla Conservatory (1961). He became the music director of the Consejo Nacional de Cultura (1967), and later helped establish the Estudio de Música Electroacústica (1979), the first of its kind in Cuba, becoming its director general.

Blanco's early compositions (1938–48) were modelled on the German lied and on the piano works of Schubert, Brahms and Chopin. From 1948 to 1959 his musical language was typical of the contemporary nationalistic trend, and he experimented with the orchestra and small instrumental groups. His varied forms revealed the need for free structure, and traditional harmony was mainly surplanted by a reliance on chords incorporating a tritone; his themes tended to be revolutionary, heroic or dramatic. From 1959 his work increasingly incorporated changing nationalist ideals and technical developments. Characterized by the use of multiple techniques and sound media, Blanco has constantly sought structures that lead to new ways of arranging the passage of sound alongside a meticulousness in the use of harmony and his ongoing fondness for themes of love, the struggle against oppression and support for human rights.

ALICIA VALDÉS CANTERO

**Blancq, Edward.** *See* BLANKES, EDWARD.

**Blancrocher.** *See* FLEURY, CHARLES.

**Bland.** English family of singers.

(1) **Maria Theresa Bland** [Romanzini] (*b* ?1768/9; *d* London 15 Jan 1838). Soprano and actress. She was said to have had Italian Jewish parents who came to England when she was very young and, despite reports of a certificate stating that she was born and baptized at Caen in Normandy in September 1770, it seems almost certain that she was the 'Italian Lady (four years old)' who sang with the conjurer Breslaw and his Italian company at Hughes's Riding School near Blackfriars Bridge in May 1773. After further seasons with Breslaw she sang in 1780 with an Italian puppet show and the next year was in a pastoral medley at the Italian Opera and sang Cupid in *King Arthur* at Drury Lane. Miss Romanzini was a leading member of Charles Dibdin's child company at the Royal Circus, and then sang principal female roles in English operas in Dublin in 1784–5. After a return to the Royal Circus she created a sensation at Sadler's Wells as La

Petite Savoyard in *The Gates of Calais* (1786) and that autumn began her long career at Drury Lane in Grétry's *Richard Coeur-de-lion*.

She was short, swarthy and scarred by smallpox but was a very popular performer whose sweet and pure voice moved audiences to raptures until the 1820s. Arnold, Storace and later Kelly regularly created parts for her in their English operas. Kelly wrote of the 'great simplicity and truth' of her singing of 'A little bird sat on a spray' in Storace's *The Cherokee* and claimed that Haydn and Pleyel agreed with him that 'no real judge ... could find a single blemish in her style or taste'. She composed songs in the ballad style, notably ''Twas in the solemn midnight hour', which she sang to her own guitar accompaniment in the comedy *The Sighs*, and a setting of Monk Lewis's *Crazy Jane*. She sang in three London oratorio seasons in the 1790s, in concerts in the provinces and at Ranelagh and Vauxhall Gardens. In 1798–9 she deputized for Banti in Italian opera and Mount Edgcumbe commented that 'few, if any, English singers who have appeared at the opera, sung with such pure Italian taste, or equalled her in recitative'.

In 1790 she married George Bland, the brother of Mrs Jordan, but by 1795 she was living with the actor Thomas Caulfield. The birth of several children did not affect her career but depression caused by the death of a child kept her off stage for several months in 1800. She retired from the stage in 1822 and suffered a complete mental breakdown two years later, when the theatre put on a benefit to provide care for her. There was a further benefit for her at the Argyll Rooms in 1826, when she sang a ballad, and against the advice of her friends she sang at the unfashionable White Conduit House that summer. James Winston saw her there, looking 'a decrepit little old woman', but recorded that she sang well. Oxberry wrote of her in 1825: 'As a singer, we never heard her equal; she had all the requisites for a first-rate vocalist – compass, power, feeling, taste, flexibility, and sweetness'.

**(2) James Bland** (*b* London, 5 March 1798; *d* London, 17 July 1861). Bass-baritone and actor, son of (1) Maria Theresa Bland. He sang in the company of the English Opera House at the Lyceum (1826–30) and then, after a brief period acting minor roles at Drury Lane, achieved fame in J.R. Planché's burlesque burlettas. Planché called him the 'monarch of the extravaganza', praised his 'good baritone voice' and wrote that his acting never degenerated into buffoonery. He died suddenly at the Strand Theatre, where he was due to perform in *Aladdin*.

**(3) Charles Bland** (*b* London, 14 Aug 1802; *d* after Jan 1838). Tenor, son of (1) Maria Theresa Bland. He sang at Covent Garden from 1824 and created the title role in Weber's *Oberon* (1826) under the composer's direction. The librettist, Planché, wrote that he sang 'at least respectably the airs assigned to the King of the Fairies', but the reviewer of the *Harmonicon* commented: 'his voice is disagreeable and his manner is not much better than his voice'. His career did not prosper and at the time of his mother's death he was described as 'late of Covent Garden'.

OLIVE BALDWIN, THELMA WILSON

**Bland, James A(llen)** (*b* Flushing, NY, 22 Oct 1854; *d* Philadelphia, 5 May 1911). American minstrel performer and songwriter. He was educated in Washington, DC, where he enrolled in the law department of Howard University and was deeply moved by the spirituals and the rhythm and harmony of the work songs of labourers on the university campus. He learnt to play the banjo, taught himself the rudiments of harmony and began composing songs. He organized musical groups and performed at various social functions, where he soon became known as a versatile entertainer. He found the perfect outlet for his musical and theatrical talents in the minstrel show and joined the Original Black Diamonds of Boston as a leading performer in 1875.

In 1876 Bland joined the Bohee Minstrels, then Sprague's Georgia Minstrels who, as Haverly's Genuine Colored Minstrels, opened at Her Majesty's Theatre in London on 30 July 1881. Bland was a star performer and became famous for his rendition of *Oh, Dem Golden Slippers* with a special comic routine at the end; another favourite with his audiences was *The Colored Hop*. He also displayed his varied talents in 'An Ethiopian Specialty', which consisted of singing, dancing and acrobatic stunts. The show met with huge success and, when the company sailed for New York on 5 August 1882, Bland and a few others remained in London, where he became a member of English companies for a short time but achieved his greatest success as a solo performer.

Bland returned to the USA in 1890 at the peak of his career and fame, touring with W.S. Cleveland's Colossal Colored Carnival Minstrels. He remained with this company for about a year, but his subsequent appearances became fewer and his itinerary is unclear. W.C. Handy states in his autobiography, *Father of the Blues* (New York, 1941), that he met Bland in Louisville in 1897, but Bland was no longer such a dazzling entertainer. A year later he sang for a short time with Black Patti's Troubadours, but the black minstrel era was nearing its end, and another musical theatre was developing. Bland tried to meet the new challenge by writing a musical comedy, *The Sporting Girl*, but it was a failure. Eventually he returned to Philadelphia where, penniless and ill, he died of tuberculosis. He was buried in an unmarked grave in the Colored Cemetery in Merion, Philadelphia; a gravestone was not erected until 15 July 1946.

Only a tenth of the 600 songs that are repeatedly claimed for him are verifiably by him. He wrote his songs and dances for specific performances, shaping the melodies, texts and rhythms to suit the situation and the character. They range from sentimental ballads to vigorous dances and sturdy marches. His musical inspiration

was drawn from black spirituals, gospel hymns and work songs, with their rhythmic pulse and leader-response elements. Bland's most famous song, *Carry me back to old Virginny*, was adopted by the State of Virginia in 1940 as its official state song.

WORKS

*Unless otherwise indicated, all works are minstrel songs with texts by Bland and all were published in Boston*

Edition: *J.A. Bland: Album of Outstanding Songs*, ed. C. Haywood (New York, 1946)

The Farmer's Daughter (1874); Carry me back to old Virginny (1878); Close dem windows (1879); Fascinating Coon (New York, 1879); Father's growing old (1879); Flowers will come in May (1879); In the Morning by the Bright Light (1879); Lucy, the Pride of the South (1879); My Old Home in Mississippi (1879); Oh, Dem Golden Slippers (1879); Old Homestead (1879); Old Plantation Lonely (1879); Pretty Little South Carolina Rose (1879); Rambling Through the Clover (1879); Silver Slippers (1879); Take good care of mother (1879); Uncle Joe, or The Cabin by the Sea (1879); Whisper softly, baby's dying (1879)

De angels am a coming (New York, 1880); Dancing on the Kitchen Floor (1880); Darkey's Request (New York, 1880); Darkie's Jubilee (1880); Dashing Harry May (New York, 1880); De Golden Wedding (1880); In the Evening by the Moonlight (New York, 1880); Keep dem golden gates wide open (New York, 1880); Kiss me goodnight, mother (1880); Listen to the silver trumpets (1880); Oh, my brother! (1880); Sister Hannah (n.p., 1880); Sons of Ham (New York, 1880); Way up Yonder (1880); Won't we have a jolly time? (New York, 1880); The Colored Hop (Philadelphia, 1881); Come along, Sister Mary (n.p., 1881); Dandy Black Brigade (New York, 1881); Darkie's Moonlight Picnic (New York, 1881); Gabriel's Band (New York, 1881); I'll name the boy Dinnes, or no name at all (n.p., 1881); Mid'st Pretty Violets (1881); My own Sweet Wife to Be (n.p., 1881)

Oh, Lucinda! (Philadelphia, 1881); Oh, why was I so soon forgotten? (n.p., 1881); The Old Fashioned Cottage (n.p., 1881); Only to Hear her Voice (n.p., 1881); Rose Pachoula (n.p., 1881); Taddy, please, scare me again (n.p., 1881); Tell all de children good bye (Philadelphia, 1881); Tell 'em I'll be there (New York, 1881); Traveling Back to Alabama (n.p., 1881); You could have been true (New York, 1881); Christmas Dinner (1889); Tapioca (n.p., 1891); Happy Darkies (New York, 1892)

CHARLES HAYWOOD

**Bland, John** (*b* ?London, *c*1750; *d* ?London, *c*1840). English music seller, instrument dealer and publisher. By 1776 he was established in London, where he remained active until his comparatively early retirement in 1795. In 1789 he went to Vienna to induce Haydn to visit England and to seek compositions from him and other composers, including Hoffmeister and Kozeluch. Bland is said to have been the hero of the 'Razor' Quartet story, in which he supposedly received the manuscript of the quartet, op.55 no.2, as a reward for presenting the composer with his English-style razor; however, the op.55 quartets were published in England not by Bland, but by Longman & Broderip in 1790. Haydn did eventually send Bland three piano trios (HXV: 15–17) which he subsequently published, and when Haydn arrived in London in January 1791 he spent his first night as a guest of Bland at his house in Holborn. Bland published other works by Haydn, though his business relationship with him was by no means an exclusive one. He also appears to have commissioned the 1792 portrait of Haydn by Thomas Hardy (now in the RCM), and issued engravings from it.

Bland published many collections of catches and glees, operas and sheet music, in addition to republishing many of Handel's works, often in unusually inexpensive editions. In 1795 the business, including Bland's stock of 12,000 engraved plates, was taken over by Lewis, Houston & Hyde, who in 1797 were followed by Francis Linley (1771–1800); he in turn gave place in 1798 to William Hodsoll who kept on the business until 1831. After giving up his own business, Bland appears to have had some association with the Birchall firm until about 1801.

**Blandrati, Giovanni Pietro.** *See* BIANDRÀ, GIOVANNI PIETRO.

**Bland & Weller.** English music publishers and instrument makers. The business, not to be confused with that of John Bland, was founded in London in 1784 by Anne Bland, who went into partnership with E. Weller in 1792. In addition to their publishing activities, which included country-dance collections and the first English edition of three Mozart piano sonatas (K280, 282, 283), they are also described as piano makers, and wind instruments bearing their name are extant. In 1805 the firm purchased from Dibdin the copyrights of 360 of his songs together with his musical stock, which they then reissued. Anne Bland retired in about 1818, and a sale of plates and copyrights took place, though Weller carried on the business as Weller & Co. until 1820.

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES

**Blangini, (Giuseppe Marco Maria) Felice** (*b* Turin, 18 Nov 1781; *d* Paris, 18 Dec 1841). French composer, singing teacher and tenor of Italian birth. As a boy he sang in the Turin Cathedral choir and was a pupil of Bernardo Ottani. Arriving in Paris in 1799, he became fashionable as a singer, composer of salon music and singing teacher. He also opened a concert room at his home in the rue Basse-du-rempart de la Madeleine, which was run by his mother; he took part in concerts there (as did his sister Félicité, a pupil of Crescentini), notably when he was in Paris in 1810 and 1811, performing his famous *romances*

and nocturnes. In 1810, as recorded in the *Journal de l'Empire* of 13 March, 'several music-lovers who were members of the Société de la rue de Cléry' took over the renovated concert room, which according to the *Tablettes de Polymnie* of January 1811 was 'the concert room frequented for preference by the best society of Paris'.

In 1802 Blangini made his début as an opera composer at the Théâtre Feydeau and, in 1806, at the Opéra. In 1805 he became *maestro di cappella* to the Duke of Saxe-Coburg in Munich. Then, with the title of 'director of her private music', he was in the service of Pauline Borghese, Napoleon's sister, with whom he had an affair (reflected in some of his most popular songs). She took him to Nice but they were separated by Napoleon, who in 1809 transferred him to Kassel where he was director of the theatre, *maestro di cappella* and master of chamber music to the new King of Westphalia, Jérome Buonaparte, until the latter's fall. Back in Paris in 1814 and protected by Talleyrand and the Duchess of Berry, he was appointed superintendent of the royal chapel, court composer and professor of singing at the Conservatoire. He was a member of the Légion d'Honneur and received an aristocratic title, became a French citizen and married a banker's daughter. After the Revolution of 1830 he lost his court appointments, and as a musician was overtaken by the rise of Romanticism. His autobiography, edited by Maxime de Villamorest, was published as *Souvenirs de Blangini* (Paris, 1834).

Blangini composed nearly 30 operas, mostly *opéras comiques*, as well as church music, 174 *romances*, 170 nocturnes for two or three voices and many canzonets for one or more voices with piano or harp accompaniment; he claimed, and has subsequently been credited with, the invention of the vocal nocturne (in 1801). Many of his stage works were unsuccessful and received few performances; they are written in a light style. The texts of his very popular *romances* and nocturnes are of almost exclusively amorous inspiration, and display simplicity of texture and an elegant, fluent melodic style.

WORKS

OPERAS

*opéras comiques unless otherwise stated*

KH – *Kassel, Hoftheater*
PFE – *Paris, Feydeau*
PN – *Paris, Nouveautés*

La fausse duègne (3, G. Montcloux d'Epinay), PFE, 24 June 1802 [completion of Della Maria's opera]; Zélie et Terville, ou Chimère et réalité (1, E. Aignan), PFE, 6 Jan 1803; Encore un tour de Calife (1), in Ger. as Noch ein Streich des Kalifen, Munich, 28 June 1805; Nephtali, ou Les ammonites (op, 3, Aignan), Paris, Opéra, 15 April 1806 (Paris, 1806); Le sacrifice d'Abraham (op, 3, Col. Saint-Marcel), KH, 14 Nov 1810, excerpt, pf acc., duet (Leipzig, 1811); Les femmes vengées (1, M.-J. Sedaine), PFE, 22 Oct 1811, song (Paris, 1811); L'amour philosophe (2, Aignan), KH, aut. 1811

Le naufrage comique (2, Sedaine), KH, spr. 1812; La fée Urgèle (2, ? C.-S. Favart), KH, sum. 1812, ariette (Paris, *c*1815); La princesse de Cachemire (3, Sedaine), KH, aut. 1812; Trajano in Dacia (os, 2, G. Rossi), Munich, Hof, 14 July 1814; La sourde-muette (3, J. de Valmalette), PFE, 26 July 1815; La comtesse de Lamarck, ou Tout par amour (3, Saint-Cyr and Armand d'Artois), PFE, 16 April 1818; La fête des souvenirs (intermède, 2, T.M. Du Mersan), PFE, 16 April 1818; Le jeune oncle (1, H.A. Advenier-Fontenille), PFE, 10 April 1821, trio (Paris, 1821); Le duc d'Aquitaine (1, Achille d'Artois, M. Théaulon and A.-J. Le Bouthillier Rancé), PFE, 1823, excerpts (Paris, *c*1825)

Le projet de pièce (1, Mély-Janin [J.M. Janin]), PFE, 4 Nov 1825; Le Saint-Henri (1, Advenier-Fontenille), Paris, Court, 1825; L'intendant (1, Mély-Janin), Paris, Court, 1826; Le coureur de veuves (2, M.J. Brisset), PN, 1 March 1827; Le jeu de cache-cache, ou La fiancée (2, Achille d'Artois), PN, 25 May 1827; Le morceau d'ensemble (1, Armand d'Artois), PN, 19 Nov 1827; L'anneau de la fiancée (3, Brisset), PN, 28 June 1828; Le chanteur de romances (2, Armand and Achille d'Artois), Paris, ?Variétés, 5 Nov 1830; La marquise de Brinvilliers [1 duet only] (drame lyrique, 3, Castil-Blaze and E. Scribe), Paris, OC (Ventadour), 31 Oct 1831; Un premier pas (1, E. Mennechet and J.F. Roger), Paris, OC (Bourse), 24 Nov 1832; Les gondeliers (2, E. Champeaux and A. Bréant de Fontenay), Paris, OC (Bourse), 19 April 1833

Music in: Figaro, ou Le jour des noces, 1827

Not perf.: Les fêtes lacédémoniennes, *c*1807; Inès de Castro, *c*1810; Marie Thérèse à Presbourg, ou La naissance du duc de Bordeaux (4, Bérard), 1820, vs (Paris, 1820); Le vieux de la montagne (4), written for the Opéra

OTHER WORKS

Songs, pf/harp acc., mostly pubd Paris: *c*174 romances in at least 39 numbered collections; *c*170 It. nocturnes, 2–3vv, in at least 29 numbered collections; numerous Fr. and It. canzonets, in at least 17 numbered collections

Sacred: 4 masses, vv, orch; 6 motets, incl. Miserere, solo vv, vv, perf. Kassel, 1813; Libera me, vv, orch, perf. Kassel, Dec 1810

Orch: Ov., on a Sp. theme; perf. Kassel, ?1810; Funeral March, perf. Kassel, Dec 1810

It. cant., on the last moments of Werther, T, orch, perf. Kassel, 14 March 1813

EMILIA ZANETTI/HERVÉ AUDÉON

**Blank, Allan** (*b* New York, 27 Dec 1925). American composer. In his youth, he studied the violin and attended the High School of Music and Arts in New York, where he developed an interest in composition and conducting. He held a fellowship in conducting at the Juilliard School (1945–7), after which he studied at Washington Square College (BA, 1948), University of Minnesota (MA in composition, 1950) and the University of Iowa. From 1950 to 1952 he was a violinist in the Pittsburgh SO, and he taught instrumental music in New York high schools from 1956 to 1965. He has also taught at Western Illinois University (1966-8), Paterson (New Jersey) State College (1968–70), and Lehman College, CUNY (1970–77). From 1978–96, he taught and directed the New Music Ensemble at Virginia Commonwealth University, where he is now emeritus professor. Blank has received numerous awards and honours for his composition, among them an NEA composers' grant (1983) and first prize in the George Eastman Composition (1983) for his Duo for bassoon and piano. In 1988 he won the Eric Satie Mostly Tonal Award and the annual choral competition of the Chautauqua Chamber Singers, and in 1989 the Lind Solo Competition sponsored by Cornell University. He has received commissions from various organizations in Virginia: the Music Teachers Association (1979, 1988, 1991), the Shakespeare Festival, and, in 1990, a grant

from the Virginia Commission of the Arts. Blank has written an especially wide range of concert and stage pieces, including works for small mixed ensemble, large wind ensemble and orchestra. His output of more than 100 pieces encompasses a broad range of expressive and idiomatic possibilities. His chamber music is often characterized by a soloistic impulse: flowing arabesque lines combine in a sonorous polyphony in which each instrument or voice remains distinct.

WORKS
*(selective list)*

Stage: Aria da capo (chbr op, E. St. Vincent Millay), 1958–60; Excitement at the Circus (children's op, 1, I. Leitne), 1968; The Magic Bonbons (8 scenes, Blank, after L.F. Baum), 1980–83; The Noise (chbr op, 2, G. Hopper, after B. Vian: *Les batisseurs d'empire*) incid music

Large ens: Concert Piece, band, 1960–63; Music for Orch, 1964–7; 6 Significant Landscapes, chbr orch, 1972–4; Divertimento, tuba, band, 1979; Concertino, bn, str, 1984; Music for Brass and Perc, 4 hn, 3 tpt, 3 trbn, tuba, 5 perc, 1985; Concertino, str orch, 1987; Passacaglia, str orch, 1989; Wheels, fl choir, 1989; Conc., cl, str orch, 1990; Statements and Interactions, hn, str orch, 1995; Music for Small Orch, 1977

Choral: Buy me an ounce and I'll sell you a pound (e.e. cummings), SATB, pf, 1956; Poor Richard's Almanak, SATB, 1987; My Love in Her Attire, TTBB, 1989; 4 Chin. Poems, SA, 1991; What Became of Them, children's choir, pf, 1994; The Tide Rises, SATB, 1994; Catch a Little Rhyme, children's choir, pf, 1995

Solo vocal: Poem (cummings), S, cl, vc, harp, 1963; 2 Ferlinghetti Songs, S, bn, 1964; 13 Ways of Looking at a Blackbird (W. Stevens), S, fl + pic, cl + b cl, pf, vn + va, vc, 1964–5; Esther's Monologue (M. Blank), cant., S, ob, va, vc, 1970; Some Funnies and Poems (O. Nash, E. Lear, cummings, M. Blank, A. Blank), nar, pf, 1982; Around the Clock, S, fl/pic, cl/b cl, pf, 1983

Principal publishers: Associated, CFE, Dorn, Music for Percussion, Presser, Seesaw, Smith

MARTIN BRODY

**Blankenburg** [Blanckenburg, Blanckenburgh], **Quirinus** [Quirijn, Gideon] **Gerbrandszoon van** (*b* Gouda, 1654; *d* The Hague, 12 May 1739). Dutch composer, organist, theorist and poet. He was the son of Gerbrant Quirijnszoon van Blankenburg (*c*1620–1707), organist in Zevenbergen and Gouda. He probably received his first instruction in music from his father. He started his musical career at an early age, as an organist in Rotterdam (1670–75, at the Remonstrantse Kerk) and at Gorinchem (1675–9). For some years from 1679 he studied at the University of Leiden (he was registered under the name Gideon van Blankenburg). In the mid-1680s he settled at The Hague, where he stayed for the rest of his life. He was organist of the Walloon church from 1687 to 1702. In 1699 he was appointed to the Nieuwe Kerk but was active there only after the new organ had been completed in 1702. Because of his old age his pupil Frans Piton deputized for him from 1720. He was sought after as a music teacher by the nobility of The Hague: his pupils included Willem Bentinck, Ludwig Friedrich, Prince of Württemberg, and probably Count Unico Wilhelm van Wassenaer.

Blankenburg was considered a proficient keyboard player and a first-class expert on carillon and organ building. His advice was requested as early as 1676 in connection with the carillon newly ordered from Pieter Hemony for the tower of the St Janskerk, Gouda, where his father was organist. He proposed the inclusion of C♯ and D♯ in the lowest octave but was strongly opposed by other advisers and by Hemony himself. He published a defence of his position (*De nootsakelijkheid van Cis en Dis in de bassen der klokken*, *c*1677, now lost). Hemony replied with *De onnoodsakelijkheid en ondienstigheid van Cis en Dis in de bassen der klokken* (Delft, 1678/*R*1927), but Blankenburg's proposal eventually prevailed. Later on he was asked to try out newly built or restored organs and carillons in various towns and cities, but his judgments, which may have been influenced by financial interests, drew him into controversy several times.

Blankenburg's printed music consists entirely of keyboard pieces. The *Clavicimbel- en orgelboek der Gereformeerde Psalmen en kerkzangen* comprises essentially homophonic settings for organ or harpsichord of all the psalms and hymns of the Dutch Protestant Church. The rhythm and harmony of the original 16th-century melodies are adapted to 18th-century taste, with many ornaments added. A few of the settings are preceded by a fugal prelude. *De verdubbelde harmony* is a little volume written in honour of the marriage of Prince Willem Carel Hendrik Friso and Princess Anna of Hanover. It contains a number of small, unpretentious pieces of various kinds. Some were printed on transparent silk and could be played when viewed from either side. A volume announced in 1739 as *Fugues, allemande, courante, sarabande, bourée, gavotte, menuets, gigue et autre pièces de clavecin* apparently never appeared, possibly because of Blankenburg's death. Three autograph manuscripts (*D-ROu*) include vocal and harpsichord pieces (see Praetorius). Some are by Blankenburg himself, others are arrangements by him of vocal extracts from operas by Handel and Destouches and from a cantata by J.G.C. Störl. The remainder of the pieces are anonymous or can be attributed to other composers. Blankenburg's curious treatise *Elementa musica* is principally a textbook on thoroughbass but also includes many autobiographical remarks. He accused François Campion and Handel of the unauthorized use of some of his musical ideas. One was the theme for a fugue, and he included in the book his own *fuga obligata* based on it. He dated his theme 1725, and accused Handel of using it in his *Six fugues or voluntaries* (1735). We now know, however, that Handel wrote these pieces around 1720.

WORKS
*all printed works published in The Hague*

Clavicimbel- en orgelboek der Gereformeerde Psalmen en kerkzangen (1732); 2/1745 enlarged and with Fr. text as Livre de clavecin et d'orgues pour les pseaumes et cantiques de l'église réformée

RUDOLF A. RASCH

**Blankenburg, Walter** (*b* Emleben, nr Gotha, 31 July 1903; *d* Schlüchtern, 10 March 1986). German theologian and musicologist. He came from a line of Lutheran ministers. After a classical education in Gotha and Altenburg (1914–22), he studied theology (1922–9) in Rostock and Göttingen; at the same time he studied musicology and history, first in Göttingen with Ludwig and Brandi, then in Freiburg with Gurlitt, Besseler and Ritter, and finally in Berlin with Schering and Blume. He took the doctorate in 1942 at Göttingen, where he studied with Zenck, with a dissertation on Bach. After teaching music in Rotenburg an der Fulda and Kassel (1930–33) he was a pastor in Vaake. From 1947 to 1968 he directed the Protestant Kirchenmusikschule in Schlüchtern. In 1962 the University of Marburg granted him an honorary doctorate of theology and in 1966 he was honoured with the title of Kirchenrat; he was also music director of the Evangelische Landeskirche of Kurhessen-Waldeck.

Throughout his life Blankenburg devoted himself to the organization, practice and current theological questions of church music. He was active in the *Singbewegung* from the beginning of his academic career: from 1930 to 1947 he directed the Kasseler Singgemeinde; in 1938 he was regional director (Kurhessen-Waldeck, 1938–75), national executive committee member (1947) and (from 1948) deputy director of the Verband der Evangelischen Kirchenchöre for West Germany. He was also editor of the *Zeitschrift für Hausmusik* (1933–41), co-editor of the *Kirchenchordienst* (1935–42) and editor (from 1941), and editor-in-chief of *Musik und Kirche* (1952–80). He was an authority on the works of J.S. Bach, Schütz and Johann Walter and his investigations were often guided by his interest in the relation between theology and music; he also helped to transform the education and professional image of church musicians in Germany through the conferences he organized for the directors of church music programmes. He was honoured with a Festschrift, *Bach-Interpretationen* (ed. M. Geck, Göttingen, 1969), and was awarded the Karl Straube plaque (1978).

HANS HEINRICH EGGEBRECHT/FRIEDHELM BRUSNIAK

**Blankes** [Blanks, Blancks, Blanke, Blancq], **Edward** (*fl* 1582–94). English composer. An Edward Blancq (or Blanke) was a London wait from 1582 to 1594. It is assumed that he is the 'Maister Blankes' listed among England's 'excellent Musitians' in Francis Meres's *Palladis Tamia* (London, 1598). Much of Blankes's surviving music is either fairly insignificant or is incomplete. *Credo quod redemptor*, while fairly short at just under 40 breves, has some quite striking antiphonal effects and sonorous passages in 12 parts. Six three-part fantasias show some skill and variety in contrapuntal writing that is again somewhat vocal in character; but while Blankes aims to create interest in his five-part 'Phancy' by including a homophonic passage in triplets and by some venturesome harmonic passages, the melodic lines often move rather narrowly and lack real distinction.

HUGH BENHAM

**Blanquer, Amando** (*b* Alcoy, 5 Feb 1935). Spanish composer. He began his musical studies with the municipal band in Alcoy (1946–7), where he learnt to play the piccolo, flute, horn, piano and violin and was taught harmony. Between 1954 and 1958 he studied the piano, horn and composition at the Valencia Conservatory with Leopoldo Magenti, Miguel Falomir and Manuel Palau Boix respectively, completing his training with Miguel Asins Arbó. From 1958 until 1962 he was in Paris, where he studied composition with Lesur and orchestration with Wissmer, and attended Messiaen's analysis lectures at the Conservatoire. In 1962 he won the Prix de Rome and attended the Accademia di Spagna di Belle Arti, also studying with Petrassi at the Accademia di S Cecilia. He was appointed to the composition chair at Valencia Conservatory (1969; director, 1971–5). The Valencian government commissioned two works from him, the stage cantata *Tríptic de Tirant lo Blanc* (1990) and the opera *El triomf de Tirant* (1991). He received the UNICEF prize for his *Sinfonía coral* (1981), the Joaquín Turina prize of Seville for his *Invenciones para orquesta* (1984) and several other awards. In 1986 he was named a corresponding member of the Real Academia de S Fernando.

His aesthetic is guided by a desire to communicate, and his music is characterized by a fine sense of timbre and a highly personal approach to a modal technique derived from Messiaen. Blanquer is the author of *Técnica del contrapunto* (Madrid, 1975) and of *Análisis de la forma musical* (Valencia, 1989).

WORKS
(*selective list*)

Stage: Tríptic de Tirant lo Blanc (cant. escénica, J. Palacios, after J. Martorell: *Tirant lo Blanc*), 1990, Valencia, Palau de la Música, 20 Nov 1990; El triomf de Tirant (op, 2, 4 scenes, J. Lluis and R. Sirera, after J. Martorell: *Tirant lo Blanc*), 1990–91, Valencia, Teatro Principa 17 Oct 1992
Choral: Cant. de Nadal (J. Valls), S, T, B, children's chorus, chorus, orch, 1976–7; Sinfonía coral (Niño universal) (J. Valls), chorus, orch, 1981; Missa a Sant Jordi, chorus, orch, 1981–2
Orch: Suite blanca, 1955, rev. 1985; Sinfonietta, 1958; Conc., bn, str, 1962; Homenaje a Juan Ramón Jiménez, gui, orch, 1974, rev. 1990; Hn Conc., 1976; Dédalo, cl, str, 1977; Oda a Manuel de Falla, hpd/pf, orch, 1977; L'os hispánic, tuba, orch, 1979; Suite galaica, str, 1979; Tríptic orquestal, 1983; Invenciones para orquesta, 1984; Fl Conc., 1986; Conc., 4 hn, str, 1987; Concierto fantasia (Homenaje a G.F. Haendel), org, orch, 1989; Tpt Conc., 1989; 3 homenajes, 1990–1: Cumbres (a Oscar Esplá), Perfumes (a Joaquín Rodrigo), Burlesca (a Manuel Palau)

MARTA CURESES

**Blanter, Matvey Isaakovich** (*b* Potshep, Chernihov region, 28 Jan/10 Feb 1903; *d* Moscow, 24 Sept 1990). Russian composer. He studied at the music institutes of Kursk (violin and piano, 1915–17) and Moscow (1917–19), where he was a pupil of Mogilevsky (violin) and Kochetov and Potolovsky (theory). From 1920 to 1921 he took composition lessons with Konyus. He worked at theatres in Moscow (from 1921), Leningrad (1926–7), Magnitogorsk (1930–31) and Gor'kiy (1932–3), and his name is principally associated with songs, dance music and light scores for the theatre. Of his songs, *Katyusha* (1938) gained international popularity, particularly during the war years; in Italy it became the hymn of the anti-fascist

partisans. Like all of Blanter's work, it is distinguished by warm, open lyricism and a distinctive Russian character.

WORKS
(*selective list*)

Operettas: Na beregu Amura [On the Bank of the Amur] (1939)
Songs: Katyusha; V lesu prifrontovom [In the Wood at the Front]; Letyat pereletnïye ptitsï [The Migrating Birds are Flying]; Luchshe netu togo tsveta [There is No Better Flower than You]; Moya lyubimaya [My Darling]; Partizan Zheleznyak; Pesnya o Shchorse [Song about Shchors]; Solntse skrïlos' za goroyu [The Sun was Hidden behind the Hill]; Do svidaniya, goroda i khatï [Goodbye, Towns and Huts]; Pod zvezdami balkanskimi [Under Balkan Stars]; *c*200 others

GALINA GRIGOR'YEVA

**Blanton, Jimmy** [James] (*b* Chattanooga, TN, Oct 1918; *d* Los Angeles, 30 July 1942). American jazz double bass player. He played locally in groups led by his mother, a pianist, and attended Tennessee State College briefly before moving in the late 1930s to St Louis, where he performed with fellow black musicians in the Jeter–Pillars Orchestra and in Fate Marable's riverboat bands. There he was discovered in late 1939 by Duke Ellington, who engaged him immediately for his orchestra. Blanton's playing subtly altered the Ellington sound, stabilizing the band's rhythm and greatly enhancing its swing; it also ushered in Ellington's most creative period as a composer, particularly in masterpieces such as *Ko-Ko*, *Concerto for Cootie*, *Harlem Air Shaft* and *In a Mellotone* (all 1940, Vic.), where Blanton's bass part is especially prominent. Blanton also took part in a few of the informal jam sessions at Minton's Playhouse in New York that contributed to the genesis of the bop style. From 1941 his playing became somewhat erratic, and late that year he was obliged by ill-health (diagnosed as congenital tuberculosis) to take up residence in a California sanatorium, where he died shortly afterwards.

In his tragically brief career, Blanton revolutionized jazz bass playing, and until the advent of the styles of Scott LaFaro and Charlie Haden in the 1960s all modern bass players drew on his innovations. He possessed great dexterity and range, roundness of tone, accurate intonation, and above all an unprecedented sense of swing. His strong feeling for harmony led him to incorporate many non-harmonic passing notes in his accompaniment lines, giving them a contrapuntal flavour and stimulating soloists to their own harmonic explorations. Blanton also contributed the earliest fully satisfying jazz solos on this instrument, which depart in their inventive melody and flexible rhythms from the walking bass style that was then prevalent. Despite his short career Blanton left a large recorded legacy, not only in his 130-odd recordings with Ellington's orchestra, but also in many small-group performances with some of Ellington's sidemen, and especially in a remarkable series of duos with Ellington himself. As adapted by his followers Oscar Pettiford, Ray Brown and Charles Mingus, Blanton's innovations led indirectly to the creation of the bop rhythm section.

J. BRADFORD ROBINSON

**Blaramberg, Pavel Ivanovich** (*b* Orenburg, 14/26 Sept 1841; *d* Nice, 28 March 1907). Russian composer and writer. He studied at the Alexander Lycée in St Petersburg until 1860, then joined the central statistics committee of the Ministry of Internal Affairs. He was the official Russian delegate to the International Statistical Congress at The Hague in 1869, but in the following year resigned from government service. In 1876 he joined the staff of the newspaper *Russkiye vedomosti*. From 1878 he was in charge of its foreign section, and was a member of the editorial board; he also contributed articles, notably 'Musorgsky pered parizhskoy publikoy' (10/22 June 1896, p.2), an account of Pierre d'Alheim's newly published book on Musorgsky and the interest which Musorgsky's music was arousing in Paris.

Blaramberg studied theory with A.A. Herke. In the late 1850s he came to know Balakirev, whom he helped to establish the Free School of Music in 1862. Besides teaching at the Moscow Philharmonic School (from 1878), he taught at the Moscow Philharmonic Society's Music and Drama School (1886–98). As a composer he was not highly regarded by other musicians and composers, not even by his friends in the Five: Rimsky-Korsakov bluntly dismissed 'some kind of suite on oriental melodies and dances, which I didn't like much', and Cui described the music of *Skomorokh*, a comic opera, as 'dry and shallow'. He composed elegant songs and some efficient orchestral works; his stage works, modelled to some extent on Meyerbeerian grand opera, achieved success with the public, but his music has subsequently been forgotten.

WORKS

Stage: Voyevoda [voivode] (incid music, A.N. Ostrovsky), 1865; Mariya Burgundskaya [Mary of Burgundy] (op, after V. Hugo), 1878, Moscow, 1888 (orig. title Mariya Tyudor rejected by the censor); Skomorokh [wandering minstrel] (comic op, after Ostrovsky: *Komik XVII stoletiya*), 1887, Moscow, 1908; Devitsa-rusalka [The Water Maiden] (op), 1888; Tushintsï [The People of Tushino] (op, after Ostrovsky), 1891, Moscow, 1895; Volna [The Wave] (op), 1902
Orch: Umirayushchiy gladiator [The Dying Gladiator], sym. picture, 1882; Sym., b, 1886; Scherzo; Mechtï [Dreams], 2 musical pictures on poems by I. Turgenev
Vocal: Demon (cant., after M. Lermontov), 1869; Strekozï [Dragonflies], fantasy, Mez, female vv, orch, 1879; Na Volge [On the Volga], musical picture, male vv, orch, 1880; other choral works; songs

GEOFFREY NORRIS

**Blarer** [Blaurer], **Ambrosius** (*b* Konstanz, 4 April 1492; *d* Winterthur, 6 Dec 1564). Swiss reformer and poet, active in Germany. He studied literature at Tübingen University from 1505 and received the MA degree in 1513. In 1510 he entered the Benedictine monastery at Alpirsbach, in the Black Forest, where he later became prior. He was musically inclined and, like Luther and Zwingli, played

the lute. He had contact with the humanists of the time: his friendship with Melanchthon is attested by a lively exchange of letters, and through his brother Thomas, a student at Wittenberg University from 1520, he became acquainted with Luther's writings. Blarer's stand on Protestant doctrine caused him to leave the monastery in 1522. He returned to Konstanz, where he became a preacher in 1525. In the same year he made contact with Zwingli but rejected his teaching on the Last Supper, and subsequently maintained a position midway between Luther and Zwingli.

In Konstanz he governed the church, promoted the political alliance with Zurich (1527–31), and, after the Bishop and chapter had left, drew up with the help of the mayor of the city a Book of Order. He reformed other towns in south Germany and in 1534 Archduke Ulrich of Württemberg entrusted him with reforming southern Swabia. In 1539 he returned to Konstanz. During this time he collaborated on the Konstanz hymnbook, the second or third edition of which (1540) corresponded entirely to Zwingli's ideas; it was important as a model for numerous publications in south Germany until about 1565. Sixt Dietrich may have been a musical adviser for it. When Konstanz was captured by the Emperor Charles V in 1548, Blarer fled to Switzerland and worked until his death in Winterthur (1549–51) and Biel (1551–9).

Blarer's poetic gifts had appeared early in life. Around 1522 he wrote one of the earliest Protestant hymns, *Wies Gott gefällt*. His hymns and spiritual poems were widespread in the 16th century; 25 survive, but many are lost. A few poems are parodies of secular texts, such as *Mag ich dem Tod nicht widerstan*, after Mary of Hungary's famous song, *Mag ich Unglück nicht widerstan*. Benedictus Ducis and Siegmund Hemmel set some of Blarer's texts to music. The satirical poem on court life, *Wiewohl viel harter Orden sind*, set several times by Senfl and others, was formerly believed to be by Blarer, but is probably not by him (see introduction to *Ludwig Senfl: Opera omnia*, v). Blarer's hymns were rediscovered chiefly by Spitta in the 19th century. Four are still retained in German Protestant hymnals: *Wies Gott gefällt*, *Freu dich mit Wonn*, *Jauchz Erd und Himmel* and *Wach auf, wach auf*.

MARTIN BENTE/JOHN KMETZ

**Blas-** (Ger.). Prefix meaning 'wind', as in *Blasinstrumente* ('wind instruments'), *Blasorchester* ('wind band') and *Blasmusik* ('music for wind').

**Blasco de Nebra (Orlandi), Manuel** (*b* Seville, 2 May 1750; *d* Seville, 12 Sept 1784). Spanish organist and composer. In 1768 he became assistant organist at Seville Cathedral to his father, José Blasco de Nebra (Lacarra), who had been organist there since 1735. He was made titular organist in 1778 and remained in the post until his early death, predeceasing his father. He was renowned during his career for his remarkable sight-reading ability and his expressive performances on the organ, the harpsichord and the nascent piano. A prolific composer, he left some 170 compositions, of which only 30 have survived: *Seis sonatas para clave y fuerte-piano* op.1 (Madrid, 1780; ed. R. Paris, Madrid, 1964); six pastorellas and 12 sonatas (*E-MO*; ed. B. Johnsson, Egtved, 1984); six keyboard sonatas (Osuna, Encarnación Monastery; ed. M.I. Cárdenas Serván, Madrid, 1987). They are technically demanding, virtuoso compositions which reveal the composer's talents as a keyboard player.

JOSÉ LÓPEZ-CALO

**Blas de Castro, Juan** (*b* ?Barrachina, Teruel province, *c*1561; *d* Madrid, 6 Aug 1631). Spanish composer, singer, guitarist and theorbo player. On 11 August 1592 in Alba de Tormes (near Salamanca) he received 30 reales for vihuela strings in his capacity as musician to the 5th Duke of Alba. At the duke's court he formed a lasting friendship with Lope de Vega, through whose *Arcadia* of 1598 we know that Blas de Castro sang and played at courtly festivities as well as setting Lope's poems to music. In 1596 he was in the service of the future king, Felipe III, singing his own compositions in a scene incorporated by Lope into his comedy *La bella malmaridada* (dated Madrid, 17 December 1596), and in 1597 he entered the service of the aged Felipe II as a part-time chamber musician. At the accession of the new king in 1599 the chamber musicians obtained full-time posts with annual salaries of 30,000 maravedís, and Blas de Castro was offered an additional post as usher of the king's privy chamber, with a total salary of 43,800 maravedís.

The fleeting establishment of the court at Valladolid (1601–6) found Blas de Castro and other chamber musicians singing his *tonos* on 7 June 1605, accompanied by the composer on the theorbo, and by the others on the guitar: it appears that Blas de Castro was in fact directing the ensemble. In 1619 he accompanied the royal entourage to Portugal, acting as both musician and usher to the king's privy chamber. Later he was appointed to a special post at a salary of about 75,000 maravedís. When Felipe IV came to the throne in 1621, Blas de Castro remained at court as an interpreter and composer; around 1628, however, he appears to have reduced or even ceased his attendance at the palace because of ill-health and advancing years, and in 1629 he authorized his nephew in Barrachina to sell his negro slave. In January 1630 he wrote his will: on his death the following year his estate listed 761 *tonos* on loose sheets, some guitar strings, and three guitars (including a very valuable one in ebony and

ivory). Felipe IV contributed 600 silver reales to Blas de Castro's funeral, and in return acquired all his compositions; these perished in the fire at the Palacio Real, Madrid, on 24 December 1734.

Blas de Castro achieved great fame during his lifetime. He was cited as a guitar player by Cristóbal Suárez de Figueroa in his *Plaza universal de todas ciencias y artes* (1615), and by the court poet Antonio Hurtado de Mendoza, who described his compositions as 'solemn and sweet'. The writer who made the most frequent and flattering references to him was his close friend Lope de Vega, most importantly in his *Elogio en la muerte de Juan Blas de Castro* (ed. J. Barbazán, Madrid, 1935).

His 20 surviving *tonos* for three or four voices (ed. Robledo) are transmitted in two manuscripts: 'Tonos castellanos', copied between 1600 and 1615 (*E-Mmc*), and a songbook compiled by the royal copyist Claudio de la Sablonara between 1624 and 1625 (*D-Mbs*, *E-Mn*; see Etzion). The texts are for the most part anonymous, but include one each by Lope de Vega, Luis de Góngora and the Prince of Esquilache. The music is characterized by frequent hemiolas, alternating homophonic and imitative passages, added 7th chords and chromaticism, and the refrains include many passages for one or two voices with instrumental accompaniment: in some cases these clearly prefigure the *tonos humanos* of the second half of the 17th century.

LUIS ROBLEDO

**Blasi, Luca.** *See* BIAGI, LUCA.

**Blasis, Carlo** (*b* Naples, 4 Nov 1803 or 1795/7; *d* Cernobbio, 15 Jan 1878). Italian dancer and writer on dance. *See* BALLET, §2(i).

**Blasius** (*fl c*1440). Composer. He was the author of *Audi nos nam te filius*, perhaps only a fragment (vv.7–9) of a complete three-voice setting of the Assumption sequence *Ave preclara maris stella* (*AH*, l, 1907/*R*, 313–15), in *D-Mbs* Clm 14274. The chant (Rajeczky, no.I/2) is paraphrased in the discantus and structural cadences are often emphasized by full triads. A Blasius de Este was master of the choirboys at Padua Cathedral in 1421; a 'Frater Blasius ungarus' was *cantor* at S Francesco, Bologna, in 1426; and Archangelo Blasio was in the papal chapel from 1476 to 1492; but the name is too common to permit certain identification.

DAVID FALLOWS/IAN RUMBOLD

**Blasius, (Mathieu-)Frédéric** [Mathaeus, Matthäus] (*b* Lauterbourg, Alsace (now Bas-Rhin), 24 April 1758; *d* Versailles, 1829). French conductor, composer and instrumentalist. He received music instruction from his father, Johann Michael Blasius, and from a Herr Stadt, and between 1780 and 1782 was employed by the Bishop of Strasbourg, Prince Louis-René-Edouard de Rohan. He first performed in Paris as a violinist, playing his own concerto at the Concert Spirituel in 1784 to favourable reviews, but in 1790 gave up his career as soloist to become music director and first violin of the Comédie-Italienne (Opéra-Comique). In addition to the violin, he also played the clarinet and bassoon, for which he wrote methods, and the flute. He was a member of the National Guard Band from 1793 to 1795, and taught violin and probably also wind instruments at the Conservatoire from 1795 to 1802. His compositions, influenced by the foreign musicians he encountered in Strasbourg and Paris, include theatre pieces and wind band or Harmoniemusik for the Revolutionary fêtes, which were especially well received, and many instrumental works. His string quartets in particular employ a balance of parts uncommon in France at a time when the virtuosity of the first violin was the standard practice.

Blasius directed the bands of the Garde Consulaire (1799–1804) and the Grenadiers de la Garde de Napoléon I; with the restoration of Louis XVIII (1814) he became director of the fifth regiment band of the Imperial Guard, and a member of the king's private orchestra. Contemporaries whose works he performed, including Grétry, Méhul and Dalayrac, regarded his abilities as a conductor highly. He retired as music director of the Opéra-Comique in 1816, and lived in Versailles until his death in 1829.

Blasius had two brothers who became noted musicians: Pierre Blasius (*b* Lauterbourg, 2 Sept 1752), a violinist, and Ignace Blasius (*b* Lauterbourg, 11 April 1755), a bassoonist. Both were members of the National Guard Band, and taught at the Institut National de Musique and the succeeding Conservatoire.

WORKS

*printed works published in Paris unless otherwise stated; thematic catalogue in Rau (1974) and McCormick (1983)*

THEATRICAL

*all first performed in Paris*

La paysanne supposée, ou La fête de la moisson (comédie, 3, Dubois), Comédie-Italienne, 28 Aug 1788, music lost

L'amour hermite (pièce anacréontique, 1, P. Desriaux), Beaujolais, 31 Jan 1789 (1789)

Prince Polastri, 1789, cited in a letter from Duprat, *F-Po*

Ballet, 1791, unperf., cited by Fétis

Le pelletier de St-Fargeau, ou Le premier martyr de la république française (traité historique, 2, A.-L. Bertin d'Antilly), OC, 23 Feb 1793 (1793), music lost

Le congrès des rois (comédie, 3, Maillot), OC, 26 Feb 1794, collab. Cherubini, Grétry, Méhul, Kreutzer, Dalayrac, Deshayes, Solié, Devienne, Berton, Jadin, A.-E. Trial

Africo et Menzola (mélodrame, 3, Coffin-Rosny), Ambigu-Comique, 10 March 1798

Adelson et Salvini (mélodrame, 3, P. Delmarre), Gaîté, 1802 (choreog. M. Adam)

Don Pèdre et Zulika (mélodrame), Gaîté, 1802, music lost

Clodomire, ou La Prêtresse d'Irmensul (mélodrame, 3, N. and H. Lemaire), Porte-S-Martin, 5 May 1803 (choreog. M. Aumer)

Fernand, ou Les Maures (3, A.-J. Coffin-Rony), OC, 11 Feb 1805

Doubtful: Les trois sultanes, ou Soliman second (comédie, C.-S. Favart), Comédie-Italienne, 25 Aug 1792, new music by Blasius, lost

OTHER VOCAL

Vive l'amour et la folie (C. Grenier), couplets (1795)
Française, point de vengeance, couplets (1814)

**Blason, Thibaut de.** *See* THIBAUT DE BLAISON.

**Blatný, Josef** (*b* Brno, 19 March 1891; *d* Brno, 18 July 1980). Czech composer, teacher and organist. He was taught by Janáček at the Organ School (1909–12). Remaining in Brno, he taught the organ at the conservatory, established himself as a leading organist and acted as choirmaster at St Jakub. Later he was appointed professor of organ improvisation at the academy; he was himself an excellent improviser. His music, in the late Romantic tradition, is unusual in showing no trace of folksong influence. Structurally simple, it has a delicately graded expressive quality. Most of his music is for church use or for organ, and in these genres he combined his experience of art music and domestic traditions. His instructional works for piano gained wide popularity.

WORKS

JAN TROJAN

**Blatný, Pavel** (*b* Brno, 14 Sept 1926). Czech composer. He studied the piano with Vaňura and composition with Schaefer at the Brno Conservatory (1950–55), and then continued composition studies with Bořkovec in Prague (1955–7). He read musicology with Racek and Štědroň at Brno University. During the second half of the 1960s Blatný was a participant at Darmstadt, and in 1967–8 he received a scholarship that enabled him to study at the Berklee College of Music, Boston. He was head of the music department at Czechoslovak Television in Brno (1963–91) and for 12 years was a lecturer at the Brno Academy.

Blatný's output is remarkable for having passed through a number of different styles, beginning with neo-classicism in the late 1950s in works influenced by Martinů, Stravinsky and Prokofiev. It was at this stage that he created his characteristic 'dialogic' compositional technique whereby two contrasting streams of material combine to form one, such as in the Suite for wind and piano (1958). He then experimented with jazz elements and serial technique and shortly afterwards realized a synthesis of contemporary art music and spontaneous musicianship that had become the THIRD STREAM; examples of this include *Per orchestra sintetica* (1960), the Study for quarter-tone trumpet and jazz band (1964) and the orchestral *Apel* (1974). In works such as the cantatas from the 1980s (after poems by K.J. Erben), Blatný's musical language became simpler, while in the late 1990s he began collaborating with his son Marek to create pieces fusing rock music and elements of a contemporary classical expression.

KAREL STEINMETZ

**Blatt, František Tadeáš** (*b* Prague, 1793; *d* Prague, 9 March 1856). Czech clarinettist and composer. After studying art in Vienna he attended the Prague Conservatory (1811–17), where he learnt the clarinet with Václav Farnik and composition with Dionys Weber. In 1814 he toured Germany and northern Europe, and in 1820 succeeded Farnik at the conservatory. Blatt took a large part in the college's administration, eventually becoming assistant director. He did little solo work, but his sensitive playing in the opera orchestra prompted Berlioz to name him the foremost Bohemian player of the day. In 1827 or 1828 Schott published his clarinet tutor with French and German texts (*Méthode complète pour la clarinette*), which included two fingering charts for clarinets with nine and twelve keys. A second, revised tutor, published in 1839, includes a fingering chart for a 13-keyed clarinet. Blatt's other compositions include clarinet studies, duets, trios and a quintet, oboe exercises, a singing tutor (*Kurzgefasste theoretische praktische Gesangschule*, Prague, 1829) and some piano works.

**Blau, Jenő.** *See* ORMANDY, EUGENE.

**Blaukopf, Kurt** (*b* Czernowitz [now Chernovtsy, Ukraine], 15 Feb 1914; *d* Vienna, June 14 1999). Austrian music sociologist and writer on music. He studied music theory with Stefan Wolpe and conducting with Hermann Scherchen in Vienna (1932–7), and music theory with Josef Tal and music history with Edith Gerson-Kiwi in Jerusalem (1940–2). When he returned to Vienna he edited the periodical *Phono* (1954–65) and collaborated with the German periodical *Hifi Stereophonie* (1965–83). He was appointed lecturer (1962), and subsequently professor (1963) in music sociology at the Vienna Hochschule für Musik; he also directed the Institute for Music Sociology (1965–84) and the UNESCO institute Media cult (1969–89). In 1976 he became chairman of the ISME commission on music in education and mass media, and in 1992 he was put in charge of an interdisciplinary investigation into the relationship between scientific conceptual models and the arts, whose findings are being published as a series (see Blaukopf, 1995 and 1996). He was the general editor of the series Musik und Gesellschaft (Karlsruhe and Vienna, 1968–).

Blaukopf's research, based mainly on the writings of Max Weber, has placed special emphasis upon the sociology of tonal systems and on the influence of the media on music. He has also written several books on Mahler and his time. The University of Vienna made him an honorary professor in 1974 and awarded him an honorary doctorate in 1994.

RUDOLF KLEIN

**Blaurer, Ambrosius.** *See* BLARER, AMBROSIUS.

**Blautz, Gabriel.** *See* PLAUTZIUS, GABRIEL.

**Blavet, Michel** (bap. Besançon, 13 March 1700; *d* Paris, 28 Oct 1768). French flautist and composer. The son of Jean-Baptiste Blavet, a turner, and Oudette Lyard, he taught himself several instruments, becoming accom-

plished on the bassoon and flute. He married Anne-Marguerite Ligier in 1718; the couple's long and happy marriage resulted in two daughters and two sons, both of whom became priests and one of whom, Jean-Louis, was the author of five books and a number of translations.

In 1723 Blavet moved to Paris in the entourage of Duke Charles-Eugène Lévis. Three years later he made his début at the Concert Spirituel, launching a remarkable public career. During the next quarter of a century Blavet appeared at the Concert Spirituel more frequently than any other performer, and throughout the period musicians and writers were unanimous in stating that his singing tone, pure intonation and brilliant technique set the standard in flute playing for all of Europe. On 1 October 1728 Louis XV granted to Blavet, 'musicien ordinaire de notre très cher cousin le prince de Carignan', a *privilège général* for six years to publish 'plusieurs sonates pour la flûte traversière', and op.1 was issued immediately, dedicated to Carignan. By 1731 Blavet had transferred his allegiance to the Count of Clermont, with whom he maintained ties for the rest of his life. An invitation to join the Prussian court, issued by Frederick the Great while still crown prince, was declined. When he added to his other duties the posts of first flute in the Musique du Roi (*c*1736), in the Musique de la Reine (1738) and at the Opéra (1740), Blavet's position in Parisian musical life was unrivalled. Among those who wrote with admiration of him were Telemann, Marpurg, Quantz, Hubert Le Blanc, Serré de Rieux, Ancelet, La Borde, Daquin and Voltaire. It is likely that many of Leclair's nine flute sonatas and his flute concerto were written for Blavet, for the two often performed together.

Blavet's sonatas, among the masterpieces of the early flute repertory, represent the successful transfer to the flute of the *goûts réunis* of French violin sonata style, developed by Anet, Duval, Senaillé, Leclair and others. The sonatas of op.2 show the influences of the French suite and the Corellian *sonata da camera*, and those of op.3 exhibit a more modern, *galant* style. Only one of Blavet's flute concertos survives: it has brilliant Vivaldian outer movements flanking a pair of French gavottes serving as a slow movement.

Blavet's four stage works were written for the private theatre of the Count of Clermont's château at Berny; *Le jaloux corrigé* was also given six performances at the Paris Opéra on a double bill with Rousseau's *Le devin du village*. The music of the overture, arias and an accompanied recitative of this pasticcio was taken from popular Italian intermezzos; Blavet provided the *secco* recitatives and the divertissement (six dances and a vaudeville). His innovation was to abandon for the first time the arioso recitative that the French had used since Lully. 'The recitative of this French intermezzo', reported the *Mercure de France*, 'is approximately in the style of Italian recitative, at least to the extent that the differences between the languages permitted it; and in spite of the almost universal bias of our nation against the Italian recitative, it did not appear that the spectators were extremely shocked by this first attempt'. The *Mercure* politely neglected to mention that the audience hissed. Whatever the initial reception (Blavet's divertissement continued to be performed at the Opéra after the rest of the intermezzo had been dropped), *Le jaloux corrigé* and *Le devin du village* helped launch a new era of italianate music at the Opéra, and with it the Querelle des Bouffons. *Le jaloux corrigé* was also performed at Mannheim in 1754.

Blavet's interest in teaching was reflected in his op.2, in which he meticulously marked correct breathing places, and in his three *Recueils de pièces*, which contain pieces in all styles and at all levels of difficulty, many arranged for two flutes in a manner suitable for student and teacher to play together. Blavet's most brilliant flute pupils were the composer and publisher Pierre-Evard Taillart and the teacher and composer Félix Rault, who succeeded Blavet at court, the Opéra and the Concert Spirituel.

NEAL ZASLAW

**Blaze, François Henri Joseph.** *See* CASTIL-BLAZE.

**Blažek, Zdeněk** (*b* Žarošice, Hodonín district, 24 May 1905; *d* Brno, 20 June 1988). Czech composer, teacher and music theorist. He studied with Petrželka at the Brno Conservatory and with Helfert at the university, from which he received the PhD in 1933 for a dissertation on Smetana. He completed his education in Suk's masterclasses at the Prague Conservatory (1933–5). His first appointment was with Czech Radio in Brno; he then taught theory and composition at the Brno Conservatory and was later its director for many years. At Brno University he completed the *Habilitation* (1961) and became professor of music theory in 1968. In his music he remained faithful to the late Romantic, nationalist Suk–Novák tradition. Contemporary musical developments hardly touched his style, which remained essentially homophonic. Though he wrote piano and chamber pieces, many of his works are vocal, and his songs and choruses achieve considerable expressiveness through harmonic subtlety.

**Blazon, Thibaut de.** *See* THIBAUT DE BLAISON.

**Blech** (Ger.). Brass, as in *Blechblasinstrumente* ('brass instruments') and *Blechmusik* ('music for brass bands').

**Blech, Harry** (*b* London, 2 March 1910; *d* London, 9 May 1999). English conductor and violinist. He studied at Trinity College of Music and the RMCM, and played in the Hallé Orchestra from 1929 to 1930 and the BBC SO from 1930 to 1936. He led the Blech String Quartet from 1933 until it was disbanded in 1950, by which time his interests had turned towards conducting. He founded the London Wind Players in 1942 and (under the auspices of the Haydn-Mozart Society, of which he was also founder) the London Mozart Players in 1949, remaining musical director until 1984. The London Mozart Players was the first chamber orchestra in Britain to specialize in the Viennese classics and, with his lively and clear-textured (if not always well-poised) readings of music by Haydn and Mozart, Blech not only built up a large and loyal audience but also exercised considerable influence on interpretative styles. He consistently encouraged young soloists and made a point of exploring the byways of the Viennese Classical repertory. He was created OBE in 1962 and CBE in 1984.

STANLEY SADIE

**Blech, Leo** (*b* Aachen, 21 April 1871; *d* Berlin, 24 Aug 1958). German conductor and composer. In Berlin he studied the piano under Ernst Rudorff, and composition under Woldemar Bargiel and later under Humperdinck. He was conductor at the Stadttheater, Aachen (1893–9) and then at the Neues Deutsches Theater in Prague (1899–1906), where his reputation as a conductor and composer of opera became well established. In 1906 he was appointed conductor of the Royal Opera House, Berlin, where he became Generalmusikdirektor in 1913. In 1923 he moved to the Deutsches Opernhaus, Berlin, as artistic director, and this was followed by a year at the Berlin Volksoper in 1924, and a year at the Vienna Volksoper in 1925. In 1926 he returned to Berlin as conductor of the Staatsoper on Unter den Linden, and remained there, achieving great success, until, being Jewish, he found himself unable to return from a guest engagement at Rīga in 1937. He stayed at Rīga for four years; in 1941, when his safety was again threatened, he moved to Stockholm. He secured a post at the Stockholm Royal Opera, where he had been a regular guest conductor for several years, and also conducted concerts. In September 1949 he returned to Berlin, where he became conductor at the Städtische Oper.

Blech's operatic repertory was wide. He was especially renowned for his performances of Wagner and Verdi, and of *Carmen*, which he conducted about 600 times. He was also a fine orchestral conductor, admired for reliability, clarity and elegance, and for his sensitivity as an accompanist. He made many recordings, principally with the orchestra of the Berlin Staatsoper, including a famous recording of Beethoven's Violin Concerto with Kreisler. During his lifetime he achieved considerable success with his own operas, particularly *Das war ich* (1902, Dresden), *Alpenkönig und Menschenfeind* (1903, Dresden), and, most popular of all, *Versiegelt* (1908, Hamburg). His stage works were said to show a deft lightness of touch in the tradition of Humperdinck. He also wrote orchestral, choral and chamber works, and songs.

**Blechbläser** (Ger.). *See* BRASS INSTRUMENTS.

**Blechflöte** (Ger.). *See* PENNYWHISTLE.

**Blegen, Judith** (*b* Missoula, MT, 27 April 1941). American soprano. She studied singing with Euphemia Gregory at the Curtis Institute from 1959. After an apprenticeship at the Santa Fe Opera Festival (to which she later returned as a principal), she was engaged for concerts at Spoleto in 1963. She studied further in Italy and in 1964 went to Nuremberg, where during two years she sang such varied roles as Lucia, Susanna and Zerbinetta. Engagements followed in Vienna, Salzburg and the major American houses; her début role of Papagena at the Metropolitan (1970) led to performances as Marcellina, Mélisande, Ascanius and Sophie in *Werther*. She made her Covent Garden début in 1975, as Despina, and her début at the Opéra in 1977, as Sophie in *Der Rosenkavalier*. Her singing, notable for its intelligence, charm and polish, is

preserved on recordings of oratorio and lieder, and in her Susanna in *Le nozze di Figaro*.

MARTIN BERNHEIMER/R

**Blesh, Rudi** [Rudolph] **(Pickett)** (*b* Guthrie, OK, 21 Jan 1899; *d* Gilmanton, NH, 25 Aug 1985). American writer on music. He attended Dartmouth College and earned the BS in architecture from the University of California, Berkeley. In the 1940s he served as jazz critic for the *San Francisco Chronicle* and the *New York Herald Tribune*. He wrote a pioneering serious history of jazz, *Shining Trumpets* (1946), and with Harriet Janis was co-author of the first history of ragtime, *They All Played Ragtime* (1950). The latter work established him as the leading authority in this field, and eventually prompted a revival of the music. Also with Janis, he founded Circle Records, a small but significant jazz label which became the first to issue the Library of Congress recordings of Jelly Roll Morton. In 1953 they sold Circle Records – apart from the Morton recordings – to Jazzology Records. From 1947 to 1950, and again in 1964, Blesh wrote and narrated radio programmes on jazz and American folk music. From 1956 he taught jazz history at Queens College, CUNY, and New York University, and in the 1970s he contributed disc notes to numerous ragtime recordings. Blesh also edited ragtime piano music and wrote on modern art and the cinema.

JOHN EDWARD HASSE

**Blessi, Manoli.** *See* MOLINO, ANTONIO.

**Blessinger, Karl** (*b* Ulm, 21 Sept 1888; *d* Munich-Pullach, 13 March 1962). German musicologist and composer. He studied with Wolfrum in Heidelberg, worked as music director from 1910 to 1912 in theatres in Bremen, Koblenz and Bonn, and studied musicology in Munich with Sandberger, receiving his doctorate in 1913 with a dissertation on music in Ulm in the 17th century. From 1920 to 1945 he taught music theory, musicology and music education at the Akademie der Tonkunst in Munich, where he was named reader in 1935 and professor in 1941. Aside from his pedagogical works on form and melody, Blessinger became known for his conservative leanings in the 1920s through his polemical writings on the degeneracy of modern music. In the Nazi period he received acclaim for writing one of the few comprehensive anti-Semitic tracts on music, using graphic biological imagery to condemn 19th-century Jewish composers for allegedly infiltrating European music and destroying its essence.

PAMELA M. POTTER

**Blewitt, Jonas** (*d* London, 1805). English organist and composer. He seems to have studied with R.J.S. Stevens, who said that he was almost blind. From about 1795 he was organist of the united London parishes of St Margaret Pattens and St Gabriel Fenchurch, also of St Katharine Coleman, Fenchurch Street. His *Complete Treatise on the Organ* (*c*1795) was the first separately published English organ tutor.

WORKS
*all published in London*

Six Songs and a Cantata, op.1 (*c*1778); 10 Voluntaries, op.2, org/hpd (*c*1780); A Collection of Favourite Ballads Sung … at the Spa Gardens Bermondsey, op.3 (*c*1785); A Complete Treatise on the Organ, to which is added a Set of Explanatory Voluntaries, op.4 (*c*1795); 10 Voluntaries or Pieces … in an Easy and Familiar Style, op.5, org (1796); 12 Easy and Familiar Movements, op.6, org (*c*1797), 36 singly pubd ballads: see *BUCEM*

EDWARD F. RIMBAULT/R

**Blewitt, Jonathan** (*b* London, 19 July 1782; *d* London, 4 Sept 1853). English organist, conductor and composer, son of JONAS BLEWITT. He studied with Battishill and with Haydn, and held various organ appointments in England, moving to Ireland in 1811 as private organist to Lord Cahir. He was organist of St Andrew's, Dublin, and composer and director of the music to the Theatre Royal (Crow Street), succeeding Tom Cooke in the latter post in June 1813. In the same year the Duke of Leinster appointed him grand organist to the Masonic body of Ireland, and he became the conductor of the principal concerts in Dublin. He joined J.B. Logier in his system of music instruction in Ireland and soon became the foremost teacher in Dublin. Before 1825 Blewitt was again in London and wrote the music for Drury Lane Theatre with great success. In 1828 and 1829 he was director of the music at Sadler's Wells Theatre. In his latter years he was connected with the Tivoli Gardens at Margate. His ballads in the Irish style were particularly popular, and in 1849 he revisited Ireland as a pianist, with the tenor John Templeton. He is reported to have died in great poverty.

WORKS

EDWARD F. RIMBAULT/ALFRED LOEWENBERG/R

**Bley** [née Borg], **Carla** (*b* Oakland, CA, 11 May 1938). American jazz composer, bandleader and keyboard player. She learnt the fundamentals of music from her father, a church musician, but is otherwise self-taught. At the age of 17 she moved to New York, where she wrote jazz tunes for musicians such as George Russell, Jimmy Giuffre and her husband at the time, the pianist Paul Bley. In 1964, with her second husband, the trumpeter Mike Mantler, she formed the Jazz Composers Guild Orchestra, known from 1965 as the Jazz Composer's Orchestra. In 1966 she helped found the Jazz Composer's Orchestra Association, a novel non-profit organization which commissions, produces and distributes commercially unviable jazz. In 1968 they founded the New Music Distribution Service, a pioneering outlet which extends far beyond jazz and into the realms of avant-garde and electronic recording and composition, to supply albums and scores that are otherwise difficult to obtain. Although already highly regarded by this time among critics, Bley first came to public notice with *A Genuine Tong Funeral* (1967), a cycle of pieces recorded with the Gary Burton Quartet, and with her compositions and arrangements for Charlie Haden's *Liberation Music Orchestra* (1969, Imp.). In 1971 she completed the eclectic 'jazz opera' *Escalator over the Hill* (JCOA). This work led to several composing grants. Bley continued to compose, expand the activities of the Jazz Composer's Orchestra Association, and lead her own ten-piece touring band; her sidemen included Mantler, Roswell Rudd and Steve Swallow. Around 1985 she reduced the group to a small band, but this new group was not well received, and in 1990 she established an 18-piece big band. An indifferent keyboard player, Bley is an outstanding jazz composer with a wide range of styles at her command. Much of her best work is infused with a spirit of parody and sardonic humour. Her composition *3/4* has been performed by musicians as varied as Keith Jarrett, Ursula Oppens and Frederic Rzewski.

J. BRADFORD ROBINSON

**Bleyer, Georg** (*b* Tiefurt, nr Weimar, bap. 28 Oct 1647; *d* ?after 1694). German composer and poet. He possibly attended the Thomasschule at Leipzig. From 1664 he studied law and music at Jena and matriculated at Leipzig in 1666 but broke off his studies later that year on the death of his father. He soon succeeded Caspar von Stieler as chamber secretary at the court of Count Schwarzenburg at Rudolstadt, where he also assisted the Kapellmeister, Wolf Ernst Roth. He was crowned Poet Laureate in 1672, and the count paid for him to go on journeys to France, probably before 1670, and to Italy in 1673–4. But he also came into conflict with the count on several occasions, and his application from Vienna in 1675 to succeed Roth was unsuccessful; so too was his later application to join the Hofkapelle at Dresden, and when he applied to succeed Sebastian Knüpfer, who died in 1676, as Kantor of the Thomaskirche, Leipzig, he was turned down because his knowledge of Latin was defective. He was in Rudolstadt in 1677, but serious disputes with the count led to his finally being banished. From 15 August 1677 until 31 August 1678 he worked at the court at Darmstadt simply as a musician. Among the last records of his life are an application for a post when he was in Frankfurt in 1680 and a poem of homage of 1683 in which he called himself court musician to Duke Julius Franz of Saxe-Lauenburg. That his *Zodiacus musicus* (1683) was published at Antwerp may indicate that he was also in Brabant that year. A note on the manuscript of his *Ich danke dir, Herr* suggests that he was still alive, probably in Germany, in 1694.

Bleyer never succeeded in exchanging the uncertain status of court musician for that of established church organist or Kantor. Nevertheless, his output seems to have consisted above all of sacred vocal music, which formed the main part of the repertory at Rudolstadt. An assessment of his work in this sphere has to be based, however, on only six surviving manuscript pieces which are technically accomplished, genuinely expressive and include virtuoso vocal parts and extended fugal sections. *Lust-Music* consists of two sets of dances, each containing 50 pieces, and a supplement containing a further 18; although they do not fall into readily identifiable types or

into stereotyped groupings, they provide early evidence of the vogue in Germany for up-to-date French dances. He was better known for his *Lust-Music* than for his occasional poetry; moreover, his authorship as both poet and composer of the *Rudolstädter Festspiele* has been called into question by Höfer.

WORKS

Lust-Music, 4, 5 insts (Leipzig, 1670) [2 vols.]
Zodiacus musicus XII. sonatarum, 2–4 insts (Antwerp, 1683), inc.
Musikalische Andachten über die Sonn- und Fest-Evangelia, 4–8vv (Jena, 1679); lost, cited in Göhler
Musicalische Erquickstunden, 4–6vv (Jena, 1683), lost, cited in Göhler

Ich danke dir, Herr, 5vv, 5 insts, bc, 1694; Jauchzet dem Herrn, 1v, 6 insts, bc, Frankfurt, 2 or 11 May 1680: *D-F*
4 psalms, 1, 4vv, 2–11 insts, bc, *Bsb*, *S-L*, *Uu* (anon.)

Other works, now lost, indicated by 133 text incipits in inventories, incl. many sacred vocal works in Rudolstadt inventories (see Kinkeldey and Baselt)

MICHAEL SPAETH

**Bleyer, Nicolaus** (*b* Stolzenau, 2 Feb 1591; *d* Lübeck, 3 May 1658). German violinist and composer. From about 1610 he was a member of the court orchestra at Gottorf, where from 1614 to 1617 he had lessons from William Brade. In 1617, after the death of Duke Johann Adolf, he and Brade joined the orchestra of Count Ernst at Bückeburg. Here he also made the acquaintance of Thomas Simpson, who named a five-part piece in one of his collections *Bleyers Armbandt* (RISM 1617[25]) and published six pieces by him for four instruments and continuo in another (1621[19]). In 1621 he was appointed a civic musician at Lübeck, received the freedom of the city on 1 May 1623 and remained there until his death. He was active in the city's musical life and had many pupils, among them Nathanael Schnittelbach. In addition to the six pieces already mentioned there is a collection of his own, *Erster Theil Newer Paduanen, Galliarden, Balletten, Mascaraden und Couranten*, which must have appeared in Hamburg in 1628. It survives incomplete but part of it at least reappeared in his collection *Erster Theil Newer Pavanen, Galliarden, Canzonen, Synfonien, Balletten, Volten, Couranten und Sarabanden* (Lübeck and Leipzig, 1642). There are 43 pieces in the latter volume, for five instruments and continuo. His violin writing, derived from English models, is characterized by lively figuration and rich double stopping. A set of five variations on *English Mars* (*c*1650; formerly at *PL-WRu*, now lost, but in Beckmann, vol.ii) reveals the extent of his virtuosity. Another set of dances is lost, as is a cantata for three voices, two violins and continuo, *O süsser, o freundlicher Herr Jesu Christ* (formerly at *D-Lm*).

GEORG KARSTÄDT/ULF GRAPENTHIN

**Blich, Richard** (*fl* ?*c*1370). English musician. The sole extant reference to his work occurs in the text of the motet *Sub Arturo/Fons citharizancium/In omnem terram* (*see* ALANUS, JOHANNES, perhaps composed in 1372 or 1373. Its upper voice praises some 14 English musicians, recording a lively and productive group of composers, singers and instrumentalists then active in court circles, of whom Richard Blich was one: his 'works please both holy people and rulers'. All the named musicians so far identified were active at some point in their careers in the English Chapel Royal between about 1340 and 1405 (during the reigns of Edward III, Richard II and Henry IV), or in the chapel of the Black Prince (*d* 1376). It is possible that Blich may be identifiable with the Richard Blithe who was admitted a Gentleman of the Chapel Royal between 1406 and 1413 and remained so until his death in 1419 or 1420; this hypothesis implies a date of birth about 1350.

ROGER BOWERS

**Blikken fluit** (Flem.). *See* PENNYWHISTLE.

**Blindennotenschrift, Blindennotation** (Ger.). *See* BRAILLE NOTATION.

**Blindhamer** [Blindthaimer, Blyndthamer, Plinthamer], **Adolf** (*b* *c*1475; *d* between 1520 and 1532). German lutenist and composer. From September 1503 at the latest (probably earlier) he was court lutenist to Maximilian I; in this capacity he was in Augsburg in 1509 and 1518. He was made a citizen of Nuremberg on 5 August 1514; the document recording this event refers to him as 'the good lute player'. In 1515 he was employed there for two years 'so that he might with even more diligence teach

young persons how to play the lute and other instruments'. As late as 1520 Dürer ranked him as one of the three best lutenists of his time in the inscription on the portrait of the Antwerp lutenist Captain Felix Hungersperger. In the early 1530s Hans Gerle spoke of him in *Musica teusch* (Nuremberg, 1532) and *Tabulatur auff die Laudten* (Nuremberg, 1533) as being dead.

Gerle was probably Blindhamer's pupil in Nuremberg: in the two treatises mentioned above he singled out Blindhamer for praise of his playing style, his skill in ornamenting, and his teachings on notating rhythms. By citing 'so widely celebrated a master' as being adept and successful within the conceptual framework of German lute tablature, Gerle defended his own use of this notation against its detractors, most notably Martin Agricola in his *Musica instrumentalis deudsch* (1529). Agricola's complaint that this tablature (in which the entire alphabet is applied crosswise on the frets rather than lengthwise along the strings) was a case of 'a blind master making his pupils blind' drew inspiration from information in Virdung's *Musica getutscht* (1511) that a blind man, Conrad Paumann, had invented it. Agricola's words must have had the unintended consequence of reflecting negatively on Blindhamer – through no fault of his other than his name.

Five compositions by Blindhamer have come to light: two prelude-like pieces and three intabulations of German songs, all in three parts. The titles of the songs he arranged are *Ach unfal was czeystu mich*, *Christ ist derstanden* and *Meyn sin und gemüt*. All five works appear in a manuscript formerly in the court archives at Wertheim am Main (now in *A-Wn* Ms Mus. 41950) dating from around 1525, and all bear the ascription 'AB' except the second, which carries Blindhamer's full name. The ornamented and chromatic style of these works, with their rich chordal underpinnings, places them midway between the compositions of Hans Judenkünig and Hans Neusidler. On the basis of his extant works, his position at the imperial court, and the positive judgments of his contemporaries, Blindhamer emerges as an important link in German lute playing between Paumann and the generation of Gerle and Neusidler.

FRANZ KRAUTWURST/BETH BULLARD

**Blind octaves.** A way of writing passage-work for the piano to produce the effect of rapid scales or arpeggios in triple octaves, more easily seen than described. The notes of the passage are taken alternately by the left and right hands in octaves in such a way that the linear movement is carried by alternate thumbs, the outer notes sounding only every other time (see ex.1). Previous editions of *Grove* have maintained that the device is unworthy of a serious composer, apparently on the grounds that great effects should not be purchased at bargain prices.

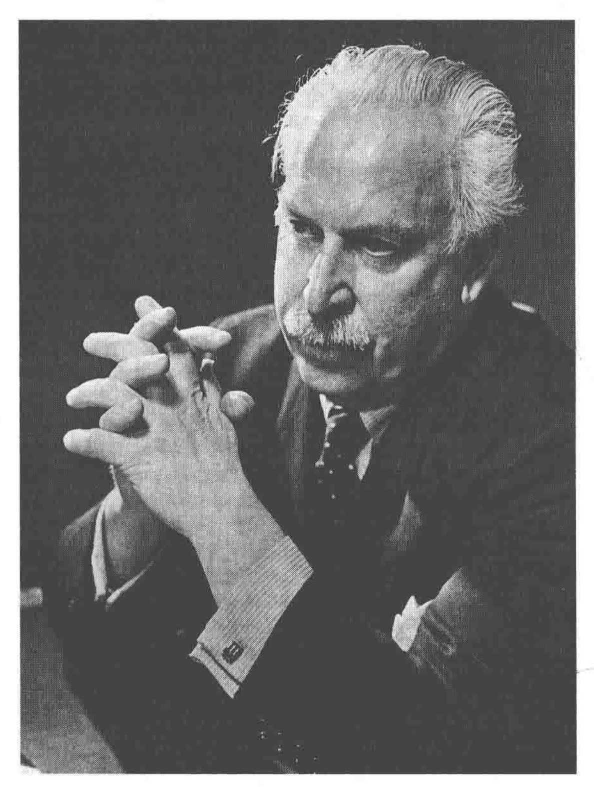
**Blind Tom.** *See* BETHUNE, THOMAS.

**Bliss,** Sir **Arthur (Drummond)** (*b* London, 2 Aug 1891; *d* London, 27 March 1975). English composer of American descent.



1. LIFE. He was educated at Rugby and Pembroke College, Cambridge (1910–13), where he studied counterpoint with Charles Wood. While still at Cambridge he came to know Elgar, whose music made a deep and lasting impression on him, and came under the stimulating influence of E.J. Dent. He spent a year at the RCM (1913–14), where he studied conducting, but he derived little benefit from Stanford's teaching. He served throughout World War I, in the Royal Fusiliers and, from 1917, in the Grenadier Guards. After demobilization in 1919 he soon won a reputation as a cosmopolitan and advanced composer, with a series of lively ensemble works. In *Madame Noy*, the Rhapsody for two voices with chamber ensemble, and *Rout* he experimented with instrumental uses of the voice, in wordless vocalization and nonsense syllables. These works occasionally show the influence of Stravinsky, Ravel and Les Six, while some use is made of jazz idioms. At the same time Bliss became actively engaged in London musical life. He arranged and composed music for Nigel Playfair's productions at the Lyric Theatre, Hammersmith, where he put on a series of concerts at which many English works were played (1919). He also wrote music for a production of *The Tempest* in 1921, using an ensemble of tenor and bass voices, piano, trumpet, trombone, gongs and five percussionists, all dispersed through the Aldwych Theatre.

In 1921 Bliss took up an appointment as conductor with the Portsmouth Philharmonic Society, gaining valuable experience that was to make him one of the most efficient composer-conductors of his generation. His earliest orchestral works were also performed that year: the Two Studies and *Mêlée fantasque*. On Elgar's suggestion he was asked to write a work for the Three Choirs Festival, and *A Colour Symphony* was duly performed, under his direction, in autumn 1922. In this bold and picturesque work it is already possible to recognize many of the characteristics that were to mark his mature work. In 1923 he moved, with his father and brother, to Santa Barbara, California. He wrote little music during the two years he spent in the USA, but continued to conduct. He also became the pianist of a

chamber ensemble, lectured, wrote criticism and, in 1925, married Trudy Hoffmann. That year he returned to England and once more became actively involved in composition. The Introduction and Allegro of 1926, dedicated to the Philadelphia Orchestra and Stokowski, was the first of many works written for virtuoso ensembles or soloists – a series that included the Clarinet and Oboe Quintets (for Thurston and Goossens), the Viola Sonata (for Tertis) and the Piano, Violin and Cello Concertos (for Solomon, Campoli and Rostropovich). The *Pastoral: Lie Strewn the White Flocks* was the first of many works written for amateur choirs. In 1935 he firmly established his position as Elgar's natural successor with the Romantic, expansive and richly scored Music for Strings.

1930 saw the production, at the Norwich Festival, of one of the most deeply personal of Bliss's works, the choral symphony *Morning Heroes*, written as a tribute to those who died in World War I. Each of its five movements describes an aspect of war common to all ages. In this work, after more than ten years, Bliss at last exorcized his memories of the war. In 1934–5 he moved into a new field, when he wrote music for Alexander Korda's and H.G. Wells's film *Things to Come*, working in close collaboration with Wells, and writing much of the music before the film was shot. Here, and in the three ballet scores written between 1935 and 1946, Bliss showed striking ability to write vivid illustrative music in a relatively simple and direct style that is entirely his own. His love of the theatre and keen artistic sense served him well in *Checkmate* and *Miracle in the Gorbals*, two of the most successful of English ballets.

Bliss was in the USA when war broke out in 1939, and he remained there to teach at Berkeley until 1941, when he returned to England to take an administrative job with the BBC, soon becoming director of music (1942–4). His full-length opera *The Olympians*, written with J.B. Priestley, occupied him from 1948 to 1949, when its underprepared Covent Garden production met with a cool reception. In 1950 he was knighted, and in 1953 became Master of the Queen's Music, fulfilling the appointment's many musical and official tasks conscientiously and energetically. These included writing music for the investiture of the Prince of Wales in 1969. His later works include cantatas, several orchestral works, among which the *Meditations on a Theme of John Blow* stands out as one of his finest scores, an opera for television, *Tobias and the Angel*, and many occasional pieces.

*Arthur Bliss*

2. WORKS. In the early 1920s Bliss was outspoken in rejecting the forms and idioms of established tradition (and particularly of Germanic tradition), aligning himself instead with those who looked to Stravinsky, Schoenberg and the younger French composers for leadership. His earlier ensemble works reflect the spirit of an age that wished to put memories of a devastating war behind it. However, he soon rediscovered the strong ties that bound him to his predecessors, most of all to Elgar, and for the rest of his life was content to work within an idiom that owed much to earlier Romantic composers of the 19th and 20th centuries; but his music retained some of the characteristics of the advanced composers whose music had influenced him in youth: wide-ranging melodies, instrumentally rather than vocally inspired, recall the Viennese Expressionists; his brilliant orchestration is designed, like Stravinsky's, to separate parts rather than to blend and mix timbres; and the consonance–dissonance range is wide, dissonance being reserved for dramatic use, rather than appearing as a regular part of speech.

While Bliss's large-scale works, fluent, inventive and richly textured, reflect his warm and outgoing personality, his music has little of the introspective quality of Mahler's, Elgar's or Schoenberg's. He depicted turbulence, conflict or jubilation in music as a skilled illustrator, rather than as one who expresses his inner feelings. Except in the case of *Morning Heroes*, which embodied his own memories of the war in which he had served, many of his most striking works were written in response to external stimuli. In the film and ballet scores he matched dramatic and visual situations with apt and vivid musical images and textures, and proved his ability to broaden and simplify his style to meet the needs of the occasion. The limitations involved in writing for amateurs (whether choirs or brass bands) seem to have helped him to focus and concentrate his style. He was always happy writing for known and admired performers, and took pleasure in reflecting and responding to the character of their playing.

Although all his big works are soundly and clearly constructed, interest in processes of organization and thematic transformation is generally subsidiary to the expression of emotion and action. Some of his most successful works or movements are cast in episodic form, including the anthology cantata *Lie Strewn the White Flocks*, the *Meditations on a Theme of John Blow* and the *Metamorphic Variations* for orchestra. Later works, and notably the *Meditations* and the *Metamorphic Variations*, sometimes display a new lightness of touch, and a serenity that was missing in the turbulent music of his middle years.

HUGO COLE/ANDREW BURN

**Bliss, Philip Paul** (*b* Clearfield Co., PA, 9 July 1838; *d* nr Ashtabula, OH, 29 Dec 1876). American singer and composer of gospel hymns. He was the compiler with I.D. Sankey of *Gospel Hymns and Sacred Songs* (1875). *See* GOSPEL MUSIC, §I. See also D.W. Whittle, ed.: *Memoirs of Philip P. Bliss* (New York, 1878); *DAB* (H.E. Starr).

**Blithe, Richard.** *See* BLICH, RICHARD.

**Blitheman** [Blithman, Blytheman, Blythman], **John** (*b* *c*1525; *d* London, 23 May 1591). English organist and composer. The Fitzwilliam Virginal Book, which includes the third of his *Gloria tibi Trinitas* settings, gives his forename as William. No other 16th- or early 17th-century musical source mentions any forename, but Chapel Royal records from 1558 to 1590 consistently refer to John Blitheman, and there can be little doubt that this is the composer. In or before 1558 he was admitted as Gentleman of the Chapel Royal and he held that position until his death. John Blitheman was also associated with Christ Church, Oxford, being recorded in 1555–6 as a chaplain there, and in 1560 as a member of the choir who was evidently often absent; from 1569 to 1578 he is listed at the head of the lay clerks. He died on Whitsunday and was buried at St Nicholas Olave, Queenhithe. His epitaph (quoted in Shaw) refers to his skill as an organist and mentions that John Bull was his pupil.

Although Blitheman's recorded career falls mainly within the reign of Elizabeth, the style and function of his liturgical organ music and his few vocal works suggest that they were written during the reign of Mary. The most important of these earlier works is the set of four verses intended for the nine-verse hymn *Aeterne rerum Conditor*. In the first three pieces the cantus firmus is embellished: in the first as the lower of two parts, in the second as the lowest of three parts and in the third verse as the third of four parts, where it is marked 'melos suave'. In the fourth verse the plainchant is in the top voice, unadorned, accompanied by two florid parts in the left hand. This clear, rhythmic distinction between the plainchant and the other parts is the hallmark of his set of six variations on *Gloria tibi Trinitas* (in the Mulliner book, probably compiled between 1558 and 1564: *see* MULLINER, THOMAS), which serve no liturgical purpose. Here the element of virtuosity is paramount; only in the sixth setting does the composer revert to a smooth four-part texture, with the plainchant in the bass.

JOHN CALDWELL/ALAN BROWN

**Blitzstein, Marc** [Marcus] **(Samuel)** (*b* Philadelphia, 2 March 1905; *d* Fort-de-France, Martinique, 22 Jan 1964). American composer. His early works reflect his admiration for the craft of musical composition, an aesthetic encouraged by both of his otherwise antipodal teachers in Europe, Boulanger and Schoenberg. Thereafter, his style changed from an abstract neo-classicism, in which form and structure were primary, towards a more functional agit-prop style, crystallized in his stage works. Well-known examples, such as *The Cradle will Rock*, bring together blues, pop, speech patter, parody and satire (often involving quotation or other referential material). His skilful use of American vernacular speech patterns is perhaps his crowning achievement.

As a child, Blitzstein, whose parents were of Russian Jewish heritage, was sent to the Ethical Culture Sunday School and to programmes sponsored by the Socialist Literary Society. At the age of seven he gave his first public performance, a reading of Mozart's 'Coronation' Concerto K537 with his teacher, Constantine von Sternberg, at the second piano. By the age of nine he had skipped two years at school, his academic precocity paralleling his remarkable musical talent. Following the separation of his parents, he moved with his mother and sister to Venice, California, where he continued his piano studies with Katherine Montreville Cocke and Julian Pascal, performed at charitable concerts and basked in the attention of society writers. The family's return to Philadelphia early in 1917 enabled Blitzstein to re-establish a warm relationship with his father, with whom he attended the theatre and concerts.

At the age of 16, Blitzstein enrolled at the University of Pennsylvania. After his scholarship was rescinded because of poor progress in physical education, however, he began a three-year period of study with Siloti, commuting to New York for lessons. In 1924, after a brief affair with Alexander Smallens, he entered the newly formed Curtis Institute of Music, where he studied composition with Rosario Scalero. His works from this period include salon-style piano pieces and songs to texts by Housman

and Whitman. In 1926, shortly before leaving Europe, he performed as solo pianist with the Philadelphia Orchestra under Henry Hadley. While studying with Boulanger in Paris, he completed two more songs on Whitman texts: *O Hymen! O Hymenee!*, a foray into bitonality, and *Gods*, a tonal work featuring frequent changes in metre, key and rhythm. He went on to Berlin, where he enrolled in a course with Schoenberg at the Akademie der Künste. As he immersed himself in the principles of 12-note composition, he grew increasingly antipathetic towards what he came to view as a sterile approach to musical creation. His own compositions, which he later came to call *Songs for a Coon Shouter*, continued to consist of theatrical settings of Whitman texts. He returned to Philadelphia in 1927.

While resident at the MacDowell Colony during the summer of 1928, Blitzstein met the novelist and critic Eva Goldbeck, whom, despite his homosexuality, he later married. That same year he began writing articles in *Modern Music*, a journal to which he regularly contributed until 1940. As a composer, his fascination with Whitman texts continued. The blues harmonies employed in songs such as *I am He* and *Ages and Ages* suggest a commonality between jazz and primal sexuality. These were given their première in 1928, together with *O Hymen! O Hymenee!* and *As Adam*, by the black American baritone Benjohn Ragsdale at a Copland-Sessions Concert in New York. The Piano Sonata (1927) was performed several times in 1929 and *Percussion Music for Piano* (1929) was introduced, a work which gained notoriety for its slapping, shutting and opening of the piano lid. During the same year, *Triple-Sec* (1928), a one-act opera containing a love scene between a black man and a white woman, was first performed in Philadelphia. Blitzstein's association with both advanced musical circles and leftist political ideology was solidified through these challenges to public sensibility.

For the next several years, Blitzstein travelled in Europe and America composing works in diverse styles. *Parabola and Circula* (1929), for example, although set in a cubist formal world and based on a story replete with symbolic abstraction, contains music which is melodious, conservative and suggestive of the style of Les Six. The ballet *Cain* (1930) is modal and mildly dissonant, featuring moments best described as polytonal. *The Harpies* (1931), with its Thracian setting, satirization of Gluckian, Wagnerian and Mozartian mythology, and Broadway theatricality, suggests the influence of neo-classicism. *The Condemned* (1932), an opera based on the Sacco and Vanzetti trial, broke new ground in employing a chorus for each of the four dramatic roles. *Jimmie's got a goil* (1935), and other songs set to texts by e.e cummings, offered audiences musical amusement. The 'Italian' String Quartet (1930), the *Romantic Piece* for orchestra (1930), the Piano Concerto (1931) and the *Serenade* for string quartet (1932) were designed to prove his compositional ability in the genres of absolute music.

If the early 1930s marked a period in which Blitzstein was searching for an appropriate musical language, they were also characterized by his yearning to understand the personal demons and political-social issues that so consumed him and his wife. Their marriage survived in part because of a shared support for the Communist movement, and a shared concern about how best to express that support while continuing to enhance their careers. After Eva's untimely death from anorexia in 1936, Blitzstein became more open about his homosexuality. Hanns Eisler's lectures at the New School for Social Research, New York (1935), pushed him to agitate for music that would address social concerns, attack social enemies and, most importantly, convey its message in an accessible, vernacular musical language. To fulfil these objectives, he turned to tonality, popular song, sardonic references to earlier styles and parodies of art music. He also wrote for 'red' journals such as *New Masses* (1936–46), worked for leftist groups such as the Composers Collective, New York, and adhered to a belief that the composer must join and fight for the people, rather than living as a parasite on society's beneficence.

The intended première of *The Cradle Will Rock* (1936–7) was cancelled by the Federal Theater Project when the work's anti-establishment, pro-union theme was deemed too controversial. It was later produced independently by John Houseman and Orson Welles at the Mercury Theater, New York. With its satirical quotations of Bach and Beethoven, conjoined with stylistic elements taken from patter, jazz and the musical revue, the work has come to symbolize the musical equivalent of Brecht's 'epic theatre'. *I've Got the Tune* (1937), a radio song-play, made Blitzstein the composer *par excellence* of the Communist movement. *No for an Answer* (1937–40), which followed, deals with hardships faced by unemployed and non-unionized Greek immigrants; the films *Valley Town* (1940) and *Native Land* (1940–41), for which Blitzstein wrote scores, are concerned with unemployment and fascistic elements in capitalist society. His reputation became so politicized that the FBI under J. Edgar Hoover began a serious investigation of his ties to the American Communist Party.

In 1942 Blitzstein joined the war effort, becoming attached to the Eighth Air Force in London. With the breaking of the Hitler-Stalin pact in 1941 and the addition of the USSR as an ally, he felt the war had become entirely just. His works from this period, including *Freedom Morning* for orchestra and chorus of black enlistees (1943, when blacks were still segregated in the US armed services), the *Airborne Symphony* (1944–6), commissioned by the air force, and a film score for Garson Kanin's documentary *The True Glory* (1945–6), were pleasing both to the military and to his own social conscience.

After the war Blitzstein returned to writing for the stage. *Regina* (1946–8), a character study of the mores of the American South at the turn of the 19th century, melded together the diverse styles of the spiritual, ragtime, blues and traditional opera. The opera's focus on the struggle of black Americans for equality reflected Blitzstein's continuing concern for minority issues. In *Reuben, Reuben* (1955) and *Juno* (1957–9) he continued his role as a social critic. It was his translation and adaptation of *Die Dreigroschenoper* by Brecht and Weill, however, that brought him the long elusive fame he had sought: the seven-year run of the production also brought him a financial bounty he could not have envisioned.

In 1959 Blitzstein was honoured with membership in the National Institute of Arts and Letters. Despite his reputation as an advocate of leftist causes, he also gained a commission from the Ford Foundation to write an opera. Returning to the subject of his early work *The Condemned*, the Sacco-Vanzetti trial, he incurred the

wrath of right-wing journalists such as George E. Sikolsky. He took time away from composition in 1962 to serve as the John Golden Professor of Playwrighting at Bennington College. While there, he established a friendship with Bernard Malamud and began to set the writer's short stories *The Magic Barrel* and *Idiots First*. In November 1963 he went to Martinique to work and rest. In January 1964, after a beating at the hands of three sailors he had met in a waterfront bar, he died in hospital in Fort-de-France.

WORKS

DRAMATIC

Triple-Sec (op-farce, 1, R. Jeans), 1928, Philadelphia, 6 May 1929; Parabola and Circula (op-ballet, 1, G. Whitsett), 1929, unperf.; Cain (ballet), 1930; The Harpies (op, 1, Blitzstein), 1931, New York, 25 May 1953; The Condemned (choral op, 1, Blitzstein), 1932, unperf.; Send for the Militia (theatre sketch, Blitzstein), 1v, pf, 1935; The Cradle Will Rock (play in music, 10 scenes, Blitzstein), 1936–7, New York, 16 June 1937; I've Got the Tune (radio song-play, 1, Blitzstein), 1937, New York, 24 Oct 1937; No for an Answer (op, 2, Blitzstein), 1937–40, New York, 5 Jan 1941; Plowed Under (theatre sketch, Blitzstein), 1937

Labor for Victory (radio series, Blitzstein), 1942; Galoopchik (musical play, Blitzstein), 1945, unfinished; Show (ballet), 1946; Regina (op, 3, L. Hellman and Blitzstein), 1946–8, New York, 31 Oct 1949; rev. 1953, 1958; The Guests (ballet), 1948; Reuben, Reuben (musical play, 2, Blitzstein), 1955, Boston, 10 Oct 1955; Juno (musical play, 2, J. Stein and Blitzstein, after S. O'Casey), 1957–9, New York, 9 March 1959; Sacco and Vanzetti (op, Blitzstein), 1959–64, unfinished; Idiots First (op, 1, Malamud and Blitzstein), 1963, completed L.J. Lehrman; The Magic Barrel (op, 1, B. Malamud and Blitzstein), 1963, unfinished

Incid music: Julius Caesar (W. Shakespeare), 1937; Danton's Death (G. Büchner), 1938; Androcles and the Lion (G.B. Shaw), 1946; Another Part of the Forest (Hellman), 1946; King Lear (Shakespeare), 2 versions: 1950, 1955; Volpone (B. Jonson), 1956; A Midsummer Night's Dream (Shakespeare), 1958; A Winter's Tale (Shakespeare), 1958; Toys in the Attic (Hellman), 1960

Film scores: Hände, 1928; Surf and Seaweed (R. Steiner), 1931; War Department Manual, 1935; Chesapeake Bay Retriever, 1936; The Spanish Earth (J. Ivens), 1936–7, collab. V. Thomson; Native Land (L. Hurwitz and P. Strand), 1940–41; Valley Town, 1940; Night Shift (J. Chambers), op, 1942; The True Glory (C. Reed and G. Kanin), 1945–6

VOCAL

After the Dazzle of Day (W. Whitman), 1v, pf, 1925; As if a Phantom Caress'd me (Whitman), 1v, pf, 1925; Into my Heart an Air (A.E. Housman), 1v, pf, 1925; Gods (Whitman), Mez, str, 1926; 4 Whitman Songs, Bar, pf, 1928; Is Five (e.e. cummings), S, pf, 1929; Cantatina, female chorus, perc, 1930; Children's Cantata, chorus, 1935; Jimmie's Got a Goil (cummings), 1v, pf, 1935

A Child Writes a Letter, Bar, pf, 1936; Invitation to Bitterness (Blitzstein), ATB, 1938; The Airborne Sym. (Blitzstein), nar, T, B, male chorus, orch, 1944–6; Displaced (Blitzstein), 1v, pf, 1946; This is the Garden (Blitzstein), chorus, orch, 1957; 6 Elizabethan Songs (Shakespeare), 1v, pf, 1958; From Marion's Book (cummings), 1v, pf, 1960; songs

INSTRUMENTAL

Orch: Sarabande, 1926; Romantic Piece, 1930; Pf Conc., 1931; Surf and Seaweed, suite, 1933; Variations, 1934; Freedom Morning, sym. poem, male chorus, orch, 1943; Native Land, suite, 1946; Lear: a Study, 1958

Chbr and solo: Sonata, pf, 1927; Perc Music, pf, 1929; Scherzo, pf, 1930; Str Qt 'Italian', 1930; Serenade, str qt, 1932; Discourse, cl, vc, pf, 1933; Suite, pf, 1933; Le monde libre, march, pf, 1944; The Guests, suite, pf, 1949; Show, suite, pf, 1947

DAVID Z. KUSHNER

**Bloc de bois** (Fr.). *See* WOODBLOCK.

**Bloch, Augustyn (Hipolit)** (*b* Grudziądz, 13 Aug 1929). Polish composer and organist. At the Warsaw Conservatory he studied the organ with Feliks Rączkowski (1950–55) and composition with Tadeusz Szeligowski (1952–9). Between 1954 and 1977 he composed a large amount of children's songs and incidental music for the Polish Radio Theatre in Warsaw. He has won several international prizes for his chamber music and symphonic works, including two special mentions in the Prince Rainier II Competition (for *Medytacje* and the ballet *Oczekiwanie*, 'Awaiting'), the UNESCO Prize (for *Dialoghi*) and an award from the Brighton Festival (for *Oratorium*). He has also received numerous honours in Poland, and served as vice-president of the Polish Composers' Union (1977–9, 1983–7) and as president of the programme committee for the Warsaw Autumn Festival (1979–87).

After composing French-influenced works for organ during his student days (e.g. *Fantasia*, 1953, and the Sonata, 1954), Bloch experimented briefly with neoclassicism in such works as the Concertino (1958). He used 12-note rows – predominantly linear – for the first time in *Espressioni* (1959). The works of the 1960s show an increasing preponderance of intense chromaticism in clusters or 12-note chords, as in *Awaiting* (1963); blocks of sound in a single tone-colour (e.g. *Dialoghi*) and complex, metrically free textures are also traits of this period. These various tendencies culminated in the theatre works *Ajelet, córka Jeftego* (1967) and *Gilgamesz* (1968), both of which are on subjects from the remote past. The evocation of an archaic sound world with the suggested variation of formulae, such as that found in Gregorian, Byzantine and synagogal chant, has since characterized works such as *Wordsworth Songs* (1976), *Anenaiki* (1979), *Carmen biblicum* (1980) and *Exaltabo Te* (1988), while the tradition of the evangelical chorale is heard in

quotations of Bach (in *Oratorium*, 1982, and *Canti per coro ed organo*, 1984). The religious pieces and those for the stage, the core of Bloch's output, possess a lighthearted scepticism that is typical of his style. The form of many works and individual movements describes an arc of surging and ebbing motion between beginning and end.

WORKS
(*selective list*)

Stage: Voci (ballet, 1, W. Gruca and R. Lindenbergh), 1962; Oczekiwanie [Awaiting] (ballet, 1, W. Giersz and L. Perski), 1963; Byk [Bull] (ballet, 1, H. Tomaszewski), 1965; Ajelet, córka Jeftego [Ayelet, Jephta's Daughter] (mystery op, 1, J. Iwaszkiewicz), 1967, Warsaw, 22 Sept 1968; Gilgamesz (ballet-pantomime, 1, Tomaszewski), 1968; Pan Zagłoba [Mr Zagłoba]) (musical, 1, W. Maciejewska, after H. Sienkiewicz), 1971; Barzdo śpiąca królewna [Deeply Sleeping Beauty] (op-ballet-pantomime, Bloch, after C. Perrault), 1973; Zwierciadło [Mirror] (ballet-pantomime), tape, 1975

Orch: Concertino, vn, str, pf, perc, 1958; Dialoghi, vn, orch, 1964; Enfiando, 1970; Oratorium, org, str, perc, 1982; Bleibe bei uns Herr, 1986; Wzwyż [Upwards], 1993

Vocal-orch: Espressioni (Iwaszkiewicz), S, orch, 1959; Impressioni poetiche (J. Kasprowicz), male chorus, orch, 1959; Gilgamesz, 16 Bar, orch, 1969 [concert version of ballet-pantomime]; Poemat o Warszawie [Poem about Warsaw], nar, SATB, orch, 1974; Wordsworth Songs, Bar, chbr orch, 1976; Taka sobie muzyka [Just a Little Music] (T. Kubiak), S, orch, 1977; Denn Dein Licht kommt (Bible: *Isaiah*), nar, SATB, org, orch, 1987; Litania ostrobramska [Litany of Ostra Brama], SATB, orch, 1989; Du sollst nicht töten, Meditation (Bible:*John*, psalms, St Albert, St Augustine), Bar, SATB, vc, orch, 1991; Hac festa die (13th century), SATB, org, period insts, orch, 1996

Other vocal: Medytacje (Bible: *Isaiah*, Ps xxxix), S, org, perc, 1961; Depesza [Dispatch] (Kubiak), children's vv, 2 pf, perc, 1963; Salmo gioioso, S, 5 ww, 1970; Z gwiazdą w Cudobudzie: pastorałka mazowiecka [With the Star in the Cudobuda: a Mazovian Christmas Carol] (S. Czachorowski), solo vv, ens, 1974; Anenaiki, 16 vv (SATB), 1979; Carmen biblicum (Pss lvii, cxlviii, cxlix, cl, Bible: *Isaiah*), S, 9 insts, 1980; Canti, SATB, org, 1984; Exaltabo Te (Ps cxlv), chorus, 1988; Lauda, S, A, perc, 4 str, 1988; Die Verscheuchte (E. Lasker-Schüler), Bar, va, vc, pf, 1994

Chbr: Warstwy czasu [Layers of Time], 15 str, 1978; Supplicazioni, vc, pf, 1983; A due, sax, b cl, vib, mar, 1984; Musica, cl, 4 str, 1985; Duetto, vn, vc, 1986; Geige und Orgel, vn, org, 1988; Musica per tredici ottoni, 13 brass, 1988; Fanfare, 6 brass, 1991; Pf Trio, 1992; Infiltrazioni 'In memoriam Béla Bartók', 2 vn, 1995

Solo inst: Fantasia, org, 1953; Variations 'In memoriam Karol Szymanowski', pf, 1953; Sonata, org, 1954; Jubilate, org, 1975; Clarinetto divertente, cl, 1976; Głos milczenia [Voice of Silence], tape, 1977; Notes, sax, 1981; Forte (lieto), piano (corale) e forte (furioso), org, 1985

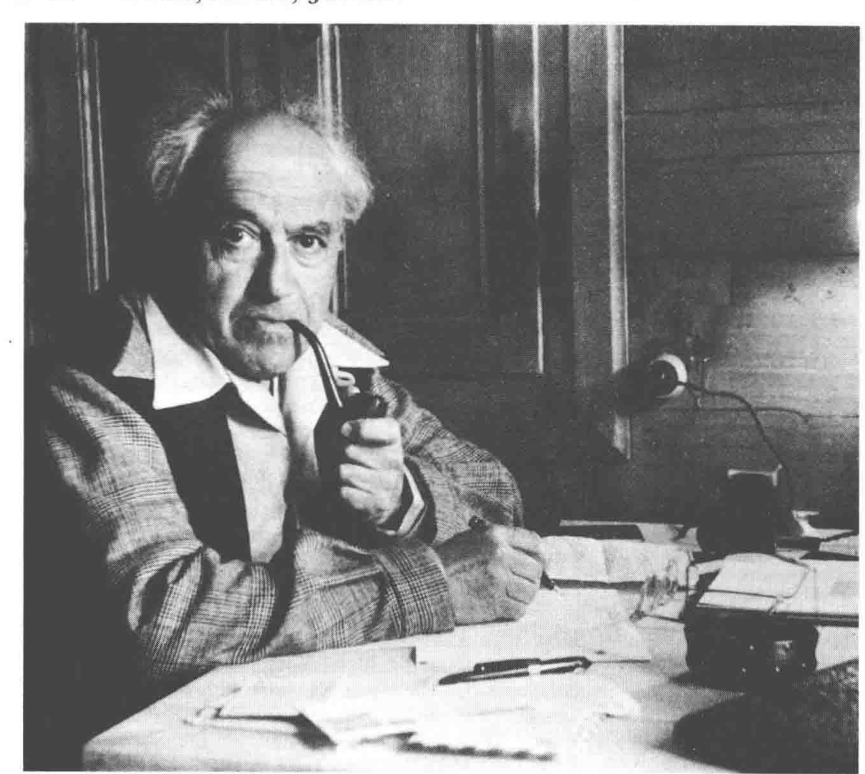
MARTINA HOMMA



**Bloch, Ernest** (*b* Geneva, 24 July 1880; *d* Portland, OR, 15 July 1959). American composer and teacher of Swiss origin.

1. LIFE. He studied in Geneva with Albert Goss and Louis Etienne-Reyer (violin) and Jaques-Dalcroze (solfège and composition) before leaving, at the suggestion of Martin Marsick, to study in Brussels. There he took lessons from Eugène Ysaÿe (violin), Rasse (composition) and Franz Schörg (violin and chamber music), at whose home he lived from 1896 to 1899. He then went to study in Frankfurt with Knorr (1899–1901) and in Munich with Thuille (1901–3). After a year in Paris (1903–4), during which time he absorbed the French Impressionistic style, he returned to Geneva, married Margarethe Augusta Schneider, and entered his father's business as a bookkeeper and salesman of Swiss tourist goods. Meanwhile, he kept his hand in music by composing in piecemeal fashion, conducting orchestral concerts in Neuchâtel and Lausanne (1909–10) and lecturing on aesthetics at the Geneva Conservatory (1911–15). A high point of this period was the première of his lyric drama, *Macbeth*, at the Opéra-Comique, Paris, on 30 November 1910.

Bloch went to the United States in 1916 with the encouragement of Alfred Pochon, second violinist of the Flonzaley Quartet, as conductor for a tour by Maud Allan's dance company. When the tour collapsed, he accepted a position at the newly formed David Mannes College of Music in New York, teaching theory and composition there and also privately (1917–20). He was thus able to bring his wife and three children, Suzanne, Lucienne and Ivan, to America. The successful première of his String Quartet no.1 by the Flonzaley Quartet on 31 December 1916 led to performances of his orchestral works in Boston, New York and Philadelphia. He conducted his *Trois poèmes juifs* with the Boston SO in March 1917 and *Schelomo*, with Kindler as the cello soloist, at a concert sponsored by the Society of the Friends of Music in New York in May of the same year. Following additional successes in Philadelphia, where he conducted a programme of his 'Jewish' works with the Philadelphia Orchestra in January 1918, he signed a contract with G. Schirmer, who published these compositions with what was to become a trademark logo – the six-pointed Star of David with the initials E.B. in the centre; it was an imprimatur which firmly established for Bloch a Jewish identity in the public mind.

Bloch expanded his contact with American life by conducting Renaissance choral music with amateur singers at the Manhattan Trade School, teaching the fundamentals of music to children in Joanne Bird Shaw's experimental summer school in Peterboro, New Hampshire, and discussing art and life with such figures as Julius Hartt. In 1919 his *Suite* for viola and piano (or orchestra) won the Coolidge Prize, quickly earning a place in the viola repertory.

Bloch served as founding director of the Cleveland Institute of Music (1920–25), where he conducted the student orchestra, taught composition, established masterclasses and courses for the general public, and proposed such radical reforms as the abandonment of examinations and textbooks in favour of direct musical experience, with study rooted in the scores of the great masters. However, the trustees continued to favour a practical curriculum and a more traditional approach to music education, and this eventually led him to resign. (It was in Cleveland, in 1924, that he became a naturalized US citizen.) He then accepted the directorship of the San Francisco Conservatory of Music (1925–30), during which time he was awarded the Carolyn Beebe Prize of the New York Chamber Music Society for his *Four Episodes* for chamber orchestra (1926), the first prize in a contest sponsored by *Musical America* for his epic rhapsody in three parts, *America*, and a shared RCA Victor Award for his homage to his native land, *Helvetia*.

*Ernest Bloch*

During the 1930s Bloch lived mainly in Switzerland, composing such works as *Voice in the Wilderness*, the Piano Sonata, *Evocations* for orchestra, the Violin Concerto and, most importantly, the *Sacred Service*, with which he began his second European period. He conducted his works in various European cities, and returned briefly to the USA to conduct the *Sacred Service* in New York in 1934. Major festivals of his works were held in London in 1934 and 1937, the latter in connection with the founding of an Ernest Bloch Society, with Albert Einstein as honorary president, and Alex Cohen as secretary. *Macbeth* was revived in Naples in Italian translation in March 1938, but only three performances were given owing to Mussolini's deference to a visit from Hitler. Because of growing anti-Semitism and also because he wished to retain his American citizenship, Bloch returned to the USA and, in 1940, assumed a professorship at the University of California at Berkeley, where he taught summer courses until his retirement in 1952. The Berkeley duties fulfilled an obligation he owed the institution, which, in conjunction with a grant from the Stern family had enabled him to compose in Europe from 1930 to 1939 freed from the responsibilities of teaching.

In his later years, during which he lived reclusively at Agate Beach, Oregon, he was the recipient of numerous honours, including the first Gold Medal in Music (String Quartet no.2), from the American Academy of Arts and Sciences (1947) and the Henry Hadley Medal of the National Association for American Composers and Conductors (1957). He continued to compose in a wide variety of genres, and to pursue his lifelong hobbies of photography and mushroom collecting, and his newer interest in collecting and polishing agates. In 1958, suffering from cancer, he underwent unsuccessful surgery; he died a year later. In 1968 an Ernest Bloch Society was formed in the USA through the efforts of the composer's children.

2. WORKS. Bloch's student compositions are diverse and derivative, ranging from the sprawling *Symphonie orientale* (1896) to the Romantically effusive *Vivre – aimer* (1900). The periods in Munich and Paris produced two major efforts, the extravagantly orchestrated Symphony in C♯ minor, a four-movement formally conceived work despite a broad programme (a fugue opens the fourth movement), revealing the influence of Richard Strauss with regard to melody, harmony and orchestration, and the pair of symphonic poems, *Hiver – Printemps*, with Impressionistically coloured instrumentation, notable in the harp and woodwind solos, and in the closing reflective coda. *Macbeth*, the only published operatic venture by Bloch, established his credentials as a dramatic composer. In this work, he synthesized elements from the Wagnerian music drama, from Debussy's *Pelléas et Mélisande* and from Musorgsky's *Boris Godunov* with his own emerging originality. Certain characteristics associated with the composer's later works appear in *Macbeth*: frequent changes of metre, tempo and tonality, melodic use of the perfect fourth and augmented second at crucial moments, modal flavouring, dark instrumentation, repeated-note patterns, ostinatos and pedal points, and ever-present cyclic formal procedures (the last refined through study with Rasse, a pupil of Franck).

Bloch's search for his own musical identity found fulfilment in a series of highly charged epics on a broad scale, biblical in inspiration and known as the 'Jewish Cycle'. In these deeply emotive utterances, which include settings of Psalms cxxxvii and cxiv for soprano and orchestra (1912–14), Psalm xxii for baritone and orchestra (1914), the symphony *Israel* with five solo voices

(1912–16), and *Schelomo* (1915–16), a Hebraic rhapsody for cello and orchestra (including the use of quarter-tones for the first time in his output), he painted sweeping musical canvases with a rich orchestral palette. Their 'oriental' or quasi-Hebraic character is intensified by the augmented intervals, melismatic treatment of melody, and large, colouristic orchestra. The Scotch-snap rhythm and its variants is so pervasive that it has come to be known as the 'Bloch rhythm'. Authentic Hebrew material is rare (exceptions are quotations from the *Song of Songs* in *Israel* and a *gemora nigun* in *Schelomo*); however, certain of Bloch's compositional traits take on a new meaning in the context of the 'Cycle'. The repeated-note patterns and the augmented and perfect fourth intervals in the Psalms and *Schelomo*, for example, evoke the call of the *shofar* as it is sounded in the synagogue on the High Holy Days (*Rosh ha-Shanah* and *Yom Kippur*); the unfettered rythmic flow suggests the melismas of Hebrew chant. Additionally, the frequent accents on the final or penultimate beat of a bar have analogies in the Hebrew language.

Following the 'Jewish' works, Bloch moved, in part, towards a neo-classical aesthetic as exemplified, to varying degrees, in his two sonatas for violin and piano, the First Piano Quintet (with effective use of quarter-tones in the first and third movements), and the first Concerto grosso (with a powerful closing fugue). Even in these 'abstract' works, however, certain referential associations are revealed, for example to the Gregorian mass *Kyrie 'Fons bonitatis'* in the Second Violin Sonata, or the 'Dirge' and 'Pastorale and Rustic Dances' movements of the Concerto grosso. And, in the same period, there is still a residue of overt Judaic expression, as in *Baal shem* for violin and piano and *From Jewish Life* for cello and piano (albeit an expression more akin to the Jew of the eastern European ghetto than that of the Bible); Bloch's propensity to eclecticism is further seen in the piano cycle, *Poems of the Sea*, in which there is a mixture of Impressionism, modality and Hebrew *shtaygers*.

With his move to San Francisco, Bloch produced a series of widely varied works, including *America: an Epic Rhapsody*, a three-movement programme symphony unified by a recurring motto and containing ample quotations from Amerindian melodies, English shanties, American civil war tunes, Negro spirituals and references to the mechanization of 20th-century America (e.g. factory noises, car horns). A closing anthem is intended to be sung by the audience. The *Four Episodes* for chamber orchestra conjures another slice of American life, that of San Francisco's Chinatown, while *Helvetia*, replete with folksong quotations and other Alpine suggestions, pays homage to his native land.

In the 1930s Bloch returned to his roots and, in his retreat at Roverdo-Capriasca, Ticino, produced his monumental *Avodath hakodesh* ('Sacred Service'), based on texts drawn from the Reform Jewish prayer book. His other music from that European decade is mostly large in scale and diverse in inspiration and subject matter. *Voice in the Wilderness*, an orchestral work with obbligato cello, is, essentially, a series of meditations but without a specific subject and decidedly not Jewish in intent (as opposed to *Schelomo*); *Evocations* has a quasi-oriental atmosphere, as in the second movement, 'Houang-Ti', with its pentatonic and exotic scales, and the inclusion of harp, piano and celesta; and the Violin Concerto, despite its Amerindian motto used structurally to unify the work, reverts to well-practised traits, i.e. cyclic procedures, the 'Bloch rhythm', and open fourths and fifths.

The substantial body of music after 1941 is, in the main, less subjective than that of earlier years. The Concerto grosso no.2 and the string quartets nos.2–5, with their formal design and abstract quality, fall into the neo-classical category. Similarly, the passacaglias and fugues of the *Suite symphonique* and the String Quartet no.2 cement a return to principles associated with early masters whose technical polish Bloch admired. The *Concerto symphonique*, on the other hand, is a large-gestured Romantic piano concerto, while the *Sinfonia breve* may be described as both tightly compressed and Expressionistic. 12-note themes are commonly employed in the late works regardless of their style (as in the Symphony in E♭ major, *Sinfonia breve* and String Quartet no.3), while Jewish assocations are still occasionally noticed (e.g. in the Symphony for trombone and orchestra and the *Suite hébraïque* for violin or viola and orchestra). Earlier pictorialism is largely absent; indeed the kaleidoscopic and sometimes rhetorical features of the 'Jewish Cycle' have been supplanted by objectivity, serenity and control.

Bloch attracted many distinguished students (among them Sessions, Douglas Moore, Rogers, Chanler, Frederick Jacobi, Porter and Elwell), whom he taught to develop and create according to their individual temperaments and talents, an approach he adopted from his teacher, Knorr. He neither founded any school nor blazed new trails; he moulded into a distinctive style the ingredients he found already in use, including aspects of atonality and 12-note themes.

The passion, fervour and colourful florid writing of Bloch's 'Jewish Cycle' are perhaps most characteristic, though in retrospect even these works are guided by an acute sense of form. However, unlike the late string quartets and suites for solo string instruments, the biblically inspired works, with their luxurious waves of phantasmagoria, engage the listener more emotionally than intellectually. Patriotic efforts such as *America* and *Helvetia*, though somewhat selfconscious, are meritorious as *pièces d'occasion*. But in his best work, the expression of his firm faith in the spirituality of mankind always shows through. Bloch was, and continues to be, a singular figure in the music of the 20th century.

WORKS

STAGE

Macbeth (op, 3, E. Fleg), 1904–9, Paris, Opéra-Comique, 30 Nov 1910

ORCHESTRAL

Helvetia, 1900–29, Chicago, 18 Feb 1932
Symphony in c♯, 1901–2, Geneva, 1910
Hiver – Printemps, sym. poems, 1904–5, Geneva, 27 Jan 1906
Three Jewish Poems, 1913, Boston, 23 March 1917
Schelomo, vc, orch, 1915–16, New York, 3 May 1917
Suite, va, orch, 1919
In the Night, 1922
Concerto grosso no.1, str, pf obbl, 1924–5, Cleveland, 1 June 1925
Four Episodes, chbr orch, 1926, New York, March 1927
Voice in the Wilderness, orch, vc obbl, 1936, Los Angeles, 21 Jan 1937
Evocations, 1937, San Francisco, 11 Feb 1938
Violin Concerto, 1937–8, Cleveland, 15 Dec 1938
Suite symphonique, 1944, Philadelphia, 26 Oct 1945
Variation no.10 'Solemne', 1944 [from the multi-composer Variations on a Theme by Eugene Goossens]
Concerto symphonique, pf, orch, 1947–8, Edinburgh, 3 Sept 1949

Scherzo fantasque, pf, orch, 1948, Chicago, 2 Dec 1950
Concertino, fl, va, str, 1950
Suite hébraïque, va/vn, orch, 1951, Chicago, 1 Jan 1953
Concerto grosso no.2, str qt, str, 1952, London, 11 April 1953
In memoriam, 1952
Sinfonia breve, 1952, London, 11 April 1953
Symphony, trbn, orch, 1954, Houston, 4 April 1956
Symphony in E♭, 1954–5, London, 15 Feb 1956
Proclamation, tpt, orch, 1955, New York, 18 Nov 1957
Suite modale, fl, str, 1956; Kentfield, CA, 11 April 1965
Two Last Poems, fl, orch, 1958

VOCAL

Choral: America: an Epic Rhapsody, chorus, orch, 1926; Avodath an hakodesh [Sacred Service], Bar, chorus, orch, 1930–33
Other works: Historiettes au crépuscule, 1v, pf, 1904; Poèmes d'automne, Mez, orch, 1906; Prelude and 2 Psalms, S, orch, 1912–14; Israel, 5 solo vv, orch, 1912–16; Psm xxii, A/Bar, orch, 1914

CHAMBER AND SOLO INSTRUMENTAL

3–5 insts: Str Qt no.1, 1916; Pf Qnt no.1, 1921–3; 3 Nocturnes, pf trio, 1924; In the Mountains, str qt, 1925; Night, str qt, 1925; Paysages, str qt, 1925; Prelude, str qt, 1925; 2 Pieces, str qt, 1938–50; Str Qt no.2, 1945; Str Qt no.3, 1952; Str Qt no.4, 1953; Str Qt no.5, 1956; Pf Qnt no.2, 1957
Solo str: Suite, va, pf, 1919; Sonata no.1, vn, pf, 1920; Baal shem, vn, pf, 1923, orchd 1939; From Jewish Life, vc, pf, 1924; Méditation hébraïque, vc, pf, 1924; Nuit exotique, vn, pf, 1924; Sonata no.2 (Poème mystique), vn, pf, 1924; Abodah, vn, pf, 1929; Melody, vn, pf, 1929; 2 Pieces, va, pf, 1951; 3 suites, vc, 1956, 1956, 1957; Suite, va, 1958; 2 suites, vn, 1958
Pf: Ex-voto, 1914; 4 Circus Pieces, 1922; In the Night, 1922; Poems of the Sea, 1922, orchd; Danse sacrée, 1923; Enfantines, 1923; Nirvana, 1923; Sonata, 1935; Visions and Prophecies, 1936
Org: 6 Preludes, 1949; 4 Wedding Marches, 1950

JUVENILIA 1895–1900
*all unpublished*

Symphonie orientale; Vivre – aimer, sym. poem; Str Qt; Orientale, orch; Vn Conc.; Sonata, vc, pf; Poème concertante, vn, orch; Fantaisie, Pastorale, vn; songs incl. Là-bas, Larmes d'automne, Musette, Près de la mer

MSS in *US-Wc* [juvenilia], *BEm*, *R*, *Hhc*, *ATs*, Western Jewish History Center, Berkeley, CA

Principal publishers: Boosey & Hawkes, Broude, Carisch, Eschig, Fischer, Leuckart, Mills, G. Schirmer, Suvini Zerboni

DAVID Z. KUSHNER

**Bloch, Ernst** (*b* Ludwigshafen am Rhein, 8 July 1885; *d* Tübingen, 4 Aug 1977). German philosopher. He studied philosophy at Munich University and at Würzburg University, where his subsidiary subjects were physics and music and where he took the doctorate in 1908 with a dissertation on Rickert. In 1933 he left Germany, eventually reaching the USA, but returned after the war as professor of philosophy and director of the institute of philosophy at the University of Leipzig (1949–56); in

1961 he became visiting professor of philosophy at Tübingen University. His principal writings on music are incorporated in his major philosophical works, *Vom Geist der Utopie* (Munich, 1918/*R*, 2/1923/*R*), and *Das Prinzip Hoffnung* (Berlin, 1954–9/*R*; Eng. trans., 1986), which deploy a romanticized and depoliticized Marxism akin to the early work of his friend Lukács. Bloch compensated for what he saw as Marxism's incomplete view of reality, as dominated by material exchange, by introducing the notion of a basic human 'hunger' which could be characterized as 'spiritual' and take on a religious tone in its description, without a necessary commitment to any faith. This hunger is evident in the emotional attitude of hope, expressed in aspirations for a better society, or future utopia. Bloch defended utopian ideas from both conservative and orthodox Marxist criticism (see Zabel, 1990).

Music is central to Bloch's utopian thought because it provides a means for the expression of ideal images of the subject (or self), free from the constraints of society. An inner freedom from social constraint is itself constitutive of 'hope'. Music embodies this basic freedom because its development is more than a mere reflection of socio-economic contingencies. Stylistic evolution shows how different ideals of selfhood have evolved independently of society, each style presenting a new utopian view of the self and giving an image of how 'man hears himself' in a given era. The basic human hunger for reconciliation of the subject with the ideal self-image, or 'object' of hope, can thus be shown to change historically in its form, and yet to remain consistent in its general nature. In his *Vom Geist der Utopie* Bloch elaborates on changing forms of the idealized self-image: the 'sacred self' (Bach), the 'secular self' (Mozart), the 'dramatic self' (Beethoven), forms of aspiration to a 'transcendent self' (Wagner, Bruckner). Despite their historical expression, each of these ideals could be generalized as relevant to the people of any time. They are not limited to the historical circumstances which led to their expression, but present universal possibilities. The second volume of *Das Prinzip Hoffnung* includes an allegory that illustrates the importance of music in a philosophy of hope. Excerpts from both works are included in the collection *Zur Philosophie der Musik* (Frankfurt, 1974; Eng. trans. as *Essays on the Philosophy of Music*, 1985)

F.E. SPARSHOTT/NAOMI CUMMING

**Blochwitz, Hans Peter** (*b* Garmisch-Partenkirchen, 28 Sept 1949). German tenor. He studied in Mainz and Frankfurt. After developing a successful career as a concert and lieder singer, he made his operatic début in 1984 at Frankfurt as Lensky (*Yevgeny Onegin*). He sang the Evangelist in stagings of the *St Matthew Passion* at La Scala, Milan (1985), and the *St John Passion* at the Théâtre des Champs-Elysées, Paris (1986). At Aix-en-Provence he has sung Belmonte, Ferrando and Tamino. Blochwitz made his Covent Garden début in 1989 as Ferrando, returning as Don Ottavio, the role of his Metropolitan début in 1990. In addition to his four major Mozart roles, his repertory includes Monteverdi's Nero and William in Henze's *Der junge Lord*, which he sang at Munich in 1995. A very stylish singer, with superb diction, he has a firm-toned lyrical voice perfectly adapted to Bach and Mozart. His recordings include Ferrando, Don Ottavio and Tamino, and several admired discs of lieder.

ELIZABETH FORBES

**Blockflöte (i)** (Ger.). The English term 'blockflute' is sometimes used to mean RECORDER.

**Blockflöte (ii)** (Ger.). *See under* ORGAN STOP.

**Block harmony.** A homorhythmic accompanying texture in which harmonies are presented as simultaneous chords, often one per beat, below a more active and soloistic melodic part (*see* HOMOPHONY). Block harmony accompaniment is most often associated with piano music (e.g. the left hand harmonizing a right-hand melody or a solo instrument or vocal line), but is also found in orchestral music. *See* HOMOPHONY, ex.2.

BRIAN HYER

**Blockland** [Brockland], **Cornelius** [Corneille de] [Montfort, Corneille de] (*b* Montfoort, nr Utrecht, *c*1540; *fl* 1571–86). Dutch composer and music theorist, active in the Franche-Comté. He was also a doctor, astrologer, mathematician and poet. He wrote two Latin poems, published in 1581, in honour of the Florentine mathematician and theologian Francesco Giuntini. According to Du Verdier he also wrote several ephemerides mostly issued under the pseudonym Imbert de Billy; in these Billy is described as 'natif de Charlieu en Lyonnais' and tailor to the Baron of Saint Amour (Louis de La Baume, to whom Blockland's musical *Instruction* was dedicated). That Billy was in fact Blockland seems to be confirmed by Billy's *Almanach pour l'an 1582* (Lyons, 1582); in the address to the councillors and bourgeois of Lons-le-Saulnier the author declared that he was merely the mouthpiece for 'le docteur de Montfort' who had recently settled in the town. He described Montfort as of noble birth, raised in the Catholic religion, and 'educated at good and famous universities'. This attempt to impress the town councillors and ecclesiastical authorities suggests that Blockland may have been suspected and persecuted as a Protestant. The same *Almanach* includes a woodcut of Montfort as well as eulogies in Greek and Latin by Jean Willemin and Claude Morel, schoolmasters in Saint Amour. An almanac by Morel of the same year (*Diare au journal pour l'an 1582*, Lyons, 1582) laments the misfortune of Montfort in two prefatory poems.

Blockland's *Instruction fort facile pour apprendre la musique pratique* (Lyons, 1573) was written at Saint Amour in 1571; a second edition was prepared at Lons-le-Saulnier in 1586 and published in the following year as *Instruction méthodique et fort facile pour apprendre la musique pratique* (Lyons, 1587/*R*). This simple didactic treatise draws heavily on Loys Bourgeois' *Droict chemin* (1550) and Maximilian Guilliaud's *Rudiments* (1558) by paraphrasing or plagiarizing certain passages and reproducing some of their tables and music examples; its principal innovations are the omission of the traditional

discussion of the Guidonian hand and the gamut, and the inclusion of music examples from 31 chansons, two madrigals, a Provençal song and a motet, by composers of the previous generation (including Lassus, Clemens non Papa, Arcadelt, Janequin and Certon). The chapter on mutation mentions a Latin treatise (now lost) by Blockland, 'treating the complete knowledge of music'. His only surviving music is *Le [second] livre du jardin de musique* (Lyons, 1579; only the superius partbook is extant), for four voices. It contains 36 chansons and *voix de ville*, including settings of poems by Clément Marot, Ronsard (four sonnets) and Du Bellay, as well as three old narrative anecdotes, two graces and three occasional pieces addressed to local gentry, among them an epithalamium for the wedding of Louis de La Baume and Catherine de Bruges in 1574. The archaic rondeau *Elle m'aime bien* and the equally venerable *Faute d'argent* (which uses the same imitative motifs as Josquin's setting) contrast with similar *voix de ville* in dance rhythm, such as the pavane *Celuy se peut promettre* and the galliard *Belle que j'aime*. The collection closes with poems by de La Taissonnière and Claude Morel in praise of Blockland and his music.

FRANK DOBBINS

**Blockwerk** (Ger.; Dut. *blokwerk*). The undivided principal chorus of the medieval organ (*see* ORGAN, esp. §IV, based upon a 'double Principal' (two open unison Principals/ Diapasons) without any ranks separated off as individual stops. The term itself may be 18th-century (Utrecht organ documents, 1731), although according to J. Hess (1807) it was used by 'old builders'. At Reims (1487) it is known only that the organ had 2000 pipes, at Amiens (1422) that the four-octave keyboard began at 19 ranks and ended at 91, at Dijon (*c*1350) that those ranks were made up of Principals, Octaves, Super-octaves and Twelfths. As well as 8′, the *Blockwerk* could be based on open 4′ (Leuven, 1445), open 16′ (Delft, 1458) or deeper, according to the pitch and key compass. The 1480 *Blockwerk* now in Middelburg, Netherlands, had a probable disposition of:

*F* 16.8.4.2⅔.2.2.1⅓.1⅓<br>
*d′* 16.8.4.4.2⅔.2⅔.2.2.2.1⅓.1⅓<br>
*f′* 16.8.5⅓.4.4.2⅔.2⅔.2.2.2.1⅓.1⅓<br>
*f♯′* 16.8.5⅓.4.4.2⅔.2⅔.2⅔.2.2.2.1⅓.1⅓<br>
*g′* 16.8.8.5⅓.4.4.2⅔.2⅔.2⅔.2.2.2.1⅓.1⅓<br>
*c♯″* 16.8.8.8.5⅓.4.4.4.2⅔.2⅔.2⅔.2.2.2.1⅓.1⅓<br>
*e″* 16.8.8.8.5⅓.5⅓.4.4.4.2⅔.2⅔.2⅔.2.2.2.1⅓.1⅓<br>
*a″* 16.8.8.8.5⅓.5⅓.4.4.4.2⅔.2⅔.2⅔.2.2.2.1⅓.1⅓

The most useful description of the sound of a *Blockwerk* is Praetorius's (*Syntagma musicum*, ii (1618, 2/1619), p.99) of that at Halberstadt (1357–61):

> The large Praestants and the low manual compass, which does not rise high enough for lightness of sound, caused together a deep coarse rumbling as of a dreadful distant thunder, while the many-rank Mixture [i.e. undivided chorus] gave an exceeding shrillness, strong, loud and powerful.

The *Blockwerk* belonged essentially to (a) the fixed church organ (as distinct from positives, etc.) and (b) northern Europe. Organs in Bordeaux, Lombardy and Tuscany already had mostly single, separable ranks by *c*1500 ( an example is S Giustina, Padua, 1493, organ of 16.8.5⅓.4.2⅔.2.1⅓.1). A full account of the history of the *Blockwerk* is given in R. Quoika: *Vom Blockwerk zur Registerorgel: zur Geschichte der Orgelgotik, 1200–1520* (Kassel, 1996).

PETER WILLIAMS/BARBARA OWEN

**Blockx, Jan** (*b* Antwerp, 25 Jan 1851; *d* Kapellenbos, nr Antwerp, 26 May 1912). Belgian composer. He received his first lessons in theory and piano from Frans Willem Aerts, choirmaster of St Pauluskerk, Antwerp, and was a fine treble singer there. He was a pupil at the Ecole de Musique, which under Peter Benoit became the Flemish Music School (Vlaamsche Muziekschool) in 1876; there Blockx received organ lessons from Jozef Callaerts and was a pupil of Benoit for harmony, counterpoint, fugue and composition. He soon withdrew from the influence of his imposing teacher to follow his own path; in 1879 he went to Leipzig, where he became a friend of Grieg and Sinding and attended Reinecke's classes at the conservatory. From Germany he travelled to Italy, but this journey does not seem to have made a strong impression on him. In 1885 he was appointed lecturer in harmony at the Flemish Music School, in succession to Hendrik Waelput, and in 1886 he became conductor of the Royal Art Society. He was an outstanding teacher and idolized by his pupils, who included the composers Lodewijk Mortelmans and Flor Alpaerts. In May 1901 he succeeded Benoit as director of the Antwerp Conservatory, where he introduced a number of reforms in order to raise the standard of tuition; he founded a string quartet consisting of prizewinning players from the conservatory. He was a member of the Royal Belgian Academy and of a jury, set up by the publishers Sonzogno of Milan, for an international competition in opera composition.

Blockx's fame rests chiefly on the success enjoyed by his operas; the day of the first performance of *Herbergprinses*, 10 October 1896, may be regarded as the beginning of Flemish opera. His work can be seen as a national variation of Romantic realism and as a typical product of his education at Benoit's school, which was based largely on the study of Flemish folksong. Blockx knew instinctively how to underline the dramatic action with suitable musical effects. From Wagner he inherited certain principles in the use of leitmotif, recitative and symphonic commentary. His orchestration, though on the whole conventional, is always polished and effective, and his melodies reveal a considerable lyric gift.

WORKS
*(selective list)*

*MSS in B-Aac, Ac*

STAGE

*operas unless otherwise stated; all publications in vocal score*

Iets vergeten (Spl, 1, V. de la Montagne), Antwerp, Koninklijke Harmonie, 19 Feb 1877

Milenka (ballet, 1, P. Berlier), Brussels, Monnaie, 3 Nov 1888 (Brussels, 1896)

Maître Martin (4, E. Landoy, after E.T.A. Hoffmann), Brussels, Monnaie, 30 Nov 1892

Sint-Niklaas (pantomime, 3, T. Hannon), Brussels, Royal du Parc, 1894

Herbergprinses (3, N. de Tière), Antwerp, Vlaamse Opera, 10 Oct 1896 (Paris, 1897)

Thijl Uilenspiegel (3, H. Cain and L. Solvay), Brussels, Monnaie, 12 Jan 1900 (Paris, 1900)

De bruid der zee (3, de Tière), Antwerp, Vlaamse Opera, 30 Nov 1901 (Paris, 1902)
De kapel (1, de Tière), Antwerp, Vlaamse Opera, 7 Nov 1903 (Paris, 1903)
Baldie (3, de Tière), Antwerp, Vlaamse Opera, 25 Jan 1908, rev. as Liefdelied, Antwerp, Vlaamse Opera, 6 Jan 1912
Telamon en Myrtalee, 1910 (R. Verhulst)
Thijl Uilenspiegel II (3, Cain and Solvay), Brussels, Monnaie, 12 Nov 1920, completed by P. Gilson

CHORAL WITH ORCHESTRA
*all publications in vocal score*

Vredezang (K. Ledeganck), female vv, orch (Brussels, *c*1877)
De kleine bronnen (J. Vuylsteke), female/children's vv, orch, 1878 (Paris, 1898)
Een droom van't paradijs (orat, J. van Beers), solo vv, chorus, orch, 1881–2; Waltz, arr. pf 4 hands (Antwerp, n.d.)
Klokke Roeland (cant., A. Rodenbach), chorus, orch, 1888
Antwerpen's schutsgeest (cant., A. Wouters), chorus, orch, 1888
Gloria patriae (cant., H. Melis), children's vv, orch (Brussels, 1902)
Scheldezang (cant.), chorus, ww, 1903
Feest in den lande (cant., R. Verhulst), T, children's vv, orch (Brussels, ?1905)
Jubelgalm (cant., de Tière), chorus, orch (Brussels, ?1905)

OTHER WORKS

Choral unacc.: Licht, solo vv, male vv, 1895 (Leipzig, n.d.); De heide, male vv (Brussels, 1899); Het graf, 4vv (Ghent, 1904); Ave verum, mixed vv (Brussels, 1905); other works
Orch: Rubensouverture, 1877; Kermisdag, 1879; Vlaamsche dansen (Danses flamandes), 1884 (Paris, 1898); Sym., D, 1885; Symphonische drieluik (Brussels, 1905); Suite in den ouden vorm, 1907, ed. (Paris, 1922); other works, incl. music for ww

MARIE-THÉRÈSE BUYSSENS

**Blodek, Vilém** (*b* Prague, 3 Oct 1834; *d* Prague, 1 May 1874). Czech composer, flautist and pianist. He was born into a poor family and was educated at a German Piarist school in Prague. After studying with Dreyschock (piano) and at the Prague Conservatory (1846–52) with Antonín Eiser (flute) and Kittl (composition) he became music teacher to the Zieliński family in Lubycza, Galicia (1853–5). On returning to Prague he worked as a concert pianist and music teacher and briefly as second conductor of the Prague Männergesangverein, for which he wrote a number of patriotic choruses. In 1860 he succeeded Eiser as professor of flute at the conservatory, and as a basis for teaching he wrote his own flute tutor (1861). He was also active as a writer of incidental music for both the German and Czech theatres: from 1858 onwards he wrote music for 60 plays and collaborated with Smetana on music for the tableaux for the 1864 Shakespeare celebrations. In 1865 he married his pupil Marie Doudlebská, despite opposition from her father, a rich lawyer. Overwork caused a nervous breakdown, and after a spell in a mental home in 1870, he returned there permanently in May 1871.

Blodek began composing at the conservatory at the age of 13 (wind sextet, 1847) in a style that owed much to his teacher Kittl, to Mendelssohn and to the early German Romantics. His Symphony in D minor (1858–9), his most ambitious work at the time, easily surpasses works by the more established Czech symphonists Kittl and Měchura. Though its Mendelssohnian Scherzo betrays Blodek's early affiliation, its monothematicism makes a suggestive link with Smetana and his Triumphal Symphony (1853) and remained a characteristic device, for instance in his Flute Concerto (1862), the most brilliant and attractive of his virtuoso flute works.

Blodek's best-known work is his one-act opera *V studni* ('In the Well'), first performed at the Provisional Theatre in November 1867. One of several comic village operas written to Sabina librettos (*The Bartered Bride* is the most famous), it has a cast of just four characters and is made up of a handful of closed numbers: five solos, two duets, one quartet, an overture and an intermezzo, and three brief ensembles for chorus and soloists. It was the first Czech comic opera to replace spoken dialogue with recitative. Blodek's opera is often considered to be one of the most 'Czech' operas after those of Smetana – it was written shortly after the première of *The Bartered Bride* – but its pleasant melodic style and rather foursquare construction suggests Nicolai or Lortzing. Blodek's next opera, *Zítek*, again to a Sabina libretto (a historical comedy set in the 14th century), was a more ambitious work both in its musical vocabulary and in its operatic form. A full-length three-act opera with a large cast, it made some attempt to break down the divisions between the closed numbers of its predecessor, using arioso and a chorus more integrated into the action. Blodek completed only one act and part of the second before his death; Smetana, already ill, declined to finish it, but it was eventually completed by F.X. Vaňa and was performed for the first time in 1934 on the 100th anniversary of Blodek's birth.

From *Zítek's* advance on *In the Well* it is clear that Blodek's illness and early death robbed 19th-century Czech music of a remarkable talent. *In the Well* has survived, despite a naive text often more tedious than charming, an oversweet harmonic vocabulary and the occasional clumsiness of technique; this is a tribute to a lightness of touch and appealing freshness of melody that is not always excelled by Blodek's greater contemporary, Smetana.

WORKS

STAGE

Mlhavé obrazy [Misty Pictures] (incid music to J. Brandeis's play), Prague, 1859
Clarissa (op), 1861, unfinished [lib in Ger.]
Chorista (vaudeville, F. Hainiš-Zdobnický), 1861, Prague, 22 March 1862, lost
Hudba k slavnosti Shakespeareově [Music for the Shakespeare Celebrations], Prague, 23 April 1864
V studni [In the Well] (comic op, 1, K. Sabina), Prague, Provisional, 17 Nov 1867, vs (Prague, 1878)
Svatojánská pouť [St John's Pilgrimage] (incid music to F.F. Šamberk's play), Prague, 1868, ov. (Prague, n.d.)
Zítek (comic op, 3, Sabina), 1868–9, unfinished, completed by F.X. Váňa, Prague, National, 3 Oct 1934
Incid music to 60 plays

VOCAL

Die Kapelle, 1v, pf, pubd in musical suppl. to *Erinnerungen*
[20] Liebeslieder, 1v, pf, 1860–?, 13 as Písně milostné [Love Songs] (Prague, 1909)
6 mužských sborů [6 Male-Voice Choruses], 1859, 1 pubd: K bratrům [To the Brothers]
20 choruses for male vv, some to Ger. texts by J. von Eichendorff, H. Heine and A. von Chamisso, and to Cz. texts by V. Hanka, J.V. Jahn, J. Pick and K. Sabina; several pubd, incl. Ach ty Labe tiché [O quiet Elbe], 1865; Pijácká (Společná) [A Drinking-Song (A Social Song)], 1867; Pochod [March], 1867
Sacred: Solemn Mass, D, 1853; Ave Maria, C, mixed choir, 1863 (Prague, 1888); Otče náš [Our Father], F, male vv, 1863; Veni Creator, C, mixed vv, 1863; Off, C, 1863, inc.; Mass, D, 1865

INSTRUMENTAL

Orch: Concert ov., C, op.2, 1850; Ov., D, 1854; Sym., d, 1858–9; Concert Ov., E, 1859; Ov., e, ?1862, inc.; Fl Conc., D, 1862, ed. J. Kàan (Prague, 1903); Skladba [Composition], A, 2 fl, orch, ?1862

Chbr: Sextet, D, fl, 2 vn, ob, hn, trbn, 1847; Salon Piece, C, vn, pf, 1850; Grand Solo, D, fl, pf, op.1, 1851; Allegro di bravura, D, fl, pf, 1852; Fantasie e Capriccio, F♯, fl, pf, 1863; Andante cantabile, D, fl, pf, 1863; pf music

Principal publishers: Urbánek, Vilímek, E. Starý, J.A. Christophe & Kuhé, Český hudební fond

JOHN TYRRELL

**Blok, Aleksandr Aleksandrovich** (*b* St Petersburg, 16/28 Nov 1880; *d* Petrograd, 7 Aug 1921). Russian poet. In 1904, his *Stikhi o prekrasnomy dame* ('Verses About a Beautiful Lady') appeared; in these poems, Blok's obsession with a paragon of femininity, often identified with the Divine Sophia, first appeared. This obsession also inspired his drama *Neznakomka* ('The Unknown Woman') for which the composer Vladimir Kryukov wrote a symphonic prologue in the early 1920s. Blok soon became the most popular Russian poet of his generation. Inspired by Wagner and, in turn, by Vladimir Solov'yov's theories of collectivity (*sobornost'*), Blok became interested in the stage and a number of his dramas were produced with music written by the poet and composer Mikhail Kuzmin. The influence of Wagner on Blok's work is indisputable: while the poem *Val'kiriya (na motiv iz Vagnera)* ('Walküre (on Motifs from Wagner)') provides the most obvious example, other poems such as the early *V zharkoy plyaske vakkhanalii* ('In the Hot Dance of the Bacchanale') are considered to have been written under his influence. It has even been suggested that Blok and his wife saw themselves as characters from the *Ring* (Bartlett, 1995). Blok's writings have attracted a number of mostly Russian musicians: in his only settings of contemporary Russian verse, Rachmaninoff selected a poem by Blok for the op.38 songs, while Aleksandr Krein's symphonic fragments *Roza i krest'* ('The Rose and the Cross') were inspired by Blok's drama of that name. During the early Soviet period, Blok exerted a fascination over Feinberg (whose op.7 settings are considered to be particularly close in spirit to the poetry) and Vladimir Shcherbachyov, whose mighty Second Symphony (1922–6) and the piano suite *Nechayannaya radost'* ('Unexpected Joy') were both inspired by the poet's own reading of his verses. In 1920, Artur Lourié and Anna Akhmatova were planning a ballet based on Blok's drama *Snezhnaya maska* ('Snowy Masque') but the project was abandoned on the composer's emigration the following year. His poems subsequently inspired composers ranging from Mosolov, Myaskovsky and Roslavets to Denisov and Shostakovich.

JONATHAN POWELL

**Blokviool.** Variant of the HOMMEL (box zither) of the Low Countries.

**Blokwerk.** *See* BLOCKWERK.

**Blom, Eric (Walter)** (*b* Berne, 20 Aug 1888; *d* London, 11 April 1959). English music critic, writer and editor. He was of Danish and British extraction on his father's side and Swiss on his mother's, and he was educated privately. As a young man, he was employed by the music publishing firm of J. & W. Chester in London. His career as a writer began in 1919, when he was invited by Rosa Newmarch to assist her in providing progamme notes for the Queen's Hall Promenade Concerts. He continued to do this until 1926. From 1923 to 1931 he was London music critic of the *Manchester Guardian*. In 1931 he was appointed music critic of the *Birmingham Post*. He returned to London in 1946 to begin work as editor of the fifth edition of *Grove's Dictionary*. Three years later he became music critic of *The Observer*. In the meantime he had succeeded A.H. Fox Strangways as editor of *Music and Letters* in 1937. Under pressure of work on the dictionary he resigned the editorship of *Music and Letters* in 1950 but resumed it in 1954. In 1946 he was appointed chairman of the Central Music Library in Westminster and a member of the music committee of the British Council. In 1955 he was awarded the CBE and made an honorary DLitt of Birmingham University.

He was an excellent linguist and made a number of translations of foreign works (Einstein's *Gluck*, Deutsch's documentary biographies of Schubert and Mozart). As an editor he was punctilious, even to the point of overriding the views of his contributors. As a writer he had an acute ear for English style. He believed firmly in the English language as a means of expression, and not only defended it against encroachments from abroad but endeavoured to enrich it by proposing the revival of obsolete musical terms. His prejudices were apparent but failed to arouse enmity. The number of his publications, though impressive, does not give a complete picture of his unremitting industry. He did much to encourage younger writers and had many friends.

The width of Blom's interests is evident from his first book, *Stepchildren of Music*, which ranges from *The Dragon of Wantley* to Bartók's first two quartets. *The Music Lover's Miscellany*, which he edited, also gives evidence of wide reading as well as discrimination in the choice of texts and their juxtaposition. *Music in England* is a popular history which achieved a broad readership. Though he was thoroughly familiar with contemporary music – although critical of, for example, Rachmaninoff and Weill – and not hostile to it, the classics were the core of his musical experience, particularly Mozart, on whom he wrote perceptively and with affection. As an analyst he had no use for what he called 'philosophical criticism' and 'psychological probing' but aimed at conveying to others the pleasure he got from the music he was discussing. He had an unrivalled capacity for digesting information and organizing it systematically for the benefit of readers – not only in his *Everyman's Dictionary of Music* but in the many pages of the 5th edition of *Grove's Dictionary* for which he was personally responsible. His knowledge of technical details was occasionally faulty and his judgment could sometimes be criticized – for instance, his decision to exclude living performers from *Everyman's Dictionary*. But against this must be set

his complete absorption in music as a humane art and an eager desire to share his interests with others.

JACK WESTRUP/ROSEMARY WILLIAMSON

**Blomberg, Leopold** (*b* Warsaw, 1831; *d* Warsaw, 20 April 1900). Polish organ builder. He was a member of the Warsaw school established by Mateusz Mielczarski. In 1882 he founded the firm Blomberg i Syn in Warsaw, having worked on his own since 1854. He built about 150 fine, sturdy organs for parish churches, mostly of medium size, and exported dozens of such instruments to various provinces of the Russian empire, including the Russian-occupied region around Helsinki. Among his firm's greatest achievements were overhauls of the organs at Płock Cathedral (1876), Lublin Cathedral (1894–5) and the Warsaw churches of the Blessed Virgin (1873), St Martin (1889) and All Saints (1901; three manuals and pedal, 50 stops). This last, the largest, was highly praised by Marco Enrico Bossi, but was destroyed in 1939 by a German bomb. (For further description see J. Gołos: *Polskie organy i muzyka organowa*, Warsaw, 1972; Eng. trans., 1992, as *The Polish Organ*, i: *The Instrument and its History*.) Leopold's two sons Andrzej (*d* 1911) and Edward (1866–1900) reportedly spent some time as apprentices with Cavaillé-Coll and in 1894 took over their father's firm, which existed until 1911.

JERZY GOŁOS

**Blomdahl, Karl-Birger** (*b* Växjö, 19 Oct 1916; *d* Kungsängen, nr Stockholm, 14 June 1968). Swedish composer, teacher and administrator. He went to Stockholm in 1934 to study biochemistry, but soon his interest in music prevailed and in 1935 he began lessons with Rosenberg. His earliest works – the Trio for woodwind (1938), the First String Quartet (1939) and the *Symfoniska danser* (1939) – already show solid craftsmanship and thorough motivic work; stylistically they recall not only contemporary Rosenberg but also Nielsen and Sibelius. Blomdahl continued his studies, after wartime service, at the Swedish Royal Academy of Music with Tor Mann (conducting) and Mogens Wøldike (Baroque music). In the mid-1940s he appeared frequently as a conductor outside Stockholm, but later he conducted only occasionally, and then only his own music.

At this time there began also the acitivies of the Monday Group, an informal association of young composers, instrumentalists and musicologists who met in Blomdahl's flat to discuss and analyse new works and compositional techniques, their attention being centred on Hindemith's *Unterweisung im Tonsatz*. Other aspects of musical life were considered as well: teaching methods, the situation of old and new music within the institutions (here the Little Chamber Orchestra and the Chamber Choir were important instruments), and the role of radio and daily newspapers. From 1946 members of the Monday Group took over the chamber music society Fylkingen, and later they gained control of the Swedish section of the ISCM; again Blomdahl was generally the leading figure.

Blomdahl's compositions of the mid-1940s are to a great extent marked by an active concern with the structural and polyphonic matters associated with Hindemith's 'new objectivity'. Major examples include the neo-Baroque *Concerto grosso* (1944), the String Trio (1945) with its cantabile polyphonic first movement and its lively, musicianly finale, the Bach-derived Three Polyphonic Pieces for piano (1945) and the Second Symphony (1947). This, the terminal work of the period, shows the full development of certain features of Blomdahl's style, notably his strong-willed construction, marked by powerful climaxes, and his vigorous rhythms, which exist in a distinctive oscillation between dance and march.

In 1946 and 1947 Blomdahl made his first journeys abroad, not to study but to investigate. He began to move in several new directions, taking a growing interest in Bartók and Stravinsky, and gradually also in 12-note serialism, which he encountered principally in the writings of Leibowitz and Krenek; given his dynamic temperament, he was attracted less by Schoenberg and Webern than by Berg. At the same time he was collaborating with the literary group around the poet Erik Lindegren and the review *Prisma*. This resulted in, for example, the *Pastoralsvit* (1948) influenced by a poetic cycle of Lindegren, the *Danssvit no.1*, which Birgit Åkesson choreographed as *Fruktbarhet*, and the highly dramatic music for Rabbe Enckell's radio play *Agamemnons hemkomst* (material from which was used in the choral work *I speglarnas sal*, 'In the Hall of Mirrors').

During these years Blomdahl also began his work in teaching. His pupils of the late 1940s included Pettersson, Bucht and Karkoff; later, as professor at the Swedish Royal Academy of Music (1960–64), he taught Bark, Rabe, Mellnäs and many others. He also organized courses at a more popular level, made many radio programmes and presented teaching programmes on television. In addition, he was chairman of Fylkingen (1949–54), secretary to the Swedish section of the ISCM (1947–56) and general secretary for the first ISCM Festival in Sweden (1956), consultant to the Swedish radio music department (1956–60) and its director (1965–8). The concert series of contemporary music, Nutida Musik, organized by the Concert Hall Society and Swedish Radio from 1954, was proposed by him. In 1953 he was elected a member of the Swedish Royal Academy of Music.

A key work in the evolution of Blomdahl's later style was the Symphony no.3, sub-titled 'Facetter' (1950), a name which says much about the work's structure: it is a series of variations whose bold, individual mutations mirror the possibilities for development afforded by a 12-note series. At the same time the piece shows features of a traditional cycle of movements: a slow introduction is followed by a slow movement for strings, a scherzo, a climactic allegro and an epilogue establishing a connection with the introduction. It is noteworthy that the series is a tonal one and that the style, with its rhythmic pregnancy and tight contrapuntal structure, recalls Bartók rather than the Second Viennese School.

In later years Blomdahl's rate of production decreased, but his works came to have a greater capacity for stylistic renewal, reflecting currents in central European music. He never approached the developments associated with Darmstadt; rather, his contacts were with Holmboe in the 1940s and later with Seiber and Ligeti. In the *Danssvit no.2*, one of his most original smaller pieces, there are links with the blues, foreshadowing certain episodes in *I speglarnas sal* (1951–2).

The latter work contains a number of features which Blomdahl had previously criticized, such as tone painting in the introduction and recitation with orchestra. Its vocal writing is particularly interesting (this was his first large vocal work), moving from pointillism to parody-jazz, from spoken choral passages to melodious solos. The 'neo-expressionist' style of this work did not prevent Blomdahl from continuing his musicianly and more traditionally polyphonic manner, as in the Chamber Concerto (1953) with its two playful movements, the first opening with a fugue. The ballet *Sisyphos* (1954) also has lively, effective music, such as the orgiastic final dance which, despite its schematic construction, shows the influence of *The Rite of Spring*.

Another ballet, *Minotauros* (1957), was preceded by the lyrically introvert Trio for clarinet, cello and piano (1955) and a second broadly built choral work, *Anabase* (1956), in which St John Perse's poetic technique is mirrored in detailed, mosaic-like music. Blomdahl's next major work was the 'space opera' *Aniara* (1957–8), his best-known composition. Sub-titled 'a revue on man in time and space', it treats, according to Blomdahl, 'the relationship between individual and group in respect to time'. The revue-like form brings abrupt changes of style, ranging over sacred choral music, jazz, ecstatic vocalise, lyrical intimacy and mime; the electronic episodes, the first examples of Swedish work in the medium, caused great excitement.

*Aniara* was followed by two orchestral compositions, *Fioriture* and *Forma ferritonans* (written for an iron company), of which the latter shows a move towards cluster technique in its development from a slow introduction to a dynamic climax. Then came a second opera, *Herr von Hancken* (1962–3), a reflection less on time than on a specific, psychologically curious destiny; it is a kind of chamber-musical tragedy in *buffo* form. Blomdahl's last work was the intense electronic sound-picture *Altisonans*, composed at the Stockholm Electronic Studio he had helped to establish. At his death he was working on another opera with electronic features, *Sagan om den stora datan* ('The Tale of the Big Computer').

Throughout his life Blomdahl was engaged in debate on Swedish musical life. Two questions concerned him particularly: the role of new music and the improvement of institutions. In spite of the pessimism into which he fell for long periods, his achievement, made through his vigorous willingness to take the initiative, has few equals in the history of Swedish music.

WORKS

DRAMATIC

Operas: Aniara (E. Lindegren, after H. Martinson), 1957–8, Stockholm, 1959; Herr von Hancken (Lindegren, after H. Bergman), 1962–3, Stockholm, 1965; Sagan om den stora datan [The Tale of the Big Computer] (after H. Alfvén), inc.

Ballets: Sisyphos (B. Åkesson, after Lindegren), 1954, Stockholm, 1957; Minotauros (Åkesson, K. Gundersen, after Lindegren), 1957, Stockholm, 1958; Spel för åtta [Game for Eight] (Åkesson), 1962, Stockholm, 1962

Incid music: Vaknatten (H. Åkerhielm), 1945

Film scores: Gycklarnas afton (I. Bergman), 1953; Så börjar livet (L. Nilsson), 1965

Radio scores: Agamemnons hemkomst (R. Enckell), 1949; Theseus (N. Kazantzakis), 1950; Hekube (Enckell), 1952; De trogna (J. Masefield), 1954; Mordet på Kiron (Enckell), 1958

BO WALLNER, HANS ÅSTRAND

**Blome** [Bloym] (*fl c*1430–60). English composer. His music suggests that he was a slightly younger contemporary of Dunstaple. Four settings of the Ordinary of the Mass survive, all as *unica*, in the 'English' fascicles of the Trent manuscripts (*I-TRmp*) (second stratum) and the Aosta manuscript (*I-AO*); Meyer-Eller (i, pp. 72–85) has proposed that several more works in *I-AO* may be by Blome. His music is usually sonorous, with interesting use of syncopation, but is at times rhythmically stiff and dissonant (although some passages are corrupt). Only *I-AO* calls him 'Blome', but he is probably the Richard Blome listed as an extra fifth clerk in the College of the Holy Trinity, Arundel, in 1455–6, and as Instructor of the Choristers there in 1458–9.

WORKS

Gloria, 3vv, *I-TRmp* 92 ('Bloymi' paired with Credo by scribe but related to it only in mode; no chant)

Credo, 3vv, *TRmp* 92; ed. in Meyer-Eller, ii, 77 (text shared between i and ii; no chant)

Sanctus, 3vv, *TRmp* 87; ed. in Meyer-Eller, ii, 90 (no chant)

Sanctus, 3vv, *AO*; ed. in Meyer-Eller, ii, 38 (Sarum Sanctus no.5 in iii, largely unornamented)

BRIAN TROWELL

**Blomstedt, Herbert (Thorson)** (*b* Springfield, MA, 11 July 1927). Swedish conductor. After early lessons in conducting at the Swedish Royal College of Music (1945–50) under Tor Mann, and in musicology at the University of Uppsala (1948–52) under Carl-Allan Moberg, Blomstedt studied contemporary music with John Cage at Darmstadt and Renaissance and Baroque performance practice at the Schola Cantorum in Basle. He subsequently studied conducting with Markevitch at the Salzburg Mozarteum (1950–55), with Jean Morel at the Juilliard School of Music (1953) and with Bernstein at Tanglewood (1953), winning the Koussevitzky Prize that year. He made his professional début with the Stockholm PO in 1954. Blomstedt has since held numerous musical directorships, including the Norrköping SO (1954–61), Oslo PO (1962–7), Danish RSO (1967–77), Dresden Staatskapelle (1975–85) and Swedish RSO (1977–83). In 1984 Blomstedt first appeared with the San Francisco SO, and a year later was appointed its music director, holding that position until 1995 and thereafter named conductor laureate. He significantly strengthened the musical and analytical rigour of the orchestra, and gave premières of works by Carter, Danielpour, Harbison, Perle and Wuorinen, winning Columbia University's Ditson Award for distinguished service to American music in 1992. He has remained a lifelong champion of Scandinavian composers, among them Bäck, Jørgensen, Lidholm, Norgärd, Nørholm and Pettersson. He is also an admired exponent of Bartók, Berwald (editing the *Sinfonie singulière* for Bärenreiter in 1965), Hindemith, Nielsen, Sibelius and Richard Strauss, and has recorded cycles of symphonies by Beethoven, Nielsen, Schubert and Sibelius. In 1996 Blomstedt was appointed music director of the NDR SO in Hamburg and in 1998 of the Leipzig Gewandhaus Orchestra. His conducting is distinguished by rhythmic clarity and control, structural insight and a powerful sense of drama. Blomstedt's years in San Francisco seem also to have induced a deeper warmth and a more eloquent sense of phrase in his music-making.

CHARLES BARBER

**Blondeau, Pierre** (*fl* Paris, 1st half of the 16th century). French lutenist. He was a singer at the Ste Chapelle in 1506, and in 1532 was paid as a music copyist for the royal chapel. Attaingnant printed a *Pavane Blondeau* and several pieces for lute in the same style signed 'P.B.' in *Dixhuit basses dances* (Paris, 1529/30; ed. in Société de musique d'autrefois, textes musicaux, ii, Neuilly, 1964). Possibly Blondeau served the printer in an editorial capacity. The 'Pierre Blondeau, maître joueur d'instruments', cited in a rent contract of 1550, and again as the father of children in baptismal records of 1551 and 1553, may be identifiable with the earlier one or his namesake.

DANIEL HEARTZ

**Blondeau, Pierre-Auguste-Louis** (*b* Paris, 15 Oct 1786; *d* Montargis, 14 April 1863). French viola player and composer. He studied the violin with Baillot and composition with Gossec and Méhul at the Paris Conservatoire and in 1808 won the Prix de Rome with his cantata *Marie Stuart*. His *Te Deum* in honour of Napoleon was played in Rome in 1810; his opera *Così si fa a' gelosi* was performed in Perugia in 1812 and a ballet *Almanzor* in Lisbon in 1814. He played the viola in the Paris Opéra orchestra from 1816 until 1842, devoting his remaining time to composition, theoretical writing and translation. His compositions include numerous sacred vocal works, chamber music and some orchestral pieces. His most important writings are his vivid account of his stay in Italy as one of the first Prix de Rome scholars and his *Histoire de la musique moderne* (1847); besides treatises on harmony and counterpoint, he wrote studies of Palestrina and Marcello, as well as poetry and translations. Neither as composer nor as teacher did Blondeau achieve celebrity in Paris. Blanchard referred to his 'misplaced knowledge' and the tendency of his music to modulate freely and frequently. As a memoirist, however, he is the equal of many of his literary contemporaries.

WORKS

*all printed works published in Paris*

STAGE

Così si fa a' gelosi (ob, 2), Perugia, 1812

Almanzor (ballet, ?3), Lisbon, 1814

HUGH MACDONALD

**Blondel, Jorge Urrutia.** *See* URRUTIA BLONDEL, JORGE.

**Blondel, Louis-Nicolas** (*fl* 2nd half of the 17th century). French composer and musician. He was a musician in the royal chapel in Paris. He published *Motets à deux, trois et quatre parties, avec la basse-continue, propres pour les concerts et pour toutes les dames religieuses* (Paris, 1671). The 12 pieces, of the *petit motet* type, have well-constructed melodic lines and interesting rhythms and are in a style free of the dance elements that influenced much French church music of the late 17th century. It has been suggested that these pieces may be by Simon Blondel, musician ordinary of the king also at that time. There is also an *air* for solo voice and continuo in *Recueil d'airs sérieux et à boire de différents auteurs* (Paris, 1702). Three untitled compositions ascribed to 'Mounsieur Blondill' appear at the end of a manuscript partbook (*GB-BEcr* TW 1172); they are in binary form, common time and D minor, and may be by Louis-Nicolas Blondel or by another composer named Blondill or Blondhill.

WILLIAM HAYS

**Blondel de Nesle** (*fl* 1180–1200). French trouvère. Although the legend recounting the part he supposedly played in freeing King Richard the Lionheart from captivity is traceable to manuscripts of the 13th century, it is accurate only with respect to period. The trouvère's identity is a matter for speculation. Because the poet is never named Messire or Monseignor in the manuscripts, he would seem to be at most a younger son of lesser nobility, and perhaps a commoner. On the other hand, it has also been suggested that he is identifiable with the powerful Jehan II de Nesle. *Quant je plus sui* and *Tant ai en chantant* are dedicated to Conon de Béthune, and therefore antedate 1200, while *A l'entree de la saison* is sent to Gace Brulé, another of the oldest generation of trouvères. On this basis, Blondel's date of birth may be estimated *c*1155–60. Features of dialect in the poems indicate that he was a native of Picardy, his home most likely being the town of Nesle in the département of Somme, lying between Péronne and Saint Quentin.

Works by Blondel are among the most widespread within the trouvère repertory, several surviving in ten or more manuscripts. *Quant je plus sui*, the model for four other chansons, is among the famous works quoted by Gilles de Vies Maisons (in R.1252 – other quotations being drawn from poems by Gace Brulé and the Chastelain de Couci). *Li plus se plaint* provided the model for three other chansons, and four or five other poems by Blondel were the subject of later imitations. Gautier de Coincy based four of his *Miracles de Nostre Dame* on *Amours dont sui espris*, *Bien doit chanter*, *Li plus se plaint* and *Quant je plus sui*. *Bien doit chanter* apparently also provided the basis for *Ich hôrte wol ein merlîkin singen* by Ulrich von Gutenberg. Blondel's name is coupled with those of the Chastelain de Couci and Tristan by Eustache Le Peintre de Reims, who (in R.2116) compared himself with these ideal representatives of the tradition of courtly love.

Blondel displayed a strong preference for isometric strophes, although a few of his poems have three different line lengths to the strophe, while one has five. In addition to the common heptasyllabic, octosyllabic and decasyllabic verses, there are others that are rare. *Puis qu'Amours* provides the only example of an isometric nonosyllabic poem in the repertory. *Amours dont sui espris* and *Ma joie me semont* comprise isometric hexasyllabic strophes, as do *De la plus douce amour*, whose authenticity has been questioned, and R.1163, a work of contested authorship that is attributed to Blondel only in an unreliable manuscript. *Amours dont sui espris* shares its form and melody with *Purgator criminum* and *Procurans odium*, while *Ma joie me semont* is similarly related to *Ver pacis aperit*, written for the coronation of Philippe II Auguste in 1179. Because the latter date is suspiciously early for Blondel, and because isometric hexasyllables constitute less than 3% of the trouvère repertory, these examples probably demonstrate the influence of conductus on secular song. (The temporal priority of *Ver pacis* has also been claimed on the basis of a supposed quotation from the antiphon *Unxerunt Salomonem*.)

Most of the original melodies to Blondel's poems are cast in bar form, although *Tant ain et veul et desir* is non-repetitive, and *Puis qu'Amours* has the structure *ABCDBEF*. More often than not there is some repetition, strict or varied, within the cauda. There is considerable variety to the modal constructions, and several of these vary according to different manuscript readings. Two readings of *J'ain par costume* place the final at an extraordinarily high point within the ambitus. The late setting of *Li plus se plaint* in *F-Pn* fr.24406 is unusual in that the melody begins an 11th above the final; the late setting of *Se savoient mon tourment* in *F-Pa* 5198 has an even more extended range of a 12th. Most melodies display a fairly strong sense of tonal centre, but *Coment que d'amours*, *De mon desir* and *Tant ai en chantant* raise the expectation of a final at the lower part of the ambitus, while ending at or above the centre. Portions of *Amours dont sui espris* are notated in 2nd mode in *F-Pn* fr.846, and one suspects that the rhythmic solution valid for *Ver pacis* is applicable also to *Ma joie me semont*. A late setting of *De la plus douce amour* in *F-Pn* fr.844 is in 1st mode with upbeat, the notation being fully mensural. Elements of regularity in the construction of other chansons are few, and these vary from the fairly simple *Se savoient mon tourment* to the much more florid *Cuers desirous apaie*.

THEODORE KARP

**Blondi** [Blondy, Blonde], **Michel** (*b* ?Paris, ?1676; *d* Paris, 6 Aug 1739). French dancer and choreographer. His dancing-master father, Antoine, married the sister of Pierre Beauchamp, with whom Michel is said to have studied. References before about 1728 to a Blondi as choreographer probably signify Antoine (*d* 20 July 1740), who survived his son. Michel was a dancer at the Paris Opéra from 1690 to 1729, when he became a *maître de ballet*, responsible for the disposition of dance in each opera produced. He held this post until his death. Nemeitz stated that he also directed entr'acte ballets at the Jesuit Collége Louis le Grand. He taught Marie-Anne Cupis de Camargo, Marie Sallé and, allegedly, Franz Hilverding van Wewen. Despite Noverre's claim that Blondi did not teach his students to read dance notation, as a member of the Académie Royale de Danse, Blondi signed a resolution condemning Pierre Rameau's notation system; he preferred the Beauchamp-Feuillet system, partly for its closer alliance with the music (*Mercure de France*, September 1732). He was admired for his expressive dancing and the variety in his choreographies: an examination of some of his colourful character dances suggests that he was inspired by their music.

SARAH McCLEAVE

**Blondie.** American rock group. Its key members, Deborah Harry (*b* Miami, 1 July 1945; vocals) and Christopher Stein (*b* New York, 5 Jan 1950; electric guitar), had been part of the artistic network centred on the CBGBs club in New York in the early 1970s and their first recordings, such as *Rip her to Shreds* (1977), were inspired by a post-Warhol sensibility. In 1978 Blondie was teamed with the producer Mike Chapman, whose previous productions included the British pop groups Mud and Smokie. His attention to detail brought international hits like *Sunday Girl* (1979), *Heart of Glass* (1979), *Atomic* (1980), *The Tide is High* (1980) and *Rapture* (1981), several of which were composed by Harry and Stein. Although Blondie is often described as part of the punk rock movement, the group's most successful music was more a highly skilled form of 'power pop', which featured Harry's deadpan soprano and Marilyn Monroe-like visual image, and Stein's pointed arrangements of quirky, lightweight songs.

The group was dissolved in 1983 and Harry subsequently pursued a career as a solo singer in collaboration with Stein as songwriter, bandleader and record producer. In 1999 the band reformed to release an album of new material called *No Exit*; the first single from the album, *Maria*, made number one in the UK.

DAVE LAING

**Blondy, Alpha** [Seydou Kone] (*b* Dimbokro, Côte d'Ivoire, 1 Jan 1953). West African singer. He is known for his performances of Afro-Reggae. He and his band Solar System sing in French, English, Arabic, Hebrew and Dioula. Unlike the lyrics of Jamaican reggae, Blondy's lyrics are primarily political; his songs often concern issues of freedom, unity and social revolution. His first single, *Brigadier Sabari*, documents his experience of being arrested in Abidjan in the 1980s and his subsequent mistreatment by the police. He received the Senghor prize for 'Best African Group' in 1986, and in the same year one of his most popular recordings, *Jerusalem*, was released; this recording and *Apartheid is Nazism* established his position as a leading European recording artist. After his successful tour of North America many regarded Blondy as the successor to Bob Marley.

GREGORY F. BARZ

**Blood, Sweat and Tears.** American jazz-rock group. Emanating from the late 1960s melting pot, they were one of the earliest bands to characterize the jazz-rock idiom. Formed in 1967 by Al Kooper (*b* 1944; vocals and keyboards), Steve Katz (*b* 1945; guitar) and Bobby Colomby (*b* 1944; drums), the group blended original composition with their own stylized arrangements of jazz, country, rock and rhythm and blues material. Jazz standards such as Billie Holiday's *God bless the child* and Herbie Hancock's *Maiden Voyage* sat beside versions of songs by Laura Nyro (*And When I Die*, *He's a runner*), Brenda Holloway (*You've made me so very happy*), Lennon and McCartney (*Got to get you into my life*) and Jagger and Richards (*Sympathy for the Devil*). Much of the original material framing these came from Katz and the band's second and longest serving singer, the Canadian David Clayton-Thomas, who joined for the second, best-selling and Grammy award-winning album *Blood, Sweat and Tears* (Col., 1968). Thomas is the writer of the much-covered 'Spinning Wheel' from this album, as well as the fiery 'Lucretia MacEvil' and 'Go Down Gamblin''.

Blood, Sweat and Tears produced arrangements enriched with jazz solos which in turn often signalled a change in tempo or feel, creating multi-sectioned pieces rather than just straightforward songs. 'Spinning Wheel' is a fine example of this, as is their version of Joe Cocker's 'Something's coming on' from *Blood, Sweat and Tears 3* (Col., 1970). Discussing the overall style of Blood, Sweat and Tears, Thomas said that the band took works from other genres and 'turned them over to Juilliard and Berkeley trained jazz arrangers and came up with this hybrid – this child of many worlds'.

These arrangers were largely the horn players. As a section, the horns underwent something of a revolution with Blood, Sweat and Tears. Following the simple homophonic stabs in the soul bands of James Brown and Otis Redding, theirs was like a big-band sound in miniature with jazzy, contrapuntal lines both backing the vocals and featuring as melodic interludes. From an ever-changing personnel, the members have included Randy Brecker (trumpet), Lew Soloff (trumpet) and Tom Malone (trombone), as well as the rhythm players Larry Willis (keyboards), Mike Stern (guitar) and Don Alias (percussion).

Diminished sales heralded the end of a nine-album partnership with Columbia in 1976. The band effectively split after *Brand New Day* (ABC, 1977), although Thomas has fronted Blood, Sweat and Tears intermittently since then.

GEORGE DOUBLE

**Bloom, Robert** (*b* Pittsburgh, 3 May 1908; *d* Cincinnati, 13 Feb 1994). American oboist. From the age of 19 he studied with the founder of the American school of oboe playing, Marcel Tabuteau, at the Curtis Institute, Philadelphia. In 1930 he received his first appointment as assistant principal, and later solo, english horn in the Philadelphia Orchestra under Leopold Stokowski. In 1946 he was invited as a founding member of the NBC SO, where for six years he played principal oboe under Toscanini. As a core member of the Bach Aria Group from its foundation by William Scheide in 1946 until 1980, Bloom played an important part in the revival of Baroque music in post-war America, and is remembered above all for his poised performances of Bach and tasteful ornamentation. Bloom was also eager to explore new oboe music; he played in an early US performance of Schoenberg's Wind Quintet and inspired numerous compositions, including Quincy Porter's Quintet for oboe and strings and *Winter's Past* by Wayne Barlow. He was awarded an honorary MMus from Yale University in 1971. Bloom composed a number of short works for oboe and taught at several of America's leading educational institutions, where his pupils included Bert Lucarelli, Ray Still and Allan Vogel. His wife Sara Lambert Bloom has edited a complete collection of Bloom's compositions and editions of oboe music, *The Robert Bloom Collection* (New Haven, 1998), and will soon re-release important recordings from his eventful career.

**Blow, John** (*b* Newark, Notts., bap. 23 Feb 1648/9; *d* Westminster, London, 1 Oct 1708). English composer, organist and teacher. By his mid-20s he had become the foremost musician in England, and in later years he was the elder statesman of the Restoration school, whose chief luminary was Henry Purcell.

1. Life. 2. Character and portraits. 3. Works.

1. LIFE. Blow's origins were humble. He was the second child of Henry and Katherine Blow, who were married at Newark in 1646. Burney and Hawkins both stated that he was born at North Collingham, Nottinghamshire, but

the parish registers there do not mention anyone named Blow, whereas those at Newark record the baptisms of Blow and of his brother and sister, the marriage of his parents, and the burial of his father; moreover, the register of Lambeth degrees notes that in 1677, on taking his doctorate, he himself declared on oath that his birthplace was 'the faithful borough of Newark'. It is likely that he was one of the six music scholars at the Magnus Song School, Newark, and he was among five boys from Newark and Lincoln whom Henry Cooke conscripted during winter 1660–61 into the choir of the Chapel Royal; there his contemporaries included Pelham Humfrey, Robert Smith (ii), Thomas Tudway, William Turner and Michael Wise. He showed early promise in composition: while he was still a chorister at least three of his anthems (*I will magnify thee*, *Lord, rebuke me not* and *Lord, thou hast been our refuge*) were in the chapel repertory, their texts being included in the second edition of James Clifford's *The Divine Services and Anthems*, printed in January 1664 (the music is lost). Also from this period is *I will always give thanks unto the Lord*, composed jointly by Humfrey, Blow and Turner and designated the 'Club Anthem' because, as Boyce explained, it was conceived 'as a memorial of their fraternal esteem and friendship'.

Late in 1664, when Blow's voice broke, he remained in the charge of Cooke. He presumably continued his musical studies under Christopher Gibbons, one of the chapel organists, and possibly also assisted John Hingeston, the royal instrument keeper (as Purcell was later to do). He also continued singing, though only informally: on 21 August 1667, at Samuel Pepys's home, he performed trios with two other former choristers, one of whom, Tom Edwards, was by now servant to Pepys; the latter admired their 'extraordinary skill', presumably in sight-reading, but not their adolescent voices, which, he observed, were so badly out of tune they 'would make a man mad'.

In December 1668 came Blow's first formal appointment, as organist of Westminster Abbey in succession to Albert Bryne. His first extant anthem of known date, *Oh Lord, I have sinned*, was written in 1670 for the funeral of the Duke of Albermarle (formerly General Monck). January 1669 brought his first post at court, as musician for the virginals, and in 1671 he served as a supernumerary organist when the Chapel Royal moved to Windsor for the summer. He was also increasingly prominent among musicians in the city: by 1672 he was an assistant of a guild, the Corporation of Music, becoming one of its annual wardens in 1673 and again in 1676. On 16 March 1673/4 he was sworn a Gentleman of the Chapel Royal in succession to Roger Hill. Further important appointments followed rapidly. In July 1674 he succeeded Humfrey, whose will he had witnessed three months earlier, both as Master of the Children of the Chapel and as composer-in-ordinary for voices in the Private Music; and in October 1676 he succeeded Christopher Gibbons as one of the three organists of the Chapel Royal. In September 1674 he married Elizabeth, daughter of Edward Braddock, Master of the Choristers of Westminster Abbey and a Gentleman, and subsequently also Clerk of the Cheque, of the Chapel Royal. They had five children, of which only the three daughters survived their father; of the sons, Henry, the first-born, died in infancy, and John, 'a youth of great Forwardness and extraordinary Hopes', died in 1693, aged 15. Elizabeth Blow died in childbirth in October 1683; Blow was then living in the Great Sanctuary at Westminster, where he continued paying rates until his death. He never remarried.

As Master of the Children of the Chapel, Blow exercised a powerful influence over several generations of budding musicians who were choristers there, including William Croft, Jeremiah Clarke (i), Daniel Purcell, Henry Hall (i), John Walter, Francis Pigott, James Hesletine, John Robinson, Vaughan Richardson and Bernard Gates. His duties, being domestic as well as musical, were onerous, but they did not sap his creative energies: during the 1670s he produced an impressive quantity of sacred music, including about 30 anthems (almost half of them elaborate examples with instrumental symphonies and ritornellos), several services, and nine Latin motets presumably intended for private devotional use. In December 1677 the first Lambeth degree of Doctor of Music was conferred upon him by the dean and chapter of Canterbury (the see being vacant), a signal recognition of his pre-eminence as a church musician. At Michaelmas 1679 he created a vacancy for the young Purcell by resigning as organist of Westminster Abbey. The two men shared a close professional relationship and, it appears, a lifelong friendship; in 1682 Purcell joined Blow as one of the three organists of the chapel (the third being William Child), and in 1684 the two of them successfully championed Father Smith in his 'battle of the organs' with Renatus Harris at the Temple Church.

Blow's output of church music continued to be substantial during the 1680s, but he was also increasingly involved in secular composition; he turned out at least one ode for the court, and sometimes two or three, nearly every year from 1678 onwards (and probably earlier), as well as occasional works for other events, including the Oxford Act on two occasions during the 1670s and St Cecilia's Day in 1684, while songs of his appeared in published collections from 1678 onwards. In addition to these manifold activities, he accepted a further position at court: from Michaelmas 1682 he shared with Nicholas Staggins, the Master of the King's Music, the somewhat nebulous and apparently unremunerated responsibilities of 'musician in ordinary for the composition and practise for the violins' (for which group Purcell was the officially designated composer). Blow also became involved with dramatic music; his masque *Venus and Adonis* was performed at court, probably in 1683, and in April that year he and Staggins applied for a royal licence 'for the erecting [?creating] an Academy or Opera of Musick, & performing or causing to be performed therein their Musicall compositions', though nothing more is heard of this project.

For the coronation of James II, in 1685, Blow provided three of the eight anthems, including *God spake sometime in visions*, a symphony anthem on the grandest scale. Four years later, when William and Mary were crowned, the music was generally less lavish, the largest of Blow's three contributions being the comparatively modest *The Lord God is a sun and a shield*. In 1687 he filled an unexpected vacancy, caused by the sudden death of Michael Wise, as Almoner and Master of the Choristers of St Paul's Cathedral. In this capacity he began by reconstituting the choir, disbanded since the Fire of London; once services began, initially in temporary accommodation but from 1697 in Wren's new cathedral, Blow's duties must have become heavier, but he continued

to discharge them until 1703, when he resigned in favour of Jeremiah Clarke, who was already organist. On Purcell's death (1695) Blow succeeded to his post (held jointly with Father Smith) of 'tuner of the regals, organs, virginals, flutes and recorders' to the court, and resumed his own former appointment as organist of Westminster Abbey. In 1700 a new post at court, that of Composer for the Chapel Royal, was established for him; he retained this and all his other royal appointments, and continued serving as Abbey organist, until his death.

During the years that followed the Revolution of 1688 Blow continued to meet many of the musical needs of the court, setting New Year odes and sharing with Staggins the chore of providing those for the birthday of William III, while the more congenial task of composing odes for Queen Mary's birthday fell to Purcell's lot. It was Blow, too, who provided the Chapel Royal, now largely neglected by Purcell in favour of theatrical commissions, with the bulk of its new repertory. He was also busy outside the court. He set the ode for the St Cecilia's Day celebrations in 1691, 1695 (together with a grandiose orchestrally-accompanied *Te Deum* and *Jubilate*, which emulates Purcell's celebrated setting) and 1700. Large-scale anthems with instruments, banned from the Chapel Royal in 1691 on account of the king's austere tastes, were still required elsewhere on special occasions, and Blow enjoyed three such opportunities, composing *I was glad* for the consecration of the chancel of St Paul's Cathedral in 1697; *Blessed is the man that feareth the Lord* for the Festival of the Sons of the Clergy a year later, when he was steward of the festival; and *O sing unto the Lord a new song, sing unto the Lord* for a charity concert held in 1701 in aid of relief and education for the poor. He also published numerous smaller pieces: he contributed to *Musick's Hand-Maid* (RISM 1689[7]), *The Harpsichord Master* and *A Choice Collection of Ayres for the Harpsichord* (both issued in London in 1700 and containing items by various of his pupils). In 1695 his *No, Lesbia, no* was one of the *Three Elegies Upon the Much Lamented Loss of our Late Most Gracious Queen Mary* (1695[9]) that he and Purcell issued as a joint tribute; *An Ode, on the Death of Mr Henry Purcell (Mark how the lark and linnet sing)*, Blow's setting of a fulsome text by Dryden, was published the following year. Two subsequent publications by Blow emulated posthumous issues of Purcell's music: *A Choice Collection of Lessons for the Harpsichord, Spinnet, &c* (1698) borrowed even its title from a Purcell anthology that had appeared two years earlier, while *Amphion Anglicus* (1700), a substantial volume of his solo songs, vocal chamber music, and numbers excerpted from odes, was published by subscription following the successful example of *Orpheus Britannicus*.

After 1700 Blow's output diminished sharply. He produced his last court ode probably in 1701, but he continued to provide new anthems for the Chapel Royal, most of them in the archaic full style. At the coronation of Queen Anne, in 1702, three of his anthems were sung; none is extant, but their surviving texts suggest that they were merely abbreviated adaptations of pieces composed in 1689 (the more martial portions, originally associated with William III, being excised). On his death Blow was buried in the north aisle of Westminster Abbey, close to Purcell's grave. In his will, made nine months previously, he had described himself as being already in failing health; after minor bequests to his servant, sister and niece, he left the residue of his estate to his three surviving daughters. During the reigns of Charles II and James II, Blow, like all the royal musicians, had received his salary and allowances only late and irregularly, but his diligent book-keeping must eventually have borne fruit, for at his death he had investments in eight leases at Westminster and owned a substantial country property at Hampton.

2. Character and portraits. Hawkins, who was personally acquainted with some of Blow's later pupils, described him as 'a very handsome man in his person, and remarkable for a gravity and decency in his deportment . . . a man of blameless morals and of a benevolent temper, but . . . not . . . totally free from the imputation of pride'. As for likenesses, the frontispiece of *Amphion Anglicus* (see illustration) is a fine engraving from life by R. White, and three other reputed portraits have survived. A half-length by John Riley, now in the possession of the family of Detmar Blow (reproduced in *Grove3* and *Grove4*, when it was thought to be by Lely), certainly depicts Blow; a small head, attributed to Lely (formerly at *GB-T*), is more doubtful; whilst a head and shoulders attributed to Closterman, belonging in turn to W.H. Cummings and A.H. Mann but untraced after its subsequent sale at Sotheby's, bears scant resemblance to the White engraving (see portrait supplement to *MT*, xlix, 1908). The frontispiece to *Amphion Anglicus* includes a coat of arms, seemingly appropriated from the family of Bloywe; it is displayed also on Blow's monument in Westminster Abbey (to which it seems to have been belatedly added some time after 1723), together with an epitaph concluding: 'His own Musical Compositions,

*John Blow: engraving by Robert White from 'Amphion Anglicus' (London: Pearson, 1700)*

(Especially his Church Musick) are a far nobler Monument to his Memory, than any other can be rais'd for Him'.

3. WORKS. Blow himself declared that he valued his sacred music above his other output, a judgment endorsed by posterity; within this field his symphony anthems, composed for the Chapel Royal and scored for violin consort (two with additional woodwind), are of exceptional interest. If the earliest among them are indebted to Humfrey, later examples are restlessly exploratory, both in structure and also in the concertante treatment of the instruments. Though sometimes uneven, they form a body of work scarcely inferior to, and much less stereotyped than, the symphony anthems of Purcell, a comparison that discloses persistent mutual influence. In the finest of them, such as *Blessed is the man that hath not walked*, *I said in the cutting off of my days* and *Sing unto the Lord, O ye saints*, freshly inventive instrumental movements, expressive solos, close-knit ensembles and sonorous choruses unfold in lucid and satisfying patterns, and it is unfortunate that their scoring denies them regular liturgical performance (although one or two, shorn of their instrumental passages, remained in the cathedral repertory long after Blow's death). The verse anthems without instruments are mostly less striking, though they range widely in style, with solo writing of limpid simplicity in early examples such as *Turn thee unto me* (a work that Burney singled out to lambast for its supposed grammatical solecisms), arresting declamatory passages in *The Lord, even the most mighty God, hath spoken* and other anthems of the 1680s, and extravagant, sometimes vapid coloratura in later pieces such as *Bring unto the Lord, O ye mighty*; the choruses, mostly short and homophonic, are much less varied.

During the 1670s Blow also cultivated the old full anthem, creating webs of sonorous polyphony laced with resolute harmonic clashes, as in the brooding *O Lord God of my salvation*; the equally sombre five-part *O God, wherefore art thou absent* and the more brilliant *God is our hope and strength*, in eight parts, served as immediate models for two of Purcell's pieces in the same style, *O God, thou hast cast us out* and *O Lord God of hosts*. All these works include contrasting but still essentially polyphonic passages for verse ensemble. Blow returned to this genre towards the end of his life: *My God, my God, look upon me* (1697), a modest four-part anthem, ushered in a group of 14 further examples, which recall, sometimes vividly, their Jacobean and Caroline precursors. The full-anthem style is successfully combined with the techniques of the Chapel Royal symphony anthem in Blow's occasional anthems with orchestra. The first of these, *God spake sometime in visions*, scored for eight-part choir and strings, is a work of compelling grandeur and expressive power. In the flamboyant *I was glad* the orchestra includes trumpets, which enrich the choruses and add brilliant obbligato parts to one solo. *Blessed is the man that feareth the Lord* again includes a trumpet air but also, unusually in such a work, extended antiphonal exchanges among contrasting verse ensembles and the full choir. In *O sing unto the Lord a new song, sing unto the Lord*, a fine piece in which statuesque choruses alternate with elaborate solos, an almost Handelian amplitude of gesture vividly illustrates how far Blow's musical language had evolved since his first adult anthems.

Blow was, for his period, an unusually prolific composer of services, although these are inferior to his anthems. His early settings, those selected by Boyce, are broadly syllabic and eschew text repetition after the manner of the short service, but exploit contrasts between the full choir and frequently regrouped upper and lower verse ensembles. The G major setting, though uneven, is the most notable. Bizarrely compendious, it includes all the main and alternative canticles except the *Benedicite*, a further setting of the *Magnificat* and *Nunc dimittis* in verse style, alternative common-time settings of the ante-Communion music, and the entire Communion service recomposed in triple time; nearly all these 19 movements share one head-motif. Despite its individuality, the work reveals Blow's familiarity with settings by his polyphonic forebears, especially in its array of ingenious canons (which are entirely absent from the E minor service); it was perhaps inspired by Child's Sharp Service, and served in its turn as the immediate model for Purcell's Service in B flat. The C major service, apparently a later composition, is less severe in style, encompassing florid passages. His morning and evening services for full choir, apparently associated with the full anthems of his late years and matching their austerity, are the last descendants of the Tudor and Jacobean short service (one example of which, that in G minor by Nathaniel Patrick, he painstakingly transcribed in score).

In the mid-1670s Blow composed nine sacred pieces to Latin texts; they are quite different from his anthems, being far more italianate, but no specific models have been identified. Their circulation in his lifetime was limited, and their context and purpose remain unknown. Seven of them are unremarkable duets with continuo accompaniment, four employing a ground bass. Two, however, both for five voices, are justly celebrated: *Gloria Patri, qui creavit nos*, an effective display of rhythmical declamation within contrapuntal textures, and *Salvator mundi*, an eloquent essay in the use of bold dissonance and pathetic chromaticism.

Although Blow's secular output represents a substantial achievement, only isolated works match the quality of his best sacred music. One such example is the subtly proportioned and tenderly lyrical *Awake, awake, my lyre*, a short ode written for the Oxford Act in the mid-1670s. It is very different from Blow's court odes, the earliest of which, composed in the late 1670s for New Year and for the king's birthday, are comparatively slight works. Building on foundations laid by Humfrey, they soon grow more complex in structure and more varied in style, but they contain little or none of the elaborate concerted writing that was already prominent in Blow's symphony anthems. In 1680, however, the commencement of Purcell's parallel series of court odes stimulated Blow to greater enterprise, resulting in a constant reciprocal traffic and a friendly rivalry in the music of the two men; it was Blow who, between 1681 and 1683, was first to introduce into the court ode a ground bass, a symphony in dancing compound time, and a solo for 'that stupendious Base' John Gostling. All these features are found in his 1684 Cecilian ode *Begin the song*, which in invention and craftsmanship outshines any of his court odes, although those composed later in the 1680s contain rich concerted writing as well as shapely instrumental movements, and show increasing concern with structural integration. After 1690 only a few of Blow's court odes survive intact, but

his rivalry with Purcell persisted in other works: his 1691 Cecilian ode *The glorious day is come*, for instance, while emulating such works as Purcell's *Dioclesian* by employing brass and woodwind as well as strings, is the first English score with a notated kettledrum part. Blow's late odes include novelties of style as well as instrumentation, for example urbane italianate airs in slow triple metre and massive common-time contrapuntal choruses.

Blow's only dramatic work, *Venus and Adonis*, is another composition for the court, two of whose members (a former mistress of the king, and their natural daughter) were cast in leading roles. For these reasons, and because it gives prominence to picturesque dance numbers, Blow termed it a masque, though it is in all essentials a miniature all-sung opera, mingling elements inherited from Jacobean and Caroline court entertainments with others borrowed from France and Italy in a masterly and highly original synthesis. It exercised a seminal influence on Purcell's *Dido and Aeneas*, but Blow, regrettably, wrote nothing more for the stage save a few songs for inclusion in plays.

Blow composed well over 100 secular songs, duets and trios. Most of them were included in the published songbooks of the period, and almost a third reappeared in *Amphion Anglicus* (1700/*R*). Their style – lyrical, declamatory, florid, suave, vivacious, pathetic and dramatic – is as diverse as their quality. Simple minuet songs, for instance, may be as fresh as *It is not that I love you less* (*The Self-Banish'd*) or as insipid as *Why does my Laura shun me?* (*The Grove*), and duets as vigorous as the celebrated *Go, perjur'd man* or as contrived as its companion piece *Go, perjur'd maid*; and while the finest examples are the equal of anything in the period, in weaker ones the phrase structure lacks discipline and the tonal planning is often wayward. The two most ambitious of them are both elegies. *No, Lesbia, no*, on the death of Queen Mary, employs related ground basses in three of its four movements, but their treatment lacks rigour; though expressive, it is overshadowed by Purcell's two elegies for the Queen, with which it was published. The heartfelt *Mark how the lark and linnet sing* (*An Ode on the Death of Mr Henry Purcell*), for two countertenors and two recorders, eschews ostinato basses in favour of sustained and finely crafted counterpoint. Blow's 17 devotional songs are, as a group, no match for those of Purcell, but such examples as the solo *O that mine eyes would melt into a flood* and the dialogue *How art thou fall'n from heav'n, O Lucifer* combine sensitive declamatory writing with vivid musical imagery.

Blow showed little interest in instrumental chamber music. His solitary trio sonata, in A major, is thematically related to a symphony anthem in the same key, *The Lord is my shepherd*; though an early piece, it is notably italianate, lacking the Englishries of Purcell's sonatas. The Ground in G minor is conventional, but the powerful and inventive 'Chacone' in G relies less on ostinato technique than on the cumulative effect of increasing rhythmic activity. A keyboard version of the latter piece, in F, also survives. Blow's other harpsichord music, only about a quarter of which was published in his lifetime, comprises 12 suites, the same number of grounds (among them a fine technical showpiece in E minor), several independent preludes, and numerous single dance movements including effective arrangements of numbers from *Venus and Adonis*. Blow's output of organ music is the most substantial of his period. Most of it is thoughtful and polyphonic, florid passage-work being carefully controlled (as in the Double Verse in G, for example), and even the lighter pieces are dignified in tone. Archaisms and novelties are curiously mingled: several pieces contain strong Mixolydian inflections, but in one (a voluntary in A) these flank an arresting Neapolitan progression; the cornet voluntaries are among the earliest English examples of their type, yet elsewhere there are extended borrowings, only lightly reworked, from Frescobaldi. Blow's lifelong interest in the work of continental composers is further illustrated by transcriptions that he made in the 1670s of vocal chamber music by several Italian composers, of motets by Henry Dumont in the 1680s, and of organ pieces by Froberger, Reutter (i) and J.C. Fischer not long before his death.

A short manuscript treatise on continuo playing, which Blow presumably wrote in his capacity as a teacher, deals helpfully with keyboard realization, though not with the theorbo, on which the Chapel Royal choristers learnt figured bass. What purports to be another treatise of his, entitled *Dr Blow's Rules for Composition* (*Lbl* Add.30933), is merely a corrupt copy, made by an unknown hand, of John Coprario's *Rules How to Compose* (?before 1617).

In view of Blow's eminence as a composition teacher, Burney's vitriolic tirades about his musical language make ironic reading, particularly since his target was not Blow's occasional idiosyncracies but merely some of the stylistic commonplaces of his period. The diatribe sheds more light on its author than on its victim, and it did Blow's reputation little damage at the time, although it may long have discouraged systematic study of his music. During his lifetime his renown approached that of Purcell, despite the limelight in which the younger man basked as a successful theatrical composer. Even though Purcell's superior genius was widely recognized, Henry Sacheverell saluted him and Blow jointly ('Hail, mighty Pair! Of Jubal's art / The greatest glory'), while their fellow composer Henry Hall framed a similar sentiment with an unexpected emphasis ('Only Purcell e're shall equal Blow'). A balanced appraisal must acknowledge technical flaws in some of Blow's music: imperfect control of texture, aimlessness of melodic line in places, and occasional indecisiveness in harmonic and tonal planning – though these defects are usually local. A more general shortcoming is the unevenness of invention that mars even some of his finest scores. But his music, much of it steeped in the English polyphonic tradition, remains strongly individual and inventive; his ideas are mostly effective and sometimes truly memorable, and their working out, often searching, is at best thoroughly satisfying. His position as the most important composer among Purcell's contemporaries is unquestionable; his true stature approaches that of Purcell himself more closely than has generally been acknowledged.

BRUCE WOOD

**Bloym.** *See* BLOME.

**Bluebeat.** *See* SKA.

**Bluegrass music.** A style of American country music that grew in the 1940s from the music of Bill Monroe and his group, the Blue Grass Boys. It combines elements of dance, home entertainment and religious folk music of the rural South-east. A bluegrass band typically consists of four to seven individuals who sing and accompany themselves on acoustic string instruments: two rhythm instruments (guitar and double bass) and several melody instruments (fiddle, five-string banjo, mandolin, steel guitar and second guitar). Lead instrumentalists take solo breaks between verses of a song and provide a harmonic and rhythmic background often in a responsorial relationship to the vocal part. Instrumental works have alternating solos as in jazz. Notable performers who have initiated bluegrass instrumental techniques are Earl Scruggs (banjo) and Monroe (mandolin). The vocal range of bluegrass music is higher than most country music singing, often reaching *c″*. In vocal duets the second (tenor) part lies above the melody, trios include a baritone part below the melody, and in religious songs a fourth (bass) part is added. Usually these parts are harmonic, but in duets particularly they provide vocal counterpoint. The music is mostly in duple meter with emphasis on the offbeats. Tempos are generally fast: an average slow song has 160 crotchets per minute, a fast one 330.

The bluegrass repertory includes traditional folksongs but is dominated by newly composed music, including sentimentally reminiscent secular songs, religious spirituals, revival hymns and instrumental numbers. Phonograph records have always been important for disseminating the repertory and style. In the 1940s most groups played on the radio and toured rural communities in the South. During the 1950s they appeared on television and in 'hillbilly bars' in the urban North-east. In the 1960s the folksong revival opened up college concert halls, coffee houses and folk festivals to bluegrass performers, and in 1965 Carlton Haney established the First Annual Blue Grass Festival in Fincastle, Virginia, the prototype for many such yearly events nationwide. During the 1970s and 80s bluegrass music included many styles, from 'traditional bands', such as the Johnson Mountain Boys and Larry Sparks and the Lonesome Ramblers, performing the 1945–55 repertory, to 'progressive' and 'newgrass' groups, such as the Seldom Scene and New Grass Revival, that combine rock songs and techniques with bluegrass instrumentation and performing style. In the 1990s bluegrass changed significantly with the emergence of women like Alison Krauss and Laurie Lewis as featured vocalists, instrumentalists and bandleaders. Meanwhile the repertories and styles of the leading performers now tend toward an eclectic mix of traditional and progressive elements.

NEIL V. ROSENBERG

**Blue note (i).** A concept used by jazz critics and musicians from the early decades of the 20th century onwards in black American music, notably in BLUES and JAZZ, to characterize pitch values perceived as deviating from the western diatonic scale.

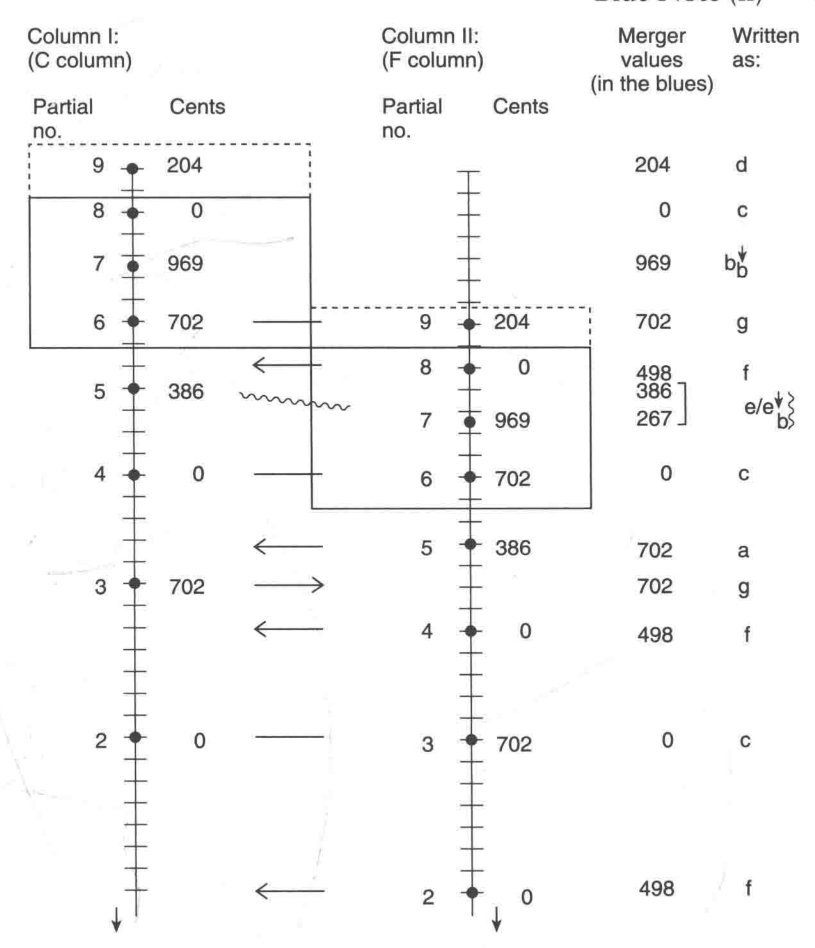
1. Definitions. 2. Origins. 3. Global diffusion.

1. DEFINITIONS. It was already observed in the 1920s that blues and jazz singers, as well as instrumentalists tend to present the 3rd and 7th, sometimes also the 5th degree in a diatonic framework by pitch values a semitone lower, often with microtonal fluctuations. From this observation musicologists have tried to construct 'blues scales'. The earliest proposition was that blues singers were using minor-3rd intonations or 'blue 7ths' such as E♭ and B♭ respectively over a C major triad. Although its origin is unknown, by 1925 the term 'blue note' was established in the literature (Niles, 1925–6). It is significant, however, that 'downhome' blues musicians do not use it, unless influenced by jazz critics. Generally, blues singers in the Deep South speak of 'worrying' or 'bending' the notes. Against the background of a strong central tonality, blues singers develop themes and melodic variations largely independently of the guitar chords used in the accompaniment. The intonation, often with glides and considerable melisma, sometimes deviates by microtonal values from the standard tunings of the guitar or

the piano. Jessie Mae Hemphill, for example, is known for a pronounced melismatic style.

From a western viewpoint, blue notes have been described in terms such as 'deviations', 'inflections' and 'lowering', taking the western tonal system as a yardstick. In search of underlying ideas, musicologists have systematized some of these deviations, proposing 'blues scales' with ever-increasing numbers of notes, from eight tones to fifteen (Titon, 1977, 2/1994, p.153) within the octave. More recently this approach has been challenged (Evans, 1982, p.24). By the mid-1970s, Titon (op. cit., p.154) had already proposed 'E', 'G' and 'B' complexes , leading to his 'Downhome blues scale'. Evans (op. cit., p.24) suggested that blues musicians proceed from an awareness of 'flexible pitch areas'. Tonemic analysis of blues singers' concepts and behaviour, in which all possible intonations together constitute the same toneme, has reconciled present-day ethnomusicological views with statements by blues singers (Kubik, 1999). If blue notes are considered intra-systemic as part of a non-western tonal system, they vanish as separate entities and become those points where the deviations between western and non-western systems of pitch are greatest.

2. ORIGINS. Explanations of the blue note as originating 'from the American slaves' difficulties in adapting West African pentatonicism (lacking the 3rd and 7th degrees) to European diatonicism' (*Grove6*) have been universally disproved. Research has shown that no degrees were lacking (Waterman, 1952 and Kubik, 1996) and, since Paul Oliver's findings (1970), it has been generally accepted that the cultural genealogy of African-American music in North America – in contrast to that of the Caribbean – points predominantly to the savanna and sahel zone of West Africa, rather than the coast. While blues is most certainly an African and American late 19th-century development with no single link to any specific African musical genre, a majority of the blues' traits can be firmly traced to areas in West Africa that represent a contact zone between an ancient sub-Saharan culture world of agriculturalists and an Arabic-Islamic culture world that became effective from *c*700 CE on. Many traits in the tonal world of blues can be better understood as a thoroughly processed and transformed Arabic-Islamic stylistic component. For historical reasons and from the performing practice of 'downhome' blues, the theory of an equiheptatonic origin of the blue note (Jones, 1951, pp.9–10, Dauer, 1955, pp.v, 6, and Dauer 1958, p.78) can also be discarded. In an equiheptatonic system the 3rds are 'neutral', neither major nor minor. A memory of such tonal systems, as found in the tunings of *balo* xylophones in Guinea and those of the Asena of the Lower Zambezi valley, lingers on in North America, but not in 'downhome' blues. If it had continued in the blues, then blues singers would regularly intonate the upper blue note between B♭ and B♮; they tend, however, to flatten the B♭ rather than sharpen it. In addition, very few blues are heptatonic, which also invalidates theories considering the blue note as 'neutral 3rds'. Some authors have linked blue notes to a 'neutral mode' in Anglo-American folk music of the Appalachian mountains, with a possible Scottish and Irish background (Buchanan, 1940, p.79). One of the most prominent theories encountered in the literature (for a summary see Mecklenburg and Scheck, 1963) was that blue notes could be explained by the superposition of an (African) pentatonic scale over a heptatonic (European) framework of chords.



As it now stands, the origin of the blues tonal system (see illustration), is more complex, connected with the structure of various penta- to hexatonic systems across the west-central Sudanic belt and possibly northern Mozambique. Benjamine V. Boone (1994) and Gerhard Kubik (1999) have both suggested that the tonal system behind the blues derives from pitch patterns ultimately rooted in the formants of speech as articulated by speakers of certain West African languages. The most recent theory about the nature and origin of the tonal system behind the blues (Kubik, 1999) postulates that its salient pitch values result from a merger of a common west-central Sudanic pentatonic pattern extrapolating partials 4 to 9 with its own transposition a 5th down or a 4th up, as if the same melody were articulated first by a woman and then a man.

3. GLOBAL DIFFUSION. Reinterpretation of the blue note within the western tonal system has become a prominent feature of most western popular music, as well as some art-composed music, such as in that of Gershwin. Jazz harmony has largely placed the concept of blue notes within its own western-oriented theoretical framework. Brothers (1994) and Kubik (1999) have suggested that jazz harmonic practice, however, was predominantly non-Western in its underlying structures and concepts. Although the idea of equidistance, prominent in one set of African tonal systems (as in the equiheptatonic system described above), was not generative in the development of the blues' tonal system, it resurges as a shadowy structure in bebop, as evidenced by common descending progressions of some chord clusters in narrow intervals. Bebop harmony has incorporated elements of blues tonality as well as structural elements of harmonic parallelism in narrow intervals inherited from equiheptatonic African tunings. It was developed by Charlie Parker, Dizzy Gillespie, Thelonious Monk and others from a background different from that of western composers such as Schoenberg and Hindemith, with whose harmonic devices bebop harmony can only be superficially compared. As in the blues, pitch perception by musicians in bebop is also heavily entrenched in the concept of pitch areas within an essentially heptatonic framework that is 'elastic' with frequent tendencies towards equidistance. It is the pitch area concept inherited from the blues and ultimately from African traditions that steered developments in jazz during the 1940s in the direction of 'altered' and 'substitute' chords.

Thus, a non-Western analysis of the characteristic pitch-values prevalent in blues and jazz, described as 'blue notes' in the literature, leads to an assessment of this music's historical, audio-psychological and aesthetic characteristics, with results that diverge sharply from those obtained by any approach based on classical European music theory.

GERHARD KUBIK

**Blue Note (ii).** American record company. It was established in New York in 1939 by Alfred Lion, to record jazz; its earliest sessions produced records now acknowledged as classics, by such musicians as Sidney Bechet, Earl Hines, Albert Ammons and Meade 'Lux' Lewis. In the 1940s the company established an important catalogue of traditional jazz and swing, including recordings by James P. Johnson, Art Hodes and Sidney Bechet; Blue Note was among the earliest to record bop musicians, notably items by Thelonious Monk.

In the LP era the company concentrated on styles that were then contemporary, with a close involvement with soul jazz and hard bop, represented by, among others, Horace Silver, Art Blakey, Lee Morgan, Jimmy Smith and Ike Quebec. In 1963 Blue Note was purchased by Liberty; musicians recording for the company included Herbie Hancock and Wayne Shorter. Blue Note then began recording jazz-rock and more commercially orientated music; Donald Byrd's album *Black Byrd* (*c*1972) became the company's best-selling album. In 1975 systematic reissue began of the back catalogue, and from the 1980s reissues appeared on Mosaic.

The connection with Liberty meant that Blue Note records were distributed by EMI. In 1979 EMI purchased Liberty, thus acquiring Blue Note; control passed in 1985 to Manhattan, a subsidiary of Capitol. In addition to a reissue scheme, the company began making new recordings again, including items by younger musicians as well as albums by established musicians, among them McCoy Tyner, Jackie McLean and Freddie Hubbard.

In 1989 EMI discontinued Manhattan and Blue Note became the umbrella company under which EMI's jazz activities were organized; in 1991 Manhattan was revived for releases in smooth jazz and pop-jazz styles. In 1993 Blue Note achieved its highest sales for a single disc when it crossed over from jazz into pop with the CD *Hands on Torch* by the acid-jazz group Us3, which used ostinatos from classic Blue Note sessions as a basis for a session of hip-hop dance music. In April 1997 the company was the subject of a documentary television show, 'Blue Note: a Story of Modern Jazz'.

**Blues.** A secular, predominantly black American folk music of the 20th century, which has a history and evolution separate from, but sometimes related to, that of jazz. From obscure and largely undocumented rural American origins, it became the most extensively recorded of all traditional music types. It has been subject to social changes that have affected its character. Since the early 1960s blues has been the most important single influence on the development of Western popular music (*see* POPULAR MUSIC; POP).

1. Definition. 2. Origins. 3. The 1920s: first recordings. 4. Piano blues and the northern migration. 5. 1930s blues. 6. Urban blues. 7. Postwar blues. 8. Blues and the white audience. 9. Conclusion.

1. DEFINITION. The most important extra-musical meaning of 'blues' refers to a state of mind. Since the 16th century 'the blue devils' has meant a condition of melancholy or depression. But 'the blues' did not enter popular American usage until after the Civil War; and as a description of music that expressed such a mental state among the black population it may not have gained currency until after 1900. The two meanings are closely related in the history of the blues as music, and it is generally understood that a blues performer sings or plays to rid himself of 'the blues'. This is so important to blues musicians that many maintain one cannot play the music unless one has 'a blue feeling' or 'feels blue'. Indeed, the blues was considered a perpetual presence in the lives of black Americans and was frequently personified in their music as 'Mister Blues'. It follows that 'blues' can also mean a way of performing. Many jazz players of all schools have held that a musician's ability to play blues expressively is a measure of his quality. Within blues as folk music this ability is the essence of the art; a singer or performer who does not express 'blues' feeling is not a 'bluesman'. Certain qualities of timbre sometimes employing rasp or growl techniques are associated with this manner of expression; the timbre as well as the flattened and 'shaded' notes (produced by microtonal deviations from standard temperament; *see* BLUE NOTE) so distinctive to the blues can be simulated, but blues feeling cannot, so its exponents contend.

As the blues was created largely by musicians who had little education and scarcely any of whom could read music, improvisation, both verbal and musical, was an essential part of it, though not to the extent that it was in jazz. To facilitate improvisation a number of patterns evolved, of which the most familiar is the 12-bar blues (*see* BLUES PROGRESSION). Apparently this form crystallized in the first decade of the 20th century as a three-line stanza in which the second line repeated the first, thus enabling the blues singer to improvise a third, rhyming line while singing the second:

> I'm troubled in mind, baby, feelin' blue and sad.
> I'm troubled in mind, baby, feelin' blue and sad.
> The blues ain't nothin' but a good man feelin' bad.

This structure was supported by a fixed harmonic progression, which all blues performers knew: it consists of four bars on the tonic, of which two might accompany singing and the fourth might introduce a flattened seventh; two bars on the subdominant, usually accompanying singing, followed by two further bars on the tonic; two bars on the dominant seventh, accompanying the rhyming line of the vocal part; and two concluding bars on the tonic. Such a progression could be played in any key, though blues guitarists favoured E or A and jazz musicians B♭. Many variants exist, but this pattern is so widely known that 'playing the blues' generally presupposes the use of it.

The term 'blues' is also used to identify a composition that uses blues harmonic and phrase structure but which is intended to be performed as written, such as *Dallas Blues* (1912) by Hart Wand and Lloyd Garrett, among the first to publish the form, or *St Louis Blues* (1914) by W.C. Handy. There are numerous compositions that are in no way related to blues but that bear the name, among them *Limehouse Blues* (1924) by Douglas Furber and Philip Braham. Published compositions in blues form, while at first bringing a new sound to a larger audience, contributed much to the confusion about the nature of blues as folk music, and helped to link the term with jazz. This association with jazz retarded blues research and the independent consideration of its origins, traditions, forms and exponents. Only since 1960 has it been extensively discussed in its own right.

2. ORIGINS. In its early years the blues was wholly African American. It has been suggested that it existed before the Civil War, but this view has no supporting evidence. Influential in its development were the collective unaccompanied work-songs of the plantation culture, which followed a responsorial 'leader-and-chorus' form that can be traced not only to pre-Civil War origins but to African sources. Responsorial work-songs diminished when the plantations were broken up, but persisted in the southern penitentiary farms until the 1950s. After the Reconstruction era black workers either engaged in seasonal collective labour in the South or tended smallholdings leased to them under the system of debt-serfdom known as sharecropping. Work-songs therefore increasingly took the form of solo calls or 'hollers', comparatively free in form but close to blues in feeling. The vocal style of the blues probably derived from the holler (*see* FIELD HOLLER).

Blues instrumental style shows tenuous links with African music. Drumming was forbidden on slave plantations, but the playing of string instruments was often permitted and even encouraged, so the musicians among slaves from the savanna regions, with their strong traditions of string playing, predominated. The *jelli*, or *griots* – professional musicians who also acted as their tribe's historians and social commentators – performed roles not unlike those of the later blues singers, while the banjo is thought to be a direct descendant of their *banza* or *xalam*.

In the 1890s the post-Reconstruction bitterness of southern white Americans towards the black community hardened into segregation laws; this in a sense forced the latter to recognize their own identity, and a flowering of black sacred and secular music followed. Ballads in traditional British form extolling the exploits of black heroes (e.g. *John Henry*, *John Hardy*, *Po' Lazarus* and *Duncan and Brady*) were part of this musical expansion, and blues emerged from the combination of freely expressive hollers with the music of these ballads. Few blues were noted by early 20th-century collectors, but those collected frequently had a four-line or rhyming-couplet form. Some of the ballads popular among black singers, for example *Railroad Bill*, *Frankie and Albert*, *Duncan and Brady* and *Stack O'Lee*, had a single couplet with a rhyming third line as a refrain. In blues the 'couplet' consisted of one repeated line; *See, See Rider*, *Joe Turner Blues* and *Hesitating Blues* were among the earliest songs of this type.

At first the blues was probably only a new song form in the repertory of the black songster (*see* SONGSTER )(ii), the titles providing a theme for a loose arrangement of verses (e.g. *Florida Blues*, *Atlanta Blues* and *Railroad Blues*). Many songsters and early blues singers in the South worked in medicine shows, street entertainments promoted by vendors of patent medicines. Their travels helped to spread the blues, as did those of wandering singers who sang and played for a living. They followed the example of the street evangelists who at that time were popularizing gospel songs. Preferring the guitar to the banjo as an accompanying instrument, the songsters represent a link between the older black song tradition and the blues. By the 1920s the blues singer, who sang and played only blues, began to replace the songster.

Blues songs had no fixed number of stanzas, and the inevitable return to the tonic after the stanza's third line gave shape to long improvisations. The ballad singers had concentrated on the exploits of legendary black heroes, but blues singers sang of themselves and those who shared their experiences. Many stanzas rapidly became traditional and certain images or lines entered the stock-in-trade of every blues singer. But the inventive singer expressed his anxieties, frustrations, hopes or resignation through his songs. Some blues described disasters or personal accidents; themes of crime, prostitution, gambling, alcohol and imprisonment are prominent in early examples and have persisted ever since. Some blues are tender but few reveal a response to nature; far more express a desire to move or escape by train or road to an imagined better land. Many are aggressively sexual, and there is much that is consciously and subconsciously symbolic of frustration and oppression.

3. THE 1920S: FIRST RECORDINGS. The earliest forms of blues were not the first to be recorded. Mamie Smith's recording of *Crazy Blues* (OK/Phonola) in August 1920 brought a popularized form to a large audience; Smith was a stage performer, and her blues, accompanied by a jazz band, were sung in vaudeville fashion. They set the pattern for numerous recordings by Edith Wilson, Sara Martin, Clara Smith and many other black singers, most of whom were professional entertainers working with touring shows on theatrical circuits such as the Keith-Orpheum, or the circuit of the Theater Owners Booking Agency, which managed African-American artists. Among them were singers whose songs were blues in name only; but others had a deep feeling for the new idiom, including Lottie Beamon from Kansas City, Missouri, and Ma Rainey from Athens, Georgia (fig.1), both stocky women with powerful voices, as well as Ida Cox from Knoxville, Tennessee, who was much admired for her nasal intonation. But the 'Empress of the Blues', as she came to be called, was Bessie Smith from Chattanooga, whose majestic recordings set a standard that few could emulate.

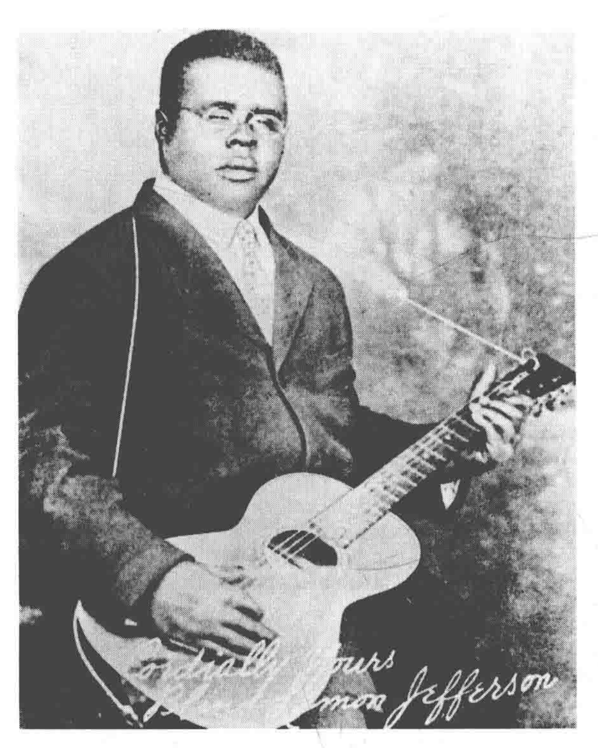
Many of these so-called classic blues singers came from the South or from border states and had heard rural singers whose blues they borrowed. Published blues, which had been available for some years, were performed with jazz-band accompaniment to audiences in northern cities. With Papa Charlie Jackson's *Papa's Lawdy Lawdy Blues* (Para.), recorded with banjo accompaniment in 1924, the recording industry began to make known the songs of the country tradition. Jackson's style and technique were those of the songsters, but *Long Lonesome Blues* (1926, Para.), by Blind Lemon Jefferson from Texas, had the authentic sound of rural blues.

Mississippi has been popularly regarded as the birthplace of blues and has been the source of many of the earthiest, least sophisticated recordings. Many Mississippi singers were guitarists who played a heavily accented accompaniment to their frequently guttural and always expressive singing. The most influential blues singer from the state was Charley Patton, who initiated a school of singer-guitarists on Dockery's plantation, near Clarksdale, before World War I. He influenced Tommy Johnson from the Jackson area, and they represented distinct, though linked Mississippi styles: Patton, Son House and Henry Sims, and their successors, Tommy McClennan and Bukka White, performed with deep, 'heavy' voices and strong, persistent rhythms, while Johnson, Ishmon Bracey and Bo Carter and the related Chatmon family used more complex, lighter rhythmic patterns and sang in higher voices, sometimes using falsetto for final syllables. Bo Carter and the Chatmons had a string band called the Mississippi Sheiks which played blues and other forms of country music and was a link with the earlier songster tradition. In Memphis, north of the Mississippi delta region, similar bands were formed in which a jug was often played as a bass instrument (*see* JUG BAND and WASHBOARD BAND). Ensembles using improvised instruments to augment strings were started in many small towns, most notably in Memphis.

The Texas approach to blues was exemplified by Blind Lemon Jefferson (fig.2). His words were original and often poetic:

> Sittin' here wondrin', will a match-box hold my clo's?
> Sittin' here wondrin', will a match-box hold my clo's?
> Ain't got so many matches, but I got so far to go.

This was one of the many images he created that passed into general usage. Rambling Thomas followed his use of



*1. Ma Rainey with her Georgia Jazz Band, Chicago, 1925: (left to right) Gabriel Washington (drums), Al Wynn (trombone), Dave Nelson (trumpet), Edward Pollack (alto saxophone) and Thomas A. Dorsey (piano)*

the guitar as an expressive 'second voice' answering the words of the long vocal lines. Alger Texas Alexander was so close to the holler tradition that he did not play an instrument, but on his best recordings he was accompanied on the guitar by Lonnie Johnson from New Orleans, who worked in Texas, or George 'Little Hat' Jones from San Antonio.

Mobile units, notably those of Columbia, Victor and Okeh, made field recordings of many singers who would otherwise have remained unknown. Some singers made few recordings, perhaps giving a false impression of their abilities. As only a few centres were used, vast areas of the South were unrepresented: hardly any recordings were made in the 1920s in Alabama, Arkansas or Florida. In Atlanta, Georgia, a school of 12-string guitar players with rich voices was recorded: among them were Barbecue Bob Hicks, his brother Charlie Lincoln, Curly Weaver, Peg Leg Howell and Blind Willie McTell. Several of them employed a knife, bottleneck or other slide to press the strings against the frets of their guitars. Some tuned their guitars to an open chord, producing a 'cross-note' tuning, which enabled them to press the slide against all the strings while playing a blues sequence. By moving the slide along the frets, whining, mournful sounds in keeping with blues feeling could be produced. This adaptability of the guitar made it a favourite instrument of blues singers.

Of the early southern singers only a few women were recorded. Among them were the powerful-voiced Bessie Tucker from Texas whose songs were largely about prison, and Lucille Bogan (Bessie Jackson) from Birmingham, Alabama, who sang robust blues about prostitution and lesbianism. The most notable was Memphis Minnie who, in Big Bill Broonzy's words, 'played the guitar like a man'. These women were admired for the masculinity of their musical attack: traditional femininity was replaced by a bragging sexuality.

4. Piano blues and the northern migration. The shadings and inflections of the blues can be obtained relatively simply on a guitar, but the blues pianist can produce the effect of blues grace notes and glissandos only by 'crushing' the keys (striking adjacent keys not quite simultaneously) and the effect of blues rhythm only by syncopation and strongly accented rhythmic phrases. Blues piano style may have derived partly from ragtime: the form known as BARRELHOUSE has similarities to improvised rags. Many blues pianists from Texas and Louisiana played in the makeshift lumber-camp saloons where barrelhouse style originated; among them was Little Brother Montgomery, who was an exponent of the *Vicksburg Blues* (1930, Para.), a standard basis for extemporization with a climbing bass figure. His contem-

2. *Blind Lemon Jefferson, c1929*

porary from Arkansas, Roosevelt Sykes, recorded it in 1929 under the alternative name of *44 Blues* (OK).

Bass figures were important in the development of piano blues; the walking bass of broken or spread octaves repeated through the blues progression provided the ground to countless improvisations. Charles 'Cow Cow' Davenport's recordings, including *Cow Cow Blues* (1928, Bruns.), illustrate facets of the early piano blues that were unified in the playing of his protégé, Pine Top Smith, who popularized the name BOOGIE-WOOGIE. Both went to Chicago from the South, as did hundreds of other blues singers, pianists, guitarists and other instrumentalists in the decade after World War I. The many immigrants forced up rent prices in Chicago and Detroit, and pianists played for beer and tips at 'rent parties' organized for mutual aid in the tenements. These became schools for other pianists, among them Meade 'Lux' Lewis and Albert Ammons.

The many blues teams formed in Chicago included that of the pianist Georgia Tom Dorsey and the guitarist Tampa Red (Hudson Whittaker), who were both from Georgia and had worked with Ma Rainey. The combination of blues and vaudeville experience led them to a vein of 'hokum', a combination of rural wit, sly urban sophistication and bawdiness; it was a new type of blues, entertainment without serious intent, which mildly ridiculed country manners while helping southern immigrants to adjust to urban life. With Big Bill Broonzy, another member of the Hokum Boys, Georgia Tom and Tampa Red managed to go on making recordings when the financial crash of October 1929 stopped most blues recording.

5. 1930S BLUES. In the early 1930s the most popular blues singer was Leroy Carr, a pianist who was accompanied with uncanny rapport by the guitarist Scrapper Blackwell (fig.3). Their approach had a strong southern character, but their lyrics had a considered, reflective quality, coloured by disappointment rather than bitterness and reflecting the mood of many of their listeners. Carr was widely copied, and his classic performances, such as *How Long, How Long Blues* (1928, Voc.) and *Midnight Hour Blues* (1932, Voc.), were recorded by numerous singers, even in the 1970s, long after his death in 1935. The fatalism of his works is also found in those of his principal imitator, Bumble Bee Slim (Amos Easton), and of Walter Davis, a pianist based in St Louis. Both had somewhat flat voices and a far less impassioned delivery than that of the previous generation of blues singers. Many of the 1930s blues are characterized by a fatalism prompted by the difficulties of the Depression. Several singers of this period were based in St Louis, midway between North and South, and their blues reflected both southern and northern attitudes. Although he was still recording in 1934 (the year of his death), Charley Patton in Mississippi was already outdated, and 16 titles he made that year remained unissued. His generation of Mississippi bluesmen, including Tommy Johnson, Ishmon Bracey and Son House, was still active but unrecorded; the cooler, less emotional singers of the younger generation had taken over. So it is perhaps surprising that a singer such as Sleepy John Estes from Brownsville, Tennessee, with a country guitar and cracked voice, singing extremely parochial lyrics, should have been as extensively recorded as he was. He had a counterpart further east in Tennessee and the Carolinas in Blind Boy Fuller, a street singer with a coarse-grained voice and ragtime guitar style. He was accompanied by a brilliant harmonica virtuoso, Sonny Terry; Estes was no less sympathetically supported by his own harmonica player, Hammie Nixon.

3. *Leroy Carr (seated) and Scrapper Blackwell, c1934*

6. Urban blues. In Chicago the tough conditions of the 1930s stimulated a more defiant, extrovert blues sound and collective performance. Tampa Red recorded some 200 titles in the decade, augmenting his plangent guitar with the heavier sound of his Chicago Five band. Its personnel varied but generally included Black Bob or Blind John Davis playing the piano, with other instruments such as tenor saxophone or trumpet taking the lead. A new departure in blues, it was followed by Big Bill Broonzy, the undisputed leader of Chicago folk music in the 1930s. Broonzy's groups were always subordinate to his singing and immaculate guitar playing, but he was the centre of a school of urban singers of southern origin, including his reputed half-brother Robert Brown, known as Washboard Sam. Sam's washboard playing was matched by his loud, rough voice, and he and Broonzy often played in groups. They were frequently joined by John Lee 'Sonny Boy' Williamson, a highly influential harmonica player with a distinctive 'tongue-tied' voice who recorded extensively under his own name, and William 'Jazz' Gillum, who also played the harmonica. Together they created an outgoing, topical form of blues that did not lose its sense of contact with those newly arrived from the South, though the sound was essentially that of Southside Chicago.

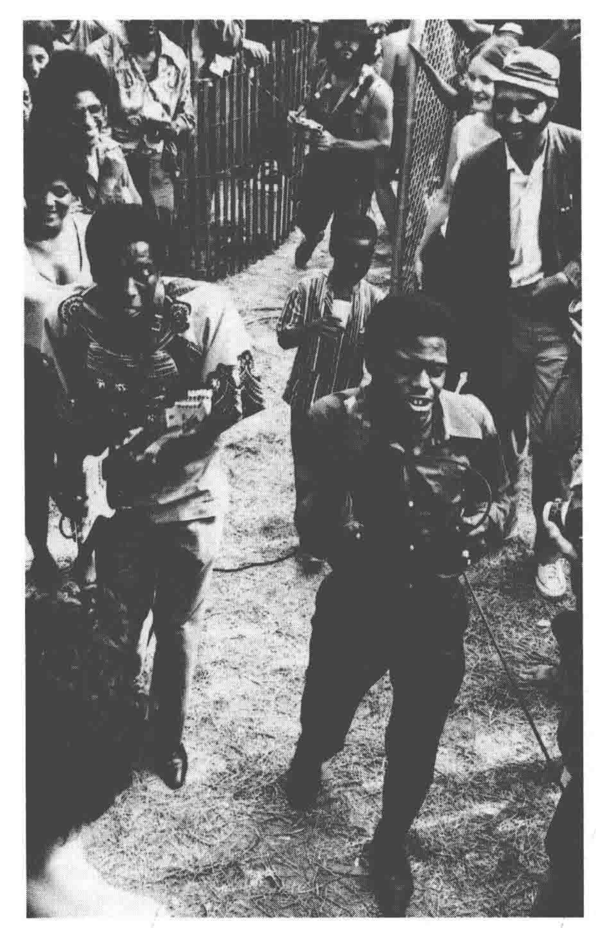
In contrast to these developments in urban blues, a new generation of 'down-home' singers from Mississippi, with a style firmly rooted in the Patton-House tradition, began to be recorded as the decade came to a close. Their blues were coarser and fiercer than that of their predecessors and provided a powerful stimulus for the blues in the early 1940s, when the Jive music of Louis Jordan and his contemporaries was shifting the emphasis of the blues with humorous novelty pieces intended only as entertainment. These later Mississippi singers included Tommy McClennan, Robert Petway, Bukka White and above all Robert Johnson (iii), who had the most lasting influence on the evolution of the blues. While still in his early 20s (1936–7) he recorded some 30 titles shortly before his death; these highly introverted, sometimes obsessive blues, with a whining guitar sound and throbbing beat, made a profound impression even on singers who recorded more than 20 years later. If one artist epitomized the range of performance and attitudes of the blues in the 1930s it was probably Broonzy, but the most memorable creations came from the singing and playing of Carr and Johnson.

7. Postwar blues. Until the end of World War II the recording of blues had been controlled by a few large companies, but in the late 1940s small companies, many with black proprietors, started commercial production. Some were in southern cities such as Memphis and Houston, some on the West Coast, where a smooth style of blues created by westward-moving migrants from Texas found a new market. New concerns also operated in Chicago and Detroit, so the combined output of blues records was considerable. Until then blues recordings had been classified and marketed in sales catalogues as 'Race' records (*see* Race record). This segregation contributed to the development of postwar rhythm and blues, a term free of racial connotations. Rhythm-and-blues encompassed many kinds of blues and related music, from the soft-toned West Coast blues of Charles Brown to the technically brilliant guitar playing of T-Bone Walker. But, like the related rock and roll, it encompassed much else besides, including the harmonizing of the rhythm and blues quartets, the popular, nostalgic, blues-based vocals of the New Orleans pianist Fats Domino, the frenetic performances of Little Richard and the witty lyrics of rock and roll singers Chuck Berry and Bo Diddley.

Of postwar blues singers among the most notable was Muddy Waters (fig.4). His early manner (as seen in his Chicago recordings of 1947) owed much to Robert Johnson, but he soon added a harmonica (Little Walter) and a piano, guitar or drums to fill out the sound, as the Broonzy-Williamson groups had done. In the 1950s his music became increasingly threatening, with hoarse singing, slow blues-boogie piano playing by Otis Spann and the complementary warbling harmonica of Little Walter, Walter Horton or James Cotton. With all instruments amplified, the live sound was highly charged, and the recordings sold in large numbers. Muddy Waters's principal rival was Howlin' Wolf (Chester Burnett) – romantic sobriquets were still expected of blues singers. Howlin' Wolf developed a ferocious and energetic style, shown for instance in *Smokestack Lightnin'* (1956, Chess). He derived much of his style from Charley Patton, whereas Robert Johnson inspired Elmore James, who was in many ways the archetypal postwar Chicago blues singer. James was technically quite limited, depending on a bottleneck slide and rhythms formulated by Johnson; he sang in a taut, constricted voice and, like many singers of his generation, paid more attention to projection and volume than to content and subtle expression. This reflects a general change in the relationship of the blues singer to his audience: though 'blues' still signified both music and mood, there was greater emphasis on performance to audiences, and lyrics became more stereotyped and less personal to the singer.

Many other southern blues singers were popular in the 1950s, among them John Lee Hooker, who left Mississippi to settle in Detroit and developed his own heavily accented guitar technique. Another was Jimmy Reed, whose loose vocals against insistent rhythms set him somewhat apart from his contemporaries but made him very popular with black audiences. In Texas, Lightnin' Hopkins extended the tradition of Blind Lemon Jefferson, dominating blues in that state. Even when the young, more urban singers from Memphis, Bobbie Bland and Little Junior Parker, settled in Texas to work and record, Hopkins did not lose his pre-eminence.

8. Blues and the white audience. Though blues was without doubt of African American origin, it was adopted by a number of white hillbilly and country artists, who began recording blues in the 1920s. Some were imitators, but a few were innovators, like Chris Bouchillon who created the 'talking blues' with a spoken narrative. The Allen Brothers sang blues in harmony while, in the 1930s, the popular country singer Jimmie Rodgers often recorded his 'blue yodels'. Though Woody Guthrie sustained the 'talking blues' form, white blues singers were few in the 1940s, the blues being perceived as in decline. Within jazz criticism blues had been treated with some respect, though it was seen as a precursor of jazz rather than as a distinct musical style with a parallel evolution. Leadbelly, though primarily a songster, was widely acclaimed in New York in the 1940s among jazz enthusiasts and mourned at his death (1949) as 'the last of the blues singers'. This of course was not the case, not even in jazz itself, for the blues singers Joe Turner and Jimmy Rushing continued



*4. Muddy Waters with Luther 'Snakehips' Johnson (guitar) and Paul Oscher (harmonica)*

to sing in jazz groups, and blues recordings were prominent in rhythm-and-blues in the 1950s. When Big Bill Broonzy went to Europe in the early 1950s he too was seen as a rare survivor of the blues tradition; he helped to stimulate the growing interest in blues by the publication of his autobiography (1955). Soon after his death (1958) the team of Brownie McGhee and Sonny Terry went to Europe, and during the 1960s a succession of blues singers visited Britain and the Continent; some remained, among them the pianists Memphis Slim, Eddie Boyd, Curtis Jones and Champion Jack Dupree.

In 1959–60 the first serious studies of blues were published and field trips for research were undertaken, largely by Europeans. During the following years strenuous efforts were made to find forgotten or unrecorded blues singers, with the result that Fred McDowell, Robert Pete Williams, Mance Lipscomb and Robert Shaw were recorded for the first time, while Mississippi John Hurt, Bukka White, Sleepy John Estes, Son House and others were rediscovered. Many veteran singers toured Europe, where they played to large and enthusiastic audiences. Skiffle, a quasi-country blues band music, had a fleeting popularity in Britain when Broonzy was alive, and the later visits of blues singers, the publication of many studies and magazines on the subject, the availability of recordings and the consciousness of a 'generation gap' (which seemed to parallel the segregation of black people in the USA) all contributed to the emergence of British pop and rock groups whose early work was strongly influenced by blues. Of these the Beatles were the best known, but the Rolling Stones, the Animals and the Who owed more to blues. Blues-based pop music was loud, heavily amplified and augmented with sound-distorting devices; the performers were extravagantly dressed, and deliberately challenged established pop music (*see* BLUES-ROCK). A similar movement followed in the USA, where the young musicians were, theoretically, closer to blues artists. Paul Butterfield, Mike Bloomfield and the group Canned Heat depended closely on postwar blues based on the Chicago style.

9. CONCLUSION. The kindling of white interest in black music always presaged or coincided with a departure from the idiom by the black population; when blues gained white enthusiasts it lost black audiences. Some singers, for example Otis Rush and J.B. Hutto, retained their integrity as artists, taking day-time jobs and performing in clubs when they could. Fortunate blues singers toured American universities; others returned to truck driving or growing crops. In black America soul music predominated, with its gospel techniques and some element of blues expression. Few blues singers retained their audiences in the soul era; the most prominent was B.B. King, an articulate, expressive, technically accomplished guitarist with a large following. His namesakes Albert King and Freddie King worked in a similar vein, appearing at the large open-air concerts of the 1970s. Other singers of a younger generation, including Buddy Guy and Junior Wells (fig.5), used the vocal techniques and stage mannerisms of soul singing, but they too were most successful performing at universities. In the mid-1970s there were only a few blues singers working

*5. Buddy Guy (left) and Junior Wells at the Ann Arbor Blues Festival, 1970*

steadily, and their audiences were mainly white, though the blues had gained an international following, and blues singers were sponsored by the State Department for tours in Africa and Asia. A few black singers, notably Taj Mahal, departed from a sophisticated popular style to find some satisfaction in traditional blues, but they cannot be said to represent the culture in the sense that Jefferson, Carr, Johnson or Muddy Waters once did. By 1980, however, soul-blues singer-guitarists such as Johnny Copeland, Z.Z. Hill and Robert Cray were welcomed. Meanwhile, blues had become international, with white blues bands in most European countries, and blues being played in Japan and South-East Asia. It had also become background music to television commercials and features. Appropriated in this way it entered a new phase, being no longer African American, but a part of the currency of global popular music.

Assessment of the importance of the blues in 20th-century American folk music has often been made in relation to jazz or to pop music. As a music of the people it had its minor artists, but within the extensive corpus of recordings there are innumerable examples of folk compositions of genius and beauty, expressions of the human spirit that are both profoundly moving and complete in themselves as creative works. It is a music that will increasingly be valued in its own right. Blues singers and musicians extended the expressive range of the guitar, piano, harmonica and human voice and evolved many musical substructures within the framework of a recognizable and distinct idiom. Blues was also important as the primary artistic expression of a minority culture: it was created mainly by black working-class men and women, and, through its simplicity, sensuality, poetry, humour, irony and resignation transmuted to aggressive declamation, it mirrored the qualities and the attitudes of black America for three-quarters of a century.

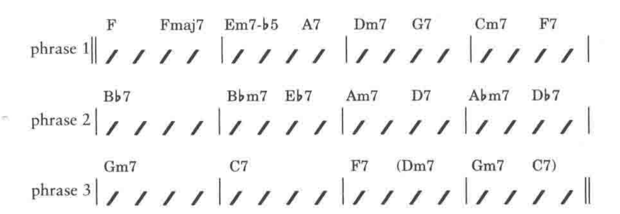
PAUL OLIVER

**Blues progression.** The underlying harmonic structure of the blues. In the broad sense, the term can refer to the harmonic basis of any piece called a BLUES (an exhaustive survey of these progressions can be found in Dauer), but it must be noted that in an attempt to capitalize on the blues craze of the early 1920s, popular songwriters used 'blues' in the titles of pieces whose harmonies bear no relation to that of the blues progression (e.g. *Limehouse Blues*). In the narrow sense, it refers to a flexible, cyclic 12-bar structure, consisting of three four-bar phrases with the chord pattern shown in ex.1. Many variants of this

Ex.1 Basic harmonic structure of the 12-bar progression

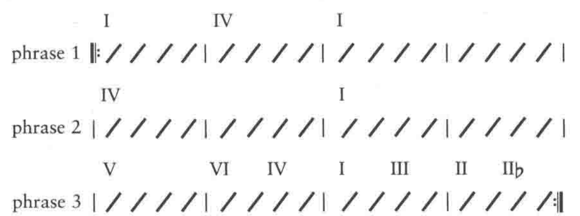


phrase 3 — I
phrase 2 — IV, I
phrase 1 — V

pattern are possible: frequently IV is used in place of I in bar 2, or in place of V in bar 10. Country blues guitarists characteristically vary the rhythms of the basic progression, and sometimes maintain a tonic drone on the bass strings; in this case a blues harmonic progression may be intimated by the vocal and treble-string melodies.

Themes based on 12-bar blues progressions appeared in ragtime compositions from 1904; later, composer–collectors of the blues published multi-thematic 'blues', combining 12-bar blues progressions with 16-bar ragtime themes and popular songs (e.g. W.C. Handy's *Memphis Blues*, 1912). These hybrid pieces were popularized by 'classic' blues singers such as Mamie Smith and Bessie Smith from 1920. A few years later, in 1923, recordings by innovative black jazz ensembles from New Orleans revealed that there were several established variants from the standard blues pattern. Only later were field recordings made of rural blues musicians. Because of this confusion in the sources it is impossible to establish an original form of the blues progression.

Jazz, particularly bop, musicians took advantage of the flexibility inherent in the simple 12-bar scheme and often presented it in new guises using a variety of passing and substitute harmonies. An extreme example is Charlie Parker's *Blues for Alice* (1951; ex.2) with its interpolated



Ex.2 Harmonic structure of C. Parker: *Blues for Alice* (1951, Clef 337)

secondary dominant progressions. A minor-mode form of the blues progression also exists, which later became a common characteristic in soul jazz. Drummers, most notably Max Roach, have adapted the blues progression and poetic form to unaccompanied solos, translating the 12-bar blues into percussive terms; a fine example is found in Roach's solo in the middle of 'Blue Seven' on the Sonny Rollins album *Saxophone Colossus* (1956, Prst.)

Broadly speaking, the blues progression entered the repertory of rock musicians from two distinct sources: from rock and roll and from country and urban blues. It is found in its simplest form (ex.1) in Bill Haley's *Rock Around the Clock* (1954) and across the spectrum of rock and roll, including Jerry Lee Lewis's *Whole Lotta Shakin' Goin' On* (1957) and Chuck Berry's *Johnny B. Goode* (1958). Gene Vincent's *Be-bop-a-lula* and Little Richard's *Tutti Frutti* (both 1956) use IV in bar 10 – this is the most common variant – while Fats Domino's *Ain't that a shame* (1955) uses IV–IV–V–V in the last four bars. Thereafter, the 12-bar pattern and its variants entered the work of Buddy Holly (*Peggy Sue* and *Oh Boy*, both 1957), the Everly Brothers (*Bird Dog*, 1958), the Beach Boys (*Little Deuce Coupe* and *Surfin' USA*, both 1963) and, ultimately, the Beatles (*A Hard Day's Night* and *Can't buy me love*, both 1964) and the Rolling Stones (*19th Nervous Breakdown*, 1966). By this point, it had lost touch with the conventionalized AAB pattern of the blues lyric.

Ex.3 12-bar bass progression from Led Zeppelin's *Since I've been Lovin' You* (1970)

In the later 1960s, blues rock musicians returned to the blues pattern, but through the influence of country and blues musicians (such as Robert Johnson, Elmore James and Willie Dixon) rather than early rock and roll. In Fleetwood Mac's *Dust my broom* (1968), this resulted in a strict adherence to the pattern; in Cream's *Sunshine of your Love* (1967) the riff is transposed rather than remaining on the same pitch; while in Led Zeppelin's *Since I've been Lovin' You* (1970), the substitution-rich pattern is found in the bass alone (ex.3).

BARRY KERNFELD, ALLAN F. MOORE

**Blues-rock.** A style of popular music that flourished during the 1960s. It originated in and is particularly associated with Britain, and depends on the electric guitar with its blues-pentatonic scale patterns and propensity for sudden shifts of movement between anguished held, bent notes and sudden runs. It attempted to counter the banality of the hit-parade material and of rock and roll (which by the early 1960s had lost its power to surprise) by retrieving what was felt to be emotionally more 'authentic' blues material. It was thus originally an underground movement originating in the London blues revival, itself an outgrowth of the trad jazz movement headed by Chris Barber. The blues revival was centred on clubs booked by Alexis Korner and Cyril Davies, namely Wardour Street's Roundhouse (from 1955) and West London's Ealing Club (from 1962). By the early 1960s other clubs were popular: the Scene and the Flamingo in Central London and the Crawdaddy in Richmond.

Korner's venues hosted a variety of touring musicians, from Muddy Waters, Big Bill Broonzy and Otis Spann to Sonny Terry and Brownie McGhee. Waters had been playing electric blues since the early 1950s, but British audiences initially wanted only the 'authentic' acoustic style on his first visit in 1958. Korner's Blues Incorporated (formed in 1962) was an important training ground for many of the most significant musicians of this phase. The clubs were frequented by listeners bored with the trad jazz scene, and by art school musicians who would become crucial to British rhythm and blues: the nascent Rolling Stones, Fleetwood Mac and the Yardbirds, Georgie Fame, Chris Farlowe, John Baldry, Graham Bond, John Mayall and Jimmy Page. These developed a close-knit circuit that included Elton John, Rod Stewart, Peter Green, John McLaughlin and Eric Clapton.

Clapton's early career epitomizes the changes of style which accompanied the development of blues-rock. With the Yardbirds he had worked with Sonny Boy Williamson 'II' in 1963 (as had the Animals in Tyneside), but he left them in 1965 after they switched from rhythm and blues towards pop and psychedelia. Playing with John Mayall's Bluesbreakers (1966), he covered material by Little Walter, Ray Charles and even Robert Johnson, before forming Cream (later in 1966) with Jack Bruce and Ginger Baker. Although they covered songs from Delta blues singers, Clapton's now extended solos helped develop progressive rock.

Blues-rock was still current in 1968 – both Led Zeppelin (Atl., 1969) and Fleetwood Mac's *Mr Wonderful* (Col., 1968) included material by Willie Dixon – but this phase was ending. While Georgie Fame went into cabaret and big bands, Baldry, Elton John and Fleetwood Mac (without Peter Green) eventually went into pop, and Led Zeppelin and Cream developed rock. By the mid-1960s, some white US musicians, of a slightly younger generation, were making much use of similar blues material: Mike Bloomfield and Paul Butterfield (who developed through jamming with Muddy Waters, Buddy Guy and Otis Rush from about 1963), Canned Heat, Roy Buchanan, Stevie Ray Vaughan and the Chicago scene focussed on Steve Miller and Johnny Winter. The popularity of artists such as Robert Cray in the 1980s suggests that this style, like any other, can be made amenable to revival.

ALLAN F. MOORE

**Blühmel, Friedrich** (*d* before 1845). German musician and inventor. A coal miner, he learned to play the violin and various woodwind instruments, changing in 1808 to trumpet and horn and calling himself a 'Berghautboist' or mine musician.

Together with STÖLZEL, who had demonstrated a horn with tubular valves in July 1814, Blühmel was co-inventor of the valve mechanism for brass instruments. According to his own testimony, Blühmel was inspired between 1810 and 1813 by the ventilating pipes and faucets of Silesian blast furnaces. It was not until 1816 that Blühmel could demonstrate working models of a trumpet and a horn with two box valves each, followed in February 1818 by a trombone with three such valves. Finally the two men joined forces and were awarded a joint patent on 12 April 1818, Stölzel paying Blühmel 400 thalers for surrendering all further rights to him. For illustration *see* VALVE (i), fig.8.

By 1819 Blühmel had fitted out a trumpet with a kind of rotary valve, but Blühmel's and Stölzel's separate patent applications in 1828 for a rotary valve were refused. In the same year, however, Blühmel secured Prussian patents for devices for prolonging the tone of stringed instruments and for tuning timpani with only one tuning-screw.

Instruments with Blühmel's box valves were made by Friedrich Wilhelm Schuster (1798–1873) of Karlsruhe until about 1833.

EDWARD H. TARR

**Blum, Robert** (*b* Zürich, 27 Nov 1900; *d* Bellikon, canton of Aargau, 10 Dec 1994). Swiss composer and conductor. At the Zürich Conservatory (1919–22) he studied composition and conducting (with Andreae), the piano (with Baldegger) and counterpoint (with Laquai and Jarnach). In 1923 he attended Busoni's masterclass in composition at the Akademie der Künste in Berlin. On returning to Switzerland he was conductor of several orchestral and vocal ensembles, among them the Männerchor Aussersihl (which gave the première of Stravinsky's *Oedipus rex* in Switzerland) and the Orchesterverein in Baden. In 1935 he founded the Madrigalchor in Zürich, and helped found the Pro Musica society. Between 1943 and 1976 he also taught composition and counterpoint at the Musikakademie in Zürich.

Best known for his sacred choral music and his film music, Blum composed works influenced by the classicist styles of Busoni and Jarnach, by medieval and Renaissance

models, and by Swiss folk music. His classicist tendency is evident in his preference for polyphony, strict forms and tonality, as well as in his struggle to suppress subjective expression and achieve an objective style in which widely contrasting compositional approaches, even serial techniques, could be synthesized. As a result of his involvement in choral music festivals in Switzerland he arranged numerous folk songs for choir. He was awarded the C.F. Meyer Prize (1942), the Musikpreis der Stadt Zürich (1960) and the composer's prize of the Schweizerischer Tonkünstlerverein (1968).

WORKS
(*selective list*)

DRAMATIC

Stage: Amarapura (op, E. Neudegg), 1924; Der Maler (dramatic cant., Blum), 1929; St Galler Spiel von der Kindheit Jesu (H. Reinhart), ?1935; Im Aargäu sind zweu Liebi (Volksliederspiel, A. Haller), 1935; Der Bauer als Millionär (incid music, R. Schweizer), ?1937; Hansjoggel im Paradies, Dialektlustspiel, 1937; Das alte Tellenspiel (incid music), ?1941; Der Misanthrop (incid music, Molière, trans. F.W. Fulda), 1958; Unspunnen-Festspiel (H.R. Hubler), solo vv, chorus, wind orch, 1968

Film scores: Die missbrauchten Liebesbriefe, 1941; Der Schuss von der Kanzel, 1943; Die letzte Chance, 1945; Die Gezeichneten, 1948; Heidi, 1952; Die Vier im Jeep, 1954; Uli der Knecht, 1955; Uli der Pächter, 1956; *c*100 other scores, including many documentary films

CHORAL AND VOCAL

Kantate von der Erlösung durch den Geist in Jesu Christo, chorus, str orch, ?1933; Vogel Juhei (Thürer), 36 Dialektlieder, 1958; 2 Chöre (A. Gryphius), chorus, orch, 1960; 4 Psalmen, S, chorus, orch, 1960; Erzengel Michael (orat, Blum, after Bible), 4 solo vv, chorus, orch, org, ?1961; Der Tod des Agamemnon (orat, Blum), solo vv, male chorus, orch, 1965; 2 Meditationen (K. Marti, after Bible), Bar, female vv, wind qnt, org, 1970; Trias (Bible), B, male vv, orch, 1973; many a cappella pieces for mixed/male/female/children's vv

Das 12. Kapitel der Offenbarung Johannis, A, 3 va, vc, pf, 1930; 4 Psalmen, S, small orch, 1932; 6 Hymnen (F. Wolters), S, str qt, ?1941; Der Streiter in Christo Jesu, S, chbr orch, ?1941; Lobgesang aus der Offenbarung Johannis, 12 solo vv, small orch, 1945; 5 Hymnen, A/B, pf, 1949, arr. B, orch, 1951; Serenade, S, B, 11 insts, 1956; 8 Fragmente nach Sappho, S, fl, vn, 1970; many lieder with pf

INSTRUMENTAL

Orch: Sym. no.1 (O. Khayyam), B, orch, 1924; Sym. no.2 (F. Hölderlin), chorus, orch, 1926; Sym. no.3, ?1927; 2 partitas, 1929, ?1935; Passionsmusik, str, org obbl., 1943; Partita, ?1951; Variationen über 'Aus tiefer Not', 1952; Va Conc., 1953; Conc. for Orch, 1955; Sym. no.4 (J.W. von Goethe), male chorus, wind, ?1959; Ob Conc., 1960; Toccata, Fantasia und Fuge, str, ?1960; Conc., vn, ob, tpt, orch, 1963; Konzertante Sinfonie, wind qnt, timp, hp, str, 1964; Sym. no.5. 1965; Partita, 1967; Sym. no.8 'Seldwyla'; Tropi e canzoni, str, 1968; Conc., str trio, chbr orch, 1969; Sym. no.6, 1969; Sym. no.10 'Pentatonischer Lobgesang', chorus, orch, 1980; ovs., suites

Wind ens: An Orpheus, 13 insts, 1951; Wind Qnt, 1962; Stationen, wind qnt, 1967; Tombe di Ravenna, 11 brass, 1969; Zitat, 9 fl

Other works: Kleines Konzert, va, cl, 1926; Musik für 8 Inst, 1927; Duett, 2 vn, 1934; Str Qt, 1934; Str Trio, 1937; Lamentatio angelorum, fl, ob, cl, hn, str qt, db, 1942; Pf Trio, 1943; Capriccio, tpt, pf, 1959; Qt, fl, str trio, 1963; Sonata, fl, vn, 1963; Divertimento über eine Zwölftonreihe, 10 insts, 1966; Musik über 3 altdeutsche Volkslieder, cl, str trio, 1970; Str Qt, 1970

TAMARA LEVITZ

**Blum, (Robert) Stephen** (*b* East Cleveland, OH, 4 March 1942). American musicologist and ethnomusicologist. He received the BMus at Oberlin College (1964) and the PhD (1972) at the University of Illinois, where he studied with Bruno Nettl, Alexander Ringer and Charles Hamm. He taught at Western Illinois University (1969–73), University of Illinois at Urbana-Champaign (1973–7), York University (1977–87), and in 1987 became professor of music at CUNY Graduate School. His research and writings have focussed on two main interests: the music of Iran and the scope and methods of ethnomusicology and musicology. He conducted fieldwork in northeastern Iran in 1968–9, 1972 and 1995, and selections from his field recordings have been published on cassette by the Iranian Ministry of Culture and Islamic Guidance (1997). A series of writings beginning in the 1970s has investigated fundamental issues in musical scholarship and historiography.

THEODORE LEVIN

**Blume, Friedrich** (*b* Schlüchtern, Hesse, 5 Jan 1893; *d* Schlüchtern, 22 Nov 1975). German musicologist. From 1911 he studied in Munich (with Sandberger, Kroyer, Wölfflin and Istel), Leipzig (with Riemann, Schering, Abert, Pinder, Schmarsow, Volkelt and Wundt) and Berlin (with Kretzschmar, Wolf and Goldschmidt). Detained by military service, he completed the doctorate in 1921 at Leipzig with a dissertation on the precursors of the orchestral suite in the 15th and 16th centuries. The same year he became assistant lecturer in Leipzig and in 1923

was named lecturer at the University of Berlin, where he completed the *Habilitation* in 1925 with a work on monody in Protestant church music. Appointed reader in Berlin in 1933, he went to the University of Kiel the following year, where he won acclaim for his direction of the collegium musicum and was named professor in 1938; he remained there until his retirement in 1958.

Blume's research speciality was the music of the Lutheran church, to which he devoted his first major book, *Die evangelische Kirchenmusik*, in addition to a number of studies of Schütz and Bach and the complete edition of Michael Praetorius (1928–40). Active in the *Jugendmusikbewegung* and well regarded as a collegium director, Blume took a special interest in the proliferation of performance editions of Renaissance and Baroque music. He was general editor of the choral music series Das Chorwerk (1929–38), which included several of his own editions of works by Josquin, Pierre de La Rue, Lassus and Purcell. In 1938, he attracted national attention with his interest in race issues, delivering a keynote speech on music and race at the largest musical gathering of the Third Reich, the Reichsmusiktage. Vague in his acceptance or rejection of racial methodology, Blume managed to appease both Nazi leaders and postwar supporters for simultaneously embracing and criticizing Nazi ideological trends. He went on to edit a series of race studies in music (Studien zur musikalischen Volks- und Rassenkunde) and earned the privilege of contributing an essay on musicology to a Festschrift for Hitler's 50th birthday. For the bulk of his later career, Blume was intensely engaged with the preparation of *Die Musik in Geschichte und Gegenwart* (*MGG*), the comprehensive music dictionary that was one of the crowning achievements of postwar German musicology. He worked closely with contributors all over the world and reportedly took personal responsibility for each of the 9414 articles. The writings for which he is best known in Britain and the USA are the four comprehensive essays on Renaissance, Baroque, Classical and Romantic music, originally written for *MGG1* and later published separately in English translation as *Renaissance and Baroque Music* (New York, 1967) and *Classic and Romantic Music* (New York, 1970).

Blume was deeply involved in musicological organizations and large-scale projects for much of his career, and was a driving force behind the rebuilding of German musicology after World War II. From 1935, he was affiliated with the Staatliches Institut für Deutsche Musikforschung, the central musicological institute established by the Nazi Education Ministry, where he served from 1939 to 1945 as the secretary in charge of Das Erbe Deutscher Musik (EDM) and editor of *Deutsche Musikkultur*, a journal designed to direct musicological scholarship to a wider readership. In 1943, under the auspices of this institute, Blume was appointed general editor of *MGG* even though its preparation had to be put off until the end of the war. After the war, Blume evaded the complexities of denazification and was free to devote himself to rebuilding German musicology. His first priority was to salvage *MGG*, which had been jeopardized by the dissolution of the Staatliches Institut. He succeeded in bringing out 14 volumes from 1949 to 1968, after which his daughter Ruth oversaw the production of the supplement. No novice at organizational leadership (he was president of the new HeinrichSchütz-Gesellschaft, 1942–56), Blume also spearheaded the founding of the Gesellschaft für Musikforschung in 1946 and served as its president until 1962 and honorary president thereafter, and he urged the authorities of the Federal Republic to resurrect such enterprises as the Staatliches Institut and EDM. Blume was careful to publicly disassociate himself from any suggestions of Nazi thought or actions, winning the trust of scholars outside Germany and re-establishing international ties severed during the war. He played a central role in reconstituting the IMS, serving as vice-president and president (1958–61); he also helped to found the IAML and was general editor of RISM from 1952. From 1955 to 1973 he was also president of the Joseph-Haydn-Institut in Cologne.

PAMELA M. POTTER

**Blumenfeld, Fannie.** *See* ZEISLER, FANNIE.

**Blumenfeld, Felix (Mikhaylovich)** (*b* Kovalyovka, South Ukraine, 7/19 April 1863; *d* Moscow, 21 Jan 1931). Russian conductor, pianist, composer and teacher, uncle of Heinrich Neuhaus. He studied the piano with Stein and composition with Rimsky-Korsakov at the St Petersburg Conservatory, where he taught the piano from his graduation in 1885 until 1918 (excluding the years 1905–11), being appointed a professor in 1897. From 1895 to 1911 he was also conductor at the Mariinsky Theatre in St Petersburg, where he gave the premières of Rimsky-Korsakov's *Servilia* (1902) and *Legend of the Invisible City of Kitezh* (1907) and the Russian première of *Tristan und Isolde* (1899). In 1908 he conducted the Russian seasons in Paris, achieving wide recognition as a conductor and, more especially, as a pianist. He lived and worked in close contact with Anton Rubinstein, Rimsky-Korsakov, Glazunov, Rachmaninoff and Chaliapin. His performing style, influenced by Rubinstein's, was heroically brilliant and lyrically melodious; he gave the first performances of many piano works by Glazunov, Lyadov and Arensky, among others. He was well known as a teacher, first in St Petersburg, then in Kiev (1918–22) and at the Moscow Conservatory (1922–31), and his methods influenced many famous Soviet piano teachers (including his nephew, Neuhaus) and are widely discussed in Soviet musical literature; among his pupils were Horowitz, Grinberg, Barere (who recorded Blumenfeld's *Etude for the Left Hand* in 1935) and Gauk. Dubyansky, considered to be his most gifted pupil, and to whom he dedicated his *Two Lyric Fragments* op.47, committed suicide at the age of 21. As a composer Blumenfeld was close to the 'Belyayev Circle' and influenced by Chopin. Although sincere and attractive pianistically, his music did not outlive him. Of some interest are his songs, including the song cycle *Vesna* ('Spring'), and some piano works, among them the Variations opp.8 and 34, and 24 Preludes.

JOACHIM BRAUN

**Blumental, Felicja** [Blumenthal, Felicia] (*b* Warsaw, 28 Dec 1918; *d* Tel-Aviv, 31 Dec 1991). Brazilian pianist of Polish birth. She studied composition under Szymanowski and the piano with Zbigniew Drzewiecki and Joseph Goldberg at the Warsaw Conservatory, making her international début shortly before World War II. The political situation in Europe forced her to emigrate in 1942. She settled in Brazil and made a successful American début at Rio de Janeiro. Villa-Lobos was so favourably impressed with her playing of his *Bachianas brasileiras* no.3 in 1954 that he composed his Fifth Piano Concerto for her, which she first performed in the Festival Hall, London, in 1955. She was also the dedicatee of Penderecki's Partita for harpsichord and chamber orchestra (1971). From the 1960s Blumental made a speciality of music outside the regular repertory, particularly from the early 19th century, and she recorded works for piano and orchestra by Clementi, Field, Kozeluch, Czerny, Hummel, Ries and Paderewski, among others, as well as the piano version of Beethoven's Violin Concerto.

FRANK DAWES/R

**Blumer, Rodney (Milnes).** *See* MILNES, RODNEY.

**Blumner, Martin (Traugott Wilhelm)** (*b* Fürstenberg, Mecklenburg, 21 Nov 1827; *d* Berlin, 16 Nov 1901). German conductor and composer. He studied theology, philosophy and natural science in Berlin from 1845, during which time he was a member of the Sing-Akademie. He decided to become a musician and studied composition with S.W. Dehn from 1847; but the principal influence on his musical background was Eduard Grell, under whom he was assistant conductor of the Sing-Akademie

from 1853 and whom he succeeded as the principal conductor in 1876. For many years Blumner also conducted the Berlin male-voice choir ('Liedertafel') founded by Zelter. At the Akademie der Künste, of which he had been a member since 1875, Blumner held various posts, the last one being chairman of a masterclass for composition. In 1891 he published his *Geschichte der Singakademie zu Berlin*, and in the same year he received an honorary doctorate from Berlin University.

As a composer Blumner belonged to the so-called Berlin 'academics'. He was committed to the Romantic-historical *a cappella* ideal and wrote exclusively vocal music. Chief among his works are the biblical oratorios *Abraham* op.8 (1859) and *Der Fall Jerusalems* op.30 (1874); he also composed motets and other unaccompanied choral works, as well as sacred and secular works for solo voice. His musical outlook was conservative, his style epigonal; his obvious models were Bach, Handel and Mendelssohn. According to Schering his works 'lack neither seriousness nor profundity but ... nevertheless sound like music on second hand' (*ScheringGO*, 463). In this sense, as a traditional rather than a progressive musician, Blumner also served the Sing-Akademie as its respected conductor. (G. Schünemann: *Die Singakademie zu Berlin 1791–1941*, Regensburg, 1941)

REINHOLD BRINKMANN

**Blundell, James** (*fl* London, *c*1775–82). English music publisher, associated with the firms of the WELCKER family.

**Blundevile, John** (*b* Lincoln, *c*1650; bur. Durham, 11 April 1721). English musician. He was the son of the John Blundevile who was associated with the choir of Lincoln Cathedral from 1622 to 1692. It is reasonable to identify him with the chorister of that name who was at Lincoln in 1660, and then at the Chapel Royal until Christmas Day 1664. It appears he then worked successively in Ely, as a lay clerk and informator between 1669 and 1674, in Lichfield in 1676 (having failed to produce the necessary certificate at Winchester on 16 May), and in Dublin, from 1677 to 1679. From 1681 he was a lay clerk at York Minster, becoming Master of the Choristers the following year. He held this post until 1692. On 15 May 1693 the Dean of Durham Cathedral was instructed to write to Blundevile to ascertain on what terms he would transfer his allegiance from York to Durham. Although Blundevile did leave York at this time, it is not known where he went, and it was not until January 1703 that he was appointed a lay clerk at Durham Cathedral.

He may well have been the composer of the two duets *Tho' our pockets are out* and *The Juice of the Grape* (*GB-Lbl* Add. 29397), though the anthem *Let God arise*, in certain of the Lincoln part-books, could be by his father. It is thought that the younger John may have been responsible for bringing to Durham an early post-Restoration book of anthems primarily in the hand of Hosier (*DRc* B1).

BRIAN CROSBY

**Blur.** English rock group. It was formed in Colchester in 1989 by Damon Albarn (*b* Whitechapel, London, 23 March 1968; vocals), Graham Coxon (*b* Rinteln, nr Hanover, 12 March 1969; electric guitar), Alex James (*b* Bournemouth, 21 Nov 1968; bass guitar) and Dave Rowntree (*b* Colchester, 8 May 1964; drums). Their first album, *Leisure* (Food, 1991), hinted at a psychedelic pop sensibility, but subsequent recordings established the band as mordant and witty observers of small-time English psychoses, which they housed in an infectious combination of mod and punk styles indebted to the Small Faces, The Kinks, David Bowie and the Jam. Thematically, *Modern Life is Rubbish* (Food, 1993) remains perhaps their most complete work, a paean to 'little Englandism' in the face of American imperialism, but musically *Parklife* (Food, 1994) is superior, with its sarcastic post-Aids disco anthem of sexual liberation, 'Girls and Boys', its tale of transvestism in 'Tracy Jacks' (a 1990s update of Pink Floyd's 'Arnold Layne') and the epic ballad 'This is a low'. As Britpop took off in 1995, the arty, middle-class 'Essex Boys' Blur were contrasted in the media with the more demotic rock of Manchester's Oasis; 'Country House' (Food, 1995), released on the same day as Oasis's 'Roll with it', famously beat its rival into second place in the UK pop charts in August that year. Afterwards, however, Blur's star was temporarily on the wane as the next album, *The Great Escape* (Food, 1995), reused old themes. In 1997 the band effected a *volte face* and embraced the slow, grunge-influenced 'low-fi' American sound of such artists as Pavement and Beck. The resultant eponymously titled album was an unexpected artistic triumph. *13* (1999) was even more experimental, with haunting, expressionistic soundscapes best evidenced on tracks such as '1992' and 'Battle', while the gospel-influenced 'Tender' retained a sufficiently broad appeal to enter the charts. See also S. Maconie: *Blur: 3862 Days: the Official History* (London, 1999).

DAVID BUCKLEY

**Blüthner.** German firm of piano makers. Julius Blüthner (*b* Falkenhain, nr Leipzig, 11 March 1824; *d* Leipzig, 13 April 1910) began working as a cabinet maker. After working for Hölling and Spangenburg (piano makers) in Zeitz, he started his own small business in Leipzig in 1853, building grand pianos with the assistance of three men and a boy. He patented his 'repetition action' after his success at the 1854 Munich Industrial Exhibition. In 1864 he began making upright pianos. He expanded his business as he won prizes and medals at various exhibitions and attracted orders from royalty. He strove constantly to refine his instruments and this work culminated in the 1873 patent for the aliquot scaling of grand pianos. This added a fourth, sympathetic ('aliquot'), string to each trichord group in the treble to enrich the piano's weakest register by enhancing the overtone spectrum of the instrument. The ALIQUOT string is tuned an octave higher than, and runs parallel to, the normal strings, but is elevated where the hammer strikes so that it is not struck directly, but vibrates in sympathy with the other strings (the illustration shows the modified aliquot scaling system introduced by the firm in 1991; for an illustration of the original system, see *Grove6*). Julius Blüthner personally tested every piano; his sons, Max, Robert and Bruno, later took over this responsibility. Bruno, who had spent some time with the American piano manufacturer Chickering, took charge of the technical side of the business.

*Blüthner's aliquot scaling for grand pianos: a fourth ('aliquot') string in the treble section is not struck by the hammer but vibrates in sympathy with the other three strings*

The large Leipzig factory was completely destroyed in World War II, but Bruno's son-in-law, Rudolph Blüthner-Haessler, was able to recommence manufacture against considerable odds. Under the direction of his son, Ingbert (*b* Leipzig, 4 March 1936), Blüthner pianos have regained their former eminence; a splendid factory was completed in October 1974, and pianos are still made there largely by hand. From 1972 the company was *volkseigener Betrieb*, or 'owned by the people', but in 1990 it was reprivatized and passed back into the Blüthner family's ownership. By 1995 150,000 pianos had been made. A new range of cheaper pianos was introduced in 1998 under the name of Haessler.

Modern Blüthner pianos, still with aliquot scaling, are prized by many eminent pianists for their quality and craftsmanship. The pianos won the gold medal at the 1965 Leipzig 800th Anniversary Fair. Blüthner instruments are distinguished by a round, slightly romantic tone, with a particularly full treble. Pianos made today have an improved, arched soundboard crown, which enhances the lower overtones. The Blüthner patent action is described and illustrated by Blüthner-Haessler. The firm's British agents since 1876 have been Whelpdale, Maxwell & Codd of London, who in 1934 began to make an entirely British piano, the 'Welmar'.

MARGARET CRANMER

**Blyma, Franz Xaver** (*b* Austria or Bohemia, 1770; *d* Kiev, *c*1812). Russian composer and conductor of Czech birth. In 1799–1800 he was music director at the Petrovsky Theatre, Moscow. Later he entered the service of Count Komburley, provincial governor of Volhynia, where he spent the remainder of his life. In addition to some violin music and two symphonies (op.1, Moscow, 1799; op.2, Bonn, 1806), Blyma composed (in 1798) the score for *Starinnïye suyatki* ('The Old-Time Yuletide'; three acts, libretto by A.F. Malinovsky), one of the most popular Russian Singspiele of its day. First performed at the Petrovsky under the composer's direction on 3/14 February 1800, it remained in the repertory until the 1830s, epitomizing the sentimental approach to national subject matter that characterized the early Romantic style in Russia. The neglible plot – a couple of maidens tell fortunes and are betrothed – serves as an excuse for a pageant of old ceremonies, costumes, song and dance.

One of the divining songs (*podblyudnïye*) the maidens sing is 'Slava' ('Glory'), famous owing to its use in Musorgsky's *Boris Godunov*; in *The Old-Time Yuletide* it is heard (for the first time on stage) in its natural habitat, accompanying a domestic ritual (an excerpt, together with one from the overture, is printed in Findeyzen). During the Patriotic War of 1812, it became customary to insert the names of valorous officers into the 'Slava', turning it into an expression of civic sentiments. This direction was continued by Alexey Nikolayevich Titov in his patriotic opera of 1817, *Muzhestvo kievlyanina, ili Vot kakovïye russkiye* ('The Courage of a Kievan, or That's what Russians are Like'), where it serves as a climactic chorus in praise of the Great Prince Svyatoslav. Musorgsky's use of the song to epitomize a tsar's coronation may thus be seen as a further continuation along this line of transformation.

RICHARD TARUSKIN

**Blyth, (Geoffrey) Alan** (*b* London, 27 July 1929). English critic. Educated at Rugby and Oxford, where he studied with Jack Westrup, he began writing criticism in *The Times* in the early 1960s and later in *The Listener* and *Gramophone*, and quickly made a mark as a sure judge of the human voice and performing style. He was an associate editor of *Opera* magazine (1967–83), and worked as a staff critic for the *Daily Telegraph* (1977–89). A prolific writer with wide experience, on singers and on opera from Mozart to the present day, Blyth has edited discographic reviews of opera (*Opera on Record*, London, 1979, 1983, 1984; *Opera on CD*, London, 1992, 2/1994; *Opera on Video*, London, 1996) and song (*Song on Record*, London, 1986–8) and has written *Wagner's Ring: an Introduction* (London, 1980) and *Remembering Britten* (London, 1981).

□

**Blyth, Samuel** (*b* Salem, MA, bap. 13 May 1744; bur. Salem, 13 Jan 1795). American craftsman and organist. He worked all his life in Salem, where from 1766 to 1783 he occasionally played the organ at St Peter's Church. He also ran a boarding-school for girls, and is recorded in Salem account books as a painter of ships, carriages, carpets and canisters, a gilder and a maker of Venetian blinds. Only one musical instrument by him is known: a spinet from about 1785, now in the Essex Institute, Salem. It is one of the few extant examples of 18th-century American plucked-string keyboard instruments, and is modelled on English types. The instrument has a range of *G*/*B* to *f'''* and has a mahogany case, with the painted inscription 'Samuel Blyth SALEM Massachusetts Fecit' over the keyboard. A bill dated 7 February 1786 from Samuel Blyth to Mrs Margaret Barton 'To making a Spinnett for her daughter – L 18 . . 0–0' is also in the Essex Institute.

CYNTHIA ADAMS HOOVER

**Blytheman** [Blythman], **John.** *See* BLITHEMAN, JOHN.

**Blyton, Carey** (*b* Beckenham, 14 March 1932). English composer. He trained at Trinity College of Music, London (1953–7), took the London BMus (1957) and studied with Jersild at the Royal Danish Academy of Music, Copenhagen (1957–8). His subsequent appointments include music editor at Faber Music (1963–74), where he edited Britten's works from *Curlew River* to *Owen Wingrave*, and visiting professor of composition for film, television and radio at the GSMD (1972–83), establishing there the first course of its kind at a British conservatory. Blyton is a skilful miniaturist of generally lighthearted and lyrical music. His songs are exemplified by the cycle *Lachrymae – In memoriam John Dowland* (1956–7), and his extensive works for woodwind by *Dance Variations* (1975), one of many works for saxophone quartet. There is a large body of music for guitar, including *The Oceans of the Moon* (1975). In his many commercial commissions his keen ear for unusual sonorities is evident, as in the BBC television documentary *The Goshawk* (1969), incidental music for the children's serial *Dr Who* and a Royal Society for the Protection of Birds documentary *Flying Birds* (1972). He has written extensively for young performers including stage works such as *Dracula! or The Vampire Vanquished* (1983), and has edited *The Faber Book of Nursery Rhymes* (1968). Several works reveal an interest in Japanese music and certain of its characteristic modes, including his most important piece, the chamber opera *The Girl from Nogami* (1976).

ANDREW BURN

**BMG** [Bertelsmann Music Group]. International record company with interests in music publishing, online music sales and audio equipment manufacturing. A subsidiary of the German media group Bertelsmann, BMG is one of the five companies that dominate the global record market. Based in New York, the company controls over 200 record labels including BMG Classics, RCA Victor Red Seal, Gold Seal, DHM, Melodiya and Arte Nova. BMG also owns the publishing rights to over 700,000 songs, including the catalogues of artists as diverse as The Beach Boys and B.B. King; in 1995 the company took control of Ricordi, whose catalogue contains the operas of Verdi and Puccini.

**BMI** [Broadcast Music Inc.]. *See* COPYRIGHT, §V, 14(ii).

**B mi** [Bemi]. (1) In the medieval HEXACHORD system with hexachords on G, C and F, the third degree of the hexachord on G, hence B♮. The letter-name of this note was written as a square or 'hard' B (for an illustration, *see* SOLMIZATION, fig.2), and the note was therefore also known as 'B quadratum' or 'B durum'. When the system was transposed (*see* MUSICA FICTA, §1(iv)), the symbol could designate the third degrees of other hexachords: F♯, C♯, E♮, A♮, or even other notes.

(2) In medieval treatises, the term was also used for the square B (or 'mi') sign when used as a notational symbol; this symbol was the forerunner of the modern sharp and natural signs, and also gave rise to the modern German use of H for B♮. □

**B molle** (Lat.: 'soft B'). The note corresponding to the syllable *fa* in the soft HEXACHORD, hence B♭.

*See* ACCIDENTAL, §§1–2, and MUSICA FICTA, §§1–2.

**B mollis.** *See* B FA.

**Bo.** Chinese cymbals. *See* CYMBALS, §3.

**Bo, Sonia** (*b* Lecco, 27 March 1960). Italian composer. She studied composition with Renato Dionisi and Azio Corghi at the Milan Conservatory, graduating in 1985; she also studied the piano, choral singing and conducting there, and took further composition classes with Donatoni at the Accademia Musicale Chigiana, Siena, in 1988. Her reputation was established through various national and international competitions: she won first prize in the Guido d'Arezzo competition in 1985 for *Frammenti da Jacopone*, an award from the European Cultural Foundation in 1985 for *Da una lettura di Husserl* and the 1995 city of Trieste gold medal for *Synopsis*. She began to teach composition at the Piacenza Conservatory in 1989.

Bo's music is characterized by a mingling of complex bands of sound, rich in timbral and contrapuntal effects. Works such as *Da una lettura di Husserl* create a fascinating interplay between different blocks of sound within an episodic formal structure. The voice plays a central part in her output both as a means of expression and as a medium through which to experiment with monodic writing, as in *Polittico* and *Studi 'con testo a fronte'*.

WORKS

Orch: Da una lettura di Husserl, chbr orch, 1984; Synopsis, 1987

Choral: Frammenti da Jacopone, female chorus, 1985; Lauda (J. da Todi), spkr, solo vv, chorus, orch, 1987; 3 filastrocche, child's v/children's chorus, 1992; La minestra (G. Rodari), children's chorus, 10 insts, kitchen pots, 1996; Filastrocche del cavallo parlante 1996 (Rodari), spkr, children's chorus, 10 insts, 1996

Solo vocal: Come un'allegoria (G. Caprioni), S, cl, vc, pf, 1986; Studi 'con testo a fronte' (P. Volponi), v, 1989; Polittico, 5 liriche, S (G. Marino, U. Foscolo, T. Folengo, L. Ariosto, T. Tasso), vn, hn, perc, pf, with dance ad lib, 1991–2; . . . rosee le fila (Foscolo), S, fl, pf, 1994; . . . oro alle fila (Foscolo), S, fl, cl, pf, perc, live elecs, 1995; Come si chiamano gli uccelli (Rodari), spkr, 10 insts, whistle, calls, 1996; D'ametista (E. Montale), spkr, b cl, vc, hp, live elecs ad lib, 1996; Con testo a fronte (Volponi), v, 1996

Chbr and solo inst: Wind Qnt, 1982; Nugae, vn, va, vc, 1982; Tre studi, vn, pf, 1984; Str Qt, 1985; Piccolo studio, 2 cl, pf, 1985; D'Iride, fl, cl, perc, pf, va, vc, 1988; 2 bagatelle, fl, gui, 1988; Blankes Turkenschwert, fl, ob, cl, bn, hn, pf, 2 vn, va, vc, db, 1991; 3 canti da Saffo, vn, 1994; Pronto chi fischia? (Rodari), 'speaking', cl, 1995; Dal 'Libro dei prodigi', sax, 1995; Come nella memoria, 3 pezzi, pf, 1996

GIORDANO FERRARI

**Boas, Franz** (*b* Minden, 9 July 1858; *d* New York, 21 Dec 1942). American anthropologist and ethnomusicologist of German birth. He was trained at Heidelberg, Berlin and Kiel as a physicist and geographer (1877–81), and, having gone to Baffinland, North America, to do a survey of Cumberland Sound, he went on to compare Inuit perceptions of space with his own technical mapping. It was during his stay among the Inuits in 1883–4, that he formulated the anthropological perspectives and field methodology that was to shape the character of early 20th-century American anthropology. On his return to

Berlin, he became interested in the methods used by Carl Stumpf, Hornbostel and Herzog in the study of music in other cultures. In 1886 Boas returned to North America to work among the Bella Coola Indians of the Pacific Northwest coast; in 1888 he took a post teaching anthropology at Clark University and settled in the USA, having decided to make Amerindians the centre of his anthropological work.

Boas was well acquainted with other pioneers in the study of Amerindian music, including Alice Cunningham Fletcher, J. Walter Fewkes and Frances Densmore, with whom he was associated through the Bureau of American Ethnology. For some publications Boas and Fletcher shared the services of John Comfort Fillmore as transcriber for their recordings of Amerindian melodies and in 1893, while chief anthropological assistant at the World's Columbian Exposition in Chicago, he and Benjamin Ives Gilman simultaneously recorded a performance in the Kwakiutl exhibit.

Boas was professor of anthropology at Columbia University (1899–1936), and in his teaching he emphasized that music was vital to the integrated ethnological study of indigenous cultures. While curator of ethnology at the American Museum of Natural History (1901–5), Boas organized the Jesup North Pacific Expedition (1902–6), the first comprehensive anthropological survey of the north circumpolar region, during which he and his associates made sound and film recordings. He urged his students to collect music along with other ethnological data. He recorded much material among the Kwakiutl and neighbouring tribes in British Columbia and among the Yoruba in Africa. His publications of the period 1887–1900 include many transcriptions: 'The Central Eskimo' (1888) and 'The Social Organization and the Secret Societies of the Kwakiutl Indians' (1897) served as models for later ethnological treatises that included music. After 1900 Boas developed a keen interest in linguistics and the closely linked oral arts and their accompanying forms (tale and myth, poetry, music and dance), emphasizing the interrelationship of different aspects of culture within the whole cultural frame. His publications (over 600 items) often included song texts with translations.

SUE CAROLE DE VALE/R

**Boatner, Edward Hammond** (*b* New Orleans, 13 Nov 1898; *d* New York, 16 June 1981). American composer. The son of a travelling minister, he became familiar with African American religious folk music at an early age. He studied at Western University (1916), the Boston Conservatory (1921) and the Chicago College of Music (BM 1932). While in Boston, he studied composition with Dett, who shared his interest in spirituals, and became a featured soloist in Dett's ensemble, the Hampton Institute Singers. In 1925 he moved to Chicago where he was active as a singer, organist and choral director, serving from 1925 to 1931 as music director for the National Baptist Convention. After teaching in Texas at Samuel Huston College and Wiley College, he moved to New York (1933) where he opened the Edward Boatner Studio.

Boatner's over 200 arrangements of African American spirituals are his primary musical legacy. Since the 1920s they have been performed by singers such as Marian Anderson, Roland Hayes, Leontyne Price and Paul Robeson. In addition to his collection *Thirty Afro-American Choral Spirituals* (1971), he published several stage works and pedagogical manuals.

WILLIE STRONG

**Boatwright, Howard (Leake)** (*b* Newport News, VA, 16 March 1918; *d* Syracuse, NY, 20 Feb 1999). American composer, violinist and musicologist. He was trained as a violinist in Norfolk, Virginia, by Israel Feldman, made his début at New York Town Hall in 1942 and was assistant professor of violin at the University of Texas,

Austin, from 1943 to 1945. At Yale (BM 1947, MM 1948) he studied theory and composition and viola d'amore with Hindemith, at whose urging he stayed on as assistant professor in music theory. As music director at St Thomas's Church, New Haven (1949–64), Boatwright established a reputation as a pioneer in the performance of early choral music. While in New Haven he also served as conductor of the Yale University Orchestra from 1952 to 1960, and was concertmaster of the New Haven SO (1950–62). He became dean of the school of music at Syracuse University in 1964, and from 1971 was professor of music in composition and theory. He was a Fulbright lecturer in India during the year 1959–60 and received a Fulbright grant to study in Romania, 1971–2. A pioneering scholar of Ives, he was elected to the board of directors of the Charles Ives Society in 1975.

He initially concentrated on sacred choral music and composed both choral works and works for solo voice with piano or instruments. Of his instrument works, the most notable are the Quartet for clarinet and strings, which received the award of the Society for the Publication of American Music in 1962, the Symphony and the Second String Quartet. His earliest choral works are modal; subsequently the chamber works in particular were influenced by Hindemith's middle-period style. In 1966 Boatwright began to develop a style he described as 'dodecaphonic, though not serial', in which he appropriates the total chromatic resource while exercising control over harmony, within the context of a layered, contrapuntal approach. This technique (described in *Chromaticism*) is demonstrated in the Second Quartet, a work which is consistent in style but also impressive in its ability to project a wide variety of moods. A versatile and creative musician, Boatwright also demonstrated an unusually wide breadth of erudition as a scholar.

WORKS

Orch: A Song for St Cecilia's Day, large str ens, 1948; Variations, small orch, 1949; Sym., 1976

Choral: The Women of Trachis (Sophocles, trans. E. Pound), 6 choruses, female vv, chbr orch, 1955; Mass, C, 1958; The Passion According to St Matthew, solo vv, SATB, org, 1962; Canticle of the Sun (St Francis of Assisi), S, SATB, orch, 1963; Music for Temple Service, Bar, SATB, org, 1969; A Song for St Cecilia's Day, S, SATB, orch, 1981; Nunc dimittis and Magnificat, SATB, org (1997); over 20 other works incl. 4 masses, many choral partsongs

TERENCE J. O'GRADY

**Bobescu, Constantin** (*b* Iaşi, 9/21 May 1899; *d* Sinaia, 26 May 1992). Romanian composer, violinist, teacher and conductor. He studied the violin in Iaşi (1908–12) with Eduard Caudella and in Craiova (1912–16) with Jean Bobescu and then entered the Schola Cantorum in Paris (1920–24, 1926–7) where he studied with Nestor Lejeune (violin), d'Indy (composition) and Paul le Flem (harmony). After starting his career as a solo violinist he became professor of violin at the conservatories of Cernăuţi and Braşov. In 1935 he was appointed conductor of the Radio Symphony Orchestra in Bucharest where he remained until 1972. Bobescu's compositions range in theme from historical and biblical subjects to satirical comedy. Though post-Romantic in structure, his music has a pronounced lyrical character: the melodic writing is essentially Romanian but it is clothed in a traditional European harmonic language. His lively orchestration displays a perfect handling of timbres, especially of strings, which he used to achieve impressionistic shading in the operas.

WORKS
(*selective list*)

Ops: Zobail (1, Bobescu, after G. Coşbuc), 1929, Cluj, Romanian Opera, 10 March 1930; Trandafirii roşii [Red Roses] (3, Bobescu, after Z. Bârsan), 1934, Cluj, Romanian Opera, 15 Jan 1937; Ioan Botezătorul [John the Baptist] (5, Bobescu, after H. Sudermann), 1939, broadcast, Bucharest radio, 1939 [Act 2 only]; Gaiţele [The Clackers] (3, after A. Kiriţescu), 1980, unperf.

Orch: Fatma, sym. poem, 1924; Preludiu la jocul Irozilor [Prelude to the Clowns Game], sym. poem, 1928; Cadix, scherzo, vn, orch, 1936; Haşiş, Lunaticul şi Paiaţa [Hashish the Lunatic and the Clown], 3 sketches, 1936; Noaptea sfîntă [Blessed Night], sym. suite, 1940; Rapsodia română [no.1], 1948; Rapsodia română [no.2], 1950; 6 dansuri simfonice româneşti [6 Romanian Symphonic Dances], 1953; Vn Conc., 1954; Siciliană, str, 1969

Vocal: Barbu-Lăutarul [Barbu the Musician] (V. Alecsandri), 1v, pf, 1919; Dragoste de ţigancă [The Love of a Gypsy Woman], 1v, pf, 1922; La mormîntul unei tinere fete [At the Grave of a Young Girl], 1v, pf, 1922; Legenda şi Eva [Eve and the Legend] (L. Blaga), 1v, pf, 1924; Basm [Fairy Tale], 1v, pf, 1932; Bratul [The Arm] (Focşăneanu), 1v, pf, 1935; Calul-dracului [Devil Horse/The Devil's Horse], chorus, 1935; Betivul [The Drunkard], male chorus, 1935; Cornul [The Horn], male chorus, 1935; Greierele şi furnica [The Crickets and the Ant] (ballad, T. Arghezi), 1v, PG, 1954, arr. orch, 1958

VIOREL COSMA

**Bobillier, Marie.** *See* BRENET, MICHEL.

**Bobïlyov, Leonid Borisovich** (*b* Tula, 15 Oct 1949). Russian composer. He graduated from the Moscow Conservatory in 1973, having studied composition with Chulaki and the piano with N.P. Yemel'yanova. From 1973 to 1979 he taught at the Dargomïzhsky Music School in Tula, and in 1979 he was appointed senior

lecturer of theory and composition at the Moscow Conservatory. He is a member of the Composers' Union.

Bobïlyov's career began in the 1970s when varied trends ranging from the avant garde to the exploration of ancient Russian art and folklore co-existed in Soviet music. In his operas, instrumental and vocal works, Bobïlyov utilizes a broad stylistic palette. His two operas for children – *Kto pridumal puskat' mïl'nïye puzïri?* 'Who Thought up the Idea of Blowing Bubbles?' and *Privet, Alisa!* 'Greetings to you, Alice!' – are particularly eclectic, embracing both dodecaphonic and rock elements. In his vocal works, his concern for the expressivity of words frequently gives rise to melodic recitative and other narrative forms (such as in the monologue and narrative from the opera *Poslednim tselovaniyem* 'With a Last Kiss' after Pasternak's *Doktor Zhivago*, in the opera *Propavshaya okhota* 'The Wasted Hunt' and in the oratorio *Materi, syostrï, zhenï* 'Mothers, Sisters, Wives').

In his instrumental compositions Bobïlyov follows Stravinsky and Prokofiev in taking the character of an instrument as a point of departure; these works are similarly eclectic and have theatrical tendencies. His works are frequently performed at the Moscow Autumn Festival and have been recorded by Melodiya. In addition to composing, he has studied the history and principles of teaching composition in Russia, and has systematically developed theoretical courses in polyphony, harmony and orchestration for composers.

WORKS

Ops: Grigory Melikhov (A. Medveyev and L. Lukinov, after M. Sholokov), unfinished; Privet, Alisa! [Greetings to you, Alice!] (children's op, V. Fisherman, after L. Carroll), 1983; Propavshaya okhota [The Wasted Hunt] (T. Vershinina and Bobïlyov, after V. Astaf'yev), 1983; Kto pridumal puskat' mïl'nïye puzïri? [Who Thought up the Idea of Blowing Bubbles?] (children's op, O. Volozova), 1990; Poslednïm tselovaniyem [With a Last Kiss] (Bobïlyov, after B. Pasternak), 1994

3 orats on verses by Russian poets, 1977, 1980, 1990

**Bobization.** The name used in Nikolaus Gengenbach's *Musica nova, Newe Singekunst, so wol nach der alten Solmisation, als newen Bobisation und Bebisation* (Leipzig, 1626/*R*), and later in J.G. Walther's *Musikalisches Lexicon* (Leipzig, 1732), for the SOLMIZATION system also known as BOCEDIZATION.

□

**Bobo, Roger** (*b* Los Angeles, 8 June 1938). American tuba player. He studied from 1956 to 1961 with Donald Knaub and Emory Remington at the Eastman School of Music, and subsequently with William Bell and Robert Marsteller. He was a member of the Rochester PO (1956–62), the Amsterdam Concertgebouw Orchestra (1962–4) and the Los Angeles PO (1964–91). From 1965 to 1975 he was also a member of the Los Angeles Brass Quintet. In 1990 he was appointed professor at the Lausanne Conservatoire.

Bobo has made a very significant contribution as a soloist. In April 1962 he gave the first ever Carnegie Hall recital for solo tuba. About 100 solo pieces have been written for him, including concertos by William Kraft (1974) and Harut'unyan (1994). He has given many performances of Vaughan William's Tuba Concerto with leading orchestras worldwide. He has made several solo discs of tuba repertory, and has also written *Mastering the Tuba* (Bulle, 1993).

EDWARD H. TARR

**Bobowski, Wojciech.** *See* UFḲĪ, 'ALĪ.

**Bobrovsky, Viktor Petrovich** (*b* Simferopol, Ukraine, 24 July/6 Aug 1906; *d* Moscow, 24 May 1979). Russian musicologist and pianist. He graduated from the Moscow Conservatory having specialized in piano under F.F. Keneman (1925–30); he then taught piano at a music school in Voronezh (1931–41) while studying theory as a correspondence student at the Central Institute of Music Education, Moscow, with V.A. Tsukkerman (1936–41). After serving on the Russian front from 1941 to 1945, he returned to Voronezh and was invited in 1949 to teach at the department of music theory at the Moscow Conservatory, where he taught music analysis until 1970. Awarded the *Kandidat* degree in 1953, he was a made a *dotsent* in 1958; he also taught at the Gnesin State Institute for Music Education, 1954–63 and 1972–8, and was a senior researcher at the All-Union Institute for Art Research, 1969–79. He was awarded the doctorate in 1975. A member of the Union of Soviet Composers from 1935, he also directed its musicology and criticism section during the late 1960s.

Bobrovsky's early research was concerned with the programmatic potential in music, particularly in the symphonies of Shostakovich. He was also attracted to questions of drama in instrumental music and strove to explain musical form and language in terms of semantics, interpreting form as 'a model of spiritual movement'. He formulated a theory of the variability of functions of musical form (the theme of his doctoral study), in which the general functions of exposition, development and conclusion manifest themselves on various formal levels and may be combined to create a greater complexity of meaning. To this flexible combining of functions he applied the terms 'compositional divergence' ('otkloneniye'), 'compositional modulation' and 'compositional ellipsis', to reflect what is not planned by the standard form, but has emerged under the influence of the specific drama of the composition. A prominent specialist in the works of Shostakovich, he contributed a number of monographs, articles and reviews on the composer, some of which are as yet unpublished; his intense involvement

with Shostakovich's work meant that he responded – publicly or in notes in his journal – to almost all of the composer's new works. He also supported other young composers – Gubaydulina, Schnittke, Butsko – in the press. Bobrovsky's later writings were concerned with general questions in the philosophy of music and sought to investigate issues such as thematism, how music relates to other art forms and the role of music in daily life.

TAT'YANA S. KYUREGYAN

**Bobrowicz, Jan Nepomucen** (*b* Kraków, 12 May 1805; *d* Dresden, 2 Nov 1881). Polish guitarist, composer and publisher. He studied in Vienna with Mauro Giuliani (1816–19). After a short career as a soloist he was made, in 1829, secretary of the senate of the Kraków Republic. When news of the 1830 Warsaw uprising reached him, he volunteered for the Polish Army and served as aide-de-camp to Bem; he was awarded the Virtuti Militari order. On the collapse of the uprising in 1831 he emigrated to Germany. In Leipzig he performed at the Gewandhaus with Karol Lipiński, Clara Wieck and others. Liszt called him 'Chopin sur la guitare'. He wrote about 40 pieces for his instrument, mostly fantasies, marches, polonaises and waltzes, published by Hofmeister or Breitkopf & Härtel. In addition, he revised Carulli's tutor and published his own with Sennewald in Warsaw. He gained particular importance between 1833 and 1861 through the publication of about 380 literary works, among them a limited number of pocket-book editions of Polish classics. (*EMuz*, T. Przybylski; *PSB*, S.P. Koczorowski)

JÓZEF POWROŹNIAK/KLAUS-PETER KOCH

**Bocal** (Fr.). The crook of a bassoon, serpent etc. It has become the American term for a bassoon or english horn crook.

**Bocan.** *See* CORDIER, JACQUES.

**Boccaber, Matteo.** *See* BUECHENBERG, MATTEO.

**Boccaccio, Giovanni** (*b* Certaldo, 1313; *d* Certaldo, 1375). Italian poet and writer. Along with Dante and Petrarch he was among the most influential literary figures in medieval Italy. The illegitimate son of a Tuscan merchant, in 1327 he moved with his father to Naples. There he was introduced into the French-influenced court of King Robert of Anjou, and this milieu influenced his first writings: the *terza rima* poem *Caccia di Diana* (*c*1334), the *ottava rima* poem *Filostrato* (*c*1335), the romance *Filocolo* (1336–8), the first draft of the epic poem *Teseida* (1339–41) and many of his *Rime*. On his return to Florence in 1341 Boccaccio strengthened his literary links with the pure Tuscan tradition, completing the *Teseida* and writing more works, among them the *Comedia delle ninfe fiorentine* (1341–2) and the *Elegía di Madonna Fiammetta* (1343–4). The Black Death, which reached Florence in 1348, inspired Boccaccio's masterpiece, the *Decameron* (1349–51; ed. V. Branca, Turin, 1992), a collection of 100 tales grouped into ten 'giornate' and told, according to the story, by ten young Florentine nobles who have escaped the plagued city. This work, which is an invaluable source of information about 14th-century Italy, made an instant reputation for its author. After 1350 Boccaccio enjoyed a friendship with Petrarch, a source of influence for his late Latin works. He spent his last years mainly at Certaldo, and left his considerable library to the Augustinian convent of S Spirito in Florence.

Many works by Boccaccio contain references to dance and to vocal and instrumental music, although they hardly go beyond stereotyped allusions to the musical experience. There are, however, no descriptions of polyphony, which was surely practised in Florence at that time. Within the frame of the *Decameron* Boccaccio inserted ten ballata texts: one ballata is sung at the end of each 'giornata' by a single member of the group. Only once does the author specify that a lute player accompanies the singer, whereas on three more occasions the whole group joins in, probably doubling the *ripresa*. It is possible that Boccaccio never heard a polyphonic ballata, a suggestion strengthened by the fact that the only one for which a musical setting survives, *Non so qual i' mi voglia*, was set for one voice only by Lorenzo da Firenze. Lorenzo also set Boccaccio's madrigal *Come in sul fonte fu preso Narciso*, this time polyphonically, whereas the text of another madrigal, *O giustizia regina al mondo freno*, set by Niccolò da Perugia, is ascribed to Boccaccio in an unreliable source (*I-PAp* Parm.1081).

The *Decameron* also mentions indirectly a richer variety of poetico-musical repertoires. References vary from the quotations of obscene songs to the performance of old-fashioned *stampite*, and from the singing of *ottava rima*

poems (a genre possibly invented by Boccaccio himself at the time of the *Filostrato*) to that of *laude spirituale*. The later musical tradition of ballatas from the *Decameron* began in 1539, with the first of Girolamo Scotto's nine settings, and continued until the 17th century. Among the other composers to set Boccaccio's poetry were Arcadelt, Francesco de Layolle, Corteccia, Domenico Maria Ferrabosco, Henri Schaffen, Palestrina, Lassus and Sigismondo D'India.

GIANLUCA D'AGOSTINO

**Bocca chiusa** (It.: 'closed mouth'; Fr. *bouche fermée*; Ger. *Brummstimme*). Singing without words and with the mouth closed: that is, humming. Especially in choral passages, the effect can be magical, and composers have used the technique for special colouration. Puccini's use of a humming chorus in the interlude of Act 2 of *Madama Butterfly* poignantly marks the passage of Butterfly's waiting. Verdi uses this choral effect in the storm scene of the final act of *Rigoletto*. Villa-Lobos's *Bachianas brasileiras* no.5 makes a rare use of *bocca chiusa* for solo voice.

In comic opera singers are sometimes called on to sing with their mouths obstructed, such as in *Die Zauberflöte* where Papageno sings with a padlock on his mouth, but that is not a true use of *bocca chiusa*. Although untexted singing has become more common in the 20th century, often this is not hummed but sung on one or more vowels (*see* VOCALISE). The female humming chorus in Holst's *The Planets*, which aids in the depiction of Neptune, 'the mystic', for example, is not marked *bocca chiusa*, and at least some editions suggest that the vocal lines be sung on the vowel 'u' as in 'sun'. Similarly, the solo vocalization in Vaughan Williams's *Pastoral Symphony* is not marked *bocca chiusa*.

ELLEN T. HARRIS

**Boccalino** [Boccalini, Boccarini], **Francesco** (*b* Rome, ?1604; *d* Rome, after 1673). Italian composer and instrumentalist. The census of the Rione Campo Marzio, taken at the time of the plague of 1656, gave his age as 52. He was organist at S Giovanni in Laterano, Rome, from 1631 to 1637, and from 25 August 1633 he was also active at S Luigi dei Francesi as a theorbo player. He also played the violin. From at least 1638 he was in the service of Cardinal Pier Maria Borghese until the cardinal's death in June 1642. Between 1644 and 1649 he was regularly employed in organizing the music for the Festival of St Jerome at the church of S Girolamo degli Schiavoni. The 1656 census describes him as a *scudiero* (groom) to Pope Alexander VII. He was an active member of the Congregazione dei Musici di S Cecilia, and was elected *guardiano* of the organists in 1670.

In 1658 Boccalino was entrusted with organizing the music for the Quarant'ore celebrations in the Borghese chapel in S Maria Maggiore, and he is known also to have composed an oratorio, *Tre fanciulli della fornace di Babilonia*, the music of which is lost. His surviving works (in *F-Pn*, *GB-Och*, *I-Bc*, *MOe*, *Rc*, *Rdp* and *Rvat*) are secular arias and cantatas for one or two voices and continuo, closer in style to Luigi Rossi than to Carissimi. One aria was included in Florido de Silvestris's *Ariette di musica* (RISM 1646[7]).

JEAN LIONNET

**Boccherini, (Ridolfo) Luigi** (*b* Lucca, 19 Feb 1743; *d* Madrid, 28 May 1805). Italian composer and cellist. A prolific composer, particularly of chamber music, with a distinctive and highly wrought style, he is the chief representative of Latin instrumental music during the Viennese Classical period.

1. LIFE.

*(i) 1743–67.* Luigi Boccherini (his first baptismal name seems never to have been used), was the third child of the musician Leopoldo Boccherini (1712–66) and his wife Maria Santa, née Prosperi (*d* Aranjuez, 1776). Leopoldo's activities as a singer, and from 1747 as a second double bass player (*contrabassista soprannumerario*) in the Cappella Palatina, allowed the family only a modest standard of living in their home town of Lucca. Thanks to intensive parental encouragement, the Boccherini children developed their considerable artistic talents early: Luigi's elder brother Giovanni Gastone (1742–*c*1800) began a career as a ballet dancer in 1756 (Grossato, 1993, pp.137–8), appearing in Venice, Trieste, Vienna, Rome and elsewhere, and from 1773 was 'dramatic poet' (*Theatraldichter*) at the Burgtheater in Vienna, where he worked with Calzabigi and made a name as librettist for comic operas (including works by Antonio Salieri and Florian Gassmann) and for Joseph Haydn's oratorio *Il ritorno di Tobia* of 1775. Luigi's elder sister Maria Ester (1740–*c*1800) became a popular and successful solo dancer while she was still very young at the Burgtheater, where she worked with Gluck. The records also mention her appearances as a prima ballerina in Bologna, Venice and Florence between 1763 and 1777; Salvatore Viganò was the son of her marriage to the dancer and choreographer Onorato Viganò. Luigi's sister Anna Matilde (*b* 1744) was a ballet dancer in Vienna and his sister Riccarda (*b* 1747) an opera singer, appearing in Florence in 1777.

Luigi Boccherini probably had his first musical education from his father, as was usual in musicians' families.

He attended the archiepiscopal Seminario di S Martino in Lucca as a day pupil from about 1751 to 1753 and received a comprehensive musical training from the *maestro di cappella* and cellist Domenico Francesco Vannucci, including tuition in singing and cello playing. There is evidence that he sang as a choirboy in Luccan churches and at the Teatro Pubblico in 1753. That autumn he went to study in Rome, where G.B. Costanzi, nicknamed 'Giovannino del Violoncello', is said to have been his teacher (Bonaventura, 1931). It is not known exactly how long he remained there, but he was back in Lucca by the summer of 1756, making his début on 4 August 1756 with a cello concerto. Through the sympathetic support of Giacomo Puccini, *maestro di cappella* of the Cappella Palatina and organist at S Martino, he made a number of further appearances on local occasions involving sacred music and at other festivities. Judging by the fees he commanded, the young Boccherini must already have been regarded as one of the city's outstanding musicians.

In 1757 Boccherini may have accompanied his father and his elder siblings at engagements in Venice and Trieste. In any case, he made a very successful appearance with his father in Vienna in the spring of 1758 as a soloist in the Musikalische Fasten-Accademien at the Burgtheater. Subsequently, they were both engaged as *musici* in the imperial capital from Easter until the autumn, playing in the orchestra of the German theatre of the imperial court theatre, the Kärntnertortheater, directed by Count Giacomo Durazzo. Most of the music Boccherini played there was ballet music, by Starzer, Gassmann and Gluck. Father and son returned to Vienna for further engagements in the same capacity in 1760–61 and 1763–4, on each occasion for a full theatrical year beginning after Easter. In Vienna, Boccherini encountered strong competition as a soloist; the known sources indicate that he did not appear at the academies of the imperial court as often as other cellists in the city, and there is documentary evidence only for two solo concerts given by him in Vienna in 1763. The sources provide only fragmentary information about Boccherini's other movements between the end of 1758 and 1764. He gave several concerts in Lucca; on 19 March 1761, in Florence, the 'celebre suonatore di Violoncello' earned much applause for a concert of music by himself, its mode of composition being described by the diarist who mentions it as being 'of a completely new kind' ('d'un maniera dell tutto nuova', *I-Fas*, Ospizio dei Melani Ms.34, p.230); and he appeared in Modena on 7 January 1762. No programmes for his solo concerts are known. Neither Vienna nor the Italian cities could offer a cello virtuoso of the time the means to make a living purely as a soloist. During a period of intensive creativity in 1760 and 1761, Boccherini wrote his first significant compositions, 18 in all: the trios op.1, the quartets op.2 and the duets op.3, all for strings (the opus numbers cited in this discussion are those from Boccherini's own catalogue, which often differ from the published opus numbers; see §5 below). In April 1764 an application Boccherini had made in 1760 for a post as cellist in the Cappella Palatina of Lucca was finally granted. A commission to compose a cantata for the local election festivities (*Tasche*) in December 1765 in Lucca, shows that he was by then recognized as a composer. In July 1765 he met G.B. Sammartini at festival concerts in Pavia and Cremona, where he and his father were making a well-paid appearance before Leopold I, Grand Duke of Tuscany. In April 1766 he applied for an orchestral position at the Teatro Alibert in Rome, where he gave a solo performance, but it seems that he was unsuccessful. The story of Boccherini's membership for six months of a string quartet, with the violinists Filippo Manfredi and Pietro Nardini, and Giuseppe Cambini as the viola player (recounted by Cambini in his *Nouvelle méthode* of *c*1795 and in *AMZ*, vi, 1803–4, cols.781–3), may relate to this period, although their alleged study of Haydn's early quartets as well as Boccherini's own does not seem plausible at this date. Soon after the death of his father in August 1766 Boccherini and his friend Manfredi, *primo violino* of the Cappella Palatina, went to Genoa, where they enjoyed the patronage of the nobility. Boccherini wrote at least one of his two oratorios for the oratorian congregation in that city. In September 1767 they left Genoa together, intending to travel to London; the records show that they were in Nice on 5 October.

*(ii) 1767–86.* The next stop on their tour was Paris, where Boccherini and Manfredi stayed for six months at the most. There Boccherini came under the patronage of the influential Baron de Bagge (Charles-Ernest Ennal). Boccherini was not an unknown when he arrived, for in April 1767 Jean Baptiste Venier had published his first six string quartets there as op.2, and in July Bailleux issued his first six trios for two violins and cello as op.1; the *Mercure de France* (April 1768) described these works as 'very effective'. Paris was the main place of publication for Boccherini's works throughout his lifetime, although

*Luigi Boccherini*

the only work published under his own supervision was the series of six trios op.4, G83–8, issued by Venier in March 1768. However, the most important product of his visit to Paris was the set of six sonatas for keyboard with violin accompaniment op.5, which Boccherini dedicated to the amateur keyboard player Anne Louise Boyvin d'Hardancourt Brillon de Jouy, and which was distributed in numerous copies and editions into the 19th century. Boccherini performed at private concerts in the salons of Baron de Bagge, Mme Brillon de Jouy and no doubt other figures of Parisian society. His only recorded public appearance in Paris was at the Concert Spirituel on 20 March 1768, when Manfredi played a violin concerto of his own composition and Boccherini performed one of his own cello sonatas. The *Mercure de France* praised Boccherini's performance but the *Mémoires secrets* of Louis-Petit Bachaumont speak of his harsh playing and a lack of harmonious chords (Rothschild, 1962, p.33). After a second appearance by Manfredi on 4 April, the two men left the French capital, but in a change to their original plan they went not to London but to Madrid, having been promised posts there by the Spanish ambassador. By spring 1768 they were playing in the orchestra of an Italian opera company in Aranjuez. The sources mention a performance of Gian Francesco de Majo's *Almeria* to which Boccherini contributed an interlude aria with cello solo. The 'Compagnia dell'opera Italiana dei Sitios Reales' enjoyed the patronage of Crown Prince Carlos, Prince of the Asturias, to whom Boccherini's six trios op.6 of 1769 are dedicated. The company performed in the newly equipped theatres of the royal residences at Aranjuez and La Granja of S Ildefonso, where the Spanish court regularly stayed in spring and summer. There must also have been performances at the Escorial and perhaps at the hunting lodge of El Pardo. The company's base was the castle of Boadillo del Monte near Madrid, the principal home of the Infante Luis Antonio Jaime of Bourbon, younger brother of King Carlos III. Boccherini seems to have been a member of the opera company until 1770, and Manfredi was its first violinist until 1772. In the autumn of 1768 Boccherini was with the company when it visited Valencia, and ate there with Giacomo Casanova, who described him as 'célèbre' (*The Story of my Life*, xi, chapter 4). The orchestra performed Boccherini's first sinfonia concertante (G491) in the 'academies' of July 1769 at the Teatro del los Caños del Peral in Madrid, probably with the composer playing the solo cello part in the second movement, and Niccolò Piccinni's *La buona figliuola* was given in Aranjuez in the spring of 1769 with Boccherini's overture G527, based on the Symphony G490. Boccherini must also have played at many private concerts in the houses of the nobility in Madrid and the Sitios, as the dedication of his series of quartets op.9 (1770) 'alli Signori Diletanti di Madrid' indicates. About 1770 he married Clementina Pellicia, second soprano in the opera company; of the six children of this marriage only Boccherini's two sons Luis Marcos and Jose Mariano survived him.

On 8 November 1770 Boccherini entered the service of Don Luis in Aranjuez as *compositore e virtuoso di camera* at a salary of 14,000 reals (raised to 18,000 in 1772). He had dedicated his quartets op.8 to Don Luis a year before. This relatively well-paid position led to a marked increase in Boccherini's activity as a composer, and he immediately extended the range of genres in which he worked with his quintets and sextets for strings and flute or oboe (the sextets op.16 and 'quintettini' op.17, 1773), his series of six symphonies op.12 (1771), and above all his first two series of string quintets, each containing six works, opp.10 and 11 (1771). The string quintet formation with two cellos that Boccherini created seems to have resulted from the fact that Don Luis had a string quartet which with Boccherini himself could become a quintet. During these years most of his compositions were very soon published, the majority of them in Paris. According to a later statement by Boccherini, his annual quota of music written for Don Luis was to comprise three *opere*, each of six compositions. On Don Luis's morganatic marriage in 1776 he moved his residence first to Velada near Talavera, in 1777 to Cadalso de los Vidrios, and at the end of 1777 to Las Arenas de San Pedro in the Sierra de Gredos, taking Boccherini with him. Don Luis's staff now also included Boccherini's brother Giovanni Gastone.

From the seclusion of Las Arenas, Boccherini made energetic efforts to resume contact with the musical world. He set up a business relationship with the publishing firm of Artaria in Vienna in 1780, and in 1781 entered into a short correspondence about the firm with Joseph Haydn, whom he greatly admired. In 1783, through the Prussian envoy at the Madrid court, he sent compositions written in his own hand to Crown Prince Friedrich Wilhelm of Prussia, an enthusiastic cellist. The prince immediately wrote a personal letter back expressing his lively interest in new works, which Boccherini satisfied by sending some of his earlier compositions to Berlin; however, his conditions of service with Don Luis stipulated that he was not to compose for any other patron at the same time. Perhaps to ensure that he remained in Madrid rather than going to Berlin, Don Luis improved these conditions: under his renewed contract of 17 August 1784, Boccherini received a additional 12,000 reals for the compositions he was to write. If the dates in Boccherini's own catalogue of his works and on the surviving musical manuscripts are correct, his creative production at this period was already considerably reduced. Apart from the six string quintets op.36 of 1784, he apparently wrote no new chamber music for the four years from 1782, and for the three years 1783–5 the only other work mentioned in the records is the villancico G539, a Christmas cantata.

Boccherini's wife and his patron Don Luis both died in 1785. At his petition, King Carlos III granted him an annual pension of 12,000 reals, and he was promised the next place to fall vacant in the Real Capilla. The entry into the Real Capilla in 1787 of another cellist, Francesco Brunetti, then only just 20 years old, may be the origin of the legend that jealous rivalry existed between Boccherini and Francesco Brunetti's father Gaetano, a violinist of high standing in the Real Capilla and music master to the Prince of the Asturias. At the end of 1785 or early in 1786 Boccherini returned to Madrid and was nominally appointed a member of the Real Capilla (*músico agregado a la Real Capilla*).

*(iii) 1786–96.* On 21 January 1786 Boccherini was appointed 'compositeur de notre chambre' to Crown Prince Wilhelm of Prussia, who was crowned king as Friedrich Wilhelm II in the same year (Rothschild, 1962, p.59). The post carried an annual salary of 1000 talers. Subsequently Boccherini sent his new patron in Prussia 12 instrumental works a year, almost without a break, most of them string quartets and quintets. The only gap

in this regular production of works was in 1791; possibly the 12 concert arias G544–55 were composed that year. It now seems unlikely that Boccherini himself ever went to Prussia as earlier biographers assumed (solely on the evidence of a letter of doubtful authenticity from Breslau). More probably, he continued living in Las Arenas near Madrid for the rest of his life. From March 1786 onwards he was also engaged in Madrid at a salary of 1000 reals a month as *director de orquesta y compositor* by María Josefa Alfonsa Pimentel, Duchess-Countess of Benavente and Duchess of Osuna, a notable patron of music. It is not known whether this appointment continued after the ten months mentioned in the documents, and if so for how long. According to the account of his travels (1834) by the English writer William Beckford, Boccherini was still in the duchess's service at the end of 1787. His music was evidently highly esteemed by the Benavente-Osuna family, for its music library contained a large number of his works from 1761 to 1787 (111 items, including compositions dedicated to the duchess from 1782, 1786 and 1787), and his opera or zarzuela *La Clementina* was performed at the duchess's palace in Madrid in 1786 (the only other recorded performance was in Valencia in 1796). Beckford tells an amusing story about Boccherini's feeling for dance and sense of musical decorum at a ball given in the Madrid palace of a rich member of the Pacheco family in December 1787. In the same year Boccherini married María del Pilar Joaquina Porretti, daughter of a former first cellist of the Real Capilla who had died four years earlier and who had been admired by Farinelli.

Carlos III died in 1788 and was succeeded by his son Carlos IV, the former Prince of the Asturias. The music-loving monarch, who played the violin himself, established both a chamber music ensemble (*músicos de la real cámera*, with Gaetano and Francesco Brunetti) and in 1795 the royal chamber orchestra. Boccherini was not a member of either group, but according to tradition he was recruited by the king to perform with him in quartets and symphonies, and suffered from his 'ear-splitting' playing (letter, François de Fossa to Louis Picquot, 8 August 1847; see Ophee, 1981). There was still great interest in Boccherini's music in Paris; around 1790–91 he had a private patron there, a man called Boulogne who perished in the chaotic aftermath of the French Revolution (possibly the taffeta manufacturer Jacques-Laurent Boulogne, 1753–94). Boccherini's chamber music was performed at concerts in his house, with Viotti as first violin, as Boccherini wrote to Pleyel on 4 January 1798. According to Boccherini, Boulogne's music library contained transcripts of 110 of his works. Friedrich Wilhelm II owned copies of the same works, also purely for private use.

*(iv) 1796–1805.* Boccherini's last nine years were troubled by illness and misfortune. His unmarried daughter Joaquina died in 1796 at the age of about 25. In the same year Boccherini accepted an offer from the Parisian publisher Ignace Pleyel, and after brief negotiations sold him 58 works (opp.44 to 54) for 7200 reals. Immediately afterwards, negotiations began for the sale of 110 other works written earlier, and an unhappy chapter in Boccherini's life began. Friedrich Wilhelm II died unexpectedly in 1797. Boccherini petitioned his successor for employment, but on 2 March 1798 the new king refused his application, and declined to grant him a pension. He finally sold the 110 works mentioned above to Pleyel for 9600 reals (letter to Pleyel, 24 December 1798). It was understandable that Pleyel at first hesitated over the purchase, since a number of these works had already been distributed for years by other publishers. However, the letters to Pleyel (reproduced in an appendix to Della Croce, 1988) suggest that Boccherini's generous and honourable behaviour was often answered by suspicion, discourtesy and procrastination; though it is also clear that Pleyel's letters (which do not survive) contained praise of Boccherini's music. Pleyel also dedicated three of his own string quartets (B365–7) to Boccherini in 1803. In any event, in 1798 and 1799, and at longer intervals thereafter, Pleyel's published collections meant the concentrated distribution of works by Boccherini, some of which had lain unknown for as long as 12 years. Pleyel took considerable liberties in his choice of works and the order in which he printed them, thus contributing a good deal to the confusion surrounding the opus numbering of Boccherini's printed compositions. Boccherini's next publisher was Sieber in Paris.

The patronage of the house of Benavente-Osuna came to an end, at the latest, when the duke and duchess moved to Paris in 1799. In 1798–9 Boccherini wrote a dozen arrangements of his own works for guitar, two violins, viola and cello for François de Borgia, Marquis of Benavente (not a member of the same dynasty). At this time he was turning increasingly to vocal music: he wrote the *Scena dell'Ines di Castro* for the stage by April 1798, and a second opera, *Dorval e Virginia*, which was performed during the carnival season of 1799–1800 in Turin but is now lost. Of his sacred works, he wrote a Mass (now lost) and a second version of his *Stabat mater* in 1800, and the Christmas cantata op.63 (now lost) in 1802. In 1799, flattered by reports of the popularity of his works in Paris and hoping for new patronage, Boccherini composed the six piano quintets op.57 with a dedication to the French nation. The invitation to him to become a member of the administrative council of the Paris Conservatoire may have been a response to this dedication; however, Boccherini's great-grandson Alfredo Boccherini said in his biography of the composer that Boccherini declined the post. He finally found a new patron in November 1800 in the person of Lucien Bonaparte, French ambassador in Madrid. Boccherini organized musical performances for him, and continued writing works dedicated to him even after Bonaparte was recalled from Spain in December 1801. On 20 January 1802 Joseph Bonaparte granted Boccherini a pension of 3000 francs a year. Nothing is known about Boccherini's connection with Tsar Aleksandr I of Russia apart from the dedication to him of the Christmas cantata op.63. The composer's grief at the deaths of his two daughters Mariana (*b* 1782) and Ysabel in 1802, and then of his fourth daughter Maria Teresa and his second wife two years later, must have hastened his death. In the late 1790s he had a friendly paternal relationship with the singer Pierre Garat and the violinist Pierre Rode, whom he is said to have helped with the orchestration of a concerto. He taught the young violinist Alexandre-Jean Boucher how to interpret his works, but there is no evidence that he regularly taught either the cello or composition. Unfortunately, he never wrote a treatise describing what must have been his outstanding cello technique. Musicians of note visited Boccherini in Madrid,

including the cellist B.H. Romberg in 1801 and the singer and pianist Sophie Gail in 1803; she found him living in a state of exhaustion in a small apartment consisting of a single room with a gallery (at Calle de Jesus y Maria 5, near the Plaza Tirso de Molina).

Towards the end of his life Boccherini's financial circumstances were modest and his health poor. He seems to have given up composition in 1804, with his unfinished String Quartet op.64 no.2. He died of peritoneal tuberculosis in 1805 and was buried in the church of S Justo y Pastor in Madrid. In 1927 his remains were taken to Lucca and re-buried in the basilica of S Francesco. A second exhumation in 1995 showed that Boccherini was about 1·65 metres tall and of slight build; the middle finger of his left hand was chronically inflamed, from playing the cello, and he suffered from epicondylitis of the left arm and elbow and arthrosis of the cervical vertebrae. An inventory of his possessions in his own hand, drawn up in 1787, indicates that he owned two Stradivari cellos.

2. SOURCES. The manuscripts Boccherini left on his death, about half of them music manuscripts, were kept by his family in good order, in ten fascicles, until they were burnt in the Spanish Civil War of 1936–9. Along with many musical autographs and transcripts of letters, the catalogue of Boccherini's works he himself had kept from 1760 onwards was lost. Fortunately it had been published in 1851, edited by Louis Picquot, who conducted a correspondence with Boccherini's grandson Fernando in 1848; Alfredo Boccherini, a son of Fernando, published another edition in 1879. According to Alfredo, Boccherini's own catalogue was not complete: he excluded all his vocal works up to 1799, certain orchestral works, his arrangements, and all his solo sonatas and concertos. There is reason to think that several other items which he omitted to record may be authentic; the catalogue may reflect a system distinguishing between music composed for a particular performance, particularly by himself (excluded from the catalogue), and music written for publication (included).

Five further catalogues of works with incipits in Boccherini's own hand are also preserved; he drew them up during his negotiations with Pleyel in 1796–7: (1) 1796: *Nota delle opere non date ancora a Nessuno*, 58 works, published by Bonaventura (Rome, 1931) (Sotheby's catalogue 1985); (2) 1796: *Catalogo delle opere da me Luigi Boccherini cedute in tutta Proprieta al Sigr. Ignazio Pleyel* (*GB-Lbl*); (3) 1797: *Nota della musica mandata a Parigi l'anno 1790 o 1791* (*F-Pn*); (4) 1797: piano quintets op.56 (*F-Prothschild*); and (5) 1797: string quintets opp.40–43, with autograph note, *In tutto 26. Pezze, che unite alle 84. dell'altro Catalogo formano pezze = 110 =* (*US-NYpm*). Questions of authenticity and bibliographical matters are examined in Gérard's thematic catalogue (1969).

In his own catalogue, Boccherini adopted a conventional numbering system in which (with a few exceptions) six works of like kind were assigned to each opus. Each opus was 'grande' or 'piccola' according to whether the works were full-length (usually four movements) or short (usually two movements, sometimes called 'quartettinos' or 'quintettinos'). Unfortunately, Boccherini's publishers used totally different numbering systems; and in some cases his publishers, notably Pleyel, confusingly regrouped his sets and later publishers used new numberings of their own, so that some works can be found under three or more numbers; and occasionally (as in the Berlin manuscripts) yet further opus numbers are appended to manuscript copies. In the discussion below Boccherini's opus numbers are preferred to Gérard numbers where their use clarifies the chronology.

A considerable part of the music preserved in autograph form derives from the extensive collection of L. Picquot, a tax collector who was a major biographer of Boccherini. On his death, a small part of this collection passed into the possession of the Bibliothèque-Musée de l'Opéra in Paris, while the larger part of it (617 works, either printed or autographs) was sold at auction in Berlin in 1904 and 1922 (Ophee, 1981). The works written for Friedrich Wilhelm II are in the Staatsbibliothek, Berlin, Preussischer Kulturbesitz.

3. VOCAL AND ORCHESTRAL MUSIC. The circumstances of Boccherini's life dictated that his main occupation would be the composition of chamber music; and it is clear that his gifts lay in the same direction. His music shows a constant concern with detail rather than with broad effect. His vocal works, including two operas, two oratorios, three cantatas and more than a dozen concert arias, are essentially marginal to his output; though the *Stabat mater* of 1781, revised in 1800 from a soprano solo setting to one for three voices, is by no means untypical with its intimate mood, its sighing appoggiaturas, and the warmth and graceful pathos of the F minor trio movements which flank the 1800 version. Such features may also be seen as in a clear line of descent from Pergolesi's *Stabat mater*.

His orchestral output is more important. Boccherini wrote several cello concertos. A group of four published in Paris (G477, 479–81; 1770–71) are straightforward works retaining many vestiges of late Baroque concerto form but not specially characteristic except in occasional melodic patterns. A concerto published about 1782 (G483), more elaborately orchestrated and less conservative in its treatment, is of greater interest. The best-known Boccherini cello concerto is one in B♭, familiar in the regrettable arrangement published by Friedrich Grützmacher in 1895: its outer movements are a conflation of a sonata (G565) and a concerto (G482), with Grützmacher's own glosses to the harmony, orchestration and solo figuration, and for its slow movement he chose the poetic Adagio of G480, the outstanding movement among the four Paris concertos. In all the authentic cello works Boccherini made extensive technical demands, using the tenor register frequently, with passage-work in high thumb positions, as well as rapid bowing across the strings and long passages in multiple stopping. The violin concerto G486, on which Mozart's K218 was long thought to have been modelled, shows no sign of being authentic and is probably a forgery by Henry Casadesus (see Lebermann, *Acta mozartiana*, 1967).

Boccherini composed at least 27 symphonies. His essentially lyrical gift and his feeling for melodic detail found less scope here than in chamber music; often a true sense of symphonic momentum is lacking. Yet his symphonies do not lack variety of expression. Several are in a conventionally festive and brilliant D major, including the first of the op.12 set, with bustling if inconsequential passage-work, and his last in that key, op.43, in Italian overture form, marred however by an excessive symmetry of phrase-structure. That Boccherini could construct a

symphonic movement cogently is shown by (for example) the Symphony in F op.35 no.4, with its economically argued first movement, characteristically built on a brief, much repeated rhythmic figure. Boccherini's several minor-key symphonies are among his most interesting. They include one in C minor, op.41, with a Pastorale slow movement in a pathetic vein and a tarantella-like finale of considerable power; still more noteworthy is the use of material from the first movement in the Pastorale and particularly the minuet. Such essays at cyclic form are discussed below; one example occurs in the D minor symphony from op.12, where the same slow introduction is used for the first movement and the third (which is a parody of a movement from Gluck's ballet *Don Juan*, familiar as the 'Air de furies' in *Orphée*). Another D minor movement of particular individuality is the first of op.37 no.3, where D minor and major alternate, as do *pp* and *ff*, and where hints of contrapuntal treatment are set against explosive tuttis.

4. Chamber music. Boccherini was a prolific composer of chamber music: he composed well over 100 string quintets, nearly 100 string quartets and over 100 other chamber works. His style became increasingly personal and even idiosyncratic over the 44 years in which he composed, to such an extent that in his late music he sometimes seems to be repeating himself (even if more subtly). The earliest trios and quartets (he was not called upon to use the rare quintet form until he settled in Spain) are in a standard Italian chamber music idiom, apart from their frequent use of the cello in its tenor register (natural in a virtuoso cellist) and an unusually ornate melodic style. Other features of rhythm and texture later to become significant characteristics are seen only in embryo. Early influences on Boccherini's style are hard to specify. He must have been acquainted with works by such Italian composers as G.B. Sammartini and Nardini; in Vienna he must have encountered the music of men like Wagenseil and M.G. Monn; in Paris he must have heard music by the Mannheim composers as well as such local men as Gossec and Schobert. But it would be hard to pinpoint the influence of such men on Boccherini's music, his chamber music in particular. By the works of 1769–70 his technique was fully assured; his style thereafter changed only gradually, gaining in freedom and unorthodoxy to a point where his latest works (from 1790 onwards) show little regard for conventions of form or tonal schemes. Some of the works of these late years suggest a growing inwardness of style, a leisureliness, a preoccupation with delicate effects of harmony, texture or rhythmic figuration at the expense of melody or formal integrity; and it is natural to think that Boccherini's isolation from the main musical cross-currents of Europe may be responsible. No doubt this increasing inwardness of style was in Fétis's mind when he suggested that a listener to a Boccherini work might imagine him to have known no music but his own (Fétis, 1829, p.536). There are features of his later music which might be regarded as Spanish, in particular the tendency to expand by direct repetition and the use of repeated syncopated notes and certain rhythmic tags characteristic of Spanish dances; though much of repetition and syncopation can be found in his earlier music too.

These syncopated rhythms, however, are an important mark of his style. Often they appear in an inner part, to maintain the vitality of an accompaniment or simply to enliven a texture; frequently they impart nervous energy to a melody or special emphasis to a cadence. They are closely allied to Boccherini's highly individual manner of phrasing, with slurs from a weak beat to a strong (ex.1),

Ex.1 String Quartet in G minor, op.24 no.2, 1st movt

which by depriving a line of direct accentuation lends a certain softness and suavity to its melodic contours. This was undoubtedly the kind of effect Boccherini aimed at; the directions 'soave', 'con grazia' and 'dolce' or 'dolcissimo' are among the commonest in his music. Boccherini's performing instructions are often specific and individual: he sometimes coupled terms like 'lentarello', 'malincolico', 'smorfioso' and 'con imperio' with tempo directions. It is perhaps the pervading charm, gentleness or even effeminacy of his music, as well as its lack of firm direction, that drew from the violinist Giuseppe Puppo the well-known remark about Boccherini's being 'Haydn's wife'. Often, however, particularly in his later music, this gentleness is contradicted by brief, explosive *fortissimo* passages (usually of a bar or less; see ex.2).

The most obvious characteristics of his melodic style are the repetition of short phrases, the use of triadic or scalic figuration, the symmetry of rhythmic structure and, above all, the delicate detail, with finely moulded lines much elaborated with trills, appoggiaturas, flourishes and other kinds of musical filigree work (ex.3). All these characteristics may also be noted in the famous minuet from the String Quintet op.11 no.5. To accommodate such florid writing, Boccherini's harmony is apt to be static during the enunciation of melodic material. But his harmonic range was wide for a composer of his time; he was well capable of using sudden shifts of harmony for a dramatic (as opposed to a structural) purpose, and in general his development sections are harmonically faster moving than his expositions.

'Development', however, is an uncertain word to use in referring to Boccherini's sonata-style movements. There is little thematic development in the Viennese Classical sense. He usually repeats some of his thematic material in related keys, and sometimes includes lengthy passages where instrumental figuration occupies the foreground while a harmonic scheme slowly unfolds. His tonal

Ex.2 String Quartet in C, op. 58 no. 1 (1799), first movt.

Ex.3 String Quintet in C minor, op.17 no.1 (1774), 2nd movt.

patterns are not always surely handled: a development section often ends in the wrong key, necessitating a clumsy switch at the recapitulation (particularly between major and minor: for example, opp.18 no.1, 24 no.2, 25 no.6). Boccherini's inclination towards a concertante style also counts against rigorous development. He wrote his chamber music for himself and for other virtuosos to play, always showing a sure grasp of string technique. The high, florid cello parts (which misled Einstein into thinking that they were intended for a second viola: *Mozart*, New York, 1945, p.189) and the elaborate violin parts inevitably represent a heterogeneous element texturally, no less so because Boccherini also assigned virtuoso passage-work to the viola and the second violin, and in quintets to the second cello.

Texture is a dynamic element in Boccherini's chamber music, as can be seen in ex.2, with its characteristic use of tremolando, open strings, double stops and syncopation. In a sensuous, wholly Latin way, he relished the sound of an ensemble of instruments for its own sake. He used bowed tremolandos extensively in inner parts, to lend movement and vibrancy to the music; he used double stops more for their enriching effect than from harmonic necessity, and triple or quadruple stops to create dramatic accents. Such other string devices as harmonics, *flautato* effects, *sul ponticello*, open notes or doubled open and stopped notes for emphasis, *bariolage* and shimmering tremolos across the strings are used with a freedom which would have been inappropriate to music conceived in more dialectical terms. In the arrangement and spacing of parts, too, Boccherini exercised a great deal of freedom, with much overlapping, particularly with two cellos (in the quintets) above the viola or with the first violin and first cello in 3rds or 6ths. The doubling of the two cellos to form a firm, resonant bass is characteristic; so are doubled octaves, either at the top of the texture or in the middle. In this context his imitation of non- or semi-musical sounds may be mentioned, for example, his bird-calls and music of shepherds' pipes and hunters' horns in the Quintet op.11 no.6, entitled 'L'uccelliera' ('The Aviary'), his imitations of Madrid street sounds in the Quintet op.30 no.6, 'La musica notturna della strade di Madrid' (the publication of which he opposed because of its incomprehensibility to anyone unfamiliar with the city), his suggestion of the jew's harp in the Quintet op.36 no.6, and of 'pifferi di montagna' in the Quartet op.58 no.5.

Boccherini's interest in cyclic forms, referred to above, represents another individual development typical of a composer working in isolation. Sometimes it involved merely the linking of two movements with a common slow introduction; elsewhere entire movements or sections of movements are repeated, most usually so that a fast movement already heard reappears as a finale, or so that a central movement is presented with the same music following as preceding it. Sometimes even more complex schemes appear, for example in the Quintet op.39 no.1, where the material is arranged *A–BCDB–EFE*, or in the Quintet op.40 no.4, where the arrangement is *A–BCBDB′CBDB′* (*B′* represents a shortened version of *B*). These early ventures into cyclic schemes may be seen as an interesting attempt by a composer to impose an external unity on music lacking strong internal structure, or as an experiment by a composer of uncommon ingenuity and enterprise in the handling of musical materials, or both.

## WORKS

Editions: *Collection des quintetti de Boccherini pour deux violons, alto et deux violoncelles*, pubd Janet and Cotelle (Paris, 1818–22); *Collection de trios pour deux violons et basse, et pour violon, alto et basse composés par L. Boccherini*, ed. Janet & Cotelle (Paris, 1824) [incl. numbering; JC]

*Le opere complete di Luigi Boccherini*, ed. P. Carmirelli (Rome, 1970–85) [quintets; C]

CHRISTIAN SPECK (1–5, work-list, bibliography); STANLEY SADIE (6–7)

**Bocedization** [bocedigalomani; bobization]. A solmization system traditionally attributed to Hubert Waelrant (1516 or 1517–95), who is reputed to have introduced it in the Antwerp music school he founded in 1547. The seven syllable-names (*voces belgicae*) of the system add one more syllable to the range of the traditional *ut–re–mi–fa–sol–la* hexachord, to give *bo–ce–di–ga–lo–ma–ni*. This changed it into an octave series which could begin on C or F (with B♭). Johann Heinrich Alsted in his article 'Musica' for the *Encyclopaedia septem tomis distincta* (Herborn, 1630) attributed the system to another Netherlander, David Mostart (*c*1560–1615), citing Mostart's, *Korte onderwysinghe van de musyk-konste* (Amsterdam, 1598, now lost). Sethus Calvisius (1556–1615), the most enthusiastic champion of the system, called it 'recently thought out'; he suggested using *pa* for B♭ (and E♭) and *ni* for B♮ (and E♮); his arguments in favour of bocedization appeared in *Compendium musicae pro incipientibus* (Leipzig, 1594), *Exercitationes musicae duae* (Leipzig, 1600) and, after a violent attack on the system by Hippolyte Hubmeier, in *Exercitatio musica tertia* (Leipzig, 1609). An equivalent system, though not known as bocedization, is solmization with the extended hexachord *ut–re–mi–fa–sol–la–bi*, also apparently favoured by Mostart, Erycius Puteanus and Alsted.

□

**Bocham.** *See* CORDIER, JACQUES.

**Bochmann, Christopher (Consitt)** (*b* Chipping Norton, 8 Nov 1950). British composer, teacher and conductor. He studied in Paris with Nadia Boulanger (1967), with whom he continued to work until 1971, and privately with Richard Rodney Bennett (1969–72). In 1968 he went to New College, Oxford (BA 1971, BMus 1972, MA 1976, DMus 1999). After teaching in a number of schools, including Cranborne Chase School and the Yehudi Menuhin School, Bochmann went to Brazil, where he taught at the Escola de Música de Brasília (1978–80). In 1980 he moved to Portugal where he has developed an extensive activity as a teacher at most of the important music schools, particularly the Instituto Gregoriano de Lisboa (1980–90) and the Escola Superior de Música de Lisboa (from 1985), of which he is the present director and head of composition. In 1984 he became conductor of the Portuguese Youth Orchestra.

Bochmann has composed a large number of works in almost all genres except opera, and he has written regularly for young musicians and amateurs. Until the 1980s his music used many of the techniques of the avant garde of the 1950s and 1960s; subsequently, contact with musicians without specialist experience of contemporary music has resulted in greater technical and aesthetic clarity, with higher priority given to the listener's perception.

SÉRGIO AZEVEDO

**Bochsa, (Robert) Nicholas Charles** (*b* Montmédy, 9 Aug 1789; *d* Sydney, 6 Jan 1856). French harpist and composer. His father, Charles Bochsa (*d* 1821), a Czech oboist and composer, settled first in Lyons, and from about 1806 was established as a music seller in Paris. Nicholas studied music with his father, and was remarkably precocious as a performer on many instruments, and as a composer. At the age of 16 he composed an opera, *Trajan*, in honour of Napoleon's visit to Lyons. When his family moved to Bordeaux soon afterwards, he began to study composition formally with Franz Beck, under whom he wrote a ballet and an oratorio, *Le déluge universel*. In 1806 he entered the Paris Conservatoire to study harmony under Catel. He studied the harp under Naderman and Marin, and finally decided to make this his principal instrument, though throughout his life he was a skilful player of almost every known instrument. His reputation as a harpist owed much to his compositions for the harp, which immensely expanded its technical and expressive range; he was constantly discovering new effects, exploiting the full possibilities of Erard's new double action.

In 1813 Bochsa was appointed harpist to the emperor, and in 1816 to Louis XVIII. During this period he composed seven operas for the Opéra-Comique, one of which, *La lettre de change* (1815), had a long run and became known outside France. In 1816 he was commissioned to compose a requiem for Louis XVI, to be used at the ceremony of reinterment of the beheaded king's remains. It was an immense work in 15 movements, with accompaniments for wind band and percussion (since the music was to be used in procession); Whitwell has pointed out remarkable anticipations of Berlioz's *Symphonie*

*funèbre et triomphale*, even to the title of the last movement, 'Récitative et apothéose'.

Meanwhile Bochsa had been developing a lucrative business in forged documents of various kinds, and in 1817 he was compelled to leave the country. On 17 February 1818 the Paris Court of Assize condemned him, in his absence, to 12 years' imprisonment with a fine of 4000 francs, and to be branded with the letters 'T.F.' ('travaux forcés', or forced labour – the standard penalty for forgers). He took refuge in London, where he soon achieved a prominent position in the musical world as a harpist and conductor. On the founding of the RAM he was appointed professor of harp and general secretary, not without opposition. In the next few years he had to face mounting attacks on his character; his forgeries became known, it was rumoured that he had contracted a bigamous marriage with Amy Wilson (having a wife still living in France) and on 4 May 1824 he was declared bankrupt, his creditors receiving only 7d. in the pound. Accordingly on 26 April 1827 he was dismissed. In 1826, however, through the influence of the king, he had been appointed musical director at the King's Theatre, and he retained that post until 1830. There was serious trouble in 1829 when he reduced the salaries of the orchestral players and when, the principal players having resigned, he replaced them with inferior musicians.

During this time Bochsa composed three ballets for the King's Theatre, and gave annual concerts which were exceedingly popular, both for his own brilliance as a harpist and for the curious novelties he introduced. In the 1830s he played in London and the provinces with consistent success, often touring with Henry and Anna Bishop. In August 1839 he eloped with Anna Bishop, following her around Europe and the world on her various tours; at Naples he was appointed musical director of the Teatro S Carlo for two years. He arrived at Sydney from San Francisco late in 1855, became ill and died there.

*Nicholas Charles Bochsa: lithograph by M. Gauci from 'Bochsa's Explanation of his New Harp Effects and Passages' (London, 1832)*

Many accounts state that he wrote a requiem for himself while on his deathbed, but a contemporary source states that he merely wrote down a 'mournful refrain' on a scrap of paper, which was used as the basis for a requiem at his funeral.

Bochsa was one of the most prolific of all composers for the harp: his music is not profound, but it is often adventurous and sometimes brilliant. His harp method was long regarded as a classic.

NICHOLAS TEMPERLEY (text), BRUCE CARR(work-list)

**Bock** (Ger.: 'goat'). A German bagpipe of the western Slav type. *See* BAGPIPE, §7(ii).

**Böck.** German family of horn players and composers. The two brothers, Ignaz (*b* Stadtamhof, nr Regensburg, 1754; *d* Vienna, after 1815) and Anton (*b* Stadtamhof, 1757; *d* Vienna, after 1815), Böck were among the leading horn duettists of the late 18th century. By the age of ten both brothers were studying with Joseph Vogel, a horn player at the court of Thurn und Taxis. In 1775 they went to Vienna and were immediately engaged at the court of Prince Joseph of Batthyány. Though most sources indicate that the Böcks had begun touring as duettists by about 1778, court records show that one or both of them were playing in the Batthyány orchestra from 1778 to 1782 (see Meier). During the 1780s they made concert tours throughout Europe, Scandinavia and Russia, and from 1790 to 1814 they were employed as court musicians by Elector Karl Theodor in Bavaria. Cramer gave one of the most detailed records of a performance by any of the hand-horn virtuosos in a review of the Böcks' concert at Berlin (1783): in additon to praising their tone he commented on an echo effect created with mutes and 'an Adagio that they played in a most song-like manner' in which the second horn sounded two tones at once (probably singing one and playing the other) in certain places. Cramer also mentioned that the Böcks wrote solo parts for concertos (now apparently lost) to which Antonio Rosetti added orchestral accompaniments.

The Böck brothers wrote ten charming duets with bass, op.6 (Leipzig, 1803). Their other works include *O care selve* for four men's voices and two horns (Leipzig, n.d.), *O Waldnachtgrün* for four voices (Leipzig, n.d.) and two sextets for strings and horns, opp.7–8 (Leipzig, 1804); Fétis mentioned a *Concertante* and other works for horn duo. The Böcks' chief contributions lay in their popularization of the horn duo and their use of the mute, which they adopted as early as 1775. After hearing the Böcks perform, Beethoven wrote the muted horn solo for the finale of his Pastoral Symphony, and his posthumous Rondino for wind instruments contains a passage for horn with the chromatic mute.

HORACE FITZPATRICK/THOMAS HIEBERT

**Bock, Jerry [Jerrold] (Lewis)** (*b* New Haven, CT, 23 Nov 1928). American composer. He composed amateur shows in high school and while studying music at the University of Wisconsin (1945–9). After college he joined up with Larry Holofcener, writing revues at Tamiment, an adult summer resort in Pennsylvania, where he met and worked with the Simon brothers, Danny and Neil. With the Simons and others he wrote songs and special material for television, most notably Sid Caesar's 'Your Show of Shows', and contributed songs for a failed revue, *Catch a Star* (1955). His only successes with Holofcener were two songs from the Sammy Davis jr vehicle, *Mr. Wonderful*, the title song and 'Too Close for Comfort'. In 1958 Bock began a fruitful collaboration with lyricist Sheldon Harnick (*b* Chicago, 30 April 1924), writing seven musicals in 12 years. An inauspicious but promising failure about a college-educated boxer, *The Body Beautiful*, nonetheless created the opportunity that resulted in their first critical and popular success the following year. This second musical, *Fiorello!*, based on the life of former New York Mayor Fiorello La Guardia, received the Tony Award for Best Musical and the Pulitzer Prize for Drama (the third musical so honoured). Their next collaboration, *Tenderloin* (1960), although it assembled many of the same illustrious creators and cast of *Fiorello!* and returned to New York City as its historical subject, was relatively unsuccessful critically and commercially, despite one of Bock's most highly regarded scores. In 1963 they produced another fine score to accompany the intimate, modestly popular but still revived *She Loves Me*, the first musical to be directed by Hal Prince.

One year later Bock and Harnick's phenomenally successful and critically lauded musical realization of Sholem Aleichem's Yiddish stories set in the Russian village of Anatevka in 1905, *Fiddler on the Roof*, arrived on Broadway. Directed and choreographed by Jerome Robbins and produced by Prince, it ran for a record 3242 performances. Although both *The Apple Tree* (1966), a novel attempt to present three one-act musicals in a single evening, and *The Rothschilds* (1970), the story of the banker Meyer Rothschild and his five sons, ran over a year, neither show managed to capture the magic or popularity of Tevye the Dairyman and his five daughters in *Fiddler*. According to Harnick, personal conflicts that developed during the production of *The Rothschilds* led to the dissolution of the partnership, and although Bock completed at least two musicals and other works without Harnick, none has been performed professionally. In his most critically and popularly successful shows Bock was able to capture a convincing sound world for the subject at hand, including 1930s popular styles in *Fiorello!*, a pseudo-Hungarian style in *She Loves Me*, and, most effectively, Jewish vernacular musical idioms in *Fiddler*.

WORKS
*(selective list)*

*unless otherwise stated, all are musicals, and dates are those of first New York performances; librettists are shown as (lyricist; book author)*

Mr. Wonderful (L. Holofcener and G. Weiss; J. Stein and W. Glickman), Broadway Theatre, 22 March 1956 [incl. Mr. Wonderful, Too Close for Comfort]

Wonders of Manhattan (film score), 1956
The Body Beautiful (S. Harnick; Stein and Glickman), Broadway Theatre, orchd T. Royal, 23 Jan 1958
Fiorello! (Harnick; G. Abbott and J. Weidman), Broadway Theatre, orchd I. Kostal, 23 Nov 1959 [incl. Little Tin Box, 'Til Tomorrow, When did I fall in love?, Politics and Poker]
Tenderloin (Harnick; Abbott and Weidman), 46th Street, orchd Kostal, 17 Oct 1960
Never Too Late (play, Harnick; S.A. Long), Playhouse, 27 Nov 1962 [one song]
Man in the Moon (marionette show; Harnick; A. Burns), Biltmore, 11 April 1963
She Loves Me (Harnick; J. Masteroff, after M. Laszlo: *The Shop Around the Corner*), Eugene O'Neill, orchd D. Walker, 23 April 1963 [incl. Dear Friend; Ice Cream; She loves me]; television 1979
Fiddler on the Roof (Harnick; J. Stein, after S. Aleichem), Imperial, orchd Walker, 22 Sept 1964 [incl. Matchmaker, Matchmaker; Sunrise, Sunset; To Life]; film 1971
Generation (W. Goodhart), Morosco, 6 Oct 1965 [incid. music]
The Apple Tree (Bock, Harnick and J. Coopersmith, after M. Twain, F.R. Stockton and J. Feiffer), Schubert, orchd E. Sauter, 18 Oct 1966
The Canterville Ghost (television musical, Harnick), 2 Nov 1966
The Rothschilds (Harnick; S. Yellen), Lunt-Fontanne, orchd Walker, 19 Oct 1970
Songs in revues, incl. Catch a Star! (Holofcener; D. and N. Simon), Plymouth Theatre, 6 Sept 1955; The Ziegfeld Follies of 1956, Boston, Schubert, 16 April 1956

GEOFFREY BLOCK

**Bockelmann, Rudolf (August Louis Wilhelm)** (*b* Bodenteich, nr Lüneburg, 2 April 1892; *d* Dresden, 9 Oct 1958). German bass-baritone. He studied singing with Oscar Lassner and Karl Scheidemantel. He was engaged at the Leipzig Opera from 1921 to 1926, making his début as the Herald in *Lohengrin*; he was leading Heldenbariton at Hamburg (1926–32), and at the Berlin Staatsoper (1932–45). He sang regularly at Bayreuth from 1928, as the Dutchman, Gunther, Kurwenal, Sachs and Wotan. In 1930 he created the title role in Krenek's *Leben des Orest* at Leipzig. He sang at Covent Garden (1929, 1930 and 1934–8); and with the Chicago Civic Opera (1930–32). His Nazi sympathies made it difficult for him to resume his career after World War II, and apart from a few appearances at Hamburg and in the German provinces, he devoted his time to teaching in Dresden. Bockelmann had a beautiful voice of sympathetic quality, and he sustained with ease the long Wagnerian roles. His warm, mellow voice, his feeling for poetry and his artistry made him a notable Hans Sachs, as can be heard in his few recordings from the role.

HAROLD ROSENTHAL/R

**Böckh, (Philipp) August** (*b* Karlsruhe, 24 Nov 1785; *d* Berlin, 3 Aug 1867). German scholar. He inaugurated the modern critical study of ancient Greek music almost incidentally, as part of an early work, *De metris Pindari* (Leipzig, 1811), being convinced that in Greek choral poetry words, music and dance formed an integrated whole. Among many gifts he had a strong mathematical bent and may have been led to the study of Greek music by an interest in the Pythagoreans. It was, however, appropriate that ancient Greek music should owe its modern study to the scholar who, above all others in the first half of the 19th century, directed scholarship towards the study of classical civilization as a whole, its history and antiquities as well as its literature. Böckh held chairs at Heidelberg (1807–11) and Berlin (1811–67).

R.P. WINNINGTON-INGRAM

**Bockholdt, Rudolf** (*b* Amsterdam, 25 Feb 1930). German musicologist. He received practical musical training at Heidelberg University from 1950 and studied musicology with Georgiades, philosophy with H.-G. Gadamer and K. Jaspers and ecclesiastical history; he also studied musicology with Handschin in Basle (1952–3). He took the doctorate at Heidelberg in 1960 with a dissertation on the early masses of Du Fay. From 1960 to 1963 he carried out research on medieval music at the Heidelberg and Bavarian Academies of Sciences, and from 1962 he also lectured at Munich University, where he completed his *Habilitation* in musicology in 1970 with studies on Berlioz; he taught there from that year as a lecturer in musicology and was appointed professor in 1977. He retired in 1995. His research, which is concerned with source material (palaeography as well as analysis), covers music of the late Middle Ages, the Viennese Classics, the 19th and early 20th centuries, and musical-textual relationships.

HANS HEINRICH EGGEBRECHT/LORENZ WELKER

**Böcklin von Böcklinsau, Franz Friedrich Siegmund August von,** Reichsfreiherr zu Rust (*b* Strasbourg, 28 Sept 1745; *d* Ettenheim, 2 June 1813). German composer and writer on music. He is reported to have studied composition with Jommelli and F.X. Richter. In his writings on music he stressed the importance of folksong and anticipated the *Gesamtkunstwerk* by advocating the communion of music, poetry and the dance. His *Beyträge zur Geschichte der Musik besonders in Deutschland* (Freiburg, 1790), written as a series of letters, provide valuable insight into musical events in various European cities and reveal an admiring contemporary's views of composers such as Mozart, Gluck, Salieri, Cannabich, Toëschi, Danzig, Lang and Wendling. His other writings on music were collected into a volume of *Fragmente zur höhern Musik, und für aesthetische Tonliebhaber* (Freiburg and Konstanz, 1811). Böcklin's views, however, were not universally respected; his musical opinions, as reported by Christmann, were severely criticized by Gerber (*GerberNL*).

WORKS

Ops (lost): Der Amtmann von Kleefeld, *c*1780; Der Zauberer, *c*1780; Die Wilddiebe, *c*1780; Das Orakel (after Gellert), *c*1783; Der Abend im Garten, *c*1783; Hüon und Armand, *c*1790; Phädon und Naide (J.G. Jacobi), *c*1790

Song collections: 24 Lieder für Junggesellen (Freiburg, 1775); [6] Neuen Lieder für Liebhaberinnen und Freunde des Gesangs und Klaviers (Strasbourg, 1789), lost; Lieder verschiedener Dichter (Heilbronn, 1790)

Miscellaneous: Amusement pour le beau monde, vn, vc, 2 gui, op.35 (Brunswick, n.d.); other songs and short kbd pieces in various anthologies and periodicals; syms., odes, church compositions, lost

**Bocquain** [Bocquam]. *See* CORDIER, JACQUES.

**Bocquay, Jacques.** *See* BOQUAY, JACQUES.

**Bocquet,** Mlle (**Anne** or **Marguerite**) (*b* ?Paris, early 17th century; *d* Paris, after 1660). French lutenist and composer. She played 'miraculously' on the lute, according to Mlle de Scudéry, whose confidante she was and with whom from 1653 to 1659 she held a famous salon inspired by that of the Hôtel de Rambouillet. Here she was in touch with various artists and some of the founders of the Académie Française – Sarazin, Conrart, Pélisson and Chapelain among them. She very probably composed the music in a manuscript (*F-Pn*) containing 17 *Préludes marquant les cadences* and a *Prélude sur tous les tons* for the lute, which constitute a thorough exploration of various tonalities, taking the chromatic possibilities of the lute as their starting-point. Other lute pieces, which bear the name Bocquet and must be attributed to her, are found in French, German and English manuscripts of the second half of the 17th century. (All this music appears in M. Rollin and A. Souris, eds.: *Oeuvres des Bocquet*, Paris, 1972; see also M. Rollin: 'Mademoiselle Bocquet', ibid.)

MONIQUE ROLLIN

**Bocquet, Charles** (*b* ?Paris, *c*1570; *d* ?Lorraine, before 1615). French lutenist and composer. His family came from Pont-à-Mousson, near Nancy; his father, Julien Bocquet (*d* 1592), was a lutenist and *valet de chambre* to Henri III. Between 1594 and 1606, while living in Pont-à-Mousson, he took part in the ballets given at the court of Charles III, Duke of Lorraine, notably in the one performed in 1606 to mark the marriage of Charles's son, Henri de Lorraine, Duke of Bar, to the daughter of Vincenzo I, Duke of Mantua; he also wrote music for it, but it has not survived. For some time from 1599 he served the Elector Palatine Friedrich IV as a lutenist. According to Besard, Bocquet was one of the three best composers represented in his *Thesaurus harmonicus* (RISM 1603[15]); it contains 15 pieces by Bocquet. G.L. Fuhrmann's anthology *Testudo gallo-germanica* (1615[24]) contains five others, and he is also represented in various German manuscripts, in a manuscript at Uppsala (*S-Uu*) and in the manuscript lutebook (*GB-Cfm*) of Edward, Lord Herbert of Cherbury (these pieces are in M. Rollin and A. Souris, eds.: *Oeuvres des Bocquet*, Paris, 1972).

MONIQUE ROLLIN

**Bocquillon-Wilhem, Guillaume Louis.** *See* WILHEM, GUILLAUME LOUIS BOCQUILLON.

**Bodanzky, Artur** (*b* Vienna, 16 Dec 1877; *d* New York, 23 Nov 1939). Austrian conductor. He studied the violin, and at 18 joined the orchestra of the Vienna Hofoper. In 1900 he made his début conducting Sydney Jones's *The Geisha* with the 18-man orchestra in České Budějovice. In 1903 he returned to the Vienna Opera as Mahler's assistant, soon making his way rapidly in theatres and concert halls in Vienna, Berlin, Prague and Mannheim. In 1914 he introduced *Die Fledermaus* to Paris and *Parsifal* to London, the latter making such an impression that he was named successor to Alfred Hertz at the Metropolitan Opera. He made his American début conducting *Götterdämmerung* in 1915; from then his career was centred on New York, at the Metropolitan (with a brief break in 1928) until his death; with the New SO, which he took over in 1919 from Varèse, until its merger with the Philharmonic in 1922 and with the Society of the Friends of Music from 1921, as successor to Stokowski, until 1931 when the society was dissolved.

Best known as a Wagnerian, Bodanzky was anything other than a narrow specialist. He was on the rostrum for Caruso's last Metropolitan evening, which was Halévy's *La Juive*, and his repertory there included Gluck, Richard Strauss, Tchaikovsky, Meyerbeer, Suppé and the American premières of Weinberger's *Švanda the Bagpiper* and Krenek's *Jonny spielt auf*. At the Friends of Music his repertory ranged from *Dido and Aeneas* to Pizzetti and Zemlinsky, and his many American premières included those of Mahler's *Das Lied von der Erde*, Honegger's *Le roi David*, and Janáček's Glagolitic Mass. Physically, Bodanzky was like a much taller Mahler, from whom his 'the facts, not the show' attitude derived. The typical Bodanzky performance was fast, intense and heavily cut (however, he gave as well as taking away, composing recitatives and other additions for *Oberon*, *Der Freischütz*, *Die Zauberflöte* and *Fidelio*).

MICHAEL STEINBERG

**Böddecker** [Boedecker, Bedeckher], **Philipp Friedrich** (*b* Hagenau, Alsace, bap. 5 Aug 1607; *d* Stuttgart, 8 Oct 1683). German composer, organist and bassoonist. The most important member of a large family of musicians, Böddecker received his earliest musical education from his father, Joachim Böddecker, and then from J.U. Steigleder in Stuttgart. He was organist and singing teacher at Buchsweiler, Alsace, from 1626 to 1629. He then went as bassoonist and organist to the court at Darmstadt and was also attached in the same capacity to the court at Durlach, near Karlsruhe. In 1638 he became organist of the Barfüsserkirche at Frankfurt. In 1642 he became organist of the cathedral at Strasbourg, where he was also director of music and organist of the university from 1648. From 1652 until his death he was organist of the collegiate church at Stuttgart and also taught music at the college. He hoped to become Kapellmeister to the Württemberg court at Stuttgart in 1657, but the post went to S.F. Capricornus, with whom in his disappointment he became locked in dispute.

Böddecker's *Melos irenicum*, a setting for large forces of the *Te Deum*, is an interesting example of mid-17th-century south German sacred music: it has attractive themes which well convey the sense of the words, effective contrasts of sonority and rhythm, and contrapuntal and homophonic sections frequently alternate. The vocal music in the *Sacra partitura* shows the influence of Italian monody. The two sonatas, respectively for violin and bassoon with continuo, also included in the volume are among the earliest German examples of the genre. The violin sonata includes double stopping and a wide variety of passage-work; the last movement is a passacaglia on an extended theme (marked 'alla francese'). The bassoon sonata, which is based on the *monica*, is entirely constructed as a passacaglia. Böddecker also wrote a treatise on thoroughbass, *Manuductio nova*, which his son Philipp Jakob Böddecker published with a preface in Stuttgart in 1701.

WORKS

EBERHARD STIEFEL

**Böddecker, Philipp Jakob** (*b* Frankfurt, 1642; *d* Stuttgart, 1 Feb 1707). German organist and composer. He was presumably trained as a musician by his father, Philipp Friedrich Böddecker. He also studied Protestant theology and from 1670 was deacon at Marbach am Neckar. On 25 April 1686 he took over the post of organist at the collegiate church at Stuttgart that his father had held until 1683. His request to be appointed a preacher as well as organist was not granted. According to contemporary reports, he did not always carry out his duties satisfactorily. As well as bringing out, with a preface, his father's *Manuductio nova* (Stuttgart, 1701) he published *Höchstschätzbares Seelenkleinod ... oder Zway schöne geistreiche Lieder in einem doppelten (einfachen und fugirten) Contrapunkt* (Stuttgart, n.d.) for soprano, alto, tenor, bass and continuo; only the title-page and dedication survive, together with a manuscript copy of the continuo part (*D-Sl*).

EBERHARD STIEFEL

**Bode, Harald (Emerich Walter)** (*b* Hamburg, 19 Oct 1909; *d* ?North Tonawanda, NY, 15 Jan 1987). American designer of electronic instruments and equipment, of German birth. He studied at the University of Hamburg and the Heinrich-Hertz Institut of the Technische Hochschule in Berlin. He pioneered a number of techniques that are now common in synthesizers and other electronic instruments. His first instrument was the Warbo Formant-Orgel (1937) in which he introduced the 'assignment' of notes on a partially polyphonic keyboard. Touch sensitivity was an important aspect of the monophonic keyboard of the Melodium (1938), developed with the assistance of Oskar Vierling, which also incorporated a pedal for vibrato control and a tuning-transposition knob. In the monophonic Melochord (1947), he pioneered the split keyboard as an alternative to the use of two manuals. A special two-manual studio version introduced the idea of a filter operated from one manual to control the timbre of notes played on the other.

From 1950 Bode undertook more conventional design work, including a series of electronic organs beginning with the Polychord (1950) and the Bode organ (1951); the latter was the basis for the Polychord III (1951), manufactured by Apparatewerk Bayern, and for the electronic organs made in the USA by the ESTEY ORGAN CO. from 1954. He also developed the Cembaphon (1951, an amplified harpsichord with electrostatic pickups), the portable Tuttivox electronic organ (1953) and the concert model of the Clavioline (1953). He emigrated to the USA in 1954, working as Estey's chief engineer, and in 1960 moved to North Tonawanda, where between 1960 and 1963 he designed a new model of the Wurlitzer electric piano.

In 1959–60 Bode developed a modular 'signal processor', which incorporated devices such as a ring modulator and elements of voltage control, and had some influence on the work of R.A. Moog and others. In 1963–4 he devised a frequency shifter and ring modulator which were originally manufactured by the R.A. Moog Co. Bode continued to design sound-processing modules, in particular a vocoder and an infinite 'barbershop' phaser; these and more recent models of the two earlier modules were manufactured by his own company, Bode Sound, in North Tonawanda. During the 1970s he also composed electronic music on tape for concerts and television commercials.

HUGH DAVIES

**Bode [Bodé], Johann Joachim Christoph** (*b* Barum, Brunswick, 12 Jan 1730; *d* Weimar, 13 Dec 1793). German translator, publisher, performer and composer. His principal instrument was the bassoon, and in 1749 at Helmstedt he played the cello in J.C. Stockhausen's collegium musicum. He moved to Celle in 1752 as an oboist and composer, and at the same time developed a strong interest in foreign languages and literature. In 1757 he settled in Hamburg as a music teacher and writer, and later became a publisher and dealer in books and music. During this period he edited the *Hamburgischer unpartheyischer Correspondent* (1762–3), completed and published Lessing's translation of Noverre's *Lettres sur la dance* (1769) and published his own translation (with C.D. Ebeling, 1772) of Burney's *The Present State of Music in France and Italy* (1773). He also translated oratorios by Metastasio, librettos to comic operas by Piccinni and Guglielmi, and novels by Fielding, Sterne, Goldsmith and others. His published compositions include two collections of songs under the title *Zärtliche und scherzhafte Lieder* (Leipzig, 1754, 1757), six symphonies and six trios (both sets Paris, 1764), two further symphonies in Parisian periodic series and collections, a cello concerto (Leipzig, 1780) and a string partita; he also wrote other concertos for bassoon, violin and viola d'amore. Bode spent his last years, from 1778, as a diplomat in Weimar, a post that gave rise to the publication of a travel diary, *Journal von einer Reise von Weimar nach Frankreich im Jahr 1787* (ed. H. Schuttler, Munich, 1994).

HOWARD SERWER

**Bodel, Jehan** (*b c*1165; *d* between 1 Oct 1209 and 2 Feb 1210). French trouvère. Though a poet by profession, he may have been attached to the magistracy of Arras as sergeant. He apparently enjoyed the protection of the mayor, Sauwalon Huchedieu, and other wealthy people. He was an original, versatile and influential writer whose works include the *Chanson de Saisnes* (a long epic dealing with Charlemagne), nine fabliaux, the *Jeu de Saint Nicolas* and the *Congés* (in which he bade farewell to his friends and native city after contracting leprosy in 1202, a circumstance that prevented his joining the Fourth Crusade). Of musical interest are a group of five pastourelles, ascribed to Bodel chiefly in the Manuscrit du Roi (*F-Pn* fr.844). However, owing to the loss of a folio in this source, most melodies are *unica* in the Chansonnier de Noailles (*F-Pn* fr.12615). Except for *Les un pin verdoiant* which is hexasyllabic, the poems are heterometric; *Entre le bois* and *L'autre jour* are complex, asymmetrical works, employing five and six different line lengths respectively. Despite the use of bar form in three

works, there is a minimum of strict repetition. Considerable interest is displayed in variation and development; some materials appear in different guises in as many as four or five phrases.

THEODORE KARP

**Bodenschatz, Erhard** (*b* Lichtenberg, Vogtland, 1576; *d* Gross Osterhausen, Thuringia, 1636). German music editor, composer and clergyman. He received his musical and academic education in the electoral choir school at Dresden, at Leipzig and at Schulpforta, where he was greatly influenced by Sethus Calvisius. In 1600 he became Kantor at Schulpforta and in 1603 pastor at nearby Rehausen and in 1608 at Gross Osterhausen, near Querfurt, where he remained until his death.

As a composer Bodenschatz remained within the bounds of contemporary practice. His masterly *Magnificat* and especially his 90 bicinia are nevertheless of considerable artistic merit and effectively combine an early Baroque inclination towards word-painting with supple vocal lines. His primary importance, however, lies in his *Florilegium Portense*, a motet anthology in two parts modelled on the unpublished anthologies of Calvisius. Intended to illustrate the practice of choral music at Schulpforta, it provides a valuable cross-section of German and Italian motet composition about 1600. The first part, published in 1603, was enlarged in 1618 to include 115 compositions by 48 composers and a continuo part supplied by the editor. Jacob Handl, with 19 works, is the best represented, followed by Lassus and Hieronymus Praetorius with nine each. The anthology favours German composers, including Bodenschatz himself, Calvisius, Erbach, Melchior Franck, Gumpelzhaimer, Hans Leo Hassler, Michael Praetorius, Vulpius, Friedrich Weissensee and many others. Notwithstanding the predominance of Latin motets and the absence of chorale variations, it affords a clear view of the compositional activity of the early 17th-century German Kantor. The second part (1621) exactly reverses the emphasis of the first, since Italian composers predominate – among them Agazzari, Giovanni Croce, Giovanni Gabrieli, Marenzio, Benedetto Pallavicino, Vecchi and Viadana – though the German Martin Roth, with 15 pieces, is the best represented composer. More than half the pieces had already been included in Schadaeus's anthology *Promptuarium musicum* (1611–17). Both parts contain mostly eight-voice pieces and thereby naturally favour double-chorus writing. The inclusion of a few five-voice pieces by Handl and Lassus and of Handl's four-voice *Ecce quomodo moritur* was probably consciously retrospective. The title-page of the 1621 volume and the frequent recurrence of certain clef combinations both point to the possibility of instrumental accompaniment. There were apparently no further editions of the *Florilegium Portense*, but the 1618 and 1621 editions were for long used, and frequently rebound, by schools at Bremen, Dresden, Grimma, Halle, Leipzig (where Bach used them at the Thomasschule), Lüneburg, Pirna and elsewhere.

WORKS

*all published in Leipzig*

OTTO RIEMER/CLYTUS GOTTWALD

**Bodeo, Joan** (*fl* 1549–54). Composer, presumably of Spanish birth, active in Italy. His single volume of four-voice madrigals (Venice, 1549), which survives incomplete, is written in a rhythmically supple, quasi-parlando style fashionable about 1550. Two more madrigals by him are included in an anthology (RISM 1554[28]).

JAMES HAAR

**Bodhrán.** Single-headed frame drum of Ireland. The membrane, which is normally goatskin but could also be deer-, greyhound-, ass-, foal-, or horse-skin, is usually nailed to the frame. It is played either with the hand or, more commonly, a stick about 20 cm long, which is usually carved from ash, holly or hickory wood and is also known as a 'tipper' or *cipín* ('little stick'). It may have a knob at one or both ends and a strip of leather is occasionally fastened to its centre to form a holding loop. A smaller stick (about 10 cm long) with a leather loop at one end and a carved knob at the other is sometimes used.

The term 'bodhrán' appears to be derived from *bodhar*, meaning 'deaf' or 'dull-sounding'. The instrument was associated with folk ritual and was played in festival processions; it has survived primarily in association with

*Bodhrán (frame drum) player at a Fleadhanna Ceoil, Co. Wexford*

the festival of St Stephen's Day. Until recently the construction of the *bodhrán* included a wooden cross at the back which enabled the player to hold the instrument while marching in processions; it was mainly an outdoor instrument. Performance technique was directly affected by this method of holding; there was no manipulation of the skin of the *bodhrán*, thus no variation in timbre could be achieved. The use of a skin tray or sieve (*wecht*, *wight*, *dallan*, *boran*) similar or identical in structure to the *bodhrán* was widespread right up to the 20th century; the tray served to hold corn or peat, while the sieve was used as a meal-sieve or winnowing tray. The links between the tray or sieve and the percussion instrument suggest that originally the *bodhrán* may have been used principally within the spring ritual of St Brigid's Feast.

The ritual ties of the *bodhrán* began to weaken with the advent of the *Fleadhanna Ceoil* (music festivals) in the 1950s, and the general resurgence of interest in traditional music in Ireland led to an increase in the popularity of the *bodhrán*. A major factor in this was its inclusion in Ceoltóirí Cualann (a concert band of traditional musicians) by Seán Ó Riada in the 1960s.

In the 1970s Johnny 'Ringo' McDonagh began to manipulate the skin of the *bodhrán* to produce different sounds. This technique was an important development in modern *bodhrán* playing, and McDonagh's recordings with the group De Danann during the 1970s were hugely influential. Both McDonagh and Tommy Hayes, who recorded with Stockton's Wing in the 1970s, continue to influence the development of *bodhrán* playing at the beginning of the 21st century.

Towards the end of the 20th century the *bodhrán* became increasingly important in the performance of Irish traditional music, and most traditional groups included a *bodhrán* player. Many performance styles evolved, and Gino Lupari, Colm Murphy and Mel Mercier were among those who contributed to the development of new playing techniques.

MÍCHEÁL O SÚILLEABHÁIN (with SANDRA JOYCE, NIALL KEEGAN)

**Bo Diddley** [McDaniel, Ellas] (*b* McComb, MS, 30 Dec 1928). American rock and roll singer. He was taken to Chicago at the age of five, and soon after began violin lessons, which he continued for 12 years. He grew up with black gospel music and the delta blues players of Chicago's southside, but he was most strongly influenced by Nat 'King' Cole, Louis Jordan and John Lee Hooker, whose *Boogie Chillen* inspired him to play guitar. He formed a street-corner band, which attracted enough attention to be granted an audition with Chess Records in 1954. In early 1955 *Bo Diddley* (Checker) was released as a single and reached number 2 in the rhythm and blues chart. It had bragging, nonsense lyrics, like many of his later songs, but its chief appeal lay in its shimmering rumba rhythm and violent, primitive guitar playing. Diddley stood outside the mainstream of rock and roll of the 1950s; he recorded unusual jazz instrumental pieces with weird sound-effects, doo-wop songs, blues, idiosyncratic rock and roll numbers and rambling insult battles with Jerome Green, his maracas player. Many of his songs are based on a distinctive syncopated rhythm (ex.1).

Ex.1

Diddley had few pop hits (only *Say Man* reached the top 20 in the 1959 US pop chart), but his influence on such performers as Hendrix, the Rolling Stones and the Yardbirds was considerable; cover versions of his songs were recorded by many American and English groups. His stage name is derived from the instrument known as a diddley bow.

JOSEPH MCEWEN

**Bodigham, Jo.** *See* BEDYNGHAM, JOHANNES.

**Bodin, Lars-Gunnar** (*b* Stockholm, 15 July 1935). Swedish composer and administrator. He studied composition with L. Wenström (1956–60), but he is self-taught in his principal field of electro-acoustic music, in which he is one of the most important composers, teachers and administrators in Sweden. His background as a jazz musician, pictorial artist (including computer-generated images) and biochemist has contributed to a characteristic openness and enthusiasm for the crossing of the boundaries between different artistic genres which he has passed on to a younger generation of electro-acoustic composers. Following his début in the concert organization Fylkingen in 1962, he became one of the driving forces in creating a small electronic music studio there. Together with Bengt Emil Johnson he directed the text and sound festivals initiated in Stockholm in 1967; Bodin was also Fylkingen's chairman from 1969 to 1972. He became a pioneer of instrumental theatre, organized now legendary happenings at the Modern Museum in Stockholm and brought John Cage and other leading modernists to Sweden. In 1972 he was composer-in-residence at Mills College, Oakland, California. In 1979 he became director of the Electronic Music Studio (EMS) in Stockholm and held this position for more than ten years.

With his multimedia works such as the 90-minute-long *Clouds* for picture projectors, singers and electro-acoustic sounds, with text-sound compositions such as *For Jon I–III*, 'radio plays' such as *Wonder Void* and *Toccata*, pure electro-acoustic works such as *Traces I–II*, *Mémoires du temps d'avant la destruction* and *Notturno alla prima*, and with his virtuoso technique and deep aesthetic and philosophical perspective, he has become an internationally significant artist with a distinct profile in these genres. As an administrator he is one of the driving forces within the ICEM, and in Sweden he has made important efforts on behalf of new music in the Society of Swedish Composers and STIM, the Swedish performing rights society. At the same time he has noted the 'permanent schizophrenic condition' that new music has reached in relation to the public and society. He speaks of the need for 'internal immigration' as a way out for the artist: 'It is not a question about isolation in some ivory tower, but to work in a complete new dimension, in another "world"'.

ROLF HAGLUND

**Bodinus** [Bodino], **Sebastian** (*b c*1700; *d* Pforzheim, 19 March 1759). German composer. All that is known of his early life is that he came from central Germany (probably from the Duchy of Saxe-Gotha) and that in his youth he must have had some relationship to the Duke of Saxe-Altenburg. About 1718 he entered the service of the Margrave Carl Wilhelm of Baden-Durlach as servant and musician. In 1723 he asked to be discharged in order to avoid being sent as oboist to the margrave's regiment in Italy. His main instrument was the violin, and when he moved to the Württemberg court he secured the post of first violinist. By 1728, having married in the meantime, he returned to Karlsruhe as Konzertmeister and his wife was engaged as a singer. In the years that followed, Bodinus developed a close relationship with his superior, the court Kapellmeister J.M. Molter.

In 1733, on the outbreak of the Polish War of Succession, the margrave disbanded the orchestra; Bodi-

nus left, but returned to his former post in 1736. He now fulfilled the duties of Kapellmeister but did not obtain the title or the salary pertaining to it and his petitions reveal the dire poverty in which he and his family lived. After Carl Wilhelm's death in 1738 he was again dismissed.

When Molter, who had returned to Karlsruhe from Eisenach in 1742, reorganized the Baden court music in 1747, Bodinus, by then in Basle, was offered the post of Konzertmeister at a salary of 300 florins a year and payment in kind. For the fourth time Bodinus entered the service of the Baden court. He seems however to have been of unstable character, and in 1752 disappeared from Karlsruhe for reasons unknown. He subsequently received a letter of recommendation from the margrave, Carl Friedrich. At the beginning of 1754 he was in Darmstadt, where he apparently tried to get an appointment. In September 1758 he was admitted to the Buden-Durlach lunatic asylum at Pforzheim; he died there some months later.

Bodinus was one of the many working musicians employed by the German courts of the 18th century. His strength lies in chamber music. He wrote not only numerous solo and trio sonatas, but also quartet sonatas, whose clear but varied structure is partly derived from Bodinus's applications (under Molter's influence) of the concerto form and principle to chamber music. Suite elements are also found in his chamber works. His concertos and symphonies, though less important than his chamber music, combine neat and accomplished workmanship with imaginative melodic invention. In spite of distinct *galant* elements Bodinus's work belongs in style to the late Baroque period.

WORKS

*the relationship of the manuscript works to those in printed collections has not been established*

Musikalischen Divertissements, erster Theil (Augsburg, before 1726), Zweiter (–sechster) Theil (Augsburg, after 1726) [incl. 30 trio sonatas and 6 qt sonatas]

Acroama musicum ... VI sonatas, vn, clvd (Augsburg, n.d.)

12 sonate, vn, b (n.d.) [without title-page]

Other inst works in *D-DS, KA, ROu, SWl, S-Uu*: incl. 6 sinfonias; 1 ov.; concs. for vn, fl, ob; qt and trio sonatas; sonatas for solo insts, incl. sonata, e, 2 fl, ed. G. Birkner (Celle, 1955); also ed. C. Havelaar (Amsterdam, 1960)

KLAUS HÄFNER

**Bodky, Erwin** (*b* Ragnit, East Prussia [now Neman, Belarus], 7 March 1896; *d* Lucerne, 6 Dec 1958). American pianist and musicologist of German origin. He made his début as a pianist at the age of 12. After attending the Gymnasium in Tilsit, Bodky went to the Musikhochschule in Berlin, where he studied with Dohnányi, Juon, Kahn and others. He twice received the Mendelssohn Prize and graduated in 1920. A fellowship from the Prussian government enabled him to continue piano studies with Busoni and composition with Strauss. Bodky's compositions, which include a piano concerto, a chamber symphony, and chamber music, were written during these years and are apparently unpublished. Furtwängler helped his concert career by introducing him as a soloist in the Leipzig Gewandhaus Concerts. In the 1920s he taught the piano in Berlin at the Scharwenka Conservatory and from 1926 was associated with the Akademie für Kirchen- und Schulmusik in Charlottenburg. From 1933 he taught at the Muzieklyceum in Amsterdam and he moved to the USA in 1938. He taught at the Longy School of Music in Cambridge, Massachusetts, and founded the Cambridge Collegium Musicum (later the Cambridge Society for Early Music) in 1942. In 1949 he received the first music appointment at Brandeis University where he taught music history. His interest in early keyboard music included playing the harpsichord and clavichord as well as scholarship; from his early *Der Vortrag alter Klaviermusik* to the posthumously published study *The Interpretation of Bach's Keyboard Works*, he sought ways of rendering the terraced effects of the harpsichord on the modern piano. In 1955 he presented the series 'Roads to Bach', one of the earliest programmes on music seen on American educational television. (H.S. Slosberg, M.V. Ullman and I.K. Whiting, eds.: *Erwin Bodky: a Memorial Tribute*, Waltham, MA, 1965)

WILLIAM D. GUDGER

**Bodley, Nicholas Bessaraboff.** *See* BESSARABOFF, NICHOLAS.

**Bodley, Seóirse** (*b* Dublin, 4 April 1933). Irish composer. He received his early musical training at the Royal Irish Academy of Music and at University College, Dublin (BMus 1955), where he studied with Larchet. From 1957 to 1959, on a postgraduate scholarship from the National University of Ireland, he studied in Stuttgart with Johann Nepomuk David (composition) and Hans Müller-Kray (conducting). He was appointed to a lectureship at University College, Dublin in 1959 and received the DMus the following year. The first Macauley Fellowship in composition (1962) enabled him to study at the Darmstadt summer school for three consecutive years (1962–4). He served as the director of Folk Music Studies at University College, Dublin in 1964 and as the chair of the Folk Music Society of Ireland for many years. His research focusses on the stylistic analysis of traditional Gaelic singing and the development of a notation system for its rubato ornamentation. Active also as a pianist, conductor and adjudicator, he became a member of Aosdána in 1982. In 1984 he became associate professor at University College, Dublin, a post from which he retired in 1998.

Bodley's compositional style has undergone considerable stylistic change. Between 1952 and 1962 his music was primarily tonal, employing occasional modal melodies that gave it a folk-like quality. The Symphony no.1, a large work featuring fugato-like motivic development, dates from this period. The composer's visits to Darmstadt in the early 1960s led to a series of works employing elements of the middle-European avant garde. From 1963 to 1971 Bodley was the principal Irish exponent of post-serial compositional procedures. Orchestral works such as the Chamber Symphony no.1 (1964) and *Configurations* (1967), as well as a number of piano and chamber works, including the String Quartet no.1 (1968) and *Scintillae* (1968), are among his most abstract music. From 1972 to *c*1980, Bodley combined avant-garde techniques with traditional Irish music. Works such as *The Narrow Road to the Deep North* (1972) and *A Small*

*White Cloud Drifts over Ireland* (1975) feature a creative conflict between the two traditions. From that time, Bodley has sought to develop a musical language that is recognizably Irish but maintains a cosmopolitan perspective. Works such as *Phantasms* (1989) and the String Quartet no.2 (1992) begin to unite a national and international voice.

AXEL KLEIN

**Bodoil, Jo.** [?Johannes] (*fl c*1420–50). Composer, possibly Welsh. He was contemporary with Dunstaple. *I-TRmp* 92 ascribes to him (as 'Jo. Bo doil' or, in the index, 'Bo. doil') the rather italianate three-voice Credo that is merely called 'English' in *I-Bc* Q15 and *I-AO*. A three-voice Gloria ascribed in *I-Bc* Q15 to Binchois (ed. P. Kaye, *The Sacred Music of Gilles Binchois*, Oxford, 1992), but uncharacteristic of his style, so clearly forms a pair with the Credo (ed. in DTÖ, lxi, Jg. xxxi, 1924/*R*) that we may assume the name is simply a misreading, or what the scribe intended as a correction, of the less familiar 'Bodoil'. These interesting pieces, with their lively superius duets recalling Ciconia, were probably written in Italy as Strohm suggests. If they are indeed English, it may be possible to identify 'Jo. Bodoil' with John Blodvel or Blodwell, traceable as a priest from 1412 to 1462 (the year of his death), a Welshman of illegitimate birth who gained a doctorate of canon law in Bologna in 1424, held prebends in Lichfield (1432) and Hereford (1433), and then went to Rome as an abbreviator of Apostolic letters (see Mitchell).

BRIAN TROWELL

**Bodorovà, Sylvie** (*b* České Budějovice, 31 Dec 1954). Czech composer. She was a piano and composition pupil at the conservatory in Bratislava, before studying at the Janáček Academy of Musical Arts in Brno (1974–9), with Ctirad Kohoutek, and at the Academy of Musical Arts in Prague. Further work with Donatoni at the composition course at Siena (1981) ensued. From 1987 she regularly attended Ton de Leeuw's courses in Amsterdam. She has taught at the academy in Brno and at the College-Conservatory of Music, Cincinnati (composer-in-residence, 1994–6). She belongs to the group Quattro, founded in 1996, which consists of four composers of different generations but who share the view of art being an 'ecology of the soul'. Her work, the structural simplicity of which tends towards a lyrical sonority, has been played on all continents; *Homage to Columbus* for guitar has even been performed in the Antarctic. She receives frequent commissions and has won several prizes (e.g. Mannheim, Czech Radio Prague). (ČSHS)

ANNA ŠERÝCH

**Body, Jack** [John] **(Stanley)** (*b* Te Aroha, 7 Oct 1944). New Zealand composer. He studied at the University of Auckland with Ronald Tremain, then, after an influential period working with Lilburn in the electro-acoustic music studio at Victoria University of Wellington, in Cologne with Kagel and at the Institute of Sonology, Utrecht. He was a guest lecturer at the Music Academy, Yogyakarta (1976–7), and since 1980 has taught at Victoria University of Wellington. His work as a composer embraces orchestral, chamber, music-theatre and electro-acoustic forms, as well as audio-visual installations which include his own photographic material. The most profound influence on his work has been his immersion in musical traditions of Asia which, through extensive fieldwork, particularly in Indonesia and parts of China, has provided him with much of his compositional material. Use of field recordings from such sources has characterized his electro-acoustic music since *Musik dari jalan* ('Music from the Street') (1975), in which Javanese street sounds are presented in literal 'documentary' fashion, as well as being abstracted into new, more rarefied contexts. Subsequent works have focussed on transcription of non-Western musical sources for Western instruments, such as in *Melodies for Orchestra* (1983), *Three Transcriptions* (1987) for string quartet and the orchestral *Pulse*.

JOHN YOUNG

**Boeck, August de** (*b* Merchtem, 9 May 1865; *d* Merchtem, 9 Oct 1937). Belgian composer. He studied at the Brussels Conservatory in order to become organist at his native village. In 1889 he met the young Paul Gilson who became his teacher for orchestration and his close friend. Both were influenced by the Russian 'Five' (especially by Rimsky-Korsakov), and they introduced musical Impressionism into Belgium. De Boeck was organist in several churches, the last being that of the Carmelites in Brussels (1900–20), and he taught harmony and organ at the Royal Flemish Conservatory at Antwerp (1909–21) and harmony at the Brussels Conservatory until 1930. Until then he was also director of the Mechelin Conservatory. In 1930 August de Boeck retired to his birth-place. He is considered one of the most representative Belgian composers of his generation, his music being lyrical and spontaneous and spiced with a certain irony.

WORKS

Ops: Théroigne de Mérincourt, 1901; Winternachtsdroom, 1903; Rijndwergen, 1906; Reinaert de Vos, 1909; La Route d'Emeraude, 1921

CORNEEL MERTENS

**Boedecker, Philipp Friedrich.** *See* BÖDDECKER, PHILIPP FREIDRICH.

**Boehm, Joseph** (*b* Pest, 4 March 1795; *d* Vienna, 28 March 1876). Hungarian violinist and teacher. He studied the violin with his father, leader of the Town Theatre orchestra, and later briefly with Rode, who influenced him decisively. In 1816 he made his début in Vienna, and in 1819 he was appointed professor of violin at the newly founded Vienna Conservatory, a post he held until 1848. He played in the imperial orchestra from 1821 to 1868, and during the 1820s enjoyed great popularity as a soloist and quartet player, rivalling Mayseder and Schuppanzigh; he was selected by Beethoven to play in the second performance of the String Quartet op.127 (23 March 1825). Boehm was also an early exponent of Schubert's chamber music and played in the première of the Trio op.100 (26 March 1828). Considered the father of the Viennese violin school, Boehm was the teacher of H.W. Ernst, Joachim, Jakob Dont, Reményi, Georg Hellmesberger and other eminent violinists. He imparted to his pupils not only a solid technical foundation but also a sense of style and Classical tradition. Joachim said of him: 'Based on an unfailing left hand and ideally smooth bowing, Boehm possessed an art of phrasing that enabled him to realize anything that he envisioned or felt'. As a composer, Boehm left a number of violin compositions which follow the trend of his day but display an unusual command of all violin techniques.

BORIS SCHWARZ

**Boehm, Theobald** (*b* Munich, 9 April 1794; *d* Munich, 25 Nov 1881). German flute maker, flautist, composer and inventor. He worked out the proportions and devised the mechanism which are the bases of the modern flute. Boehm was the son of a goldsmith, in whose craft he became fully skilled at an early age. In childhood he taught himself the flageolet and one-keyed flute; by the age of 16 he had already grown dissatisfied with the latter, and in 1810 made himself a copy of a four-keyed instrument by Grenser of Dresden. Around the same time he also made a nine-keyed flute with a movable golden mouth-hole, based on the ideas of Johann Nepomuk Kapeller (1776–1825), flautist in the royal court orchestra in Munich. In 1810 Boehm began flute lessons with Kapeller, who gave him formal instruction until 1812, admitting then that he had no more to teach him.

In that year Boehm was appointed flautist at the Isartortheater and during the next five years combined flute playing with his daily work as goldsmith. In 1818 he became a member of the royal court orchestra in Munich (first flute 1830–48), and between 1821 and 1831 he undertook extended concert tours throughout Europe. Boehm enjoyed considerable success as a virtuoso performer: he was praised for his musicality and the beauty of his tone, and Fétis, among others, considered him the best German flautist of his day. Boehm, who had studied with Peter Winter and Joseph Graetz, frequently performed his own compositions. His works, all written for the flute, include a concerto, and numerous virtuoso pieces – fantaisies, variations, potpourris and the like. He also made many arrangements for flute with piano and for alto flute with piano. His music, popular and well regarded in his own time but then forgotten, has experienced a revival since the mid-20th century, spurred by the interest of Marcel Moyse and his pupils. A complete edition of Boehm's works is in preparation.

In 1828 Boehm opened a flute-making workshop (mark: TH. BOEHM / A / MUNICH) and in 1829 he received a patent for an improved conical-bore wooden flute. During a concert tour in 1831 he heard the flautist Charles Nicholson in London and was impressed by the powerful tone that the latter drew from his large-holed flute. Boehm later admitted (in a letter to W.S. Broadwood of 18 April 1871) that he could not match Nicholson's power of tone and therefore set to work to remodel his own instrument. An experimental model was made in 1831 in the workshop of Gerock & Wolf in London, and a completely remodelled instrument emerged from the Munich workshop in 1832. On this conical-bore instrument, the 'cone Boehm' or 'ring Boehm' flute, the tone holes were newly placed to improve the tuning and a system of interlinking keys with ring touchpieces was employed to enable the player to open or close the 14 tone holes.

Boehm's flute was awarded a silver medal at the Munich industrial exhibitions of 1834 and 1835, but it did not at first win much attention although Boehm demonstrated it in Paris and London; production was limited as he was chiefly occupied from 1834 to 1839 with introducing a procedure for the purification of steel in Bavarian factories. In 1837 he left an instrument with the flautist P.H. Camus in Paris; the instrument was presented to the Académie des Sciences and adopted by Camus, Vincent Dorus and Victor Coche. The firm of Godfroy *l'aîné* (V.H. Godfroy and Louis Lot) began to make flutes based on it, but with a closed G♯ key (a modification suggested by Dorus) rather than the open key of Boehm's model, an alteration intended to make the new system easier for players of the old system. In 1838 Coche, annoyed that Boehm would not collaborate with him, accused the latter of stealing ideas from James Gordon, an amateur flautist whom Boehm had met in London in 1831 and advised on flute construction in 1833–4; the injustice of this accusation has been proved. The new flute was promoted in London by John Clinton, who had acquired an instrument in 1841; with Boehm's approval, Rudall & Rose of London began in 1843 to manufacture flutes based on his design. In the meantime Cornelius Ward in London and L.-A. Buffet in Paris (the latter assisted and advised by Coche) had seized on the unprotected design. In November 1838 Buffet received a patent for several alterations to the Boehm flute. J.D. Larabee made a Boehm flute in New York in 1844 and A.G. Badger began to manufacture the instrument there soon after.

In 1839 Boehm sold his workshop to Rudolph Greve (1806–62), who had been his foreman since 1829, in order to concentrate, by royal command, on improvements to the Bavarian iron and steel industry. Greve continued to manufacture flutes with the mark Boehm & Greve until 1846, when Boehm founded his second workshop. From about 1845 Boehm studied acoustics under the guidance of C.E. von Schafhäutl (1803–90), his collaborator in improvements to steel manufacturing. He established a new workshop in 1847 (marks: Th. Boehm / in / MÜNCHEN, Th. Boehm / MUNICH). With a fuller appreciation of the acoustics of the flute, in 1847 Boehm produced his second model, a metal flute with a cylindrical bore and a parabolic (tapered) head. The keywork of the 1832 model was adapted to the new instrument, including an 'open' G♯ key, which had been part of the original concept and a source of some controversy. From 1848 the instrument had covered keys. Boehm determined by trial and error the dimensions and placing of the tone holes, incorporating them, once established, into a geometrical plan (the *Schema*), which has proved a useful tool in the design of flutes of all sizes. He sold patent rights for this instrument in France to Godfroy *l'aîné* (Louis Lot) and in England to Rudall & Rose. Since that time a number of optional alternative keys have been designed, notably a B♭ thumb key devised by Boehm and altered by Giulio Briccialdi, but the essence of the design has remained unchanged. Boehm's silver flutes were awarded gold and silver medals at the exhibitions in Leipzig (1850), London (1851) and Paris (1855). In 1854 Boehm began to make cylindrical wooden flutes and in 1858 he made an alto flute in G; the alto flute was his favourite instrument from then on. Boehm also developed prototype oboe (1851–5) and bassoon tubes (1855).

In 1860 the watchmaker Karl Mendler (1833–1914), who had joined the workshop in 1854, bought Boehm's instrument-making equipment for 500 gulden; in 1862 he was granted a trading concession. From that year instruments were marked 'Th. Boehm & Mendler / in / München' or BOEHM & MENDLER / MÜNCHEN. Boehm

remained active in the firm until his death (at the age of 87), occupied with correspondence, playing and making small improvements. In 1888 Mendler's son Karl (1862–1920) took over the workshop and in 1903 it was sold to E.R. Leibl (1871–1957) in Nuremberg. The workshop remained active until it was destroyed by bombing in 1944.

Besides the flute, Boehm was responsible for a wide variety of inventions including improvements to the manufacture of music boxes and the construction of pianos, a sparkproof locomotive chimney and a telescope for locating fires. Pupils closely associated with him have written of him as a gentle and agreeable man of undoubted integrity. He had seven sons and a daughter, all of whom inherited a measure of his artistic and organizing ability and were outstanding in their professional lives.

PHILIP BATE/LUDWIG BÖHM

**Boehmer, Konrad** (*b* Berlin, 24 May 1941). Dutch composer and writer of German birth. He studied composition with Gottfried Michael Koenig (1959–61) and philosophy, sociology and musicology at the University of Cologne (PhD 1966); he also worked at the WDR electronic studio in Cologne (1961–3). In 1966 he settled in Amsterdam, where he worked until 1968 at the Instituut voor Sonologie, Utrecht University. He later served as the institute's director (from 1994). He was appointed professor of music history and theory at the Royal Conservatory, The Hague, in 1972. As music critic for the weekly paper *Vrij Nederland* (1968–73), president of the Genootschap van Nederlandse Componisten, and a board member of BUMA, the Dutch performance rights society (from 1980), he established himself as a leading personality in Dutch musical life. His tape composition *Aspekt* (1964–6) won first prize at the Paris Biennale in 1968 and his music drama *Doktor Faustus* (1983) received the Rolf Liebermann prize. He has lectured extensively in Latin America, the USA and Europe.

In that his activities as a composer are inseparable from his work as an activist and theorist, Boehmer is an heir to the traditions of the Enlightenment and the avant garde. In the 1960s and 70s he published barbed attacks on Egk, Stockhausen, Kagel and others from a Marxist perspective. His compositions, which reflect this political agenda, characteristically employ serial organization or montage, particularly the combination of vocal sounds and percussion, and exhibit a high-strung, nervous tone that creates a fervent Expressionism. In the words of Richard Barrett, Boehmer's art suggests a 'fearless response to the world as it is, and [an] encompassing ... vision of a world transformed'. Many of his works, particularly *Doktor Faustus* (1983) and *Apocalipsis cum figuris* (1984), integrate influences from jazz and rock music, resulting in a self-critical investigation of the social role of the artist in a world 'between serialism and pop'. In *Canciones del camino* (1973–4) and *Lied uit de vert* (1975) radical leftist songs serve as cantus firmi. An outstanding example of Boehmer's response to the historicity of musical materials is *Woutertje Pieterse* (1987), a work that alienates and satirizes the bel canto style.

WORKS

(*selective list*)

Stage: Weg, 4 actors, insts, 1970; Doktor Faustus (music drama, 2, H. Claus), 1983, Paris, 1985; Woutertje Pieterse (comic tragedy, 2, Boehmer, after Multatuli), 1987, Rotterdam, 1988

HERMAN SABBE

**Boekhout, Thomas** (*b* Kampen, 1666; *d* Amsterdam, 1715). Dutch maker of woodwind instruments. He was a pupil of Jan de Jager, whose son Frederik assisted him between 1694 and 1707, and whose niece he eventually married. Boekhout lived in Amsterdam, at first on Keizersgracht and from 1713 on Kerkstraat. He made recorders, flutes, oboes and bassoons, but was best known for his bass recorders. The *Amsterdamsche Courant* reported in 1713 that he 'makes and sells all manner of flutes, oboes . . . bass recorders which give all the notes as on a normal recorder, and a new kind of bassoon, both invented by him'. A clarinet by Boekhout is preserved in the Musée Instrumental, Brussels (see *Waterhouse-LangwillI*).

ROB VAN ACHT

**Boelke-Bomart.** American firm of music publishers. It was founded by Margot and Walter R. Boelke (*d* 25 Jan 1987) in New York in 1948 and moved to Hillsdale, New York, in 1951. Affiliated to ASCAP, the firm specializes in the publication of contemporary music, and under the general editorship (1952–82) of Jacques-Louis Monod, who succeeded Kurt List, built up a small but important catalogue. Among its composers are Arthur Berger, Lansky, Lerdahl, Perle, Roslavets, Schoenberg, Skrowaczewski and Claudio Spies. In 1975 a sister company, Mobart Music Publications (an affiliate of BMI), was founded; its composers include Babbitt, Gideon, Ives, Leon Kirchner, Leibowitz, Monod, Pollock, Shifrin, Ben Weber, Webern, Zemlinsky and Zwilich. The distributor for both companies in the USA and Canada is Jerona Music Corporation.

ALAN POPE/R. ALLEN LOTT

**Boëllmann, Léon** (*b* Ensisheim, Haut-Rhin, 25 Sept 1862; *d* Paris, 11 Oct 1897). French organist and composer. One of 14 children, he left his native Alsace after the Franco-Prussian War to enter the Ecole de Musique Religieuse et Classique (Ecole Niedermeyer) in Paris in 1871. There he studied music with Gustave Lefèvre (the director) and Eugène Gigout, both sons-in-law of the founder, Louis Niedermeyer. He became the preferred pupil of Gigout, and won first prizes in piano, organ, counterpoint, fugue, plainsong and composition. Upon his graduation in 1881 he was appointed sub-organist of St Vincent-de-Paul, Paris; he was later named organist of this church. In 1885 he married Louise Lefèvre, daughter of Gustave Lefèvre and niece of Gigout, in whose home the young couple went to live. Boëllmann then taught in Gigout's recently founded school of organ playing and improvisation. The Boëllmanns' eldest child, Marie-Louise Boëllmann-Gigout (*b* 1891), brought up by Gigout after the early death of both parents, maintained the family traditions as a well-known Parisian music teacher and coach.

In his short professional life, Boëllmann became known as a dedicated teacher, trenchant critic, gifted composer and successful performer – a talented improviser as well as a sensitive executant who coaxed pleasing sounds out of recalcitrant instruments. His critiques in *L'art musical* (signed 'le Révérend Père Léon' and 'un Garçon de la salle Pleyel') were not restricted to church and organ music; he also wrote for *Le guide musical* and *La vérité*. His best-known work remains the *Suite gothique* and, in particular, its concluding Toccata, of moderate difficulty but brilliant effect; the *Variations symphoniques* for cello and orchestra also gained international fame, and his *Fantaisie dialoguée* for organ and orchestra was played in the Queen's Hall in London in 1897. Most typical, however, are the modal and liturgical organ works in *Douze pièces* op.16, and the two-staff *Heures mystiques*, in the austere counterpoint of which Boëllmann showed himself a true disciple of his teacher and in-law, Gigout.

WORKS
*all works published in Paris*

VOCAL

Sacred: 6 motets (?1887), nos.1–3, 1v, org, nos.4, 5, 2vv, org, no.6, 2vv, vn, org, hp/pf; Tantum ergo, motet, S/T, 4vv ad lib, org/hmn, vn ad lib, hp ad lib (*c*1900); Tantum ergo, motet, S, Bar, org/hmn, vn/vc, hp ad lib (*c*1900); Tantum ergo no.3, Mez, female chorus, org, hp ad lib (*c*1896); Laudate Dominum, S, A, T, B, org (1900); Veni Creator, T, Bar, 4vv, vn, vc, hp, org, db ad lib (*c*1900)

Songs, 1v, pf, unless otherwise indicated: Berceuse; Chanson mauresque; Conte d'amour (A. de Villiers de l'Isle-Adam), op.26 (?1896); L'étoile (P. Gille); Hymne; Je ne fay rien que requérir (C. Marot) (?1895); Lamento (P. Verlaine), op.34 (?1897); Ma bien-aimée (J. Lahor) (*c*1899); Mai (J. Tellier), op.33 (1896); Marguerite des bois; Noël (E. Guinand), 1v, org/pf (*c*1895); Notre amour (A. Silvestre), 1v, pf, vc (?1894); Récit d'une jeune fille de Béthléem (S. Bordèse); Réveil de Jésus (Bordèse); La rime et l'épée; Les roses (L. Paté) (1895); Sérénade; Sous bois (L. Tiercelin) (*c*1895)

Other vocal: Le calme (A. Dorchain), op.39 (?1897); Le chant du ruisseau (J.-B. Clément), 2 solo vv/chorus; Larmes humaines (P. Collin), op.32, 2vv female chorus (1896); Rondel dans le mode phrygien (J. Froissart) (?1891)

INSTRUMENTAL

Orch: Fantaisie sur des airs hongrois, vn solo, orch, op.7 (*c*1890); Variations symphoniques, vc solo, orch, op.23 (?1893), arr. vc, pf; Sym., op.24 (?1894), arr. pf 4 hands; Fantaisie dialoguée, org solo, orch, op.35 (?1897), arr. org solo, E. Gigout; 4 pièces brèves, str orch; Scènes du moyen âge

Chbr: Suite, vc, pf, op.6 (*c*1890); Pf qt, op.10 (*c*1890); Pf trio, op.19 (*c*1895); Prière à Notre Dame [movt of Suite gothique, op.25], arr. vn/vc, pf; 2 morceaux, vc, pf, op.31 (?1896); Vc sonata, op.40 (?1897)

Org: 12 pièces, org/pedal pf, op.16 (*c*1890); Suite gothique, op.25 (1895); Deuxième suite, op.27 (1896); Heures mystiques, org/hmn [2 staves], opp.29, 30 (1896); Offertoire sur des noëls (1898); Fantaisie (1906); others in *The French Organist*, ed. R.L. Bedell (New York, 1944)

Pf: Etude (1885); Intermezzo (1885); 3 pièces (?*c*1885); Prélude et fugue (?*c*1885); Valse, op.8 (*c*1890); Deuxième valse, op.14 (*c*1890); Valse: Carillon, op.20 (*c*1893); 10 Improvisations, op.28 (?1895); Nocturne, op.36 (1896); Ronde française, op.37 (1896); Sur la mer, op.38 (1897); Scherzo caprice; Valse alsacienne; Berceuse, pf 4 hands; pf transcrs. of works by Fauré, Saint-Saëns

FELIX APRAHAMIAN

**Boëly, Alexandre Pierre François** (*b* Versailles, 19 April 1785; *d* Paris, 27 Dec 1858). French composer, organist and pianist. He was first taught music by his father, Jean François Boëly (1739–1814), a theorist, chorister and harp master to the Countess of Artois and Madame Elizabeth. At the age of 11 he entered the Paris Conservatoire and studied the violin (with Guérillot) and the piano (probably with Montgeroult, then Ladurner); however, he did not complete his studies. Boëly followed a solitary career and found the security of an official position only for a short time late in life. He was first made provisional organist at St Gervais-St Protias, Paris, from 1834 to 1838, and in 1840 became titular organist at St Germain-l'Auxerrois, where he had the organ fitted with a German pedalboard. There he gained a small but well-earned reputation in the musical world as a great virtuoso and subtle interpreter. He taught the piano at the choir school of Notre Dame Cathedral from about 1845 to 1850. During this time, however, his clergy and adherents tired of his musical style, which they found too austere, and in 1851 he had to resign his position at St Germain-l'Auxerrois to one of his pupils from the choir school.

Largely self-taught as an artist, Boëly cultivated his musical gifts and judgment by daily study of the works of the old masters. He acquired a musical education and knowledge of counterpoint that were outstanding for his time and was one of the first organists in France to promote the music of Bach; he was also a disciple of Haydn and Mozart, as well as an early admirer of Beethoven. His compositions include two three-part masses and a large repertory of piano, organ and chamber works. From his first works, he showed an unusual maturity combined with a lyricism which, in its romantic bravura, occasionally looked forward to Schumann. As the aesthetic of the organ in France changed during his career, so Boëly began to use it in a grander, more symphonic manner. His piano music also reflects the evolution in the dimensions and use of the instrument, derived from the 18th-century piano, which had taken different forms – upright, square, pedal and grand – via the researches of Erard and Pleyel.

Boëly holds an important, if unappreciated, position in French music, owing to the nobility of his thought and the innovations of his musical language, which was based on an audacious system of modulation and frequent chromaticism. Reacting against the frivolous, mediocre pieces that had become the vogue in the Paris salons during the July monarchy, he took refuge in a voluntary archaism, a kind of neo-classicism unique in France at the time. Living on the fringes of official musical life, he remained unknown to the public; but he won the trust and admiration of an élite group of friends, among them Marie Bigot, Baillot, Kalkbrenner and Cramer. He also attracted the attention of young artists such as Franck and Saint-Saëns, who regarded him as a guardian of the noble and pure classical organ tradition.

WORKS

*MSS in F-V; printed works published in Paris unless otherwise stated*

Vocal: 6 romances, 1v, pf, op.19 (1856); 2 messes brèves, 3vv, org, db ad lib, opp.25–6, 1844

BRIGITTE FRANÇOIS-SAPPEY

**Boen** [Boon], **Johannes** (*b* Noordwijk, early 14th century; *d* Rijnsburg, 1367). Dutch priest and music theorist. He attended university at Oxford and Paris, and after completion of studies in law became a priest. From 1358 to his death he was parish priest in Rijnsburg. He wrote two treatises. *Ars* [*musicae*], dating from the mid-14th century, concerns Ars Nova mensural music and the formation of intervals, with references to, and sometimes contradictions of, the teachings of Johannes des Muris; references to several well-known Ars Nova motets are included. The other treatise, *Musica* (*c*1355), outlines a doctrine of consonances after discussing pitch names and genera of proportions, names of intervals, divisions of the whole tone and alteration of pitches by use of accidentals. Boen was the only theorist of his generation to allow any note to be preceded by an accidental, including sharps on B and E and flats on C and F, but he did not admit double flats or double sharps. He clearly thought in terms of staff notation, rather than the Guidonian hand. The last part of the treatise contains a discussion *per se*, imperfect

consonances and consonants *per accidens*. His remarks on the term subtilitas are very significant: he expected more 'sublety' in tuning and rhythm to lead to a more refined musical style in the future. This was in effect a predilection of the Ars Subtilior.

GORDON A. ANDERSON/ANNA MARIA BUSSE BERGER

**Boerio, Francesco Antonio** (*fl* Naples, 2nd half of the 17th century). Italian composer. He was probably associated with the Oratorio di S Filippo at Naples. The two keyboard compositions of his included in the Cemino manuscript – an untitled canzona and a quasi-improvisatory toccata followed by an imitative 'fugue' – turn away from the traditions of the southern Italian organ school, towards a lighter, more tonally orientated idiom. His mass settings include only Kyrie and Gloria, or Kyrie, Gloria and Credo, following a common Neapolitan practice of the time.

ALEXANDER SILBIGER

**Boerman, Jan** (*b* The Hague, 30 June 1923). Dutch composer. He studied the piano with Léon Orthel and composition with Hendrik Andriessen at the Royal Conservatory in The Hague. From 1959 he devoted himself almost exclusively to electronic music. In 1962, together with Raaijmakers, he set up a private studio, which five years later was to form the basis for the electronic studio of the Royal Conservatory. From 1974 he was a teacher of electronic music and piano at this same conservatory.

Boerman is regarded as the Dutch master of electronic music, and most of his output consists of tape compositions. He also wrote compositions for the combination of tape and live performers, as well as a number of instrumental works. His electronic music displays a lushness of colour and a dramatic power seldom heard in this medium. Never a dogmatist, he uses purely electronically generated sounds as well as microphonically recorded material, but the two are welded together to become an organic whole. His frequent re-use and reworking of sounds from earlier pieces gives his output a great inner cohesion and a decidedly recognizable palette of colours.

Beginning with *Alchemie* (1961), Boerman developed a method of composition based on the golden section ratio. This method, only employed in his electronic work, serves to determine temporal and formal proportions. *Kompositie 1972*, one of his most thoroughly organized works, is a fine example of the masterful way he fuses strict design and rich sound into music with a panoramic, strikingly human quality. His instrumental and vocal idiom is, by comparison, of a less innovative character. Still, these works, especially *Die Vögel* for choir, brass and tape (1989), contain moments of great drama and fierce beauty and only confirm that Boerman's aim is to continue rather than to break with tradition.

FRITS VAN DER WAA

**Boero, Felipe** (*b* Buenos Aires, 1 May 1884; *d* Buenos Aires, 9 Aug 1958). Argentine composer, teacher and choral conductor. After studying composition with Pablo Berutti, he won the Europa Prize (1912) and studied at the Paris Conservatoire with Paul Vidal and Fauré. He returned to Argentina in 1915 and founded the Sociedad Nacional de Música, which later became the Asociación Argentina de Compositores. In 1934 he was commissioned by the National Education Council to organize a choral concert in which 2000 singers took part. In 1935 he became a member of the Fine Arts Committee and was appointed professor and choral director of the Mariano Acosta teacher-training college and professor at the Manuel Belgrano Institute, Buenos Aires. Boero was one of the most distinguished opera composers in Argentina at the beginning of the 20th century. His *Tucumán* (1918) inaugurated a series of operas based on Argentinian subjects with Spanish librettos. His greatest triumph was *El matrero* (1929), which uses indigenous songs, rhythms and dances. These and other operas combine Romantic and Impressionist tendencies with some touches of *verismo*.

SUSANA SALGADO

**Boesch, Rainer** (*b* Männedorf, canton of Zürich, 11 Aug 1938). Swiss composer and pianist. Following a general education in Zürich, he settled in French-speaking Switzerland and obtained a diploma in piano, studying with Louis Hiltbrand and Harry Datyner at the Geneva Conservatory. In 1966 he left for Paris, where he studied composition with Messiaen and took a course with Schaeffer, Bayle and Reibel at the Groupe de Recherches Musicales. In 1968 he was awarded a first prize in composition at the Paris Conservatoire for *Désagrégation*: this was the first time an electro-acoustic work had been presented for one of the institution's competitions. On his return to Switzerland he directed the Lausanne Conservatory (1968–72), and undertook numerous activities in support of new music. He formed a duo partnership with the singer Kathrin Graf, and worked as a teacher and administrator at the Institut des Hautes Etudes Musicales (Crans/Montreux), and in Geneva at the Conservatoire Populaire, the Institut Jaques-Dalcroze and the Centre Suisse de Musique Informatique. He has also worked at IRCAM (1976–85), and has spent periods of teaching and research at the Massachusetts Institute of Technology (1988) and at Stanford University (1992). In 1996 he was appointed professor at the Paris Conservatoire and given responsibility for a course in computer music at the composition class of the Geneva Conservatory. Boesch demonstrates a sophisticated understanding of the manifold possibilities for musical expression offered by the computer, and its ability to enable composers to analyse their creative gestures more completely. His output covers a wide spectrum in both the instrumental and electro-acoustic fields.

JEAN-PIERRE AMANN

**Boesmans, Philippe** (*b* Tongeren, 17 May 1936). Belgian composer. He studied piano at the Liège Conservatory, where Froidebise introduced him to the techniques of serial writing. In 1957 he came into contact with Pousseur, Souris and Célestin Deliège (the 'Liège Group', who were ardent defenders of post-serial music in Belgium), and it was under their influence that he began writing music as a self-taught composer. From 1962 he collaborated with Pousseur on the productions of the Centre de Recherches Musicales de Wallonie, and performed as a pianist at the concerts of the Ensemble Musique Nouvelle. In the same year the RTBF engaged him as a producer, and his work with the radio orchestra enabled him to complete his apprenticeship in writing and orchestrating music. Very quickly recognized as a talented composer, he was invited to many festivals abroad and won several prizes, including the 1971 Italia prize for *Upon la-mi*. In 1981 Gérard Mortier, who had become director of the Théâtre Royal de la Monnaie in Brussels, offered him the post of musical adviser and then of composer-in-residence. The Opéra National commissioned three operas from him: *La passion de Gilles* (1982), on a libretto by the writer Pierre Mertens, and *Reigen* (1992), on a libretto by the theatrical director Luc Bondy from Arthur Schnitzler's novel. (This opera had several further productions on European stages.) Boesmans also wrote his *Trakl-Lieder* for La Monnaie, as well as the orchestration of Monteverdi's *L'incoronazione di Poppea*. A third opera, named *Wintermärchen* after Shakespeare's *The Winter Tale*, was premiered in 1999. His orchestral and instrumental music has also attracted much attention, in particular his Violin Concerto; its recorded version won him the Prix de l'Académie Charles Cros. His most recent works have been written as a result of various commissions, in particular for the Arditti Quartet and the Ensemble InterContemporain.

While serialism played an important part in his musical training, Boesmans very soon became aware of the necessity of transcending its constraints and exclusions. He took little interest in the idea of 'pure music' and has tried to reintroduce expressivity. Without repudiating the legacy of serialism he developed a very personal musical language in which such concepts as consonance, periodicity and rhythmics could find a place. Remote from neo-tonal or postmodern currents, Boesmans has nonetheless always sought to maintain links with musical tradition: 'One must be able to go back in order to go forward'. This explains his interest in large-scale forms and instrumental virtuosity. Close to Berio, whose heir he can to some extent claim to be, Boesmans has gradually developed a style in which the instrument plays a determining part: this 'methodical passion for instrumental virtues' also of course includes the human voice, in which the composer has always been interested. His delight in sound itself transforms virtuosity into brilliance, the expression of a purely musical pleasure. Like Berio, Boesmans has often written works for instrumentalists to whom they are dedicated, thus seeking to preserve the personality of his musicians in his instrumental writing. *Upon la-mi* was written for the variety-show singer

Claude Lombard, *Surfing* for the viola player Christopher Desjardins, and *Summer Dreams* for the Arditti Quartet.

Great liberty of writing, unbeholden to any system, is characteristic of the music of Boesmans, as it is of the compositions of his elders, Pousseur and Berio. He concentrates in particular on harmonic rhythm and speed, together with ideas of timbre which sometimes bring him close to Messiaen. His chords and aggregations of sound are always based on natural resonance, so that they have an almost voluptuous sonorous richness. Finally, the emotional and dramatic power of his works, so limpid on first hearing, conceals a structural, polyphonic and metrical complexity which makes Boesmans one of the outstanding composers of the late 20th century.

ERIC DE VISSCHER

**Boësset, Antoine** [Anthoine] **(de)**, Sieur de Villedieu (*b* Blois, 1586; *d* Paris, 8 Dec 1643). French composer. He was appointed *Maître des enfants de la musique de la chambre du roy* in 1613, *Maître de la musique de la reine* in 1617, *Sécretaire de la chambre du roy* in 1620, *Surintendant de la musique de la chambre du roy* in 1623 and *Conseiller et maître d'hotel ordinaire du roy* in 1634; he held most if not all of these posts simultaneously until his death. He was widely recognized as the leading composer of *airs de cour*, the first of which appeared in anthologies from 1608. Some 200 *airs* for four and five voices from his nine published books were intabulated for lute, and in 1689 J.-B.-C. Ballard produced collections of the polyphonic *airs*. Mersenne considered Boësset to be a master of song ornamentation and recommended all young composers to imitate him. The *airs* exhibit great melodic beauty, and the irregularity of polyphonic texture, conceived to give a certain theatricality to the poems, makes his works sound very modern. Contrasts of language, rhythm and scoring contribute to the expressiveness of the music, but the declamatory writing found in the works of Guédron has no place. From the seventh book of 1630 the instruction 'basse continue pour les instruments' appears several times, representing the first printed reference to basso continuo by a French composer. As *Surintendant de la musique de la chambre* Boësset wrote the music for many ballets, but there is no evidence that he composed sacred music; the motets and masses bearing his name can almost certainly be attributed to his son Jean-Baptiste. The inclusion of his works in late 17th-century manuscripts (in *F-Pn*) and the reissue of his *Airs de cour* in 1689 suggest that he was still held in high regard some 50 years after his death.

WORKS

Airs de cour, 4–5vv, 9 bks (Paris, 1617–42); many intabulated for lute in *Airs de différents autheurs mis en tablature de luth par Gabriel Bataille*, 6 bks (Paris, 1608–15) and in *Airs de cour mis en tablature de luth*, 10 bks (Paris, 1617–43); 1, from vol.ix, ed. in Mw, xii (1961)

*c*22 Ballets, 1615–42 incl.: Ballet de la Reyne représentant le soleil (1621); Ballet des volleurs (1624); Ballet des fées de la Forêt Saint-Germain (1626); Ballet la Félicité (1642); Ballet triomphes (1642)

Parodies spirituelles in La pieuse alouette, 1619[9]

26 airs in La despouille d'Aegipte, 1629[7]

*59 airs in F-Pn ms VM7 501*

AUSTIN B. CASWELL/GEORGIE DUROSOIR

**Boësset** [Boëcet, Boisset, Bouesset], **Jean Baptiste (de)**, Sieur de Dehault (*b* Paris, 29 Feb 1614; *d* Paris, 25 Dec 1685). French composer, eldest son of ANTOINE BOËSSET. He served the French court in various posts for nearly half a century. He inherited from his father the post of *surintendant de la musique de la chambre*, a half-yearly position which he shared with Auget, Cambefort and Jean-Baptiste Lully (i). Like his father he was *Maître de la musique de la reine mère*, until his demotion in favour of Cambert, and from 1662 *Maître de musique de la chambre*, *Chantre* and *Maître des enfants*, positions which he held until his death. He was also *Gentilhomme de la chambre* in 1646, *Chevalier* in 1648, *Conseiller et maître d'hôtel du roi* in 1651 and *Maître de la musique de la reine* in 1660; he sold this last title to Lorenzani in 1679. As well as four *airs de cour*, included in his father's eighth book of *Airs* of 1632, he wrote two operas: *La mort d'Adonis*, performed for the king in 1678, and *Alphée et Arétuse*, given 'at Fontainebleau in concert form' shortly after his death in 1686 (see *Mercure galant*, November 1686). He also collaborated in 12 *ballets de cour* from 1653 to 1666. Loret describes him as a composer of motets and Brossard attributes seven motets to him which appear under the name of Boësset only in a manuscript in the Bibliothèque Nationale, Paris.

Boësset's son, Claude Jean Baptiste, Sieur de Launay, inherited the title of *Maître de musique de la chambre du roi* from his father but was ordered to sell it to Jean-Baptiste Lully (ii) in May 1695. Claude Jean Baptiste ensured the reissue by J.-B.-C. Ballard of works by his grandfather, Antoine Boësset, in 1689.

WORKS

4 airs de cour in A. Boësset: Airs de cour, 4–5vv, bk 8 (Paris, 1632)
Airs in Ballet de la nuit, 1653; Ballet du temps, 1654; Ballet des plaisirs, 1655; Ballet de Psyché, 1656; Ballet d'Alcidiane, 1658; Ballet de la raillerie, 1659; Ballet du triomphe de Bacchus, 1666; Paroles et musiques pour le concert de la chambre de la musique de la reyne (P. Perrin), 1667: some airs in *F-Pn*
La mort d'Adonis (op, Perrin), 1678, lost, lib, *Pn*
Alphée et Arétuse (op, M. Boucher), Fontainebleau, 1686, lost
Mass, 4vv, bc
Mass, 5vv, bc; Mass 'du Tiers', 4vv, bc, ed. D. Launay, *Schola cantorum*, lxix–lxxii (n.d.); Salve regina, 4vv, bc; Anna mater matris Redemptoris, 5vv, bc; De profundis, 4vv; all in *F-Pn*
Mag, 4vv, bc; Domine salvum fac Regem, 4vv, bc, ed. D. Launay, *Anthologie du motet latin polyphonique en France* (Paris, 1963)
Many sacred works in MSS, *Pc*, *Pn*

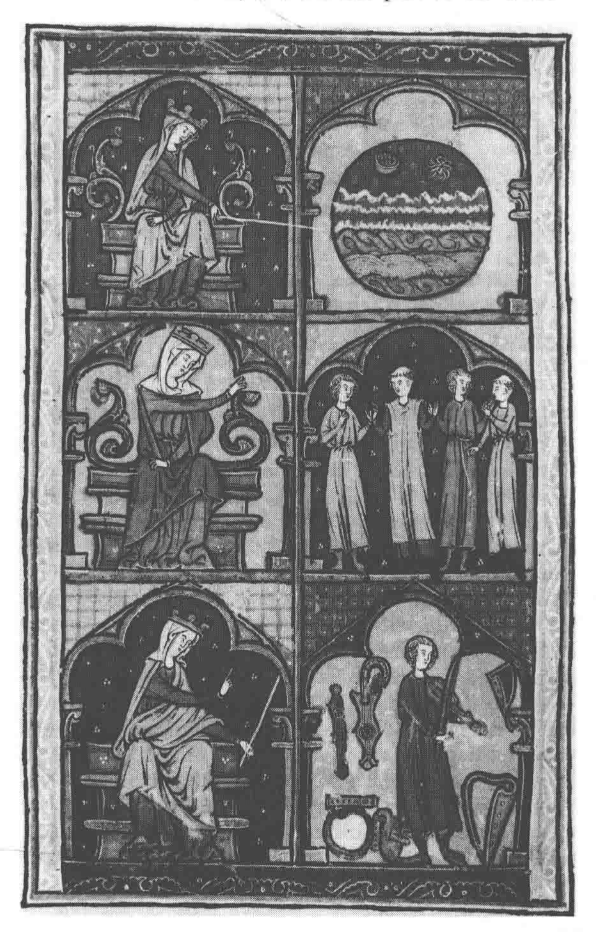
AUSTIN B. CASWELL/GEORGIE DUROSOIR



**Boethius** [Anicius Manlius Severinus Boethius] (*b* Rome, *c*480 ; *d* Pavia, *c*524 ). Roman writer and statesman. He was born into one of the foremost patrician families of Rome; following the death of his father in 487 he was taken into the home of Symmachus, another patrician. Boethius learnt Greek philosophy and the liberal arts from Symmachus and married his daughter. Both men were colleagues in later senatorial struggles.

Boethius's erudition in both the practical and speculative arts attracted the attention of Theodoric the Ostrogoth, then ruler of Italy. Through Cassiodorus, Theodoric requested Boethius's aid in various matters, including the selection of a kitharode for Clovis, King of the Franks. Cassiodorus, writing in his official capacity as *quaestor*, repeatedly praised Boethius's learning. Boethius became consul in 510, and in 522 was called to Ravenna to become Theodoric's *magister officium*. In 523 Cyprian, Theodoric's referendary, brought charges of treason against a senator, Albinus, and Boethius argued in Albinus's defence. Boethius was himself then charged and imprisoned with Albinus in Pavia, and ultimately executed.

The works of Boethius may be divided into four categories, in chronological order: didactic works, treatises on the mathematical disciplines probably written during the first decade of the 6th century; the logical works, in essence translations or commentaries on Aristotle, Cicero and Porphyry; the theological treatises, works expounding orthodox Christian doctrine according to philosophical methods; and the *Consolatio philosophiae*, a philosophical treatise written in the form of a Menippean Satire while Boethius was in prison.

Boethius's first works, written at the request of Symmachus, and dedicated to him, treated the four mathematical disciplines of antiquity: arithmetic, music, geometry and astronomy. Boethius described these disciplines as the 'quadrivium', the fourfold path to the knowledge of 'essences' – things unaffected by material substance (*De inst. arith.*, preface). Of the four works covering these disciplines, only the *De institutione arithmetica* and the greater part of the *De institutione musica* survive, although contemporary sources and later evidence show that Boethius probably completed all four works.

Unlike most of his contemporaries, Boethius did not merely repeat classical learning for rhetorical and encyclopedic purposes: he was a speculative thinker in the Greek philosophical tradition. Thus his mathematical works are not merely introductions to the fields of study with which the learned Roman should be acquainted; they are highly developed preparatory exercises for the study of philosophy in the neo-Pythagorean and neo-Platonic tradition. The work on arithmetic is a translation of Nicomachus of Gerasa's *Introduction to Arithmetic*; the treatise on geometry was a translation of Euclid's *Elements*; and the *De astronomia* followed Ptolemy's *Almagest*. Evidence in the extant musical treatise by Nicomachus (*Manual of Harmonics*) and in Boethius's treatise itself suggests that the first four books of *De institutione musica* are a somewhat loose translation of Nicomachus's lost work on music. The fifth book of *De institutione musica*, however, is based on the first book of Ptolemy's *Harmonics*. Boethius's treatise is incomplete, for it breaks off in the middle of book 5, and the last part of the work –

*Musica mundana, musica humana and musica instrumentalis: miniatures from the frontispiece of a Boethius MS from Paris, 1240s (I-Fl Plut.29.1, f.1v)*

probably comprising two further books (based on Ptolemy) after the lost final chapters of book 5 – seems to have disappeared not long after the work was written.

Music occupies an unusual position among the mathematical arts, according to Boethius, for it is related to ethical action as well as to pure reason (*De inst. mus.*, 1, chap.1). Since human behaviour is potentially influenced by music, it is very desirable to understand and control the fundamental elements of music (e.g. tonal systems, genera, modes). Moreover, music, in the form of *musica mundana*, is an all-pervading force in the universe – determining the courses of the stars and planets, the seasons of the year and the combinations of the elements; and as *musica humana* it is the unifying principle for the human being – bringing the body and soul into harmony, and integrating the rational and irrational parts of the soul and the disparate members of the body into harmonious wholes. Music is also said to be found in instruments (*musica instrumentalis*), which are subdivided into strings, winds, and percussion (*De inst. mus.*, 1, chap.2).

Boethius defines the true musician (*musicus*) as the scholar who can judge poetic compositions and instrumental performances by the application of pure knowledge; this scholar is to be distinguished from the poet, who composes songs more by instinct than by knowledge, and the instrumentalist, who is little more than a skilled craftsman (*De inst. mus.*, 1, chap.34).

The ultimate goal of the study of music for Boethius was fixed and unchanging knowledge. If music is to be known, it must be quantified; the transient sounds perceived by the senses, quantitative in their very nature, must be translated into ratios that correspond to discrete musical intervals. Thus a system of numerical ratios (two terms) and proportions (three or more terms) is constructed, and the structure of musical systems (collections of pitches) is determined by those ratios considered the simplest and closest to unity (multiple and superparticular ratios). Musical intervals are considered consonant or dissonant according to the integrity and simplicity of their mathematical ratios. Only after the full exposition of an elaborate and sometimes tedious musical mathematics are the basic elements of music translated back into audible sound by means of the monochord, the instrument with which one can make audible the mathematical ratios as well as the genera and systems tempered by pure mathematics.

Several passages in Boethius's *De institutione musica* are of particular import in the history of musical thought. A clear and perceptive theory of sound is found in book 1, chap.14. The final chapter of book 4 presents a distinction between interval (a relationship between successive sounds) and consonance (one between simultaneous sounds). Book 4, in chaps.14–17, discusses the basic elements of Greek modal theory with notational charts clearly illustrating the basic principles of that system.

The *De institutione musica* fell into virtual oblivion between the 6th century and the 9th, but emerged as an important work in the revival of the liberal arts during the Carolingian renaissance. Evidence in the manuscript tradition of Cassiodorus's *Institutiones* places Boethius's musical work in the court library of Charlemagne: two early 9th-century codices (*D-KA* CVI and *CH-BEsu* 212) preserve one of the earliest traditions (known as the Δ recension) of the second book of Cassiodorus's *Institutiones* – that which discusses the seven liberal arts. Bischoff has argued that these codices as a whole preserve a textual tradition stemming from the court of Charlemagne. The same codices also contain a short treatise entitled *Quantis cordis antiqui musici ubi sunt quorum Boethius in capitulo, de additione vocum, meminit quaeve sunt eorum nomina vel ordo* ('On how many strings were used by the ancient musicians, on which Boethius, in his chapter "On the addition of pitches", recalls what they are, their names and their arrangement'). The title itself and the names of notes and genera recorded in this very brief treatise testify to a knowledge of Boethius's work among Frankish scholars and scribes from the earliest decades of the 9th century.

The manuscript tradition of *De institutione musica*, preserved in over 150 codices containing the work or extracts from the work, represents the most extensive textual tradition of any musical treastise of the Middle Ages. The reception of the *De institutione musica* from the 9th century to the 12th century can be traced in an extensive commentary, known as the *Glossa maior*, found in the margins of numerous manuscripts containing the work. The earliest layer of commentary, dating from the middle third of the 9th century, concentrates on philosophical, philological and mathematical aspects, and ignores any relationship between *musica*, the mathematical discipline, and *cantus*, the musical practice of the period. The philosophical commentary of these decades exhibits strong parallels with the Platonic thought of contemporary thinkers, particularly Johannes Scottus Eriugena (*d c*877). Only in the final third of the 9th century does the commentary begin to acknowledge a contemporary musical practice and cite specific examples from the plainchant repertory.

The epistemological emphasis of Boethius became a predominant theme in medieval music theory from its earliest flowering in the late 9th century. Extensive elements and literal quotes from *De institutione musica* are found in the *Musica enchiriadis* and in the treatises of Aurelian of Réôme, Regino of Prüm and Hucbald. During the 10th and 11th centuries the Pythagorean diatonic musical system espoused by Boethius formed the essential collection of pitches imposed on the repertory of liturgical chant and subsequently became the basis of musical notation – with relatively little concern for the many incongruities that existed between the chant melodies and Boethius's highly restricted set of pitches. The distinction between the *musicus* and *cantor*, a dichotomy that clearly exercised a negative influence in the application of systematic musical thought to the innate nature of the repertory of chant, is ultimately rooted in Boethius's philosophical position. Not until Guido of Arezzo (*d* after 1033) was Boethius candidly regrouped with philosophers rather than musical theorists; yet even Guido repeated the myth of Pythagoras and the smithy – a myth that espouses the essentially Pythagorean basis of musical thought. Although Boethius's influence waned in the later Middle Ages as theory became more oriented toward musical practice, his work nevertheless remained an *auctoritas* of ultimate appeal in musical thought throughout the later Middle Ages and even well into the early 17th century.

CALVIN BOWER

**Boettcher, Wilfried** (*b* Bremen, 11 Aug 1929; *d* Saint Siffret (Gard), 22 Aug 1994). German conductor. A pupil of Arthur Troester, Pierre Fournier and Pablo Casals, he was a solo cellist in Hanover for two years before taking up a post at the Vienna Music Academy in 1958. A year later he founded the chamber orchestra the Vienna Soloists with which he travelled on concert tours throughout Europe and to the USA and Japan, and made many recordings. From 1965 to 1974 Boettcher was a professor at the Hamburg Staatliche Hochschule für Musik, where he took classes in cello, chamber music and orchestral training; from 1967 to 1971 he was principal conductor of the Hamburg SO and from 1970–73 resident conductor at the Hamburg Opera. He also conducted the New Philharmonia Orchestra, the English Chamber Orchestra, the Berlin PO, the Budapest PO and the Orchestre de Paris, and in 1986 was appointed principal guest conductor of the Northern Sinfonia. He conducted frequently at the Deutsche Oper, Berlin, and at the Vienna Staatsoper, and appeared at the Salzburg, Aix-en-Provence, Athens and Florence festivals. Boettcher's repertory extended from Bach to Lutosławski, but his performances of Mozart were especially praised for their organic flow, flexibility and vigour.

HANS CHRISTOPH WORBS

**Boetticher, Wolfgang** (*b* Bad Ems, 19 Aug 1914). German musicologist. He began his studies in musicology at the University of Berlin in 1933, where his teachers included Schering, Schünemann, Sachs, Moser, Blume and Osthoff. In 1939 he took the doctorate at Berlin with a dissertation on Schumann. He completed his *Habilitation* there in 1943 with a study of solo lute playing in the 16th and 17th centuries and taught as an external lecturer until 1945. In 1948 he took up teaching duties at Göttingen, first as a lecturer, then as professor in 1954, serving twice as director of the musicology institute (1958–60, 1976–79). In 1958 he also obtained a teaching post at the Technical University of Clausthal. He became professor emeritus in 1979, but continued to teach musicology courses at the University of Göttingen.

Boetticher specialized in the music of the Renaissance and the 19th century. His vast output, particularly on Lassus and Schumann, has made significant contributions to research in these areas; many of his articles have been published in Festschriften and congress reports. In the 1980s he became the centre of controversy when questions were raised about his involvement in the confiscation of property under German occupation during World War II, prompting investigations into his affiliation with Nazi ideologue Alfred Rosenberg, and leading to his suspension from teaching in 1998.

PAMELA M. POTTER

**Boetzelaer** [née van Aerssen], **Josina Anna Petronella van** (*b* The Hague, 3 Jan 1733; *d* Ijsselstein, 3 Sept 1787). Dutch composer. She is one of the few 18th-century Dutch composers, and one of only two Dutch women composers of the period whose music survives. She was born a baroness and served as a lady of the court, first to Princess Anna of Hanover, wife of Stadtholder Willem IV, and later to her daughter Princess Caroline. Both princesses were accomplished musicians and van Boetzelaer may have participated in music-making in court circles. She later studied music with F.P. Ricci, who was regularly engaged as a violinist by the House of Orange, and published ariettas, canzonettas and arias. Her two surviving collections of arias with orchestral accompaniment, opp.2 and 4, set texts by Metastasio in an expressive mid-18th-century *opera seria* style. They are well-balanced, light and elegant pieces in shortened de capo or bipartite form with effective pictorialism and coloratura. Ricci played some of her pieces on a visit to Metastasio, probably in 1780.

HELEN METZELAAR

**Boeuf, Georges** (*b* Marseilles, 21 Dec 1937). French composer. He studied composition at the Marseilles Conservatoire (where he was appointed professor of composition in 1988) and the organ with Pierre Cochereau in Nice. One of the founders of the Groupe de Musique Expérimentale de Marseille in 1969, he became the ensemble's director in 1974. As a composer, he has written electro-acoustic, vocal and instrumental works, all based on a similar aesthetic. *Boucles* (1979), the second of the Préludes, op.15 for piano, emphasizes the acoustic effects of attacks, while *Les filles du sommeil* (1987), an electro-acoustic work, recreates the impressionistic textures of a large orchestra. In the String Quartet (1996), contrapuntal passages alternate with sections in which the individuality of the instruments is lost in an indistinct mass of sound. While Boeuf has demonstrated a fondness for free pulsations in which harmonic blocks clash with a Stravinskian vigour, he is equally at ease with melodic invention, as the slower passages of *Où il est question d'un coucher de soleil* (1989), *Le vol de Cornélius* (1990) and the opera *Verlaine Paul* (1995) demonstrate. In other

works, most notably *Risées* (1994), he has sought a harmonic climate of refined colouring focussed on powerful centres of attraction, but not alluding to tonality.

WORKS
(*selective list*)

Op: Verlaine Paul (F. Venaille), op.62, 1995, Nancy, 29 Oct 1996

Orch: Transparences, op.6, str, 1972; Où il est question d'un coucher de soleil, op.49, vc, orch, 1989; Risées, op.58, chbr orch, 1994; Orbes, op.64, str, 1997

Vocal: A la mystérieuse (R. Desnos), op.37, Mez, pf, 1986; Miroir/Absence (A. Bosquet), op.41, 12vv, 1987; Le pays pesant (E. Jabes), op.59, Bar, insts, 1993; L'écho de ton·nom (E. Aubert), op.61, 4vv, 4 insts, 1995

Chbr and solo inst: Parallèles, op.2, sax qt, 1967; 7 préludes, op.46, pic, 1988; Le vol de Cornélius, op.49, basset hn, str qt, 1990; 6 chants pour la terre, op.55, 6 perc, 1991; WYW, op.60, wind qnt, 1995; Str Qt, op.63, 1996

Pf: Forme de l'absence, op.14, 1978; Préludes, op.15, 1979; 8 variations contrapuntiques, op.30, 1984; Nocturne, op.35, pf + sampler, 1985; Prélude 'Forme', op.48, 1989

Tape: Le départ pour la lune, op.5, 1972; Mémoire, op.4, 1972; Le sang des uns, op.7, 1973; Champs, op.9, 1975; Abyssi symphonia, op.18, 1980; Les filles du sommeil, op.39, 1987; Le chant de la nature, op.57, 1992

Principal publishers: CY, Billaudot, Leduc

GÉRARD CONDÉ

**Bogard, Jean** (*b* Leuven, ?*c*1531; *d* Leuven, 17 Feb 1616). Flemish bookseller and printer. He worked initially at Leuven (1562–72) but by 1574 was settled in Douai, where he had moved to avoid political turmoil; in both towns his sign was the Bible d'Or. At Leuven he printed 'with the authority of the University' and at Douai he became University Printer, receiving in 1590 the freehold of his premises. Bogard returned to Leuven in 1586 to reopen the office there, leaving his son Jean (*b* Leuven, 29 March 1561; *d* Douai, ?July 1627) to manage the Douai office in his absence. Publication continued at Leuven until 1598; thereafter the firm operated only at Douai. In 1607 Bogard's wife died, and shortly afterwards he retired to Leuven, marrying again in 1610 and spending his final years there. His son Jean succeeded him as head of the firm in 1607, a position he held for 20 years. In 1627 the business passed to his heirs. Jean (ii)'s son Pierre (*b* Douai, 22 March 1596; *d* Douai, ?*c*1638) continued to print at the Bible d'Or from 1628 to 1633, sometimes in partnership with his brother Martin (*d* 1636). Martin's widow remarried in 1637 and Pierre's in 1639, and the business declined; by 1655 debts owing to the firm of Phalèse (119 florins 12 stuivers) were written off as irrecoverable.

The Bogard family had close links with other printers and humanists, as well as extensive commercial dealings with the firms of Phalèse and Plantin. One of Jean (i)'s daughters married Balthazar Bellère, the son of Phalèse's associate, Jean Bellère of Antwerp; Balthazar printed at Douai from 1593 to 1639. No music was published by Bogard at Leuven, in deference to Phalèse's position there, but it was an important part of his operations at Douai. The firm's output comprised about 500 books, mostly theology, literature and schoolbooks, but a tenth of the total was music. 20 volumes of masses, motets and chansons published between 1578 and 1633 have survived, and a further 34 are listed either in the Plantin archives (at *B-Amp*) or in the catalogues of the Frankfurt book sales and those published by Balthazar Bellère between 1598 and 1636. A wide range of composers is featured including Ath, Beauvarlet, Bournonville, Jean de Castro, Gallet, Handl, van Heymissen, Machgielz, Marissal, Maulgred, Pennequin, Pevernage, the Regnart brothers and Jan van Turnhout; Bogard also reprinted popular collections, such as Phalèse's *Livre 7 des chansons vulgaires* and Gastoldi's *Balletti a 5 voci*. Bogard appears to have acquired various printing materials from Phalèse. His 1578 publication of Pevernage's *Cantiones aliquot sacrae* employs a title-page border typical of Phalèse, and with similar large decorative initials and is described as being printed 'typis Phalesii'; the music type is identical to that used by Pierre Phalèse (i).

SUSAN BAIN

**Bogatïryov, Semyon Semyonovich** (*b* Kharkiv, 3/16 Feb 1890; *d* Moscow, 31 Dec 1960). Russian musicologist and composer. He studied law at Khar′kiv University (1907–12) and composition at the St Petersburg Conservatory with Vītols, Kalafati and Steinberg (1912–15). He subsequently taught there, and at the Khar′kiv Conservatory (1917–19); he was rector and professor (1919–22) at the Kuban′ Conservatory and a lecturer in theory and composition (1922–41) at the Kharkiv Institute of Music and Drama (later a conservatory). During World War II he worked at the Kiev Conservatory, which had been evacuated to Sverdlovsk; from 1943 he was a professor of composition and counterpoint, and also pro-rector and dean of the department of theory and composition at the Moscow Conservatory. In 1947 he took the doctorate with a work on double canon.

Bogatïryov's work was chiefly concerned with the development of a theory of counterpoint, on which he was the USSR's leading authority. He followed Taneyev's ideas of a mathematicized process for discovering contrapuntal combinations. In *Obratimïy kontrapunkt* ('Retrograde Counterpoint'), his most important work, he probed the natural laws of retrograde, mirror and (in part) cancrizans counterpoint, which were previously little studied. Although it offers solutions to the problems of reviving counterpoint in 20th-century European music, Bogatïryov himself had little taste for contemporary music, despite his intensive study of Hindemith and Schoenberg. As a composer he was stylistically close to Russian academicism of the late 19th century. He wrote a number of symphonic and chamber works. His editing and completion (1951–5) of the orchestration of Tchaikovsky's E♭ symphony (1892) has won recognition.

L.M. BUTIR/LYUDMILA KORABEL'NIKOVA

**Bogdanov-Berezovsky, Valerian Mikhaylovich** (*b* Starozhilovka, nr St Petersburg, 17 July 1903; *d* Moscow, 13 May 1971). Russian critic and composer. His father was a leading laryngologist and specialist in the teaching of the deaf and dumb. His mother possessed literary gifts, and the whole family took a keen interest in the arts. However, on his father's insistence Bogdanov-Berezovsky attended the Nikolayevsky military school (1914–17).

He began to compose in childhood, and on the advice of Ziloti, a friend of the family, took lessons with V.M. Belyayev (1918–19). He entered the Petrograd Conservatory in 1919 to study composition with Steinberg and piano with Daugovet. He studied counterpoint first with N. Sokolov and then with A. Lyapunov, and instrumentation with A. Zhitomirsky. His father's death forced him to discontinue his piano studies at the Conservatory and take a job as a medical orderly on the ship *Narodovlets*. As a result, in 1924 he was dismissed from the Conservatory, but taken back in 1925 into Vladimir Shcherbachyov's composition class.

As a student, Bogdanov-Berezovsky was a close friend of Shostakovich; the two saw each other daily and also corresponded – the former claimed to possess approximately a hundred letters from Shostakovich. The two were members of a student circle of composers. While Shostakovich exerted a strong compositional influence on Bogdanov-Berezovsky, the latter influenced his younger friend in literary matters.

During the late 1920s Bogdanov-Berezovsky struck up a friendship with Shaporin and Popov, corresponded with Boleslav Yavorsky, and was an accompanist at classes of the great ballerinas Ol'ga Spesivtseva and Lidiya Ivanova before the latter's tragic death. He began critical work at this time and quickly established himself as one of Leningrad's leading music critics; he began on the staff of the journal *Rabochiy i teatr* ('The worker and theatre'). After graduating from the conservatory in 1927 he was an active propagandist for contemporary music, both Western and Soviet, and he worked closely with Asaf'yev and others in the Leningrad Association for Contemporary Music and with other professional music associations. He also completed important studies of Soviet opera and of Tchaikovsky's stage works, and in 1940 he was appointed principal teacher of the history of Soviet music at the Leningrad Conservatory. Outstanding compositions of this period include the First Symphony, the Piano Concerto and the opera *Granitsa* ('The Frontier'). Critics have seen in his music not only an adherence to older Russian musical traditions but also the impact of many of the leading figures of the 1920s.

Bogdanov-Berezovsky remained in Leningrad during the war as chairman of the board of the Leningrad Composers' Union, replacing Shostakovich, who had left the city. He devoted himself to administrative and mass-cultural work, wrote the opera *Leningradtsï* and was among the first to receive the Medal for the Defence of Leningrad (1943). After the war he worked intensively in both composition and musicology. He collaborated in the Leningrad Institute for Scholarship and Research in the Theatre and Music from 1946, and in 1947 he obtained the degree of *kandidat* of arts. In addition he directed the repertory division of the Malïy Opera Theatre (1951–61) and the music-theatre section of the Leningrad branch of the Composers' Union, later heading its musicology and criticism section.

WORKS
(*selective list*)

Ops: Granitsa/Doch' Barmaka [The Frontier/Barmak's Daughter] (Bogdanov-Berezovsky), op.20, 1936–40, perf. 1941; Leningradtsï [The Lenigraders] (V. Ketlinskaya), op.29, 1942–5; Nastas'ya Filippovna (Bogdanov-Berezovsky, after F.M. Dostoyevsky: *The Idiot*), op.50, 1963–4, concert perf. 1968

Ballets: Devushka s krïl'yami [The Girl with Wings] (R. Zakharov), op.37, 1950; Sïn polka [Son of the Regiment] (L. Del'-Lyubashevsky and B. Fenster), op.46, 1955; Chayka [The Seagull] (B. Glovatsky, after A.P. Chekhov), op.49, 1960; Rovesniki, unfinished

**Bogentantz** [Bogentanz, Bewgintancz], **Bernhard** (*b* ?Liegnitz [now Legnica], *c*1494; *d* after 1527). German theorist. The family residence in Liegnitz is documented from 1381, but the name is absent from the town records begun in 1546. Bogentantz attended the Gymnasium in Goldberg, and in 1508 he matriculated in the faculty of arts of Cologne University, where he may have been the pupil of Cochlaeus and fellow student of Glarean. In 1516 he was granted the status of *magister*, and he probably taught there for two years in accordance with the faculty regulations. In 1525 he matriculated at Wittenberg University, perhaps to study theology; he returned to Liegnitz in 1527. No documents have been found to support Bauch's theory that Bogentantz was rector of the parish school of St Peter and St Paul Liegnitz, from about 1530.

Bogentantz wrote a music treatise, *Collectanea utriusque cantus ... musicam discere cupientibus oppido necessaria* (Cologne, 1515, 2/1519, 3/1528, 4/1535; the third and fourth editions were called *Rudimenta utrius cantus*). It is divided into two books: the first (six chapters) deals with *musica plana*, the second (13 chapters) with *musica mensuralis*. It is a typical humanistic school manual, and closely follows the pattern of other German examples by Rhau, Listenius, Sebald Heyden and Martin Agricola. For his sources Bogentantz used mainly Gaffurius's *Practica musice* (Milan, 1496) and Cochlaeus's *Musica* (Cologne, 3/1507), often quoting directly both text and music examples.

HEINRICH HÜSCHEN/R

**Boghen, (Carlo) Felice** (*b* Venice, 23 Jan 1869; *d* Florence, 25 Jan 1945). Italian pianist, music scholar and composer. Having taken diplomas in piano and composition at the Bologna Liceo Musicale where he studied with Giuseppe Martucci, Gustavo Tofano and Alessandro Busi, he continued his training in Rome with Sgambati. Later he also studied the piano in Munich with Martin Krause and Bernhard Stavenhagen (both pupils of Liszt), and composition with Wolf-Ferrari. On his return to Italy he devoted himself to conducting and playing the piano in Viterbo, Carrara and Reggio nell'Emilia; he was also director of the school of music in Reggio nell'Emilia. In 1910 he became a teacher of harmony and score-reading at the Istituto Musicale in Florence. From that time onwards he increased his activity as a pianist, playing in the Florentine Trio (with Tignani and Coen) and with the Florentine Sextet for piano and wind which he founded in 1925. He was a member of the philharmonic societies of Bologna, Florence and Rome, and a member of the Société des Musicologues Français. As a Jew, he was forced by the racial laws to give up all his public posts in 1939. A meticulous scholar, Boghen worked mainly with early music. He made editions of old French songs, piano arrangements of pieces by Bach, Liszt, Marcello, Clementi, Frescobaldi, Domenico Scarlatti and Bernardo Pasquini, as well as arrangements for violin and piano of pieces by Tartini, Nardini and Veracini. His compositions include an unperformed opera *Alceste*, held in high regard by Sgambati and others, vocal and chamber works and many piano pieces; he also wrote books on keyboard technique and on the composers Pasquini and Busoni.

DINA ZANETTI MASIELLO/CLAUDIO TOSCANI

**Bogianckino, Massimo** (*b* Rome, 10 Nov 1922). Italian administrator, pianist and musicologist. He was a piano pupil of Casella at the Accademia di S Cecilia, Rome, and of Cortot at the Ecole Normale de Musique, Paris; he also studied composition with Virgilio Mortari and musicology with Luigi Ronga at the University of Rome and P.M. Masson at the Sorbonne. After performing widely in Europe and the USA, he devoted himself to teaching and musicology, holding posts at the Carnegie Institute, Pittsburgh (1948–51), the Pesaro Conservatory (1951–7), the Rome Conservatory (1957–67) and Perugia University (1967–94). In 1978 he founded the periodical *Esercizi: arte musica spettacolo*. His book *L'arte clavicembalistica di Domenico Scarlatti*, prompted by his own playing, was one of the first to approach the subject in the context of both historical background and stylistic criticism. In addition to serving as director of *Enciclopedia dello spettacolo* (1958–62) he has held a number of administrative positions as artistic director of the Accademia Filarmonica Romana (1961–3), the Teatro dell'Opera, Rome (1963–8), the Spoleto Festival of Two Worlds (1968–71), the Accademia di S Cecilia concerts (1971), La Scala (1972–4) and Sagra Musicale Umbra (1994–5), general manager of the Teatro Comunale, Florence (1975–82, 1990–95) and general administrator of the Paris Opéra (1982–5). He has been active in reviving music of the past as well as presiding over the creation of contemporary music falling within the most significant 20th-century trends. He has acted as a catalyst for collaboration between composers, performers, designers, directors and choreographers.

CAROLYN GIANTURCO/BIANCAMARIA BRUMANA

**Boglhat, Johannes de.** *See* BUGLHAT, JOHANNES DE.

**Boglietti, Alexander de.** *See* POGLIETTI, ALESSANDRO.

**Bogoslovsky, Nikita Vladimirovich** (*b* St Petersburg, 9/22 May 1913). Russian composer. A nobleman by descent, he received private lessons in composition from Glazunov (1927–8) and was an external student at the Leningrad Conservatory where he studied composition with P.B. Ryazanov and theoretical disciplines with Kh.S. Kushnaryov, Shteynberg and Shcherbachyov (1930–34). He avoided taking up official posts in favour of creative work. He became vice-president of the USSR-France Society in 1965 and a People's Artist of the USSR in 1983.

Bogoslovsky gained popularity through his songs of which he wrote more than 500. The most popular of these date from the pre-war and war years. As a rule they were written for films (such as *Istrebiteli* ('Fighter Planes') of 1939 and *Dva boytsa* ('Two Fighting Men') of 1942), but afterwards they came into vogue on their own account. In these songs Bogoslovsky showed himself to be a talented melodist and a sincere lyricist; he also diplays a gift as a humorist, and frequently incorporates into his songs the slang and atmosphere of the Odessa criminal underworld. His large-scale works such as symphonies and operas bear the stamp of his songs. Thus, the second and third symphonies (in C minor, 1956, and G minor, 1959), and also the symphonic narrative based on Tvardovsky's *Vasily Tyorkin* (1950, rev. 1963) are linked, in terms of their themes and general musical character, to his work as a songwriter. 'The Theatrical Symphony' (his Fifth Symphony in A minor, 1980) reflects Bogoslovsky's attraction towards the theatricality of dramatic art. In the lyrical dramas *Neznakomka* ('The Unknown Woman') and *Balaganchik* ('The Little Booth-Show'), after Aleksandr Blok, the reading of the poetical texts alternates with music which enhances their effectiveness and which provides a background commentary. Bogoslovsky also gained popularity as a gifted man of letters of a markedly satirical cast. He is the author of the roguish novel *Zaveshchaniya Glinki* ('Glinka's Testaments') (published in 1993), *Zametki na polyakh shlyapï* ('Notes on the Brim of a Hat'), *To bïlo i chego ne bïlo* ('What Happened and what did not Happen') (1996), and also numerous publications in newspapers and journals.

WORKS
(*selective list*)

Stage: Sol' [Salt] (op, 2 scenes, B. Kornilov, after I. Babel'), 1932–80, The Moscow Chamber Theatre of Music, 1980; Neznakomka [The Unknown Woman] (lyrical drama, after A. Blok), 1972, The Moscow Chamber Theatre of Music, 1982; Balaganchik [The Little Booth-Show] (lyrical drama, after Blok), 1976; The Moscow Chamber Theatre of Music, 1982; 17 operettas and musical comedies, incl. MARINA NEST'YEVA

**Bogotá.** Capital city of Colombia. It was founded in 1538 by the Spanish Conquistador Gonzalo Jiménez de Quesada on the site of a Chibcha settlement. In 1564 Santa Fe de Bogotá became the seat of an archdiocese. Protected by the inaccessibility of its inland site at a height of 2640 metres, the cathedral of Bogotá preserved its colonial music treasure long after other South American cathedrals had been pillaged.

The first mestizo *maestro de capilla*, Gonzalo García Zorro (1548–1617), was succeeded from May 1584 to January 1586 by Fernández Hidalgo, the greatest South American composer of his epoch. Hidalgo's surviving manuscripts at Bogotá consist of Vespers or compline music that bears comparison with the best works in the printed and manuscript collections by Morales, Guerrero, Rodrigo Ceballos, Victoria and other leading European composers that were purchased for Bogotá Cathedral during his epoch and later. The earliest Bogotá *maestro de capilla* of whom vernacular works survive was José de Cascante, active from about 1650 until his death in 1702. His successor was Juan de Herrera, the most prolific and talented colonial composer born in Bogotá. At least 25 other notable local musicians of the 18th century are known from Bogotá Cathedral documentation. Throughout the colonial epoch the local musical life reflected tastes in Europe, ranging from Renaissance *a cappella* music to Haydn and Neukomm masses. A special endowment for musicians was established by Archbishop Antonio Sanz Lozano in 1687, and income from his fund enabled the cathedral to continue hiring competent professionals after Colombia became independent in 1819.

In the 19th century Italian opera became popular among the cultured at Bogotá, as it did elsewhere in South America. The national anthem, *O gloria inmarcesible!*, was composed in 1887 by an emigrant Italian operatic tenor, Oreste Sindici (1837–1904), who reached Bogotá with a touring company in 1864. His masses and motets contain echoes of Rossini's *Tancredi* and Verdi's *Rigoletto*. Before the adoption of his national anthem, six others had temporarily been used. Henry Price (1819–63), who composed the music for the third, founded the Sociedad Filarmónica in 1847 with 55 orchestral players, but in 1854 political unrest drove him back to New York. Among his first violins was Juan de Jesús Buitrago, later the first teacher and the European travelling companion of E.A. MacDowell. Prominent musicians in 19th-century Bogotá also included Nicolás Quevedo Rachadell (1803–74), Eugenio Salas (1823–53), Julio Quevedo Arvelo (1829–97), Vicente Vargas de la Rosa (1833–98), Diego Fallón (1834–1905) and José María Ponce de León (1846–82), who was the first composer of Colombian operas (*Ester*, 1874, and *Florinda*, 1880). The first Colombian to publish theoretical works was Santos Cifuentes Rodriguez (1870–1932), whose *Tratado de armonia* was published in London by Novello (1892), and whose *Teoria de la música* appeared at Bogotá in 1907.

In 1882 J.W. Price founded the Academia Nacional de Música, which became the national conservatory in 1909. In 1936 Guillermo Espinosa founded the Orquesta Sinfónica Nacional, the name of which was changed to Orquesta Sinfónica de Colombia in 1952, upon the appointment of the Estonian Olav Roots as director. Others prominent in the musical life of Bogotá in the 20th century included Guillermo Uribe Holguín, José Rozo Contreras, Jesús Bermúdez Silva, Adolfo Mejía and Jesús Pinzón Urrea (*b* 1929). Well-known representatives of a later generation include Blas Emilio Atehortúa (*b* 1933) and Jacqueline Nova. In the 1960s Andrés Pardo Tovar was a prominent writer on musical subjects, and Otto de Greiff, of Swedish descent, a leading music critic. José Perdomo Escobar (1917–80), born at Bogotá, was the foremost Colombian music historian of his generation.

ROBERT STEVENSON

**Bogusławski, Edward** (*b* Chorzów, 22 Sept 1940). Polish composer. He studied composition with Szabelski at the Katowice State Academy of Music, where he returned as lecturer in 1966. His output is made up primarily of instrumental works, though he also achieved some success with his symphonically conceived opera, *Sonata Belzebuba* (1974). His works of the 1960s reflect a Polish tendency towards heightened, almost cataclysmic expression, especially when using voices. He has shown an increasing predilection for sustained lyricism, particularly in the concertos and in chamber works such as the *Preludi e cadenza* (1983). In 1968, with *Per pianoforte*, he began a long fascination with mobile structures and experimented with extended instrumental techniques. He is one of the few Polish composers to have retained serially derived pitch elements beyond 1970. Several pieces mark anniversaries of politico-historical events in 1944–5.

WORKS
(*selective list*)

Stage: Sonata Belzebuba (op, 2, Bogusławski, after S.I. Witkiewicz), 1974, Wrocław State Opera, 19 Nov 1977

ADRIAN THOMAS

**Bogusławski, Wojciech** (*b* Glinno, nr Poznań, 9 April 1757; *d* Warsaw, 23 July 1829). Polish impresario, librettist, actor and singer. He was a central figure in the history of the Polish theatre. He studied in Kraków (1770–73), where he attended many theatrical and concert performances organized by Sierakowski, prompting him to change the direction of his career away from the army and towards the theatre. He probably completed his studies at the Piarist school in Warsaw. For a few months during 1778 he studied acting with L. Montbrun, a Warsaw theatrical impresario. Soon afterwards he made his début as an actor in N.T. Barthé's comedy *Zmyślona niewierność* ('Imaginary Infidelity'), and on 11 July 1778 as a singer and librettist in the première of Maciej Kamieński's opera *Poverty made Happy*. In 1783 he became the director of the National Theatre in Warsaw, remaining in this position (with some breaks) until 1814. He also managed theatres: Dubno and Grodno (1784 and later years); Vilnius (1785–90); Warsaw (1790–95); in Lwów (1795–9); and Warsaw, for the third time (1799–1814). He gave guest performances elsewhere, including Łowicz, Poznań, Kalisz, Białystok, Kraków and Gdańsk, and from 1804 to 1806 also managed the German theatre in Warsaw. Bogusławski got into severe financial difficulties as a result of Poland's loss of independence, the Napoleonic wars, and the consequent lack of financial support, to the theatre, from government funds. He built up enormous debts and had almost gone bankrupt when, on 30 April 1814, he passed control of the National Theatre to his son-in-law, L. Osiński, who was to continue to manage it until 1825. Bogusławski remained at the theatre as an actor, and also advised Osiński. He continued to travel widely, and created his own theatre companies in the provinces. He performed at the National Theatre for the last time on 20 November 1827 in J.A.M. Monperlier's comedy *Koszyk wiśni* ('The Cherry Basket'). In 1811 he opened the first Drama School in Poland, and for three years he supported this school himself. He also established the Foundation for Retired Actors.

His career as an actor-singer began in roles as the romantic lead, such as the part of Antek (tenor) in *Poverty made Happy*. His greatest successes came during the years 1790–95 in the cheerful yet sceptic roles of the 'people's philosopher' (for example, the baritone role of Bardos in Jan Stefani's opera *The Supposed Miracle, or Kracowians and Highlanders*), and in bass roles (*basso caricato*) in Italian operas. He translated about 80 stage works from Italian, French and German, including works by Diderot, Molière and Shakespeare (including five tragedies). He also translated about 30 opera librettos, including Paisiello's *La frascatana* (1782), Salieri's *Axur, re d'Ormus* (1793), and two of Mozart's operas, *Die Entführung aus dem Serail* (23 November 1783, 16 months after its première in Vienna) and *Die Zauberflöte* (1802). He also wrote his own librettos, including three for Elsner. The best, with its highly patriotic sentiments, was that for Stefani's *The Supposed Miracle, or Kracowians and Highlanders*. His other librettos (set by Józef Elsner) are *Herminia, czyli Amazonki* ('Herminie, or The Amazons'; Lwów, 1797), *Izkahar, król Guaxary* ('Iskahar, King of Guaxara'; Lwów, 1797) and *Sydney i Zuma, czyli Moc kochania czarnej niewiasty* ('Sidney and Zuma, or The Power of a Black Woman's Love'; Lwów, 1798). He was known as the 'Polish Molière', and after 1795 as the 'father of [Polish] theatre'. He was aware of new stylistic trends in the arts and gave Polish theatre its first exposure to Romanticism.

BARBARA CHMARA-ŻACZKIEWICZ

**Boháč, Josef** (*b* Vienna, 25 March 1929). Czech composer. He received his musical education at the Brno Janáček Academy (1951–6), where his teachers included Petrželka (composition). Appointments followed as director of the music publishing house Panton (1968–71) and head of music broadcasting at Czechoslovak Television in Prague (1970–79); concurrently he worked for the Czech Music Fund and various national composers' associations. From 1984 to 1990 he was artistic director of the Prague Chamber Opera. In 1991 he co-founded the Český Krumlov international music festival.

In his early career Boháč composed mainly mass and variety songs; arrangements for the Brno Radio Ensemble of Folk Instruments (BROLN) and music for brass band. After the mid-1960s he embraced the classical tradition, producing a corpus of works inspired by his wife, the soprano Marta Boháčová, and other outstanding Czech performers, including Josef Suk, Lubomír Malý and the Due Boemi di Praga. Equally successful has been Boháč's contribution to opera, especially with regard to the one-act *Námluvy* ('The Courtship') and the full-length *Goya*. Both works have been frequently staged by Czech opera companies. Boháč's music mostly oscillates between extended tonality and serialism and is often cast in variation, sonata or rondo form. Awards he has received include the National Prize (1975), for his opera *Oči* ('Eyes'), and the State Prize (1983), for *Goya* and the oratorio *Osud člověka* ('Destiny of Man'). He was created Artist of Merit in 1979.

WORKS

(*selective list*)

OPERAS

Námluvy [The Courtship] (comic op, 1, Boháč, after A.P. Chekhov: *The Proposal*), 1967, Prague, Academy of the Performing Arts Opera Studio, 18 March 1971

MOJMÍR SOBOTKA

**Bohdanowicz, Bazyli** (*b* eastern Małopolska, 1740; *d* Vienna, 23 Feb 1817). Polish composer and violinist. In 1775 he settled in Vienna, and for about 40 years worked as first violinist in the orchestra of the Leopoldstadt theatre; between 1785 and 1791 he also played the viola in the orchestra of the Tonkünstler-Societät. Together with his family (his wife and eight children) between 1785 and 1803 he organized numerous choral and orchestral concerts in Vienna's theatres and local venues. Through these concerts he tried to stimulate the curiosity of the public by programming pieces with intriguing and humorous titles. This approach brought him wide success (his concerts were even attended by the emperor), but he was also accused of naivety, extravagance and 'musical charlatanism' (*GerberNL*).

These works were not published, but included: *Les prémices du monde*, a violin sonata played on one instrument by three children; a three-movement *Sinfonia vocale et originale senza parole*, which used so-called 'speaking pipes', or *Sprachtöne* (simple tubes, apparently without mouthpiece), to imitate birds and illustrate hunting scenes; a concerto *Europas Erstling* sung by three of his sons accompanied by a whistle and orchestra and *Die Geissböcke*, a 'carnival septet'. The eccentricity of Bohdanowicz's work was satirized by Wenzel Müller in his *Die unruhige Nachbarschaft* (text by K.F. Hensler), performed in Vienna in 1803.

There was also, however, a more serious side to Bohdanowicz's work. It is supposed that, in his youth, he may have been exposed to the influence of the progressive court of Stanisław Lubomirski at Łańcut near Rzeszów, where he would have heard much contemporary European music. Some evidence of this influence may be found in a piece written while he was still in Poland, an attractive five-movement Symphony in D major composed in an early Classical idiom, containing elements of Italian, Viennese and Mannheim styles. In Vienna he had some success with the publication of chamber and piano pieces (including polonaises), which provide evidence of early tendencies towards the evolution of a Polish national style.

WORKS

*unpublished works without siglum in list are lost*

BARBARA CHMARA-ŻACZKIEWICZ

**Bohdanowicz, Michał** (*b* Vienna, 6 Nov 1779; *d* Vienna, 20 Jan 1830). Polish composer, violinist and pianist, son of BAZYLI BOHDANOWICZ. Together with his younger brother, Franciszek, he sang as a boy in the choir of the Hofoper. Together with his parents and his seven siblings he took part in the entertainingly unconventional concerts and performances organized by his father in Viennese theatres, mainly in the Leopoldstadttheater. The main source of his income, however, came from his work as an imperial administrator and, from 1820, as cashier to

Baron R. von Hackelberg-Landau who was married to Bohdanowicz's sister, Katarzyna, a singer at the imperial theatres and at the Theater an der Wien. He composed *VIII variations pour le violin* op.1 and *6 deutsche Gesänge* op.2 (in *A-Wgm*).

BARBARA CHMARA-ŻACZKIEWICZ

**Böheim, Joseph Michael** (*b* Prague, *c*1748; *d* Berlin, 4 July 1811). German songbook compiler of Bohemian birth. After beginning his career as an actor and tenor in Hamburg and Breslau, he went to Berlin in 1779 to join Döbbelin's theatrical troupe at the Theater am Gendarmenmarkt. Later he spent some time at the Thabor Theatre in Frankfurt, but returned to Berlin in 1789 to become a member of the Berlin National Theatre. In 1793, in collaboration with his countryman Joseph Ambrosch, he published a popular two-volume collection of Masonic lieder entitled *Freymaurer-Lieder mit Melodien*; a revised edition with a new third volume compiled by Böheim alone appeared in 1795. Included in these volumes were works by Mozart (including his *Zauberflöte* aria 'In diesen heil'gen Hallen'), J.G. Nägeli, André and Bernhard Weber. In 1798–9 Böheim published his most important collection of Masonic music, *Auswahl von Maurer-Gesängen mit Melodien der vorzüglichsten Componisten*, with works by Haydn, Mozart, C.P.E. Bach, André, Salieri, Reichardt and others; a second edition, not significantly different from the first, was published in Berlin in 1817.

Böheim's daughter Charlotte Dorothee Marie (*b* Berlin, 6 March 1783 or 1785; *d* ?Frankfurt, 1831) was an outstanding singer and actress active in Berlin (from 1800), Stuttgart (from 1804) and Frankfurt (1811–18). She was married to the cellist Graff.

RAYMOND A. BARR

**Bohemia.** Region of central Europe, now part of the CZECH REPUBLIC.

**Bohemian Brethren.** A Czech religious sect which originated in Bohemia around 1450. Based on the doctrine of Petr Chelčický (*c*1390–*c*1460), a radical Taborite and eminent writer, the Bohemian Brethren initially represented an extreme type of the official Utraquism and as such were at first tolerated. Their basic beliefs included Chelčický's thesis concerning the equality of all mankind, and the primacy of the Bible in every argument and in the moral life of mankind (for whom the exercise of any form of power was sinful). Thus they did not recognize class distinctions and were consequently regarded by their contemporaries as enemies of the existing class-bound society. From 1460 until their expulsion from Bohemia and Moravia after 1618, they were persecuted, imprisoned and executed, by Catholics and Utraquists alike, especially after they had established an independent church and lay priesthood, but they succeeded in winning over some of the most influential figures of the day. They attached great importance to correct translations of the Bible and sought as collaborators adherents with good Greek and Hebrew. They formed alliances with the Lutherans in Germany, sent missions far abroad, and led active intellectual lives; they established printing presses and created their own document archive.

The Brethren's great interest in hymns is of decisive importance in the history of music. Singing formed an integral part of their daily life, in family circles and particularly in meetings in church and school. During the 16th century they compiled and published extensive hymnbooks which often ran to several editions. The earliest (1505 and 1519) were edited by Luke, their bishop; later editions were by Jan Roh (1541) and Jan Blahoslav (1561 and 1564); at least seven hymnbooks based on these appeared between 1576 and 1618. They were exceptionally comprehensive for the time: the edition of 1541 contained 308 hymns and that of 1561 nearly 750. In addition to large hymnbooks, the Brethren also published separate occasional pieces, such as hymns and dirges. The melodies reflected 15th-century Hussite songs and the remarkably careful editions showed a tendency towards simplification, elimination of complex liturgical melodies and careful correspondence of text and music. (The texts and their alterations reflect theological controversies within the brotherhood.) During the 16th century hardly any polyphonic singing existed among the Brethren. Only from illustrations is it known that schoolchildren were also taught part-singing.

The Brethren continued their publishing activities after their enforced emigration. Jan Amos Komenský, for example, published a hymnbook (Amsterdam, 1659) which broke with tradition and represented a new style of singing in the brotherhood. The Brethren tried to spread their publications still further in Bohemia and Moravia with hymnbooks printed in pocket-size editions intended for secret distribution. In these hymnbooks Czech translations of German Protestant hymns occupied a conspicuous place.

The Brethren's songs spread to Germany through the hymnbooks of the German Brethren, who formed a separate congregation after 1510. Their first hymnbook, compiled by Michael Weisse, appeared in 1531 (ed. K. Ameln, *Gesangbuch der Böhmischen Brüder 1531*, Kassel, 1957). It went into numerous editions, some printed on the Brethren's own presses and some elsewhere in Germany. The basic edition was the German version of the 1541 hymnbook brought out by Roh.

After the brotherhood was re-established in Herrnhut in 1722, a German Pietist congregation was formed to maintain traditional congregational singing, deriving its repertory almost entirely from the hymnbook of its first bishop, Count Zinzendorff. The count published many large hymnbooks, the first of which, containing 972 hymns, came out in 1735. By virtue of additions and supplements, the repertory increased to over 2200 hymns (1741), but all the hymnbooks were printed without tunes. The Herrnhut Brethren carried their love of spiritual songs with them when they emigrated to America in the

18th century, and their traditions have persisted there into the 20th century (*see* MORAVIANS, MUSIC OF THE).

During the 19th century the Czech brotherhood was revived within the area of the present-day Czech and Slovak Republics, and it still exists. By dispensing with German-Lutheran influence it has attempted to remove the traditions of the original brotherhood.

**Bohle, David.** *See* POHLE, DAVID.

**Bohlin, Folke (Bernhard)** (*b* Uppsala, 21 Sept 1931). Swedish musicologist. He took a degree in theology (1960) and later took the doctorate in musicology (1970) under Bengtsson and Moberg at Uppsala University with a dissertation on liturgical song in Swedish churches in the 18th and 19th centuries. He was a reader at Lund University (1970) and was appointed lecturer there (1971), later becoming professor in musicology (1986–96). He conducted the Lund Student Choral Society (1972–85). Bohlin became an elected member of the Swedish Royal Academy of Music in 1982 (board member 1983–1990). His chief area of research is Swedish church music, particularly that after the Reformation.

VESLEMÖY HEINTZ

**Bohlman, Philip V(ilas)** (*b* Boscobel, WI, 8 Aug 1952). American ethnomusicologist. He received the BM in piano at the University of Wisconsin-Madison in 1975, and the MM in 1980 and the PhD in 1984 in musicology and ethnomusicology at the University of Illinois at Urbana-Champaign with Bruno Nettl and Alexander Ringer; he also studied for two years at the Hebrew University of Jerusalem with Amnon Shiloah, 1980–82. He was assistant professor at MacMurray College (1982–4) and the University of Illinois at Chicago (1985–7) before joining the faculty at the University of Chicago, where he was appointed professor in 1999. He was visiting professor at the University of Vienna, 1995–6. In 1997 he was awarded the Dent medal.

Bohlman's work may be characterized as a sustained critique of modernity, canon-formation and the monumentalization of 19th-century Austro-German musical practice through an ethnographic engagement with the 'others' of Europe, whether on, or within its margins. His earlier work investigated music-making among immigrant Jews in early 20th-century Palestine; his later work brings ethnographic critique back to the centre, exploring popular religious, street and folk musics in Vienna and elsewhere in central Europe. Other areas of research include immigrant and 'ethnic' folk musics in America, and the intellectual history of ethnomusicology. In addition to extensive publications in these areas, Bohlman is editor of the series Recent Researches in the Oral Traditions of Music and co-editor (with Bruno Nettl) of 'Chicago Studies in Ethnomusicology'.

MARTIN STOKES

**Böhm.** German firm of music publishers. It was established in Augsburg in 1803 by Andreas Böhm (1765–1834), and under his direction soon achieved prominence. In 1831 the ownership passed to Andreas's son Anton Böhm (1807–84). In 1871 the firm became known as Anton Böhm & Sohn, a name it has retained, when Anton's son Moritz Anselm Böhm (1846–96) joined as a partner; three years later he became sole proprietor. In 1893 M.A. Böhm established a branch in Vienna. Moritz Anselm's eldest son, Theodor (1879–1946), took over the running of the company in 1906. The firm was completely destroyed in World War II but was restored under the directorship of Friedrich Ballinger (1906–89) and his wife Johanna, Theodor Böhm's niece, and has since regained its previous importance. Following the Ballingers' retirement, the running of the firm passed to its manager, Gerhard Über and then to Thomas Ballinger-Amtmann, the Ballingers' nephew and adopted son. Anton Böhm & Sohn has specialized in the publication of Catholic church and organ music, for which it has established a lasting reputation. The firm has also published standard editions of Haydn, Mozart and Schubert masses, many in its series Denkmäler liturgischer Tonkunst, and has begun to publish works by 20th-century composers including Otto Jochum, Siegl, Franz Philipp, Arthur Piechler, Lemacher, Genzmer and Koetsier.

ALAN POPE/R

**Böhm, Georg** (*b* Hohenkirchen, nr Ohrdruf, 2 Sept 1661; *d* Lüneburg, 18 May 1733). German composer and organist. He is specially important for his influence on the young J.S. Bach and for his development of the chorale *partite*.

1. Life. 2. Influence on J.S. Bach. 3. Works.

1. LIFE. Böhm received his early musical training from his father, who was a schoolmaster and organist; it presumably involved visits to Ohrdruf, where the Kantor was Johann Heinrich Hildebrand. His father died in 1675, and he continued his education at the Lateinschule at Goldbach and then at the Gymnasium at Gotha, where he graduated in 1684. In both towns, especially at Gotha, which was a ducal seat, there were Kantors and organists who, like Hildebrand, had been trained by members of the Bach family, Heinrich of Arnstadt and Johann Christian of Erfurt, and who could further Böhm's development. He matriculated at the University of Jena on 28 August 1684. By 1693 he had moved to Hamburg. There is no record of his filling any church position there, but as a well-educated man in a large, prosperous city he no doubt found other suitable employment while he completed a rather late musical apprenticeship. There was much to influence him in Hamburg: Kusser, a pupil of Lully, directed French and Italian works at the opera; at St Katharinen J.A. Reincken was master of a large, four-manual organ; he may also have heard Vincent Lübeck at nearby Stade, or Buxtehude at Lübeck. In 1697 Christian Flor, organist of the Johanniskirche at Lüneburg, died, and Böhm petitioned the town council for an audition, hinting that he did not have any regular employment. He was chosen unanimously and held the post until his death. He oversaw Matthias Dropa's complete rebuilding of the Johanniskirche organ in 1712–14. The question of his successor was not without considerable unhappiness. Of his five sons, Jakob Christian showed great promise and might well have graced the position, but he died before his musical studies were complete. The authorities then selected Brand Tobias Ludolph, who, despite a physical handicap, was trained in music, but he died suddenly in May 1732. The position finally went to Böhm's son-in-law, Ludwig Ernst Hartmann.

2. INFLUENCE ON J.S. BACH. Although a relationship between Bohm and the young Bach seems highly probable, C.P.E. Bach's statement to Forkel in 1775 that his father 'loved and studied the works of the Lüneburg organist Georg Böhm' stands alone. No formal connection existed

between Böhm's church and the Michaelisschule, which Bach attended from 1700 to about 1703, and the Johanniskirche organ was in a bad state of repair for private lessons. Social and personal ties are tenuous. For example, Bach's eldest brother and guardian in Ohrdruf from 1695 to 1700, Johann Christoph Bach, was the brother-in-law of another townsman, Johann Bernhard Vonhoff, who had attended the Gymnasium at Gotha with Böhm. However, as Walter Emery has pointed out, the fact that Bach named Böhm as the northern agent for the sale of his keyboard Partitas nos.2 and 3 implies that they had established a friendship, more likely in Lüneburg than later. Despite a lack of direct associations, Böhm exerted a strong influence on Bach's chorale writing, especially in his *partite*.

3. WORKS. Towards the end of the 17th century the liturgical organ chorale and the non-liturgical *partita*, or variation, were fused in the German chorale *partite*, in which a chorale melody replaced the secular dance or song formerly used as the basis of variations. The plural form of the term, *partite* (the singular form, 'partita', is erroneous), has generally been applied both to this new form and to chorale variations, but the two differ in several important respects. In particular, chorale *partite* are generally more homophonic and adhere more strictly to the phrase structure of the original melody. Böhm probably intended his chorale *partite* for domestic performance on the clavier or pedal clavier rather than for liturgical use on the organ; *Ach wie nichtig*, for example, descends below organ keyboard range to *A'*. He showed a strong liking for both *partite* and variations and used several different compositional techniques in a synthesis of different national styles. For example, the variations on *Vater unser*, a highly ornamented work in the style of French harpsichord music, presents a short variant of the chorale over a recurring bass. Bach also adopted this Italian motto device in his *partite* BWV766–8. (Spitta suggested that Böhm was the first composer to unify chorale settings by means of such theme transformations as well as the basic melody itself.) Buxtehude was also a direct influence on Böhm, particularly in keyboard figuration (see *Jesu, du bist allzu schöne*) and the use of dance forms (*Auf meinen lieben Gott*). In the saraband of BWV768 Bach followed the same practice. J.G. Walther's *partite* on *Jesu, meine Freude* also shows a direct link. The copies he made of Böhm's works suggest that Böhm wrote little keyboard music after 1705. He wrote only one chorale fantasia, *Christ lag in Todesbanden*. It is much more conservative than the fantasias of his contemporaries, with no echo sections and very little coloration. Bach chose the same melody for a fantasia (BWV718), which reflects Böhm's practice. Except for an expressive, coloratura setting of *Vater unser*, the remaining organ chorales are virtually indistinguishable from Buxtehude's. *Erhalt uns, Herr* (BUXWV Anh.11) has in fact been ascribed to Böhm as well as to Buxtehude. Of Böhm's three praeludia for organ, that in D minor is probably the earliest; it is in the five-part form that Buxtehude used – prelude, fugue, toccata-like middle section, 3/4 fugue and concluding toccata. The other two show an Italian influence totally absent from the praeludia of north German composers such as Bruhns and Lübeck; it is particularly evident in sequential episodes in the fugues.

It is Böhm's keyboard works that reveal his strongest gifts. The extended Prelude, Fugue and Postlude in G minor, which successfully combines French grace and charm with north German intensity and depth of feeling, is one of the most important works of the period. Except for the great French Suite in D (and inconsistencies in the two suites in F minor, the second of which Schulze considers the work of Mattheson), Böhm's 11 suites are in the four-movement form – allemand, courante, saraband and gigue – established by Froberger, and many of them also display Froberger's subtle melodic charm. The Prelude in F, printed as an independent piece in the *Sämtliche Werke*, may well belong to the Suite in F, with which it shares strong thematic resemblances.

Böhm's choral works are much more derivative than his instrumental music. His motets, for example, are indistinguishable from those by minor Thuringian composers of the time, and his cantatas look back to earlier 17th-century models. He based three of the six undoubtedly genuine cantatas wholly or in part on chorales. Apart from the songs he contributed to the collection of 1700, his arias are not influenced by Italian forms, though text and music are closely related. Marx argues convincingly that the *St John Passion*, long attributed to Handel and, in turn, Böhm, is the work of Christian Ritter.

WORKS

HUGH J. McLEAN

**Böhm, Johann(es Heinrich)** (*b* ? Moravia or Upper Austria, ?1740s; *d* Aachen, bur. 7 Aug 1792). Austrian theatre manager, actor and singer. He was engaged at Brünn (now Brno) in 1770, from the autumn of that year as director of the troupe. For long periods he toured in Austria, southern Germany and the Rhineland. In early summer 1776 he directed an opera season at the Kärntnertortheater, Vienna, giving 14 works in collaboration with Noverre: almost all were Singspiel adaptations of French operettas, many of which later became standard fare in Vienna. He was Joseph II's original choice as producer for the new National Singspiel company, but his appointment was frustrated. However, he and his wife (Maria Anna [Marianne]; née Jacobs) appeared in his translation of the Sedaine-Monsigny *Rose et Colas* at the Burgtheater on 9 May 1778 and were with the company for the remainder of the season; their daughters appeared in minor roles.

Böhm then formed a new touring company, giving performances in Salzburg (where he got to know the Mozarts) and, from summer 1779 to May 1780, in Augsburg; the intervening winter was passed in Salzburg. From autumn 1780 he established his company at Frankfurt, though they also gave seasons at Mainz, Cologne, Düsseldorf and Aachen. From 1787 he was director of the Elector of Trier's theatre at Koblenz, but he continued his association with Frankfurt, where Mozart met him again (they stayed at the same house) in September 1790. When Böhm died his wife succeeded him as director of the company.

The Böhms did much to further interest in Mozart's works. They revived *La finta giardiniera* in German (1780) and frequently performed it in southern Germany; Mozart wrote of composing an 'aria for Böhm' in a letter to his cousin (24 April 1780) and in other letters there are references to Böhm and members of his troupe. *Zaide* may have been started with a production by Böhm's company in mind; certainly he used parts of Mozart's *König Thamos* music for performances of Plümicke's play *Lanassa*, and Böhm chose *Die Entführung* to open the new theatre in Koblenz in 1787. Early performances of *Don Giovanni* and *Figaro* in the Rhineland were given by his company, and of *Die Zauberflöte* after his death. The repertory included many operas, ballets and plays. At a time when distinguished sedentary theatre companies were becoming established (Vienna, Hamburg, Mannheim), Böhm maintained a decent standard of touring performance in a valuable repertory over large areas of Germany and Austria.

PETER BRANSCOMBE

**Böhm, Karl** (*b* Graz, 28 Aug 1894; *d* Salzburg, 14 Aug 1981). Austrian conductor. He studied law, taking the doctorate at Graz University in 1919, and also music, first with private teachers in his native town and then from 1913 to 1914 with Eusebius Mandyczewski and Guido Adler in Vienna. Returning home, he coached singers at the Graz Opera, making his début as conductor in Nessler's *Der Trompeter von Säckingen* in 1917. He subsequently studied and conducted the major works of the repertory. He was strongly influenced by Carl Muck, who invited him to study the Wagner scores with him at Bayreuth, and Bruno Walter, who invited him to the Staatsoper in Munich in 1921. He left Munich after six years and in 1927 became Generalmusikdirektor at Darmstadt, where he frequently performed modern operas, including *Wozzeck* in 1931, a work he introduced to several musical centres. Böhm moved to Hamburg in

1931, succeeding Egon Pollak. The year 1933, when he first conducted the Vienna PO in opera and concert performances, turned out to be decisive for his further development. His initial success with *Tristan und Isolde* established a musical partnership that matured gradually over the following decades. Equally successful in his début at Dresden, Böhm accepted the invitation to succeed Fritz Busch as director of the Staatsoper in 1934. While never joining the Nazi party, he prospered in Hitler's Germany. He established a close friendship with Richard Strauss, whose devoted and inspired interpreter he remained throughout his career; he conducted the premières of two of Strauss's operas, *Die schweigsame Frau* (1935) and *Daphne* (1938), the latter being dedicated to him.

Two periods as director of the Vienna Staatsoper (1943–5 and 1954–6), and his artistic responsibility for the German seasons at the Teatro Colón, Buenos Aires, from 1950 to 1953, were his last administrative commitments. He opened the rebuilt Vienna Staatsoper in 1955 with *Fidelio*, which he called his 'Schicksalsoper'. He rapidly won a worldwide reputation as a freelance from 1956, conducting regularly at Salzburg, Bayreuth, Vienna, Berlin, Munich, Hamburg, Milan, Paris and New York, where he made his Metropolitan début in 1957 with *Don Giovanni*. Böhm recorded almost every major piece by his favourite composers, including Mozart's complete symphonies and three versions of *Così fan tutte*, of which he was for many an ideal interpreter. He was widely honoured, and bore two exclusive titles: 'Ehrendirigent' of the Vienna PO and Austrian Generalmusikdirektor. He was also the president of the LSO.

Mozart, Wagner and Richard Strauss are the composers with whom his name is most closely associated, followed by Haydn, Beethoven, Schubert, Bruckner, Brahms and Berg. Böhm's musical approach, expressed in strictly functional gestures, was direct, fresh, energetic and authoritative, avoiding touches of romantic sentimentality or self-indulgent virtuoso mannerisms – qualities finely displayed in his Bayreuth recordings of *Tristan* and *The Ring*. He was widely admired for his skilful balance and blend of sound, his feeling for a stable tempo and his sense of dramatic tension.

GERHARD BRUNNER/JOSÉ BOWEN

**Böhme, Kurt** (*b* Dresden, 5 May 1908; *d* nr Munich, 20 Dec 1989). German bass. He studied with Kluge at the Dresden Conservatory, and made his début in 1929 as Caspar at Bautzen. He sang at the Dresden Staatsoper (1930–50), and in 1950 joined the Staatsoper in Munich. In Dresden he created Count Lamoral in *Arabella*, Vanuzzi in *Die schweigsame Frau* (in which he later became a famous interpreter of Sir Morosus), Capulet in Sutermeister's *Romeo und Julia* (1940) and Prospero in his *Die Zauberinsel* (1942). At Salzburg he created Ulysses in Liebermann's *Penelope* (1954) and Aleel in Egk's *Irische Legende* (1955). Böhme first sang at Covent Garden with the Dresden company in 1936, and then regularly (1956–60) as Hunding, Hagen and Ochs; he last appeared there in 1972 with the Munich company as Sir Morosus. He made his début at Bayreuth in 1952 as Pogner, and at the Metropolitan in 1954 in the same role; he also sang at La Scala. His most famous role was Ochs, which he first sang in 1942 and repeated more than 500 times; in this role his rich voice and even richer sense of humour had full play, as can be heard in his recordings under Kempe and Böhm. He also recorded Rocco, Caspar and his Wagnerian roles.

HAROLD ROSENTHAL/ALAN BLYTH

**Böhme, Oskar** (*b* Potschappel, nr Dresden, 24 Feb 1870; *d* ?Chkalov, Ural region, ?1938). German cornettist and composer. He is thought to have trained with his father, Heinrich Wilhelm Böhme (*b* 1843), a music teacher, and from 1885 he toured as a soloist. From 1894 to 1896 he played in the orchestra at the Royal Hungarian Opera House, Budapest. Between 1896 and 1897 he studied composition with Jadassohn at the Leipzig Conservatory. He then moved to St Petersburg, playing in the Mariinsky Theatre Orchestra from 1897 to 1921, teaching in a musical college on Vasilyevskiy Island from 1921 to 1930, and playing in the Leningrad Drama Theatre orchestra from 1930 to 1934. Like many people of German origin, he was banished by Stalin to Chkalov (now Orenburg) and taught at a music school there from 1936 to 1938. The year of his death is uncertain; one eyewitness claims to have seen him at hard labour on the Turkmenian Channel in 1941. He composed 46 known works with opus numbers, including a lavishly Romantic concerto in E minor op.18 for trumpet in A (1899), which has remained in the repertory.

His brother Max William (1861–?1928) played in the Royal Hungarian Opera House orchestra from 1889 to 1908 and was the first professor for trumpet at the National Hungarian Royal Academy of Music from 1897 to 1908. He was also a member of the Bayreuth Festival

Orchestra between 1891 and 1901; in 1908 he returned to his birthplace of Potschappel to open a music school.

EDWARD H. TARR

**Bohn, Emil** (*b* Bielau, nr Neisse [now Nysa], 14 Jan 1839; *d* Breslau [now Wrocław], 5 July 1909). German musicologist, conductor and organist. At the University of Breslau he studied classical and oriental philology (1858–62). From 1862 to 1868 he studied music at the Akademisches Institut für Kirchenmusik. He was taught singing and choral direction by Julius Schäffer, and organ by Expedit Baumgart. While still a student Bohn directed the Breslau Akademischer Musikverein, and in 1868 became organist at the city's church of the Heilige Kreuz. He belonged to the generation of Eitner, the first to dedicate itself to investigating, classifying and ordering the musical heritage of the past, and which at the same time endeavoured to combine musical scholarship with performing practice. The Bohnsche Gesangverein, founded by Bohn in 1882, furthered these aims in its 'historical concerts', which numbered 100 by 1905, and another 16 by 1909. Each concert had a particular subject (e.g. concert no.84: 'Spanish church music from the 16th century to the 19th', and the concept 'historical' extended to the recent past in concert no.79: 'Schumann as vocal composer'). Paralleling his work for the concerts, Bohn published catalogues of the rich musical holdings of the three Breslau libraries (the prints in 1883 and the manuscripts in 1890), and arranged in score 10,000 old German partsongs (25,000 pages), a collection which he left to the Breslau Stadtbibliothek. In 1884 the University of Breslau conferred upon him an honorary doctorate in acknowledgment of his services to music; he had taught at its Akademisches Institut für Kirchenmusik since 1881. He was made professor in 1895, and in 1908 honorary professor. He also taught singing for many years at the Catholic Gymnasium in Breslau. He was granted honorary membership of the Florentine Philharmonic Academy (1887), of the Accademia di S Cecilia in Rome (1891), and of the Vereeniging voor Noord-Nederlandse Muziekgeschiedenis (1892). In addition to his other musical activities, Bohn composed choral and solo lieder and from 1884 was music critic of the *Breslauer Zeitung*.

FRITZ FELDMANN/RUDOLF WALTER

**Bohnen, Michael** (*b* Cologne, 2 May 1887; *d* Berlin, 26 April 1965). German bass-baritone. He studied at the Cologne Conservatory and made his début at Düsseldorf in 1910 as Caspar. Engagements followed at Wiesbaden (1912–13), the Berlin Hofoper (1914–18), the Metropolitan (1923–32) and the Deutsches Opernhaus, Berlin (1933–45). In 1914 he sang Hunding and Daland at Bayreuth, Ochs and Sarastro in the Beecham season at Drury Lane, and Heinrich der Vogler (his sole appearance) at Covent Garden. He created the title role of Rezniček's *Holofernes* in 1923 in Berlin, and sang Caspar at Salzburg in 1939.

Bohnen had a large voice of extensive range which enabled him to take both bass and baritone parts. He was as much at home as Scarpia and Amonasro as he was singing Ochs and Méphistophélès. He was attracted by parts outside the standard repertory, and at the Metropolitan sang Francesco in the American première of Schillings's *Mona Lisa* and the title role in *Jonny spielt auf*. From 1945 to 1947 he was Intendant of the Städtische Oper, Berlin, where in 1951 he made his farewell as Hans Sachs.

HAROLD ROSENTHAL/R

**Böhner, (Johann) Ludwig** [Louis] (*b* Töttelstedt, Gotha, 8 Jan 1787; *d* Gotha, 28 March 1860). German pianist, conductor and composer. He was the model for E.T.A. Hoffmann's 'Capellmeister Kreisler' and thus of Schumann's *Kreisleriana*. He had his first keyboard, violin and composition lessons from his father, a local teacher and Kantor, and as a child showed an immense talent for music. Before he was ten he had set Schiller's *Ode to Joy* for soloists, chorus and orchestra and written many other works. His parents sent him to Erfurt to study at the Gymnasium and the teacher-training college; he graduated in 1805 and was sent immediately to Gotha for further instruction with Spohr, writing his first significant pieces at about this time. In 1808 he went to Jena, where he became a piano teacher and eventually joined the artistic circles of Hoffmann and Goethe. He made his first concert tour in 1811, the success of which won him the music directorship of the Nuremberg city theatre, a post he held shakily until 1815. Further concert tours followed, the last of which – to Copenhagen in 1819–20 – ended in a complete nervous breakdown which thoroughly destroyed his artistic career. He spent the last 40 years of his life

lonely and deranged. He continued to compose, eking out a living from the pieces that he published, but these do not compare with his youthful work.

Hailed as the 'Thuringian Mozart' in his youth, Böhner won praise for his virtuoso piano pieces and his orchestral works. The influence of Spohr kept his style mainly along Classical lines, but he also anticipated Weber in a number of respects: in the concert overture (a genre that Böhner seems to have invented), in the use of the clarinet as a virtuoso solo instrument with orchestral accompaniment, and in the use of the elements of hunting, peasant life and the forest in opera (Böhner's *Dreiherrenstein*, 1810–13, anticipates *Der Freischütz* by almost a decade). Many of Bohner's works were published in his lifetime, and around the turn of the century many of his unpublished manuscripts were collected by a small Böhner Society in Gotha (now in *D-GOl*).

WORKS
(*selective list*)

VOCAL

Dreiherrenstein (op), op.107, unpubd (several numbers pubd separately); songs, incl. Drei Lieder, op.1 (1813), Drei Romanzen-Lieder, op.33 (1820); Preise Jerusalem, motet, 4vv, org/hns, op.64 (Leipzig, 1829); Der Herr ist gross (cant.), op.190 (1861)

INSTRUMENTAL

Orch: Fantasia and Variation, B♭, cl, orch/pf, 1813 (Leipzig, 1814/15); Concert Ov., D (Leipzig, 1816); 4 Variations on an Original Theme, e, vn, orch/pf (Leipzig, 1830/31); Grand Gallop brillant (à la Mozart), op.76 (Frankfurt, 1839), also version for pf; Concertino, pf, orch (1848); Concert Ov., C, 1805, arr. pf 4 hands (1862); 6 pf concs.: E♭, op.7 (1814), D, op.8 (1814), C, op.10/11 (1816), d, op.13 (1815), A, op.14 (1815), D, op.160 (1845)

Chbr: Pf Qt, C, op.4 (Leipzig, 1817); Sonatina, E♭, vn, pf, op.37 (Copenhagen, 1820); 3 fantasies, cl, pf, op.63 (1825), E♭, op.67 (1839), c, op.68 (1839); Fantasy and Variations on an Original Theme, vn, pf, op.94 (Leipzig, n.d.)

Solo pf: Sonata, E♭, op.15, 1813–14 (Leipzig, 1816); 6 Bagatelles, op.91 (Leipzig, 1822); 6 Bagatelles, op.92 (Leipzig, 1822); 4 caprices en forme de valses, op.74 (1839); Fantasie-Sonate, f, op.130 (1848); Sonata, C, op.188 (1851); Sonata, G, op.196 (1856); numerous fantasies, dances and sets of variations

GEORGE GROVE/R (text), STEPHAN D. LINDEMAN (work-list)

**Bohrung.** (Ger.). *See* BORE (i).

**Boice, Thomas.** *See* BOYCE, THOMAS.

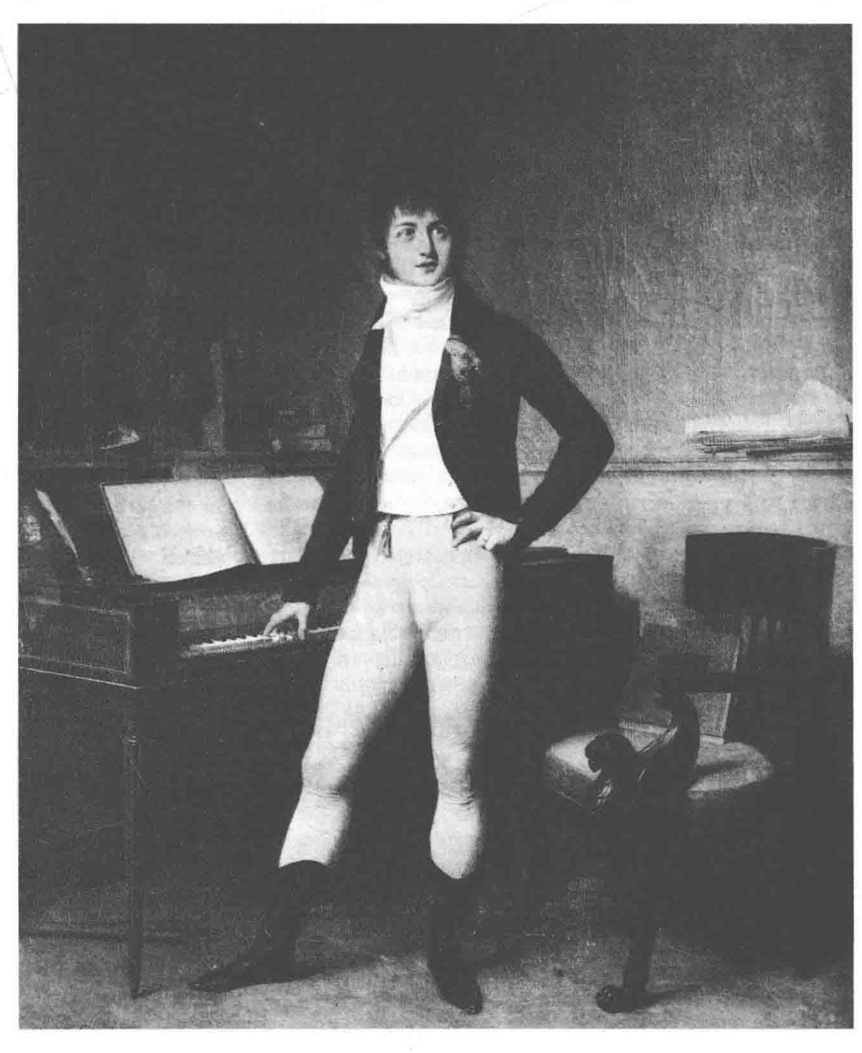
**Boieldieu, (François-)Adrien** (*b* Rouen, 16 Dec 1775; *d* Jarcy, Seine et Oise, 8 Oct 1834). French composer. He was the leading opera composer in France during the first quarter of the 19th century and remains the central figure in the *opéra comique* tradition.

1. Life. 2. Achievements and influence.

1. LIFE. The son of a clerk in the secretariat of the Rouen archdiocese, Boieldieu received his earliest education from the Abbé Joseph-Jean-Pierre Baillemont, who was known by the townspeople for his profound knowledge of Virgil and for his enlightened approach to teaching Latin and French. His first music teacher, Urbain Cordonnier, *maître de chapelle* at Coutances and Evreux and from 1783 the children's choirmaster at Rouen Cathedral, taught him solfège and singing technique, and before the boy learnt to read music he could sing by ear in cathedral performances of masses and motets: these included works by Bernier, Lalande, Campra, Brossard and Jommelli.

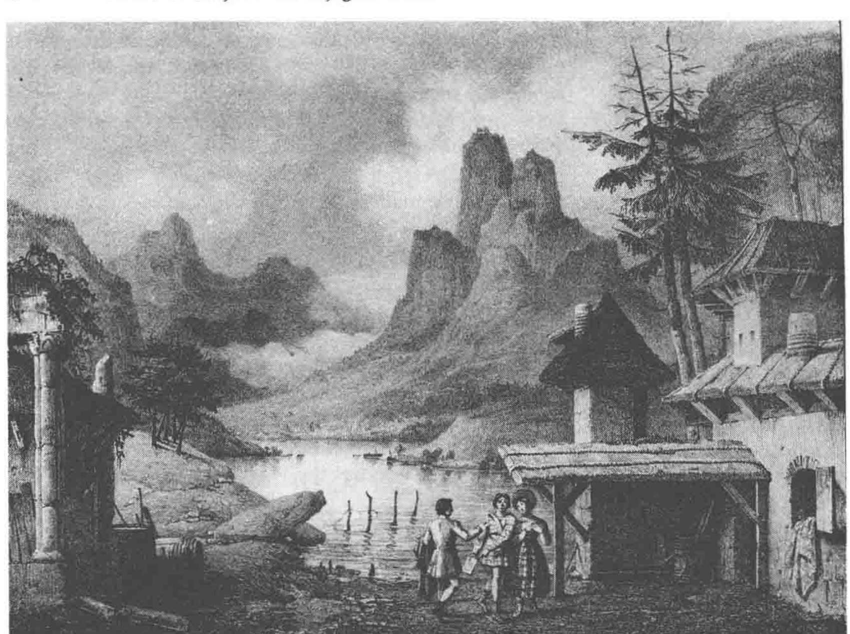
Boieldieu's principal music teacher was Charles Broche (1752–1803), the cathedral organist at Rouen. A pupil of the previous organist, Desmasures, Broche had gone to Paris to study the organ with Nicolas Séjan and Armand-Louis Couperin before taking a post as organist at Lyons; subsequently he went to Italy and spent several years in Bologna studying with Padre Martini before returning to Rouen in 1777. He first taught Boieldieu the piano and the organ, later harmony and composition. Despite reports that he was a harsh taskmaster and a chronic alcoholic – E.-T. Maurice Ourry's *L'enfance de Boieldieu*, an *opéra comique* produced in Paris in 1834, portrays Broche as a particularly contemptible character – he seems always to have held the respect of this gentle, timid pupil. Boieldieu made rapid progress as a keyboard player, and early in 1791 he was appointed organist at the church of St André in Rouen; about that time his earliest surviving compositions were written. Soon afterwards he was appearing as a concert pianist, performing his own sonatas, potpourris and Concerto in F.

One of the most important influences on the young Boieldieu was the musical theatre. The favoured theatrical genre in Rouen in the late 18th century was *opéra comique*, and Grétry's *Richard coeur de lion* and *Le rival confidant*, Dalayrac's *Nina*, *La dot* and *Azémia, ou Les sauvages* (Dalayrac was the most popular composer among the Rouennais) and Méhul's *Euphrosine et Coradin* and *Stratonice* were only among the best of the numerous works which ran successfully at the Théâtre des Arts. Among the more enthusiastically received operas were Le Sueur's *La caverne* and Paisiello's *Il barbiere di Siviglia* and *Le due contesse*.



Boieldieu wrote his first *opéra comique*, *La fille coupable*, in 1793. It made a favourable impression on M. Cabousse, the intelligent and enterprising director of the Théâtre des Arts, and he produced it on 2 November. Although the libretto, written by the composer's father, was unfavourably reviewed, the music was extremely well received at the première, and Boieldieu's improvements in the declamation and orchestration, made the very next day, ensured an even greater success the second night. The following year he resumed his activities as a concert pianist and composer, and his first four sets of *romances* were published in Paris; but the success of *La fille coupable* encouraged him to begin work early in 1795 on a second *opéra comique*, *Rosalie et Myrza*, which was produced the following autumn. In the summer of 1796 he left the calm life of Rouen and moved to Paris, where his published *romances* had already made a name for him

and where he hoped to enhance his reputation as an opera composer.



Boieldieu quickly earned a prominent place in the Paris musical world. Three one-act *opéras comiques*, *La famille suisse*, *L'heureuse nouvelle* and *Le pari*, all produced in 1797, ensured him from the outset a reputation as one of the leading French dramatic composers; and the three-act *Zoraïme et Zulnar* confirmed this reputation when it was staged with great success at the Salle Favart the following year. A series of operas produced over the next five years, including *La dot de Suzette*, *Béniowski*, *Le calife de Bagdad* and *Ma tante Aurore*, received the same measure of acclaim. In 1798 Boieldieu was nominated professor at the newly founded Conservatoire, where he taught the piano until June 1803; Fétis was a pupil of his in 1800 and noted that, during the composing of *Le calife de Bagdad*, the modest, lenient pedagogue would frequently play passages from the score and consult his pupils on it at their lessons.

In 1802 Boieldieu married Clotilde Mafleurai, a dancer of exquisite beauty and talent who, like many of her colleagues at the Opéra, had maintained a number of passionate involvements in her private life. He spent the first months of his marriage in perfect bliss, composing prolifically; but some time later Clotilde returned to a freer life, and this hurt the sensitive composer deeply and proved an embarrassment to his friends and family. He separated from her the following year and went to St Petersburg to take up a post in the Russian imperial court. Tsar Alexander I admired him, and he was made director of the French Opera and wrote several noteworthy *opéras comiques* and made a setting of the choruses in Racine's *Athalie*. Having served for eight years in Russia he returned to Paris in April 1811, and after long deliberations he decided to decline the sumptuous, opulent life offered to him by the tsar; he submitted his formal resignation in February 1812.

On 4 April 1812 Boieldieu renewed contact with the Parisian public with *Jean de Paris*, for which he won great acclaim. This work justifies its success completely, possessing great charm, freshness and vigour. The tunefulness of the themes underlies the work's inviting warmth and lasting cheerfulness. The following year he wrote the lightweight *Le nouveau seigneur de village*, and in 1816 he composed *La fête du village voisin*, which was a failure right from its first performance on 5 March; it is surprising that Boieldieu, who generally showed great care and gave evidence of good taste in choosing his librettos, should have agreed to set Charles-Augustin Sewrin's text, a

*1. Adrien Boieldieu: portrait by Louis-Léopold Boilly, c1800–03 (Musée des Beaux-Arts, Rouen)*

*2. Opening scene of Act 1 of Boieldieu's 'La dame blanche', Opéra Comique, Paris, 1825: lithograph by Godefroy Engelmann I after Julien-Michel Gué, 1827*

second-rate piece and nothing more than a poor imitation of Marivaux's *Le jeu de l'amour et du hasard*.

Having re-established himself in the Paris musical world, Boieldieu was granted several official marks of recognition. He was appointed court composer and accompanist in 1815, and the following year he became a member of the advisory board to the nominating committee of the Académie Royale de Musique. Finally, in November 1817, he was awarded the most coveted mark of recognition: he became a member of the Académie des Beaux-Arts, succeeding Méhul as professor of composition. On 30 June 1818 *Le petit chaperon rouge*, an adaptation by Théaulon of Claude Perrault's fairytale, was produced at the Opéra-Comique. This was his richest, most inventive score yet, highly polished and at the same time showing great vision; in it Boieldieu gave evidence of an improvement and strengthening of his style.

For seven years after *Le petit chaperon rouge* Boieldieu wrote virtually nothing. His health was poor and he retired to his country house at Villeneuve-St-Georges to enjoy a quiet rural life. He revised the score of *Les voitures versées* (originally called *Le séducteur en voyage*), written in 1808 for St Petersburg, and had it performed on 29 April 1820; the gay and lively libretto and zestful music fired the imagination of the public, and the opera gained a lasting popularity. Various minor works followed: *La France et l'Espagne* (1823), *Les trois genres*, written for the reopening of the Théâtre de l'Odéon (1824) and *Pharamond*, written in collaboration with Berton and Rodolphe Kreutzer for the coronation of King Charles X (10 June 1825).

In the early 1820s a profound upheaval occurred in the musical life of France: Rossini's operas were being produced in Paris and became the centre of musical attention, as well as the subject of heated debates. His *L'italiana in Algeri* had not won any great acclaim at its first performance in Paris in 1817, but productions at the Théâtre Italien in 1819 of *L'inganno felice* and *Il barbiere di Siviglia* marked the beginning of an enthusiasm on the part of the French public, which turned into a veritable fanaticism when Rossini made Paris his home in 1823. Under Rossini's influence the musical styles of many French theatre composers were being transformed, and they had to take great care to prevent their identity from being engulfed by the wave of 'rossinisme'.

Boieldieu was himself well aware of the qualities of these new trends, and he summarized his reaction to what he called 'notre convulsion musicale' in a letter to his friend the critic Charles Maurice (16 December 1823):

> I am as much a 'rossiniste' as any of those yelping fanatics, and it is because I really like Rossini and am angry when I see his art degraded by bad imitations .... I believe that one can write very good music by imitating Mozart, Haydn, Cimarosa, etc., etc., but that one is only a cheap mimic if one imitates Rossini. Why? Because Mozart, Haydn, Cimarosa, etc., etc., always speak to the heart, the spirit; they always speak the language of sentiment and reason. But Rossini, whose music is filled with catchy ideas, with 'bon mots', cannot be imitated: one must steal from him outright or be altogether silent when one is incapable of inventing other 'bon mots', which would make for an entirely new creation.

In the face of this challenge from the Italian school, Boieldieu appeared as a staunch upholder of the French tradition when he produced *La dame blanche*, an *opéra comique* in three acts to a libretto by Scribe, on 10 December 1825 (fig.2). The work won an international success. Its cleverly constructed plot and the mysterious poetry of its libretto, based on a Scottish fable recounted by Walter Scott, kept the audience in breathless suspense. They adored the Romantic atmosphere of the story and were captivated as much by the delightful score and the tuneful originality of its themes as by the grace and expertise of the orchestration. Immediately after its resounding success in Paris there were triumphal productions of *La dame blanche* throughout Europe; it became one of the most notable successes in the history of opera and has been regularly revived.

A year after the success of *La dame blanche* Clotilde Mafleurai died. She and Boieldieu had been separated since he had left for St Petersburg. Boieldieu had been living with the singer Jenny Philis-Bertin for many years, and on 23 January 1827 he married her in the tiny church

at Jarcy in the presence of his friends Catel and Cherubini. He settled down to write a new opera, *Les deux nuits*, which was eagerly awaited but not performed until 20 May 1829. Boieldieu's admirers were rather baffled by the work at its première. It had too many ornate sets and elaborate orchestral numbers, too few songs and catchy tunes; all of this surprised the public, conservative as ever and unable to capture that enveloping feeling of mystery and romance which had been the overwhelming attraction of *La dame blanche*. After a favourable reception on opening night, the opera ran for a short time before being dropped from the repertory. This greatly distressed Boieldieu, who had taken considerable pains to give his style a new impetus. Both in harmony and in orchestration the score gives evidence of a more skilful and versatile composer, and despite imperfections in the libretto *Les deux nuits* remains one of Boieldieu's most endearing *opéras comiques* and gives concrete indications of what might have come had his career continued into the 1830s.

Boieldieu then began a new work, *Marguerite*, to a libretto by Scribe, but serious worries about his health prevented him from finishing it; the work was completed in 1838 by his illegitimate son Louis Boieldieu. Persistent hoarseness brought on by consumptive laryngitis forced him to rest, and although he spent the summer of 1830 at Eaux-Bonnes in the Pyrenees and the following winter at Hyères, he did not fully recover his voice. On his doctors' advice he spent the winter of 1832 in Italy. A further stay at Eaux-Bonnes in July 1834 brought no relief and gradually he lost the power of speech. He died peacefully on 8 October and was given a state funeral at the Invalides five days later. His body was taken to Rouen, and on 13 November he was buried in the Rouen cemetery, where his fellow citizens paid solemn tribute to his memory.

2. ACHIEVEMENTS AND INFLUENCE. Boieldieu's contemporaries – Herold, Auber, Adam, Cherubini and Berlioz among them – all agreed that Boieldieu was indeed a gifted musician with exceptional creative ability. His work contains nothing artificial or affected, and the impetus and unquenchable spirit which he combined with freshness and grace could not fail to bring the listener under his spell.

The most exceptional feature of his style is its great melodic wealth and ease. He could compose melody only by singing, and these melodies therefore sound as if created spontaneously. He built on such basic materials as the diatonic and chromatic scales, the notes of a triad or dominant 7th chord, a large leap (10ths occur frequently and, as shown in ex.1, 12ths and 13ths are not

exceptional in his vocal lines) or a dotted rhythmic pattern. He rarely ornamented the melodic line with coloratura passages, and these hardly ever exceeded two bars in length; he seldom wrote virtuoso passages for singers.

Boieldieu's harmony, in keeping with his general style, never steps outside the normal confines of its time. Yet although he is best known for deft management of the simpler progressions, he could write harmony in the latest Parisian manner when the need arose; the original overture and several portions of *Béniowski* (1800) fully portray the emotions engendered by exile, treachery and exhaustion that this drama contains. He took his harmonic writing to a more advanced stage towards the end of his career, particularly in *Les deux nuits*, and made efforts to achieve greater polyphonic richness, but his music rarely attained the breadth of Méhul's or Cherubini's. He regarded the harmonic language of Beethoven's symphonies, which he heard Habeneck conduct at the concerts of the Conservatoire, with a childlike wonder; and Berlioz's student cantata *Cléopâtre* (1829) seemed to him to contain 'chords of another world' of which he 'understood absolutely nothing'.

Boieldieu was at all times conscious of the value of orchestral colour; he used the whole range of instruments and exploited some of their rarer techniques, e.g. strings *col legno* in *Le calife de Bagdad*. Moreover, he was able to create special sound combinations and poetic effects that were completely his own. He had a faultless instinct and technique for his own type of instrumentation, and his scores stand as excellent examples of clear, rich and lively orchestral writing. To sum up, Boieldieu's work is that of an individual, gifted poet and a sensitive, discriminating artist.

Boieldieu's lifetime spanned the last quarter of the 18th century and the first third of the 19th, the end and beginning of two widely different eras, and he witnessed the passing of an entire generation of musicians. The changes in operatic style that were beginning to appear in the works of his own and younger generations – a shift of emphasis from the melodic to the harmonic aspect and an increased importance given to the orchestral accompaniment – are to some extent reflected in the evolution of Boieldieu's style, and this qualifies him for a place at the head of a line of composers beginning with Herold, Auber and Adam and continuing with Gounod, Bizet and Chabrier. Insofar as his ideas sound fresh and spontaneous, his melodic lines clear, Boieldieu has sometimes been compared to Mozart, and it does indeed seem that his intelligent and lucid mind may have caught a spark from Mozart's fire. Thus, even without pushing the comparison to extremes, the title Boieldieu was given by his compatriots, 'the French Mozart', can be considered the highest accolade that he has been granted.

WORKS

*printed works published in Paris unless otherwise stated*

STAGE

*first performed in Paris unless otherwise stated*

SPH – *Hermitage, St Petersburg*

La fille coupable (oc, 2, J.F.A. Boieldieu), Rouen, Arts, 2 Nov 1793, *F-R*

Rosalie et Myrza (oc, 3, J.F.A. Boieldieu), Rouen, Arts, 28 Oct 1795, lost

La famille suisse (oc, 1, C. de Saint-Just [G. d'Aucourt]), OC (Feydeau), 11 Feb 1797, vs (1797)

L'heureuse nouvelle (oc, 1, Saint-Just and C. de Longchamps), OC (Feydeau), 7 Nov 1797, lost

Le pari, ou Mombreuil et Merville (oc, 1, Longchamps), OC (Favart), 15 Dec 1797, lost

Zoraïme et Zulnar (oc, 3, Saint-Just), OC (Favart), 10 May 1798, vs (1798)

La dot de Suzette (oc, 1, J. Dejaure, after J. Fiévée), OC (Favart), 5 Sept 1798, vs (1798)

Les méprises espagnoles (oc, 1, Saint-Just), OC (Feydeau), 18 April 1799, lost

Emma, ou La prisonnière (oc, 1, V. de Jouy, Saint-Just and Longchamps), Paris, Montansier, 12 Sept 1799, collab. Cherubini, lost except for frag., *R*

Béniowski, ou Les exilés du Kamtchatka (oc, 3, A. Duval, after A. von Kotzebue), OC (Favart), 8 June 1800, vs (1800), rev. for OC (Feydeau), 20 July 1824, vs (1824)
Le calife de Bagdad (oc, 1, Saint-Just), OC (Favart), 16 Sept 1800, vs (1800)
Ma tante Aurore, ou Le roman impromptu (oc, 2, Longchamps), OC (Feydeau), 13 Jan 1803, vs (1803)
Le baiser et la quittance, ou Une aventure de garnison (oc, 3, L.B. Picard, M. Dieulafoy and Longchamps), OC (Feydeau), 18 June 1803, collab. Kreutzer, Méhul, Isouard, *Pn*, *B-Bc*
Aline, reine de Golconde (oc, 3, J. Vial and E. de Favières), SPH, 5/17 March 1804, *Pn*, *RUS-SPsc*
La jeune femme colère (oc, 1, Claparède, after C.-G. Etienne), SPH, 18/30 April 1805, vs (1805); OC (Feydeau), 12 Oct 1812
Abderkan (oc, 1, Dégligny), St Petersburg, Peterhof Palace, 26 July/7 Aug 1805, *F-R*
Un tour de soubrette (oc, 1, N. Gersin), SPH, 16/28 April 1806, *F-R*, *RUS-SPtob*

Amour et Mystère, ou Lequel et mon cousin? (oc, 1, J. Pain), St Petersburg, 1807, lost
Les voitures versées (oc, 2, E. Dupaty), SPH, 4/16 April 1808, *RUS-SPtob*, rev. for OC, 29 April 1820, vs (1820) [orig. called *Le séducteur en voyage*]
La dame invisible (oc, 1, ? A. Daudet and ?Pain), St Petersburg, 1808, *F-R*
Athalie (incid music, 5, J. Racine), St Petersburg, 1808, *R*, *RUS-SPtob*
Rien de trop, ou Les deux paravents (oc, 1, Pain), SPH, 25 Dec 1810/ 6 Jan 1811, vs (1811); OC (Feydeau), 19 April 1811
Jean de Paris (oc, 2, Saint-Just), OC (Feydeau), 4 April 1812, vs (1812)
Le nouveau seigneur de village (oc, 1, A.F. Creuzé de Lesser and Favières), OC (Feydeau), 29 June 1813, vs (1813)
Bayard à Mézières, ou Le siège de Mézières (oc, 1, A.R.P. Allisan de Chazet and Dupaty), OC (Feydeau), 12 Feb 1814, collab. Catel, Cherubini, Isouard, vs (1814)
Le béarnais, ou Henri IV en voyage (oc, 1, C. Sewrin), OC (Feydeau), 21 May 1814, collab. Kreutzer, lost
Angéla, ou L'atelier de Jean Cousin (oc, 1, G. Montcloux d'Epinay), OC (Feydeau), 13 June 1814, collab. S. Gail, *Pn*
Le troubadour (scène lyrique), 2 Feb 1815, lost [lib pubd 1815]
La fête du village voisin (oc, 3, Sewrin), OC (Feydeau), 5 March 1816, vs (1816)
Charles de France, ou Amour et gloire [Act I] (oc, 2, M.E.G.M. Théaulon de Lambert, A. d'Artois de Bournonville and de Rancé), OC (Feydeau), 18 June 1816, vs (1816); Act 2 by Herold
Le petit chaperon rouge (oc, 3, Théaulon de Lambert, after C. Perrault), OC (Feydeau), 30 June 1818, vs (1818)
Les arts rivaux (scène lyrique, 1, Chazet), Hôtel de Ville, 2 May 1821, collab. Berton, *F-Pn*
Blanche de Provence, ou La cour des fées (op, 3, Théaulon de Lambert and de Rancé), Tuileries, 1 May 1821, collab. Berton, Cherubini, Kreutzer, Paer, *Po*
La France et l'Espagne (scène lyrique, 1, Chazet), Hôtel de Ville, 15 Dec 1823, lost
Les trois genres (scène lyrique, 1, E. Scribe, Dupaty and M. Pichat), Paris, Odéon, 27 April 1824, collab. Auber, frag. *R*
Pharamond (op, 3, F. Ancelot, P.-M.-A. Guiraud and A. Soumet), Opéra, 10 June 1825, collab. Berton, Kreutzer, vs (Paris, [1825])
La dame blanche (oc, 3, Scribe, after W. Scott), OC (Feydeau), 10 Dec 1825, vs (1825)
Les deux nuits (oc, 3, Scribe and J.-N. Bouilly), OC (Ventadour), 20 May 1829, vs (1829)
Marguerite (oc, 3, Scribe), inc., Act 1 sketched 1830, *R*
La marquise de Brinvilliers (oc, 3, Castil-Blaze [F.-H.-J. Blaze] and Scribe), OC (Ventadour), 31 Oct 1831, collab. Auber, Batton, Berton, Blangini, Carafa, Cherubini, Herold, Paer, vs (1831)
Les jeux floraux (op, 3), inc., frag. *R*

INSTRUMENTAL

Orch: Pf Conc., F, 1792 (1795); Hp Conc., C (1801); 6 Waltzes, small orch (1801); Galop, in Recueil de 6 galops composés pour les bals de l'Opéra (1834)
Chbr: Pf Trio, op.5 (*c*1800); Potpourri, on arias by Mozart, hp, vc, pf (London, n.d.); Potpourri, hp, vc, pf, *D-Dl*; 4 duos, hp, pf, no.1 (1796), no.2 (1796), no.3, with polonaise (*c*1800), lost, no.4 (1802); Air and 9 Variations, hp, pf (1803), lost; 6 vn sonatas, 3 as op.3 (1799), op.7 (*c*1807) [based on Duo no.4, hp, pf], 2 as op.8, pf/hp acc. (*c*1807) [no.2: vn ad lib]
Hp Sonata, in *Journal de harpe*, ii (1795), lost
9 pf sonatas, 3 as op.1 (1795), 3 as op.2 (*c*1795), 2 as op.4 (1799), op.6 (*c*1800); 6 Short Pieces and 8 Easy Exercises (?1800); Exercises, for A.L.V. Boieldieu, 1827, frag. *F-R*

CHORAL

Le preux chevalier (Messence), masonic hymn, chorus, cls, bn, hn (*c*1810)
Hymne maçonnique (Messence), 4vv (*c*1810)
Cantata (E. Mennechet) (1821), lost
Les chasseurs d'Afrique (M. de Charlemagne), military scena (*c*1835)
Phoebé, nocturne, 2vv, ed. in *Journal de musique* (27 April 1878)
Je pense à toi, nocturne, 2vv, D. Janvier's private collection, Paris

ROMANCES

*for one voice, piano, unless otherwise stated*

*Romances published in collections*

1er recueil de [6] romances, pf/hp acc. (1794): S'il est vrai; D'une espérance vaine; On me dit; La dormeuse; Tu vas donc t'éloigner; Les femmes justifiées
2ème recueil de [6] romances (Burgot) (1794): Je cherche loin de l'objet; J'aimais un objet; Je veux goûter; Je ne puis plus disposer; Romance sur la véritable Nina; Vous verrai-je toujours
3ème recueil de 6 romances (1794), lost, titles given in Pougin: Insensible aux attraits; L'innocente; De l'amitié, de sa douceur; Peu contente de ses attraits; L'amour et l'amitié; Les beaux yeux de Lucinde
4ème recueil de 6 romances (1794): En vous voyant; Je vous salue; Chant montagnard; Vous qui loin d'une amante; Pour la triste Amélie; Quand j'arrivai
5ème recueil de 6 romances (1795): Désirs brûlants; Mais réponds-moi méchante; Ah! que je suis heureux; Petits oiseaux; Unique objet de ma tendresse; Dans ces affreux déserts
6ème recueil de 6 romances (1795): Quand aux genoux; Charmants oiseaux; Loin de toi, cher objet; On tente peu; Je l'ai perdu, hélas!; Zelmire a trahi ma tendresse
6 romances, oeuvre VII (1795): Du rivage de Vaucluse (J.-F. Marmontel); Compagne tant chérie; Claire au tombeau (C. de Saint-Just); Tant doux plaisirs; Hélas! je voulais être aimé; Le sombre hiver (J.-F. de La Harpe)
8ème recueil de [8] romances nouvelles (1795)
1 ère suite (C. de Longchamps): Quand, par pudeur; Au sein des plaisirs; Dans mes ennuis; O toi qui sur notre existence
2ème suite: De la lune les lueurs sombres (Saint-Just), vn ad lib; Soldat qui garde ces créneaux, vn ad lib; Charmant objet; Ai trop caché le feu, 2 solo vv
6 romances nouvelles, oeuvre IX (1797), lost, announced in *Le miroir* (4 June 1797)
6 nouvelles romances, oeuvre X (1797), lost, announced in *Journal de Paris* (29 June 1797)
6 romances, oeuvre XI (1797): identical with 6 romances, oeuvre VII
Recueil de [6] romances, oeuvre XII (Longchamps) (1801): Bois muet, sombre asile; Adieu, bocage frais; Comment ne pas croire; Avant que de l'amour; O vous dont un amant aimable; Il faut partir, adieu ma Laure
13ème recueil de 4 romances (1801): Le pont de la veuve (J. de Florian); Stances ('Tu plains mes jours troublés') (C. Colardeau); Quinze ans, Myra (J. Legouvé); Tant douce amie (Saint-Just)
14ème recueil de romances (?1801), lost, announced in *AMZ*, iv (1801), *Intelligenz-Blatt* (1801), Sept, p.56
15ème recueil de 4 nouvelles romances (Longchamps) (1803); Quand laissant la cité voisine; Au premiers jours de mon printemps; L'amour, pour prix de ma défaite; Rondeau ('Mon bon ami, je te conseille'), from Emma, ou La prisonnière
3 romances (1811): Longtemps je crus à la tendresse; Quelque gloire, beaucoup d'amour; Las d'espérer vainement le bonheur

*Other romances*

Dated: Le ménestrel (A. de Coupigny) (1795); L'absence (J. Lablée) (1796), Couplets à une demoiselle ('Vous m'ennuyez') (1796); L'attente (E. Jouy) (1798); Romance de Pinto (N. Lemercier) (1800); La chanson et la romance (E. Dupaty) (1800); Sous un saule au bord du rivage (Longchamps) (1802); Le billet consolateur de l'absence (Longchamps) (1802); Quoi! tu m'aimes et me délaisses (Longchamps) (1802); Romance tirée de Don Quichotte (trans. Florian) (1802); Vois ce vieux chêne (Longchamps) (1802); Eh! quoi, tu voulais me quitter

(Longchamps), 2 solo vv (1802); Le vieux ménestrel (Mendouze) (1807); Ce que je désire (N. Ségur) (1807); L'abandon (Messence) (1811); A Zelmire (1812); Mon Dieu qui seul compte mes pleurs (C. Mollevaut) (1818); Plus d'illusion (Fontenelle) (1825); L'enfant perdu (Lorin de Belmontet) (1825); Te voilà roi! (A. Naudet) (1830); L'ange des premiers amours (M. Bétourné), 2 solo vv (1830); Le chemin de Lorette (Naudet) (1834)

Undated, pubd: Le brave à ses derniers moments (M. Commerson); Célestine; Ce que j'aime en toi; Depuis que j'ai quitté ces lieux; Les deux jours; François Ier (Ravrio); Le ménestrel et le guerrier (Bérard), 1/2vv; Le rencontre du soir (H. Georgeon)

Undated, unpubd: Adieu, charmant pays de France (P.-J. Béranger), *F-Pn*; Le besoin d'aimer, *R*; Ma bouche encore ne sait pourquoi (Longchamps), *R*; Fuyez, fuyez de mon âme attendrie, *Pn*; Laure à la fleur de sa jeunesse, *R*; O mon amante (Longchamps), *R*; Tu fuis, cruel (Florian), *R*

Lost: Je t'aime, c'est là mon bonheur; Peux-tu douter; Quand tu m'aimais (J.-E. Jouy): all 3 arr. 1v, gui by Lintant (n.d.); Couramé, announced in *Journal général d'annonces* (26 Aug 1825); Le père bien malheureux (Bouilly), text in J.-N. Bouilly: *Le vieux glaneur* (Paris, n.d.); Arbre charmant qui me rappelle; O toi que j'aime; Pauvre Blondel: all 3 mentioned in Gougelot

GEORGES FAVRE/THOMAS BETZWIESER

**Boieldieu, (Adrien) Louis (Victor)** (*b* Paris, 3 Nov 1815; *d* Quincy, 9 July 1883). French composer. The illegitimate son of Adrien Boieldieu and Thérèse Regnault, a singer at the Opéra-Comique, he was served both ill and well by his father's fame. Following the death of his father in 1834 the French government allocated him an annual pension of 1200 francs.

His début as a stage composer was with a work left incomplete by his father, the *opéra comique Marguerite*, which Louis hastened to finish. However, it was a failure at the box office and none of his subsequent works achieved more than ephemeral notice. *La fille invisible* (1854) is representative of Boieldieu's mature writing. It shows thorough acquaintance with the style of Donizetti and liberal use of modulations through 3rds; melodies are undistinguished. A waltz chorus provides local colour in the first two acts, a device used five years later by Gounod in *Faust*. *L'opéra à la cour* (1840), initially intended for the inauguration of a new building for the Opéra-Comique, is of interest as a particularly elaborate example of 19th-century French operatic pastiches. It includes musical materials from such diverse sources as Weber's *Der Freischütz*, Rossini's *Bianca e Falliero* and *God Save the Queen*.

All Boieldieu's other works are vocal. His drawing-room *romances* are often misattributed to his father.

WORKS

*stage works first performed in Paris unless otherwise stated*

Marguerite (oc, 3, E. Scribe and F. de Planard), OC (Bourse), 18 June 1838 (Paris, *c*1838), collab. A. Boieldieu

STEVEN HUEBNER

**Boileau, Simon.** *See* BOYLEAU, SIMON.

**Boileau Bernasconi, Alessio** (*b* Verona, 14 March 1875; *d* Barcelona, 27 Sept 1948). Italian music publisher of French origin. He began as a music printing apprentice with Ricordi, Milan, then went as a printer to Marcello Capra of Turin. In 1904 he became a printer for Vidal Llimona y Boceta of Barcelona, whose printing works he took over in 1906. He went straight into the publishing business, founding, in partnership with others, the firm Iberia Musical in Barcelona; in 1928 he absorbed its publishing assets with those of other publishing firms to form the Editorial Boileau. He was active for several decades, publishing the standard repertory and much other music; later the firm devoted itself almost exclusively to printing music for other firms. His most popular collection was the Edición Ibérica which contained both didactic works and piano repertory. His engraving workshop set works by most Spanish composers and musicologists of the time.

JOSÉ LÓPEZ-CALO

**Boin, Henry Alphonse.** *See* DALMORÈS, CHARLES.

**Bois** (Fr.). *See* WOODWIND INSTRUMENTS.

**Bois, Jean du.** *See* BOSQUET.

**Bois, Rob du** (*b* Amsterdam, 28 May 1934). Dutch composer. He studied piano with Hans Sachs and Hart Nibbrig-de Graeff, and law at the University of Amsterdam. As a lawyer he was legal adviser to the Dutch performing rights society until 1994. Nowadays he is free to spend all of his time composing. Hearing two symphonies by Vermeulen in 1949, he was so impressed that he decided to become a composer himself. As a composer he is self-taught, though guided as a young man by his older colleagues van Baaren and Ruyneman in the 1950s. From 1959 he was one of the composers fostered by the Gaudeamus Foundation. After he won the Visser-Neerlandia Prize (1966), his music was performed in the Warsaw Autumn Festival, the Zagreb Biennale, the Witten Festival and at the 1967 ISCM Festival in Prague. In the 1960s free experimentation, sometimes with graphic notation, replaced the strict 12-note technique that had determined his musical thinking before 1960. He has worked with Dutch musicians like the bass clarinettist Harry Sparnaay, and frequently with his Romanian friends such as the viola player Vladimir Mendelssohn and the pianist Hrisanide. In 1991 a concert was held in Bucharest in his honour. His works are mostly for a variety of chamber ensembles, and his many works show a rare talent for musical comedy as well as a habit of boldly exploring the possibilities of avant-garde matter in a joyful manner.

WORKS
(*selective list*)

HUIB RAMAER

**Boismortier, Joseph Bodin de** (*b* Thionville, 23 Dec 1689; *d* Roissy-en-Brie, 28 Oct 1755). French composer. He spent his childhood in Thionville, and went to Metz about 1700. In 1713 he was *receveur de la régie royale des tabacs* for the Roussillon troops at Perpignan. On 7 November 1720 he married Marie Valette, the daughter of the city treasurer Guillaume Valette. He remained in Perpignan until about 1723, when he settled in Paris. In September 1724 he took out a royal privilege to engrave his works and began the process of publishing them, which ceased only on his death. From 1743 to 1745 he was *sous-chef* and then *chef d'orchestre* at the Foire St Laurent, and also, in 1745, at the Foire St Germain. He was a prolific composer of very profitable works, which according to the *Mercure de France* (October 1747) brought him over 500,000 écus, enabling him to live a life of fame and luxury without holding any official post. His Christmas motet *Fugit nox* (now lost), on themes from noëls, was popular at the Concert Spirituel from 1743 to 1770, with L.-C. Daquin and C.-B. Balbastre at the organ. His *pastorale Daphnis et Chloé*, to a libretto by Pierre Laujon, was well received when it was performed at the Opéra in September 1747, and was even parodied at the Comédie-Italienne under the title of *Les bergers de qualité* when it was revived on 4 May 1752. After his death his daughter continued to sell his available works, and also published several more.

Boismortier wrote a great deal of music. Many of his compositions, intended for amateur ensembles, require only average technical skill and envisage various possible combinations of instruments, as witness the *Sonates pour une flûte et un violon par accords sans basse* op.51 and the sonatas for two bassoons and four flutes. He also composed for such fashionable instruments of the time as the *musette*, hurdy-gurdy and transverse flute. This last was his favourite instrument, and he considerably extended its repertory. In his instrumental pieces he devoted equal attention to the various parts, which can consist

simply of a series of imitations; in his earliest sonatas for keyboard and flute, op.91 (*c*1741–2), the two instruments are complementary, whereas it was usual in such works at the time for the harpsichord to dominate. Boismortier adopted the three-movement form favoured by Italian composers. He wrote concertos for many different instruments. Some, such as his *VI concertos pour cinq flûtes traversières ou autres instruments sans basse* op.15 (1727), are for unusual ensembles. These are not so much solo concertos as works in the French style of François Couperin's *Concerts royaux* (1722) and Rameau's *Pièces de clavecin en concert* (1741).

Boismortier's cantatas and motets skilfully mingle French and Italian elements, with ternary form dominating in the *airs*. The rather lightweight anonymous texts of his cantatas are typical of the period. He was most at ease in short forms, and after 1738 followed fashion by abandoning the cantata in favour of the *cantatille*. His agreeable melodies were designed to please the taste of his audience, and the virtuoso vocal writing in his motets is strongly influenced by the Italian style. In his stage works he collaborated with the great librettists of the period: Charles-Antoine Le Clerc de La Bruère (who also wrote the libretto of Rameau's *Dardanus*), Pierre Laujon and Charles-Simon Favart. He composed to suit the taste of the time, as in his *ballet-comique* on a fashionable theme, *Don Quichotte chez la duchesse*, in which the music does not attempt any local Japanese colour but consists of lively, facile melodies.

Boismortier's pedagogical works (tutors for the flute and the descant viol) are apparently lost, but the fact that he wrote them is evidence of a didactic concern also shown in such instrumental works as his *Diverses pièces pour une flûte traversière seule . . . propres pour ceux qui commencent à jouer de cet instrument* op.22 (1728), and his *Quinque sur l'octave, ou Dictionnaire harmonique* (1734).

Boismortier's music demonstrates great facility, and one regrets that he wrote so few works on a large scale. It is difficult not to agree with La Borde, who said: 'He will always be regarded by professionals as a good harmonist . . . anyone who will take the trouble to excavate this abandoned mine might find enough gold dust there to make up an ingot'.

### WORKS

*published in Paris unless otherwise stated*

#### STAGE

Les voyages de l'Amour, op.60 (ballet, 4, C.-A. Le Clerc de La Bruère), Paris, Opéra, 26 April 1736 (1736)

PHILIPPE LESCAT

**Boisseau.** French family of organ builders. Robert Boisseau (*b* Bordeaux, 9 March 1909; *d* Poitiers, 29 Feb 1979), after studying engineering in Nantes, set up an independent organ building workshop in Poitiers in 1931. During the difficult economic conditions of the postwar period he worked for Roethinger in Strasbourg until about 1960, after which, teaming with erudite organists such as Edouard and Léon Souberbielle, he took the lead in championing a return to pre-19th-century production methods, using hammered pipe metal and mixture compositions after Dom Bédos de Celles (Benedictine convent in Limon, near Bièvres, 1959; St Nicolas du Chardonnet, Paris, 1960; Châteauneuf-sur-Loire, 1962). Often overshadowed by more prolific, high-profile firms, Robert Boisseau's work is nonetheless widely considered to be some of the finest examples of the 'neo-classical' or eclectic style, epitomized by his syncretic rebuild of the Isnard/Cavaillé-Coll organ in Pithiviers (1965) and by large new organs in Royan (1965), Monaco Cathedral, (1976) and Notre Dame, Cunault, near Angers (1976). Robert's son Jean-Loup Boisseau (*b* Poitiers, 26 July 1940) worked for many years with a partner, Bertrand Cattiaux (*b* Paris, 26 Aug 1955); they moved the workshop to Bethines, near Poitiers in 1980. New organs in the pre-Revolution manner (Levroux, Le Mesnil-Amelot, near Paris, and Versailles) and prestigious restorations such as the organs at Houdan, Cintegabelle, St Denis basilica, near Paris, Notre-Dame-de-la-Daurade and St Sernin in Toulouse and Poitiers Cathedral have established them as leading exponents of historical styles in France. The Boisseau family has also been closely identified with Notre Dame in Paris, carrying out regular organ maintenance since 1965 as well as a major rebuilding in 1992. Cattiaux took over the firm in 1997, employing Jean-Loup's son Jean-Baptiste Boisseau (*b* Poitiers, 22 April 1965). Jean-Loup himself has continued to contribute to projects on a freelance basis.

KURT LUEDERS

**Boîte à musique** (Fr.). *See* MUSICAL BOX.

**Boito, Arrigo** [Enrico] (*b* Padua, 24 Feb 1842; *d* Milan, 10 June 1918). Italian librettist, composer, poet and critic. He is best remembered for his one completed opera, *Mefistofele*, and for his collaborations as librettist with Verdi.

1. Life. 2. Librettos. 3. Compositions. 4. Criticism.

1. LIFE. The son of a painter of miniatures and a Polish countess, he was brought up in Venice after his father deserted his wife and two sons. Between the ages of five and ten he received his first musical instruction from Luigi Plet and the brothers Antonio and Giovanni Buzzolla. There being no conservatory at Venice, he enrolled at the Milan Conservatory in 1853; after 1854 his course was subsidized by a grant. At first his teachers found him eccentric and lackadaisical, but when he began his lifelong friendship with another student, Franco Faccio, admitted in 1855, Boito's progress became marked. In September 1860 their joint cantata, *Il quattro giugno*, was performed at the conservatory. The title referred to 4 June 1859, the date of the Battle of Magenta in which one of their schoolmates was killed. Boito supplied the text and composed half of the music, and the work earned a notable success in the Risorgimental fervour of those days. In their graduation year, 1861, he and Faccio presented a second cantata, *Le sorelle d'Italia*, celebrating European peoples still under foreign domination.

Boito's principal teacher and advocate at the conservatory was Alberto Mazzucato, an opera composer and, from 1859 to 1868, principal conductor at La Scala. On the strength of Mazzucato's support and that of the Countess Maffei, Boito and Faccio were awarded grants for a year's travel abroad. In March 1862 they arrived in Paris, where they met Rossini and Verdi. There Boito wrote the text for Verdi's *Inno delle nazioni*, performed at Her Majesty's Theatre, London, on 24 May 1862. Boito was already at work on an opera on the Faust subject, which he had begun, according to Alberto Mazzucato's son Gian Andrea, while he was still a student. He was also planning another opera, *Nerone*, which he would never complete. In summer 1862 he visited relatives in Poland, orchestrating part of what would become *Mefistofele* and writing the libretto of *Amleto* for Faccio. He was back in Milan at the end of the year.

At a banquet following the première of Faccio's opera *I profughi fiamminghi* at La Scala on 11 November 1863, Boito declaimed his notorious ode *All'arte italiana*, wherein he advocated cleansing the altars of Italian art that had been stained like the external walls of a brothel, a sentiment that gravely offended Verdi. This was the period when Boito was associated with the Scapigliatura ('the unkempt ones'), an iconoclastic and bohemian group dedicated to ridding the arts in Italy of their besetting provincialism. The conservatives of the day found the group's jaunty satire and propensity for derision offensive. At the première of *Amleto* in Genoa on 30 May 1865 the self-congratulatory antics of the *scapigliati* aroused antagonism, and the reviews made sardonic references to 'the music of the future', then a favourite cliché of disapproval. Boito's affinity for the Scapigliatura can be most clearly observed in the poems of 1862–5 (published in 1877 as the *Libro de' versi*) and in his fantastic fable *Re Orso*. Here in abundance are his ironical wit, his passion for exotic words and clever rhymes and, particularly in his poem *Dualismo*, the underlying ideas that he would later elaborate. These were also the years of his main activity as a music and drama critic. Most of these pieces appeared in *La perseveranza*, in the *Giornale della Società del quartetto di Milano* and in the short-lived *Il Figaro*, which he co-edited with Emilio Praga. In these articles, Boito, with great assurance and ready erudition, proposed abandoning the puerilities of the past for the grand simplicities of a mature art of the future.

Boito's work on his own opera was delayed by the enthusiastic reception of Gounod's *Faust* at La Scala on 11 November 1862. According to Leone Fortis, Boito had first determined upon a pair of operas, *Margherita* and *Elena*, derived from the two parts of Goethe's poetic drama (see P. Nardi, *Vita di Arrigo Boito*, 237). When he returned from service as a volunteer in Garibaldi's campaign of 1866 his friends urged him to take up his project again, and it was at this point that he decided to fuse the two parts into a single grandiose work. During 1867 he laboured over *Mefistofele*, which went into rehearsal in January 1868. Although he had originally designed the role of Faust for a tenor, he was persuaded for budgetary reasons to revise it for a baritone. This opera was the first at La Scala for which a composer was his own librettist, and Boito unprecedentedly circulated his printed libretto some weeks before the première. Late in the rehearsal period Mazzucato insisted upon making some cuts and withdrew when Boito refused to countenance them, leaving the inexperienced composer to conduct his own work.

The première of *Mefistofele* on 5 March 1868 was a historic fiasco, lasting until well past midnight with the opposing factions in the audience vociferously sustaining their positions; the only part to be well received was the prologue. A second performance was given, this time divided between two evenings, each prefaced by the prologue and completed by Dall'Argine's ballet *Brahma*. Both parts of the opera were scorned, but the ballet was much applauded. Boito withdrew his score, his self-confidence deeply shaken.

During the next few years Boito (frequently using the anagrammatic pseudonym 'Tobia Gorrio') devoted himself to writing articles, including many on opera (see Nardi, ed., *Tutti gli scritti di Arrigo Boito*), and to supplying Italian translations of German lieder, among them Wagner's *Wesendonck-Lieder*. He also did hack-work for the rival publishing houses of Lucca and Ricordi. Among his tasks was the preparation of Italian versions of *Armide*, *Der Freischütz*, *Ruslan and Lyudmila* and *Rienzi*. He began work, too, on a libretto, *Ero e Leandro*, and started to compose it, but then consigned it first to Bottesini and then to Luigi Mancinelli. The idea of salvaging *Mefistofele* was prompted by a successful performance of the prologue at Trieste in 1871. He shortened the work, restoring the role of Faust as a tenor part, and also made a few additions; he submitted his amended orchestration to Cesare Dominiceti, whose suggestions he heeded. The revised *Mefistofele* was performed with a strong cast on 4 October 1875 at the Teatro Comunale, Bologna, a town more hospitable to novelty than Milan. Further material was added to the

*1. Arrigo Boito: miniature by Salvatore Corvaya (Museo Teatrale alla Scala, Milan)*

Prison Scene the following year at Venice. In this form *Mefistofele* made its way, particularly after its revival at Milan in 1881.

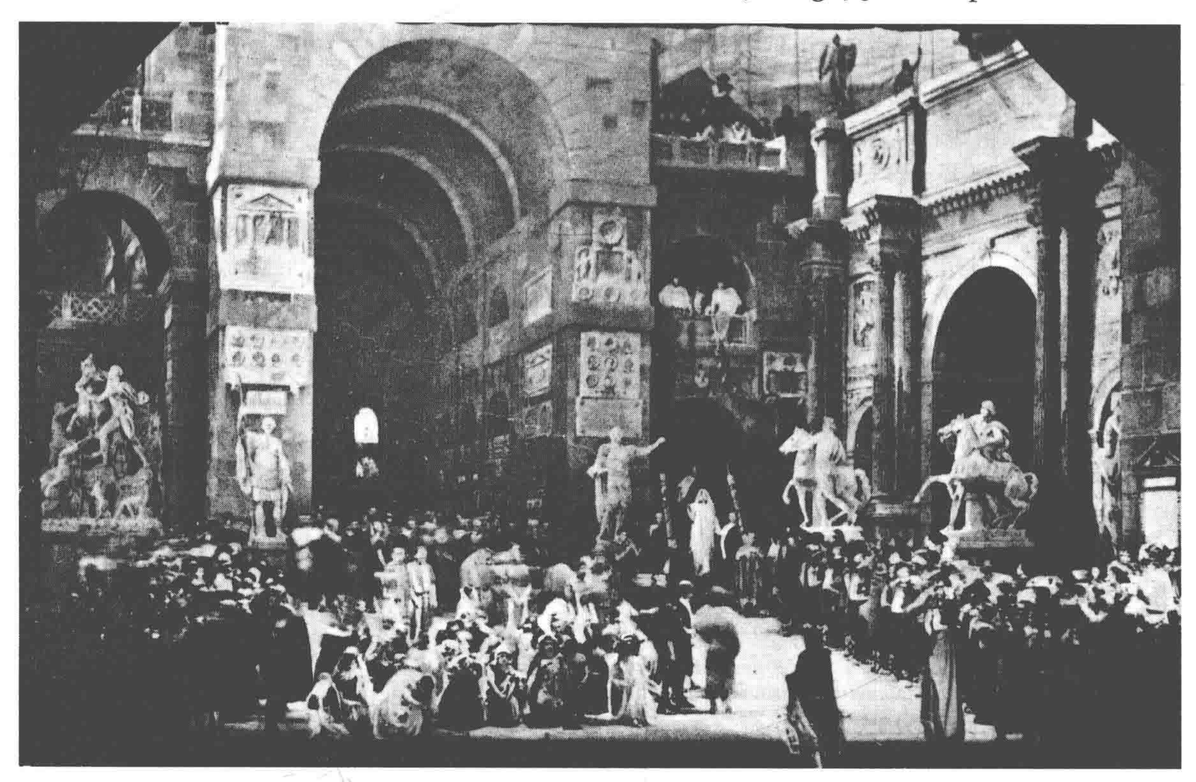
To the 1870s belongs most of Boito's activity as librettist of a number of all but forgotten operas, the single exception being Ponchielli's *La Gioconda* (1876, La Scala). His translation of *Rienzi* was given in 1874. Giulio Ricordi, a supporter of Boito from the mid-1860s, having learnt that Verdi was interested in the subject of *Nerone*, suggested that Boito relinquish his libretto to the elder composer, but Verdi, still smouldering over Boito's ode, refused it. After this episode Boito returned to the subject, working desultorily on *Nerone*, and to this period belongs the first level of music for it. In 1879, through the offices of Ricordi and Faccio, came the rapprochement with Verdi and the idea of a possible collaboration on *Otello*.

Before the end of 1879 Boito submitted a complete libretto, rather different in some respects from the final version, but Verdi was impressed with its quality. It was arranged that, as a trial, Boito would revise Piave's libretto for *Simon Boccanegra* for a La Scala revival in March 1881. This *rifacimento* was successful, particularly the new scene in the council chamber. Verdi then agreed to start on *Otello*, but the work progressed fitfully, and only Boito's patience and his readiness to modify his text kept the project afloat. The triumphant first performance, on 5 February 1887, set the seal upon Boito's friendship with Verdi, a relationship he regarded as the climax of his artistic life.

Their collaboration on *Falstaff* proceeded more smoothly, except for the tragic parenthesis when Boito assumed the directorship of the Parma Conservatory for his friend Faccio, so that Faccio, confined to an institution with paralytic syphilis, might continue to receive his salary until his death (July 1891). After the successful introduction of *Falstaff* in 1893 Boito started to sketch a libretto for a *Re Lear* for Verdi, but the composer realized he was too old to undertake this challenge. Boito continued to be a frequent visitor to Verdi's home and was present when he died.

Another important friendship of Boito's life, that with the actress Eleanora Duse, began shortly after the première of *Otello*. After an initial passion, their diverse careers kept them much apart. For her, Boito made an Italian acting version of Shakespeare's *Antony and Cleopatra*, in which she triumphed in 1888; he also prepared a version of *Romeo and Juliet* for her, but this was apparently never staged. In 1894 Duse fell under the influence of D'Annunzio, and when she separated from him some ten years later, completely disillusioned, she found once more in Boito a selfless, intellectually challenging friend. It was during this second, platonic stage of their relationship that she began to refer to him as 'il santo'.

In May 1891 Boito had read his libretto of *Nerone* to Verdi, who urged him to get on with his own career. Within a month of Verdi's death, Boito published his five-act libretto, which was received as a major literary event. Giulio Ricordi urged Boito to complete the score so that the opera could be given at La Scala in 1904 with Tamagno in the title role. Increasingly reluctant to confront the public, Boito began an extensive study of classical metres and the musical ethos of the ancients, as well as a detailed study of harmony, as his notebooks of the period testify. Persuaded by Ricordi to discard the fifth act, Boito continued to fiddle indecisively with the score until his death. *Nerone*, which had engaged Boito's attention irregularly for nearly 60 years, was finally performed six years after his death, on 1 May 1924 at La Scala (fig.2), in a version extensively revised by a committee consisting of Toscanini, Antonio Smareglia and Vincenzo Tommasini.



For much of his adult life Boito made a practice of helping struggling young composers, including Catalani and Puccini (at the time of *Le villi*). His attitude towards Puccini later changed. One of his closest friends was the dramatist Giuseppe Giacosa (to whom he suggested the plot of his play *Tristi amori*). With his ideals for the future of opera, Boito was opposed to Giacosa's participation in the libretto for *La bohème*, resenting both the subject and its composer's treatment of Giacosa. It is from this period that his coolness towards Puccini dates.

Boito's career also had an official side. In 1893, as substitute for Verdi, he was awarded an honorary degree by Cambridge University. He served on a national commission that supervised music education in Italy. In 1897 he was the author of a series of sensible proposals to improve conditions at La Scala. In 1912 he was named senator. The following year he was one of the prime movers in the establishment of the Museo Teatrale alla Scala.

It is clear from Duse's letters to her daughter that Boito in his last years lost the ability to concentrate. During the most discouraging days of World War I, he became almost a recluse, surrounded by the manuscript of his uncompletable *Nerone*. He developed a heart ailment and died in a Milanese clinic.

2. LIBRETTOS. Boito acknowledged, painfully, that he was pulled in contrary directions by his literary and musical impulses, a polarity reflected in his intellectual constitution by his fixation with an irresolvable dualism. When his *Libro de' versi* was published, he put first the poem 'Dualismo', which concludes with a vision of a man high on a tight-rope, balanced between a dream of virtue and a dream of sin. The philosophical struggle between these opposites led him to write a libretto that attempted to grapple with both parts of Goethe's *Faust*. A similar polarity underlies *Nerone*.

The literary quality of Boito's librettos follows an ascending scale from those he wrote for composers other than Verdi, through *Otello* and *Falstaff*, to those he supplied for himself. It was consistent with his belief that a libretto should be notable as drama that his first effort, *Amleto*, for Faccio, was drawn from Shakespeare. Boito's strengths and weaknesses are already evident: his ability to simplify a complicated plot and the variety of his poetic language, as well as his penchant for obscure polysyllables, his faulty sense of overall proportion, and his tendency to overstress contrasts of good and evil. *Ero e Leandro*, originally intended for himself, experiments with classical metres and embodies considerable antiquarian lore. *Semira*, written for Luigi San Germano, was withdrawn in rehearsal and never performed. *Basi e bote*, a comedy in Venetian dialect, was first performed in 1927 by Riccardo Pick-Mangiagalli. *Iràm* was intended for Cesare Dominiceti, who did not set it; it is a pithy comedy with foreshadowings of *Falstaff* (e.g. 'Il mondo è un trillo'). *Pier Luigi Farnese*, for Costantino Palumbo (1843–1928), is more intense and more vividly characterized than the other librettos in this group. The best-known of Boito's

*2. The Oppidium, Act 4 scene i of Boito's 'Nerone', La Scala, Milan, 1924: from 'L'illustrazione italiana' (4 May 1924)*

texts for composers other than Verdi is that for Ponchielli's *La Gioconda*, loosely derived from Hugo's *Angélo*. Boito changed the setting to Venice and introduced a good deal of local colour, and the flamboyant melodramatic tone faithfully mirrors Hugo's style. The characterization is anything but subtle.

*Otello*, the first of Boito's completed librettos for Verdi, has perhaps been overpraised. While undeniably a formidable achievement, the reduction of Shakespeare's text to operatic proportions was not as skilful as is usually maintained. Boito drastically altered Iago's motivation; Rodrigo's participation in the plot is inadequately developed; and the decisive fact of Cassio's survival is glossed over. That the libretto is finely proportioned is due more to Verdi's influence than to Boito. Nor was Boito's treatment as Shakespearean as is sometimes claimed. (Francis Hueffer's translation in the Ricordi scores has deceived more than one critic.) Laws of heresy in Shakespeare's day forbade specific Christian references on stage, yet many of Boito's changes and additions (the 'Credo' and the 'Ave Maria') insert these once-proscribed references. Boito's *Falstaff* is more extraordinary, perhaps because he was working from a lesser play. His fondness for word-play, his knack for hitting upon an epigrammatic phrase and his mordant irony all found full scope. The libretto seems less strained than *Otello*, and the result is exhilarating and beautifully paced.

The 1868 libretto of *Mefistofele* is more interesting as a literary document than as a potential text for music. The condensed version of 1875 sheds most of its novel features but is full of verbal felicities. The prologue, common to both versions, is without precedent in Italian operatic dramaturgy for its metrical variety and grandiose scope. *Nerone* exists in two versions: in five acts, as in the printed libretto of 1901, and in four acts, as in the printed score. The excised fifth act, for which Boito sketched music, presents Nero playing Aeschylus's Orestes while Rome burns. The four-act version ends with the death of the Christian convert Rubria. All in all, *Nerone* possesses great originality, vividly contrasting pagan magic, imperial corruption and Christian *caritas*. It is arguably Boito's finest achievement.

3. COMPOSITIONS. Boito left only two operas (one of them incomplete), as well as a handful of minor works. Clearly, he lacked the necessary compulsion to compose. He approached musical composition with such self-criticism and with so little confidence, that he reduced himself to silence for years, even decades. Yet he was capable of producing two episodes of irresistible effect in the prologue and Prison Scene of *Mefistofele*.

As a student at the Milan Conservatory, he was criticized for his gravely deficient sense of rhythm and for his unnatural and artificial tastes in harmony. To some extent these weaknesses are apparent in his mature works. Hardly a scene in *Mefistofele* is free of occasional signs of thinness and uncertainty; passages that begin well, like Faust's apostrophe to Helen, often degenerate into a mechanical series of sequences. He has not been kindly treated by some Italian critics and this results from the discrepancy between the aesthetic of his own criticism and his actual performance as a composer. From his letters it is clear that he himself was painfully aware of this discrepancy.

It is impossible to reconstruct the original *Mefistofele* because the revisions were made in the autograph score and the excised pages removed. The 1875 revision reveals Boito's uncertainty as a composer and his difficulty in

spinning out musical ideas. Although the music contains some allusions to Beethoven, the dominant influence is that of Meyerbeer, particularly in the arias of Mephistopheles. Two episodes keep the work on the fringes of the modern repertory: the prologue and the Prison Scene.

Boito's sketches and preparatory notebooks for *Nerone* survive; they bear eloquent witness to his extraordinary capacity for taking pains, but also reveal an increasing incapacity to come to practical grips with the opera. The peculiar eclecticism of *Nerone* arouses morbid fascination, but for all its grandiose spectacle and erudition the music contains little to move an audience, except in the scene of Rubria's death in the Spoliarium. In the lifelong struggle between literature and music that represents the true dualism of Boito's career, it was literature that proved supreme and in the end stifled his talent for composition.

4. Criticism. Boito's music criticism dates mostly from the 1860s. Although a good deal of it was ephemeral, enough of permanent interest remains to form a quirky witness to Boito's interests and aspirations. In a famous passage (from *Il Figaro*, 21 January 1864) he declared that opera could attain its high destiny by the following steps: 'the complete obliteration of *formula*; the creation of *form*; the realization of the vastest tonal and rhythmic development possible today; the supreme incarnation of drama'. This is a succinct statement of principles that he propounded at greater length in other articles.

Although Boito did not ignore other types of music, his chief concern was with the future of opera. He praised Mendelssohn, while regretting that he never achieved his dream of writing an opera on *The Tempest*. In another article he proclaimed that Meyerbeer's *Les Huguenots* had supplanted most Italian operas of the first half of the 19th century. On the whole, his articles treated Verdi with respect, finding particular merit in *Les vêpres siciliennes*, possibly because it is the most Meyerbeerian of Verdi's scores.

Boito was not the enthusiastic Wagnerian that has been alleged. As early as 1864, he blandly asserted that the days of Wagner's future were 'already over'. At the time of the first Italian performances of *Lohengrin* (Bologna, 1871), Wagner addressed to him *Ein Brief an einen italienischen Freund*. Wagner apparently wrote this open letter at the suggestion of the publisher Giovannina Lucca, and Boito's translation of Wagner's gratitude to his Italian audience was widely reprinted. His compliance in this matter can scarcely be blown up into partisanship. On many later occasions he expressed his lack of enthusiasm for Wagner and, later still, his antipathy to the music of Richard Strauss.

While Boito's principal accomplishments were literary rather than musical, he must nevertheless be regarded as an incomplete rather than an inconsequential composer. He was a man of aristocratic fastidiousness, a scholar of perception and sensitivity, a man who had a genius for friendship. The mark he left on Italian music of his time is greater than the sum of his own accomplishments.

WORKS

OPERAS

Mefistofele (prol, 5, epilogue, Boito, after J.W. von Goethe: *Faust*), Milan, Scala, 5 March 1868, excerpts (Milan, 1868); rev. version (prol, 4), Bologna, Comunale, 4 Oct 1875; rev. version, Venice, Rossini, 13 May 1876, *I-Mr**, vs (Milan, 1876), fs (Milan, *c*1895)

Nerone, 1877–1915 (tragedia, 5, Boito), inc., completed V. Tommasini, A. Smareglia and A. Toscanini, Milan, Scala, 1 May 1924 (Milan, 1925)

OTHER WORKS

Il quattro giugno (cant. patria, 2 pts, Boito), Milan, Conservatory, 8 Sept 1860; *I-Mc* [music of pt 1 by F. Faccio]

Le sorelle d'Italia (mistero, prol, 2 pts, Boito), Milan, Conservatory, Sept 1861; *Mc*, vs (Milan, 1861) [music of prol, pt 1 by Faccio]

Do mi sol . . . La mi . . . (Boito), song, 1v, pf, 26 Jan 1865; autograph Toscanini Collection, New York, facs. (Milan, 1924)

La notte difonde (Boito: *Ero e Leandro*), barcarola, 4vv, pf (Milan, 1875)

Inno-marcia per l'Associazione Ginnastica Triestina (Boito), 1877; *TSmt** (Trieste, n.d.)

All'arte italiana (ode, G. Giacosa), Turin, 1880, unpubd

OTHER LIBRETTOS

*Inno delle nazioni* (cant.), G. Verdi, 1862; *Amleto* (tragedia lirica), F. Faccio, 1865; *Un tramonto* (egloga, with E. Praga), G. Coronaro, 1873; *La falce* (egloga orientale), A. Catalani, 1875; *La Gioconda* (melodramma), A. Ponchielli, 1876; *Ero e Leandro* (tragedia lirica), G. Bottesini, 1879 (L. Mancinelli, 1896); *Semira* (tragedia lirica), unperf.; *Pier Luigi Farnese* (dramma lirico), C. Palumbo, 1891; *Iràm* (commedia lirica), unperf.; *Simon Boccanegra* (melodramma, after F. Piave), Verdi, 1881; *Basi e bote* (commedia lirica), R. Pick-Mangiagalli, 1927; *Otello* (dramma lirico), Verdi, 1887; *Falstaff* (commedia lirica), Verdi, 1893

WILLIAM ASHBROOK

**Boivin.** *See* BOYVIN.

**Boivin, François** (*b c*1693; *d* Paris, 25 Nov 1733). French music seller and music publisher. He was the nephew of the double bass player and composer Montéclair, and brother of the string instrument maker Claude Boivin. On 15 July 1721 Boivin bought the music shop 'A la règle d'or' on the rue St Honoré, Paris, after the death of Henry Foucault who had owned it; he and his uncle went into partnership to trade there. In addition to selling scores he soon published music and bought two licences in 1728 and 1729. He published works by Montéclair, Jacques Loeillet and Quantz, among others. On 2 July 1724 he married Elizabeth Catherine Ballard, second daughter of Jean-Baptiste-Christophe Ballard, who assisted him. As a result of their efforts, and the family connection with Montéclair and Ballard, 'A la règle d'or' became one of the foremost music shops in Paris. Works by Vivaldi, Corelli, P.A. Locatelli, Telemann and Quantz could be found there, but the mainstay of the stock was French, including cantatas by Nicolas Bernier and Clérambault, harpsichord works by François Couperin, Louis Marchand and Jean-François Dandrieu, violin sonatas by J.-M. Leclair and Senaillé, sonatas for flute by Louis Hotteterre, suites for viola da gamba by Marais and Caix d'Hervelois, motets by Lalande (*see* LALANDE, fig.1), operas by Lully, Campra and Rameau, as well as brunettes and *airs* for amateurs. Boivin also associated with the Princess of Enghien, the Bishop of Reims, the Amsterdam publisher Le Cène, the London publisher Walsh and such composers as Daquin, Mouret, Boismortier, François Francoeur and P.D. Philidor.

After Boivin died his widow continued the business for 20 years, under the name 'la Veuve Boivin', assisted by her brother-in-law Claude Boivin and her father. The measure of her intelligent management is revealed by the value of the stock which increased unceasingly; worth 4500 livres in 1721 and 29,000 in 1724, its value had increased to 36,400 livres when trading ceased in 1753. She sold her shop to Marc Bayard on 2 March 1753 and died in Chartres on 13 February 1776.

SYLVETTE MILLIOT

**Bokemeyer, Heinrich** (*b* Immensen, nr Lehrte, Lower Saxony, March 1679; *d* Wolfenbüttel, 7 Dec 1751). German composer and theorist. He was a friend of and frequent correspondent with J.G. Walther, who published Bokemeyer's autobiographical sketch in the *Musicalisches Lexicon*. From it we learn the few facts known of Bokemeyer's life. He was first educated in his home town and also in the neighbouring village, Burghof. From 1693 to 1699 he studied at the church school of St Martin and St Katharina in Brunswick, and in 1702–4 was at the university in Helmstedt. On 2 April 1704 he returned to Brunswick as Kantor at St Martin. Bokemeyer began composition lessons in 1706 with Georg Oesterreich, Kapellmeister and Kantor to the ducal court of Braunschweig-Lüneburg. Between 1712 and 1717 Bokemeyer served as Kantor in Husum (Schleswig) where, he states, he learnt the 'manner of singing *alla siciliana*' from Kapellmeister Bartolomeo Bernhardi, who also asked Bokemeyer to sing some of his Italian cantatas in the presence of the King of Denmark. In 1717 he moved to Wolfenbüttel to assist the ailing cantor at the ducal palace, Jacob Bendeler, whom he succeeded in 1720, retaining the position until his death.

Bokemeyer was widely respected in Germany as a composer, teacher and theorist, and his name appears in the works of many 18th-century theorists including Mattheson, Adlung, Scheibe and Mizler. A lengthy correspondence with J.G. Walther, in which the two learned men explored various problems encountered by the former in the preparation of his *Lexicon*, partly survives in 35 letters from Walther to Bokemeyer (*D-Bsb*; ed. in Beckmann and Schulze). In 1739 Bokemeyer was invited by Mizler to join (together with C.G. Schröter, G.H. Stölzel and Telemann) his Societät der Musikalischen Wissenschaften, a Leipzig corresponding society of musical scholars and composers.

Bokemeyer pursued a fascinating polemical argument with Johann Mattheson regarding the importance of canon and the nature of melodic composition. 'Die

canonische Anatomie', Mattheson's *Critica musica* (i, §§2–4), contains Bokemeyer's defence of canon, a musical craft he believed to be the highest peak of musical-poetical art, the basis of all fugues, imitation, double counterpoint and the *a cappella* style, as well as the actual basis of all music. Mattheson countered these conservative, scholastic and clearly non-Italian statements with his own more characteristic mid-18th-century viewpoint that canon was a fruitless, sterile artifice; furthermore, he proposed that it was melody, not canon, that served as the foundation of music. The two theorists pursued a second argument, developing out of Bokemeyer's doctrine of how to write good melodies (in *Critica musica*, ii, as 'Die melodische Vorhof'). In taking exception to almost everything Bokemeyer proposed, Mattheson formulated an extensive doctrine of melody that remains an important source of insight into the radical change of musical styles taking place in the mid-18th century.

Bokemeyer collected a remarkable library of books and music manuscripts (the Sammlung Bokemeyer) throughout his long life. On his death the collection was probably bequeathed to his son-in-law, the Celle organist J.C. Winter; it was subsequently purchased by J.N. Forkel, and in 1819 Forkel's library was sold to the forerunner of the Königliches Akademisches Institut für Kirchenmusik, Berlin. In 1844 the entire collection was acquired and absorbed into the holdings of the Königliche Bibliothek (now *D-Bsb*). Kümmerling, in his study of this extraordinary source for the study of Baroque music history, showed the magnitude of the original collection which contained more than 1800 scores and books, with some 850 manuscripts of sacred music. About 300 composers are represented, including Albinoni, P. Agricola, Allegri, Bononcini, Buxtehude, Caldara, J.W. Franck, Förtsch, F. Gasparini, Keiser, J.P. Krieger, Kuhnau, Legrenzi, Lotti, V. Lübeck, Österreich, Pistochi, Polaroli, Rosenmüller, Schürmann, Steffani, G.P. Telemann, Theile and Zachow. The largest portion of the library belonged originally to Georg Österreich who, as Kapellmeister at the court of Gottorf, copied or supervised the copying of the music.

Bokemeyer's own compositions, which must have been numerous, are almost entirely lost, although a considerable number of anonymous works in his own library could conceivably be his. A single cantata, *Me miserum! miseriarum conflictu obruor*, for two oboes and tenor solo, survives (*D-Bsb*); three brief didactic treatises in manuscript are in the same library: *Kurtze und gründliche Anweisung wie ein einfacher Contrapunct in lauter Consonantien zu Setzen sey*; *Bokemeyers Elaboratio dissonantiarum, nach den Fundamental Regeln des sel. Herrn Theilen*; and *Elaboratio contrapuncti duplicis alla duodecimi*.

GEORGE J. BUELOW

**Bokes, Vladimir** (*b* Bratislava, 11 Jan 1946). Slovak composer. He studied the cello with Pospíši and composition with Kořínek at the Bratislava Conservatory (1960–65) before continuing his composition studies with Alexander Moyzes and Kardoš at the College of Performing Arts. His college graduation piece was the First Symphony (1970). From 1971 to 1975 he taught music theory at the conservatory, and thereafter was appointed lecturer in composition at the college, where he was made professor in 1993. In the same year he was elected president of the board of Melos-Ethos, the international festival of contemporary music held in Bratislava.

Bokes's compositional style was first influenced by the Second Viennese School, by dodecaphony and serialism, and by the composition techniques of the postwar avant garde (see, for example, *Sequenza*, 1965, and the Piano Trio, 1967). Even later he remained faithful to rational methods of composition. (As a result of his orientation towards Western avant gardism, his works were not performed in Slovakia during the 1980s.) In his search for a personal style he has experimented with polyrhythms and even aleatorism, though the unifying element of his composition remains the use of the Golden Section and Fibonacci series, which he applies to both horizontal and vertical parameters of his music. In *Línie* ('Lines', 1978) for 12 voices he combines absolute control and organization with aleatory devices. Bokes is at his best writing for orchestra or chamber-instrumental ensembles. He has made arrangements of several works by Ján Levoslav Bella, and completed, in 1993, Kardoš's Second Piano Concerto.

KATARÍNA LAKOTOVÁ

**Bol, John** [Jan]. *See* BULL, JOHN.

**Bolan, Marc** [Feld, Mark] (*b* London, 30 Sept 1947; *d* Barnes, London, 16 Sept 1977). English pop singer. Having worked as a fashion model in the early 1960s he formed the folk-influenced Tyrannosaurus Rex in 1968 and built up a sizeable cult following in the UK. However, it was not until he jettisoned the hippy-era whimsicality of his early work and replaced it with a more pop-orientated electric guitar sound that he achieved widespread success. The group changed its name to T. Rex and their single *Ride a White Swan* (1970) heralded an unbroken sequence of 11 UK top ten hits. Working with the American producer Tony Visconti, Bolan fashioned a commercial pop sound based on infectious riffs influenced by rhythm and blues and symphonic-like string arrangements. With his friend and rival David Bowie, Bolan made the transition from countercultural flower-power music to the glitter rock of the early 1970s, with the emphasis on visual daring and androgyny. However, unlike Bowie, he failed to refresh his music and his look, and as the decade progressed Bolan slipped into self-parody. He was also unable to transfer his British popularity to the USA. A talented and distinctive vocalist and, for a period, an excellent pop songwriter, Bolan was one of the most successful British pop stars of the 1970s, who with his band T. Rex helped codify glam rock. His work has remained popular, through reissues and re-packages, and he still has a British cult following. For further reading see M. Paytress: *Twentieth Century Boy: the Marc Bolan Story* (London, 1993).

DAVID BUCKLEY

**Bolaños, César** (*b* Lima, 4 June 1931). Peruvian composer and musicologist. He studied music at the National Conservatory and at the Sas-Rosay Academy with Sas (1946–53). In Lima he founded the group Renovación together with Valcárcel and Escot. His studies continued at the Manhattan School of Music in New York (1959) and at the RCA Institute of Electronic Technology (1960–63); he finished his training at the Di Tella Institute, Buenos Aires with Ginastera, Nono, Messiaen, Dallapiccola and Maderna. There he helped to establish the electronic music laboratory and taught electronic composition (1964–70). He worked with the mathematician M. Milchberg on the calculation of probabilities and on the possibilities of using computers for composition. The seven years he spent in Argentina marked his most creative period. On his return to Peru he became director of the department of music and dance of the National Cultural Institute (1973–83), held teaching posts at the National Conservatory and at Lima University and continued his research, making important contributions to the study of ancient and traditional music instruments.

After 1963, Bolaños put aside previous references to popular music, and firmly positioned himself as part of the avant garde. His view of music as inseparable from its social context and as a form of ideological expression led to such music-theatre works as *ESEPCO I* and *Divertimento III*, both of which retain a clear sense of play. More personal characteristics are displayed in his two multimedia pieces: *Alfa–Omega*, a staged cantata with biblical texts, and *I-10-AIFG/Rbt-1* in which the musicians remain hidden in darkness while the conductor is replaced by a system of automated light signals. The written word and the voice are central elements in Bolaños's compositions, as in *Intensidad y altura* (1964), his first electro-acoustic piece, in which the reading of a poem by César Vallejo, about the difficulty of verbal expression, is given dramatic treatment. This is again the case in *Alfa–Omega*, in which texts are fragmented and superimposed by the choir, making them incomprehensible, while the reciters speak in a theatrical manner and the written word becomes a visual element projected on slides. In *Ñacahuasu* (1970), the text is heightened by its simple, amplified presentation against an instrumental line which is fragmented between three instrumental groups positioned in different parts of the concert hall. Such spatial ideas have gone to form other works including, notably, the earlier *Interpolaciones* for electric guitar and tape (1961), in which the performer is echoed by recorded guitar sounds diffused through variously placed loudspeakers.

WORKS

Orch: Ensayo, str, 1956; Homenaje al cerro San Cosme, 1957
Vocal: Cant. Solar (R. Jodorowsky), A, Bar, B, chorus, orch, tape, 1963; Immanispatak (Quechua texts), mixed chorus, 1963; Variaciones (C. J. CARLOS ESTENSSORO

**Bolcom, William (Elden)** (*b* Seattle, WA, 26 May 1938). American composer, pianist and author. He began composition studies with Verrall at an early age and continued with Milhaud at Mills College (1958–61) and with both Milhaud and Messiaen in Paris. After working with Leland Smith at Stanford University (1961–4), he taught at the University of Washington (1965–6) and Queens College, CUNY (1966–8). While in New York he developed a style of playing ragtime that, through concerts and recordings, placed him in the forefront of the ragtime revival. He has also composed original rags, among them *Graceful Ghost*. From 1968 to 1970 he was composer-in-residence at the Yale University Drama School and the New York University School of the Arts. He began to teach at the University of Michigan in 1973.

In 1975 Bolcom married mezzo-soprano Joan Morris with whom he began to develop programmes on the history of American popular song. Their recitals and recordings of songs by Henry Russell, Henry Clay Work and others have aroused much interest in parlour and music-hall songs of the 19th and early 20th centuries. Bolcom has also recorded solo albums of music by Gershwin, Milhaud and himself. He is the author with Robert Kimball of *Reminiscing with Sissle and Blake* (New York, 1973) and has edited the collected writings of Rochberg, *The Aesthetics of Survival: a Composer's View of 20th-century Music* (Ann Arbor, MI, 1984).

Bolcom began his career composing in a serial idiom; he particularly admired the work of Boulez, Stockhausen and Berio. In the 1960s, however, he gradually shed this academic approach in favour of a language that embraced a wider variety of musical styles. In most of his mature music he has sought to erase boundaries between popular and serious music. An intensely dramatic atonality may contrast with the song styles of World War I (as in the cabaret opera *Dynamite Tonite*), ragtime (*Black Host*), old popular tunes (*Whisper Moon*), or a waltz (Piano Quartet).

The dance suite *Seattle Slew* (1986), named after a famous racehorse, uses regular, formally predictable dances such as the tango, gavotte, and rag to evoke the old-fashioned atmosphere of a racetrack. The Fifth Symphony (1989) opens in a highly abstract, even Expressionistic style, featuring angular melodies and dissonant harmonies. Later the music mixes these in a collage-like manner with popular tunes and quotations from works such as Wagner's *Tristan* prelude and Mahler's horn fanfares. Bolcom's ideology, rooted in the transcendentalism of William Blake, has inspired compositions concerned with momentous religious and philosophical themes. These concerns are expressed with intense, even flamboyant music of vivid illustrative power. Such qualities appear in *Frescoes*, for example, and most notably in the monumental setting of the 46 poems in Blake's *Songs of Innocence and of Experience*, a work that stands as a summation of Bolcom's achievements as a composer.

WORKS

STAGE

Songs of Innocence and of Experience (musical illumination, W. Blake), 1956–81; Dynamite Tonite (cabaret op, 2, A. Weinstein), 1963, New York, 1963; Greatshot (cabaret op, 2, Weinstein), 1966, New Haven, CT, 1969; Theatre of the Absurd (paraphrase, Bolcom), 1970, San Francisco, 1979; The Beggar's Opera (J. Gay), 1978, Minneapolis, 1979 [completion of adaptation begun by Milhaud, 1937]; Casino Paradise (music-theatre op, 2, Weinstein), 1986–90, Philadelphia, 1990; McTeague (op, 2, Weinstein and R. Altman, after F. Norris), 1991–2, Chicago, 1992; A View from the Bridge (op, 2), 1997–9

STEVEN JOHNSON

**Boldemann, Laci** (*b* Helsinki, Finland, 24 April 1921; *d* Munich, 18 Aug 1969). Swedish composer. He studied conducting with Wood and the piano at the Royal Academy of Music, London; then in 1939 he moved to Sweden and there took piano lessons with de Frumerie. Forced to join the German army in 1942, he served in Russia, Poland and Italy, where he deserted to join the partisans in the Abruzzi. After two years in an American prison camp he returned to Sweden in 1947. During the 1950s he supported himself as a timber measurer, and in the next decade he worked in music teaching and administration. As a composer he aimed at simplicity, purity and expressiveness, finding vocal music his ideal medium. He felt musically isolated in the Sweden of the 1950s, but his works achieved recognition in Germany. In later years he became increasingly concerned with composing for children. The opera *Dårskapens timme*, constructed from 20 leitmotifs, has a self-ironic tone, and Boldemann's music is generally cheerful, direct and tuneful.

WORKS
(*selective list*)

Stage: Svart är vitt – sa kejsaren (children's op, prelude, 2, L. Hellsing, after K. Boldemann), op.20, 1963–4; Dårskapens timme (comic op, 3, epilogue, K. Boldemann, after A. Bonacci), op.21, 1965–6; John Bauer (children's stage orat, Hellsing), op.23, solo vv, orch, 1967; . . . och så drömmer han om Per-Jonathan (scene, Boldemann), op.26, B, orch, 1969

Orch: La danza, sym. ov., op.4, 1949–50; Sinfonietta, op.11, str, 1954; Fantasia concertante, op.12, vc, orch, 1954; Pf Conc., op.13, 1956; Vn Conc., op.15, 1959; Sym. no.1, op.18, 1959–62

Vocal: Lieder der Vergänglichkeit (H. Michaud), op.8, Bar, str orch, 1951; Notturno (Michaud), op.14, S, orch, 1958; 5 other orch songs, *c*180 songs with pf incl. 112 children's songs

Choral: 6 sånger (V. Ekelund), op.28, male vv, 1969

Inst: Canto elegiaco, op.19, vc, pf, 1962; pf pieces

ROLF HAGLUND

**Bolden, Buddy** [Charles Joseph] (*b* New Orleans, 6 Sept 1877; *d* Jackson, LA, 4 Nov 1931). American blues and ragtime cornettist and bandleader. The first of the New Orleans cornet 'kings', he was highly regarded by contemporary fellow black musicians in the city, who in their reminiscences embroidered his life with a great many legends and spurious anecdotes. He came relatively late to music, adopting the cornet around 1894 after completing his schooling, and emerged not from the brass marching-band tradition but rather from the string bands which played for private dances and parties. By 1895, while working as a plasterer, he was leading his own semi-professional group, and by 1901, when his name first appears in city directories as a professional musician, his group had stabilized into a six-piece unit with cornet, clarinet, valve trombone, guitar, double bass and drums. Bolden's rise to fame coincided with the emergence of a black pleasure district – Black Storyville – at South Rampart and Perdido streets, where he played in the dives and tonks (but not the brothels). His fame was at its peak in 1905, when his group performed regularly in the city's dance halls and parks, and undertook excursions to outlying towns. In the following year Bolden showed distinct signs of violent mental derangement, and his band rapidly disintegrated. In 1907, in a state of hopeless indigence and alcoholism, he was admitted to a mental institution in Jackson, where he spent his remaining years. His life formed the basis of M. Ondaatje's novel *Coming through Slaughter* (New York, 1976).

Contemporary musicians universally praised the power of Bolden's tone, his rhythmic drive and the emotional content of his slow blues playing. He reportedly found ingenious ways of ornamenting existing melodies, but recent research has cast doubt on his reputation as the first jazz musician.

J. BRADFORD ROBINSON

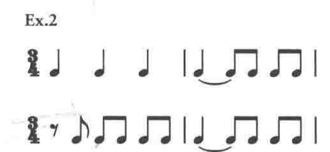
**Boldon** [Baldoni], **Tomaso** (*b* Padua; *fl* 1598–1601). Italian composer. He was a priest. His surname 'Boldon' is probably a Paduan dialect version of the more common name 'Baldoni'. His earliest known work, *Volse Giove saper*, was first published in a collection of five-voice madrigals composed by 'diversi Eccellenti Musici di Padova' (RISM 1598[2]). His *Vesperi per tutte le solennità dell'anno* (Venice, 1601) contains as well as the psalm settings a mass, a *Te Deum* for six voices, a *falsobordone*, a *Gloria Patri* and an eight-voice setting of the Litany of the Blessed Virgin Mary. The dedication to Abbate G.F. Moresini indicates that the psalm settings had been composed in response to a request from Paduan clerics for pieces which could be performed 'alla Bassa senza soprani & all'Alta senza Bassi'.

**Bolero.** A Spanish popular dance or song. Its dancers are called *boleros* or *boleras*. Of the several possible etymologies considered by Suárez-Pajares (A1993), the most plausible are those deriving from the verb *volar* ('to fly') and from the name *boleras*, given to the Gypsy women 'who were the first to dance it [and called so] because of the little gold-braided balls (*bolitas de pasamanería*) that adorned their dresses'. From its beginnings in Spain

**Ex.1** Typical bolero (a) and seguidilla manchega (b)

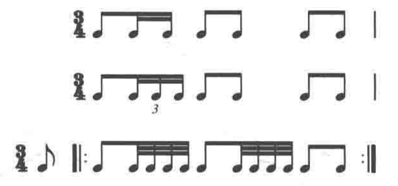
(a) from Tiersot (1930), p.2909

(b) from Rodríguez Marin (1881–3), p.878



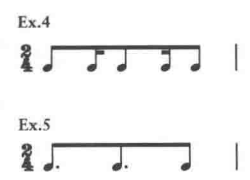
during the last third of the 18th century the bolero's popularity in the court and theatre persisted throughout the 19th century, and it has since been absorbed among the traditional dance and song genres of Andalusia, Castile and Mallorca.

Consensus among the early writers (Sor, A1835; El Solitario, A1847) points to the bolero's having derived from the *seguidilla*, whose accompanying rhythm and movements it modified and to whose verse form it was sung. After the *seguidilla* had absorbed steps and movements from such other dances as the fandango, *polo*, *tirana* and *cachucha*, two types gained prominence: the *seguidilla manchega* (which later became the bolero) and the *seguidilla murciana*. The former was much quicker and began with two verses, whereas the latter began with one. Comparison of a typical bolero and *seguidilla manchega* (ex.1) reveals their similarity.



The bolero is in moderate tempo and triple metre. It is usually performed by a couple, but in theatrical performances was executed by four to eight couples. It comprises three equal sections (*coplas*), each beginning with a *paseo* (promenade). Only in the middle section is solo performance alternated with couple-dancing. The *bien parado* (a fixed pose with one arm arched over the head and the other crossed in front of the chest) closes each section and, sometimes, phrases within the section. Complicated steps, including the *cuarta* (kicking and crossing the feet while executing a leap) and *battement* (in which the lifted leg is struck against the standing leg), and fast movements characterize the solo sections. The dancers accompany themselves with singing (often a vocalise) and castanets, and sometimes also on the guitar and tambourine. Musically the Spanish bolero is usually in *AAB* form. The entry of the voice is preceded by at least one bar of sharply marked rhythm, and short instrumental interludes separate the sung couplets. The earliest rhythms (shown in ex.2) took on characteristics closely related to traditional polonaise rhythm (ex.3).

**Ex.2**



Varying interpretations of the dance are found in Mexico, Cuba and other Latin American countries, especially

**Ex.3**

Colombia and Venezuela. The Cuban bolero is a duple-metre dance that exhibits closer relationships with the habanera and Afro-Cuban musical styles than with its Spanish counterpart. It is a binary song form that developed from such 19th-century forms as the conga, *danzón* and *contradanza*. Its often sentimental quatrains,

sometimes as many as 20, are presented in two contrasting musical periods characterized by long, flowing melodies. Rhythm is characteristically complex and includes the use of the *cinquillo* (ex.4) and *tresillo* (ex.5) in the melody as

well as in the accompaniment, which is for bongo, conga drum and claves.

According to Suárez-Pajares (A1993), the earliest use of the term 'bolero' was the dance Ramón de la Cruz specified for his *sainete La hostería del buen gusto* (1773). Dances were often incorporated in *sainetes* and in *entremeses* inserted between the acts of longer plays and lyrical dramas. Boleros were also included in many 18th- and 19th-century *tonadillas* and zarzuelas. J.A. Zamácola (1756–1826), a prominent Spanish folklorist and song collector who wrote under the pseudonym Don Preciso, attributed the dance's origin to Sebastián (Lorenzo) Cerezo or Zerezo, an acclaimed dancer from La Mancha. J.J. Rodríguez Calderón, writing in 1807, credited the Gypsy-born dancer Antón Boliche from Seville (*d* 1794) with having refined its movements and surmised that Bolidne's surname might possibly have earned him the nickname Bolero.

Among the foreign authors who kept journals of their travels in Spain during the late 18th and early 19th centuries, the Englishman J. Townsend described the dance (*volero*) performed at a ball in Aranjuez, seeing in it some resemblance to the fandango. The German C.A. Fischer saw it performed in a theatre in Cádiz and described it in more detail, mentioning printed material available from bookstalls in the Puerta del Sol district in Madrid. These manuals and methods, bearing such titles as *L'animas que manifiestan los varias pasos, y mudanzas de los seguidillas voleros y los trages mas proprios para esse bayle* and *Modo facil para aprender el ayre volero en la guitarra y arreglar la voz*, may be the earliest sources of their kind. The poet Théophile Gautier described in contemptuous terms a performance he and a companion witnessed in a theatre in Vitoria, their first viewing of a national Spanish dance (*baile nacional*).

Around the beginning of the 19th century the Spanish dancer Requejo initiated reforms in bolero dancing in a successful collaboration with the Spanish violinist and composer Dámaso Cañada (*d* 1849), whose *boleros teatrales* were written as instrumental dances with the flute replacing the voice. (The *Dance de Reguejo*, arranged for flute and piano and possibly from Cañada's collection, is printed in Sor, A1835, p.91, and several boleros by Cañada can be found in Paz, B1813.) In Seville, which was not affected by Requejo's reforms, a theatrical form of the bolero took root, giving rise to the so-called bolero school (see Cairón, B1820). Curiously, the term 'bolero' was not included in the *Diccionario de la lengua castellana*, issued by the Real Academia Española, until the fifth edition (1817), where it was defined as requiring 'much grace and elegance' (*mucho garbo y gentileza*), clearly a reference to the elevated taste of the bolero school.

The bolero quickly found favour beyond Spain's borders. It was extremely popular in Paris, and was included in the repertory of the singer-composer Manuel García in his tours throughout Europe, the USA and Mexico. Along with the older fandango, *seguidilla* and *tirana*, the bolero became one of the most popular dances in the New World during the colonial period. The Cuban bolero, however, superseded the Spanish one in Latin America, entering the repertory of marimba bands in Central America and Mexico during the 19th century. Two types of bolero exist in Mexico: the *romantico*, danced and/or sung, which has an international music-hall character, and the *ranchero*, only sung, which is found only in Mexico and is accompanied by a mariachi consort using stylized bolero rhythms. In Colombia and Venezuela boleros are part of the popular song repertory.

Early examples of the bolero in art music are Sor's famous bolero for three female voices (ed. in Mitjana y Gordón, A1920, p.2335), dating from around the middle of the period of the dance's greatest popularity in Spain, and two of Beethoven's folksong arrangements with piano, violin and cello accompaniment: the 'bolero a solo' *Una paloma blanca* and 'bolero a due' *Como la mariposa* WoO158*a* nos.19–20. Opera composers were also attracted to the form: Weber included a bolero in the incidental music to *Preciosa* (1820), and in *Der Freischütz* (1821) he employed its rhythm in the arietta 'Kommt ein schlanker Bursch gegangen'; further examples are found in the works of Méhul (*Les deux aveugles de Tolède*, 1806), Auber (*La muette de Portici*, 1828; *Le domino noir*, 1837), Berlioz (*Benvenuto Cellini*, 1838), Joaquín Gaztambide (the zarzuela *El estreno de un artista*, 1852) and Verdi (*Les vêpres siciliennes*, 1855). Moritz Moszkowski composed boleros for violin and piano (op.16 no.2) and for piano solo (op.12 no.5). Chopin's *Boléro* op.19 more nearly resembles a polonaise, particularly in the *allegro vivace*. Ravel's *Boléro* (1928), initially conceived under the title *Fandango*, employs a consistently moderate and uniform tempo, as much in its melody and harmony as in its recurrent underlying rhythm, which suggests a fleeting relationship with the traditional dance (ex.6).

WILLI KAHL, ISRAEL J. KATZ

**Bolet, Jorge** (*b* Havana, 15 Nov 1914; *d* Mountain View, CA, 16 Oct 1990). American pianist of Cuban birth. He studied with his sister Maria before entering the Curtis Institute of Music in Philadelphia in 1927, where he worked principally with David Saperton (Godowsky's son-in-law). During this time he also played for Godowsky, Josef Hofmann and Moriz Rosenthal. In 1935 he spent nine months in Paris and London broadening his education before returning to the Curtis Institute to study conducting with Fritz Reiner. In 1937 Bolet won New York's Naumburg International Piano Competition; his official New York début, given later that year, was attended by Rachmaninoff, Horowitz, Mischa Elman, Piatigorsky and Godowsky. However, success followed slowly, and the 1940s and 50s were notably lean years supplemented by teaching as Serkin's assistant at the Curtis Institute (1939–42) and Bloomington, Indiana (1968–77). In 1942 he was made military attaché for Cuba in Washington, DC, and in 1946, while serving in the US army in Japan, he conducted the first Japanese performance of Gilbert and Sullivan's *Mikado*. During the 1970s he achieved greater recognition, beginning with his magisterial performances of Liszt's transcriptions of *Rigoletto* and *Lucia di Lammermoor* at an International Piano Archive concert at New York's Hunter College in 1970. The following year Bolet played Liszt's *Totentanz* with the New York PO under Boulez to great critical success, and in 1974 his epic Carnegie Hall recital proved a turning-point in his career. A 1976 recital at London's Queen Elizabeth Hall confirmed his stature; in the same year he signed an exclusive contract with Decca, with whom he recorded the cornerstones of his repertory, principally music by Chopin, Schumann and, above all, Liszt. Although he disliked working in the studio, missing the stimulus of an audience, he recorded extensively and in 1984 he won a Gramophone Award for his disc of the first (Swiss) book of Liszt's *Années de pèlerinage*. While his repertory was essentially orientated towards the Romantics, it was surprisingly wide, and included such works as John La Montaine's Piano Concerto, Norman Dello Joio's Third Sonata and Joseph Marx's *Romantisches Klavier-Konzert*. Acclaim came late to Bolet, but his very personal mastery and refinement are widely held in awe and affection.

BRYCE MORRISON

**Bolgarskiy raspev** (Russ.: 'Bulgarian chant'). A term used for part of the Russian chant repertory from the mid-17th century. *See* RUSSIAN AND SLAVONIC CHURCH MUSIC, §2.

**Bolivia** (Sp. República de Bolivia). Country in South America, sharing borders with Brazil to the north and east, Paraguay and Argentina to the south, and Chile and Peru to the west.

I. Art music. II. Traditional music.

### *I. Art music*

Until 1776 Bolivia formed part of the Viceroyalty of Peru, as 'Audiencia de Charcas' or 'Alto Peru'; the early history of art music in Bolivia is therefore related to that of Peru. During the colonial period the capital, La Plata (or Chuquisaca, and since 1839 Sucre), was one of the important intellectual and artistic centres of Spanish America, particularly because of its S Francisco Xavier University and its cathedral. Founded in 1538 it became a bishopric in 1552 and as early as 1569 its first music school was established by the musicians Juan de la Peña Madrid and Hernán García, to teach the Amerindians singing and instrumental performance. The wealth and consequent musical development of La Plata Cathedral (whose liturgy was closely linked to that of Seville) during the 17th and 18th centuries is attested to by the substantial historical and musical archives at the cathedral, whose holdings dating from the Baroque period make it one of

the richest South American archival centres. Manuscript copies of works by such European composers as Galuppi, Hidalgo, Durón and Michael Haydn have been little explored. Throughout this period the cathedral library expanded considerably, receiving works from Spain and the colonies, especially Mexico. At the same time works of composers active at the cathedral were copied locally: the manuscript copy made in Potosí in 1784 of a mass by Zipoli, active in Córdoba, Argentina, is in the cathedral archive. The cathedral chapter maintained an ensemble of singers and instrumentalists numbering 50 musicians by the beginning of the 18th century.

Gutierre Fernández Hidalgo (1553–1620), who had worked at Bogotá and Quito, became *maestro de capilla* at La Plata in 1598. None of his works has been found in Sucre but his vain attempts to have them published in Spain or France are documented (1607). The most important 17th-century composer in La Plata was Juan de Araujo, who was born in Spain and who studied at the University of S Marcos in Lima with Tomás de Torrejón y Velasco. He was *maestro de capilla* at La Plata Cathedral from 1680 until his death in 1712. Almost 200 of his works are in the music archive, and five more are in the archive of the Seminary of S Antonio de Abad in Cuzco, Peru. He wrote sacred and secular vernacular works, of a consistent quality, including Latin psalms, hymns, part-songs and polychoral villancicos. The music of another 17th-century *maestro de capilla* at the cathedral, Pedro Villalobos, is also in the Cuzco archive. The musical activity of the mining city of Potosí during the 17th century is well documented in local archives. Theatrical representations with music were predominant, but no music survives.

During the 18th century Manuel Mesa y Carrizo distinguished himself as the *maestro de capilla* at La Plata from 1761 to 1773. His numerous works, dating from the 1760s and 1770s, and now in the cathedral archive and in private libraries, include masses, psalm settings, hymns, villancicos, *jácaras* and *juguetes*.

The Jesuits developed significant musical activities in the missions of Moxos and Chiquitos where the Indians were taught singing, instrumental performance and instrument making. Historical documents attest to the ability of the Indians in mastering the European musical idiom. The S Ignacio de Moxos church and the Episcopal Archive of Concepción, in particular, hold fairly substantial collections of secular and sacred works (including copies of works by Juan de Araugo and Domenico Zipoli). Even after the expulsion of the Jesuits, the missions maintained this tradition of neo-European music, concurrently with the inclusion of native indigenous dances in various religious processions.

In contrast to the activity of the colonial period, music in Bolivia developed little in the 19th century after independence (1825). La Paz, the effective capital (Sucre being the nominal one), began organizing its musical life in the mid-19th century. The first pianos were introduced in the 1840s; some operas were produced in 1845. But musical organizations with some degree of continuity were not established until the early 20th century, when the foundation of the Military School of Music (1904), the National Conservatory of Music (1908), the Circle of Fine Arts (1910) and many similar institutions contributed considerably to La Paz's musical life. The National Orchestra was established in 1940 under the direction of José María Velasco-Maidana, who was the foremost Bolivian nationalist composer of his time. His ballet *Amerindia* (1934–5), first performed in Berlin in 1938, and many of his symphonic poems (*Cuento brujo*, 1935, *Los Khuzillos*, 1936) are based on Aymara-Quechua mythological subjects. The nationalist movement is also represented by Antonio González Bravo (1885–1961), Eduardo Caba (*b* 1890), Teófilo Vargas Candia (1886–1961) and Humberto Viscarra Monje (1898–1971). Caba, a native of Potosí, studied in Buenos Aires with Felipe Boero and with Turina in Madrid, and became director of the La Paz Conservatory in 1942. Most of his works, such as the tone poem *Potosí*, the ballet *Kollana* and the 18 piano pieces *Aires Indios*, are in a marked Indian idiom with modal and pentatonic structures and rhythms characteristic of music of the Bolivian plateau. Viscarra Monje mainly wrote piano miniatures, among which a Rondino became very popular in Bolivia. Simeón Roncal, a native of Sucre, wrote a series of 20 *cuecas* (Bolivia's chief national dance) and other popular genre pieces in a Romantic virtuoso piano style. González Bravo, primarily a student of folk music, wrote numerous choral works for teaching purposes and orchestrated many Aymara folk tunes.

The younger generation of composers has further explored native music within neo-classical or neo-Romantic styles or else has experimented in advanced compositional idioms. Jaime Mendoza-Nava and Gustavo Navarre represent the former tendency, Hugo Patiño Thórrez, Atiliano Auza, Alberto Villalpando, Marvin Sandi, Florencio Pozadas Cordero and others the latter. Most of these composers studied abroad. Auza, Villalpando and Pozadas were fellows in the 1960s of the Di Tella Institute, Buenos Aires, under the direction of Ginastera, where they became aware of avant-garde techniques. Auza moved from a dissonant neo-classicism to serial and aleatory techniques in his works of the late 1960s. Villalpando chiefly used serialism, and wrote some successful scores for films. In general, however, opportunities for experimental composition in Bolivia have been slight. Younger composers active since the 1970s and 80s include Juan Antonio Maldonado, Willy Pozadas, Cergio Prudencio, Cesar Junaro, Oscar García and Augustín Fernández Sánchez.

## *II. Traditional music*

1. ANDEAN HIGHLANDS. The Andean highlands of Bolivia occupy more than a quarter of the country's entire area. By contrast with the more thinly populated lowlands of eastern Bolivia (*Oriente*) and the north-eastern Andean slope of the Yungas, the mountain plateaux and the high valleys are relatively densely inhabited. Members of Amerindian societies constitute more than half of the population. Most live in small rural settlements on the altiplano and in the valleys of the cordilleras at 2500 to 4500 metres above sea level, for which reason they are sometimes called 'highland Indians'. The Spanish term 'indio' (Indian), a denomination from outsiders, refers today primarily to the feeling of semantic, cultural and social solidarity among these groups. The indios speak at least one Indian language as their mother tongue and feel bound to traditional Andean cultural heritage. Following the land reform of 1953, the term indio was replaced by the now customary term 'campesino' (peasant or farmer). Most of this rural population lives from farming and stockbreeding.

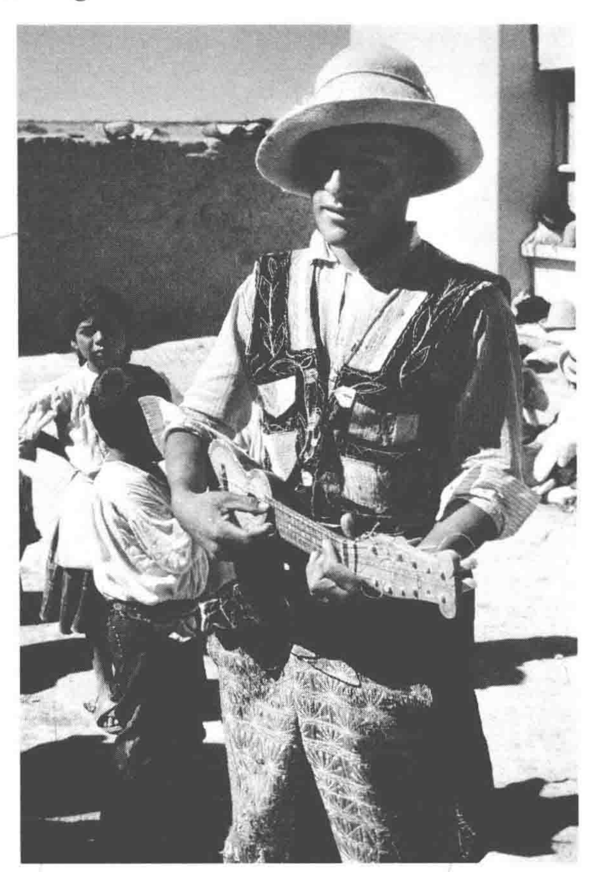
Numerically, the largest language groups of the Andean highlands are the Quechua- and Aymara-speaking farmers. Quechua is primarily spoken in the departments of Cochabamba, Oruro, Potosí and Chuquisaca, as well as in some provinces of the department of La Paz. It is a vernacular language which has evolved from the classical Quechua of the Inca Empire (1438–1537). The Aymara language survives in the vicinity of the pre-Inca ritual sites at Tiahuanaco near Lake Titicaca. Indios or indigenous peoples who speak one of these languages are designated here as Quechuas or Aymaras. The Aymaras (or Kollas) live primarily on the altiplano in La Paz and Puno (Peru) as well as in relatively large areas of Oruro and Potosí. Many musical terms and concepts from the Aymara seem to have been transmitted to the Quechuas. In addition to the Aymaras and Quechuas, a smaller group of indios still survives in linguistic and cultural isolation near Lake Coipasa; their language, Chipaya, is spoken by fewer than a thousand people. It is assumed that these people, known as Chipayas, together with the Urus of Lake Titicaca were among the first settlers of the central Andes. Some 2000 of the Callawayas or Kallawayas, the Quechua-speaking provinces of Bautista Saavedra, Muñecas and parts of the provinces of Tamayo and La Paz use their own esoteric language, Machchaj-Juyai, (literally, 'language of the compatriot or companion'); otherwise they generally speak Quechua. The Callawayas differ culturally from the Quechuas and Aymaras, although many reciprocal influences can be observed, especially in the realms of music and musical instruments.

*(i) Musical ensembles.* The traditional music of the indios of the Bolivian central Andes uses a large variety of wind instruments, a smaller number of different kinds of drums and a few idiophones. Wind instruments hold the most important position within the Andean tradition of the campesinos, followed by drums (*wankaras* or *bombos*, *tambores*) which are used primarily as accompaniment. Unlike the urban folklore ensembles (*conjuntos*), in which acculturated string instruments are mixed with some or all of the three basic types of flutes, the rural ensembles of the indios (*tropas*) generally consist of a set of one type of melody instrument. The musical groups of the campesinos can usually be divided into three main types of flute ensemble, according to native categorization: panpipe ensembles (*sikus*), notched flute ensembles (*kenas*) and duct flute ensembles (*pinkillos*). Some include drum accompaniment.

Except for the one-string musical bow (*arco selvatico*, *arco musical* or *arco de boca*), no string instruments were known in pre-conquest South America. Various guitar types, such as *vihuelas*, lutes and *bandurrias*, spread throughout the affluent mining centres of Bolivia with Spanish colonization. Through the mediation of the mestizos, the *guitarrillo*, *jitarrón* and *charango* were also introduced to the campesinos of the altiplano and were adapted and transformed there.

Traditional instruments and ensembles often have particular regional and individual names, related to the areas in which they are played. This applies especially to terms used to classify the sizes or tonal registers of one generic type of instrument in a particular ensemble. In a duct flute ensemble from the Arque province, for example, the various *pinkillos* or *charkas* are divided into four categories according to their tonal register (similar to the choral divisions of soprano, alto, tenor and bass). Each instrument is assigned an individual name according to the register group to which it belongs: the deepest and longest flute is called *charka machu*, the instrument belonging to the next higher register (about a 5th higher) is called *charka mala*; next is the *charka tara*, pitched an octave higher than the *charka machu*. The instrument belonging to the highest register is called *charka ch'ili*, it is also the smallest instrument, sounding a 5th higher than the *charka tara*. *Machu*, *mala* (also *malta*), *tara* and *ch'ili* also symbolize the social hierarchy: *machu* means 'honourable' and, as a rule, is associated with the oldest and most experienced musicians; *mala* or *malta* means 'intermediate one', while *ch'ili* ('smallest') is usually played by the youngest and least experienced musician.

*(ii) Musical characteristics.* In the Bolivian highlands, music, dance, song and ritual are closely intertwined. Dance is present in almost all group music-making. The Quechua term *taki* (song) encompasses not only the idea of sung language but also rhythmic melody and dance. The three key terms *takiy* (to sing), *tukay* (to play) and *tusuy* (to dance), each emphasize only one aspect of an integrated musical whole. These three complementary elements signify the inherent unity of structured sound, movement and symbolic expression.



Most instrumental and vocal melodies possess a pronounced anhemitonic pentatonic structure. Although certain flute types have a diatonic tuning and could theoretically be played diatonically, the scales actually played by the campesinos are predominantly pentatonic. These scales are more traditional and are played most often. Semitones do occur, in particular in melodies of wide range. Such melodies seem to be the result of a transposition by a 4th to a lower register or a 5th to a higher one; this occurs, for example, in some *sikura* panpipe ensembles. Such hexatonic and heptatonic scales can be explained as the combination of two anhemitonic pentatonic scales whose tonal centres are arranged in layers of a sequence of intervals built up first on the final and then on the upper fifth. Influenced by Western-type compositions such as national and regional anthems, and the urban folklore groups, traditional ensembles now more often adopt melodies in major and minor keys.

Generally speaking, the melodies produced by the various traditional panpipe types are performed in a playing technique of interlocking pairs (*tinku* or *contra-*

*punto*). Each pair consists of a complementary set of female and male instruments (*arka* and *ira*, fig.1). The melody is simultaneously performed by several panpipe pairs in two to five parallel octaves. Parallel octaves also occur in some duct flute and some *kena* ensembles. In ensembles of double-row panpipes, as well as in some duct flute and notched flute ensembles, parallel octaves will often be embellished with parallel 5ths and/or 4ths or, somewhat less often, with parallel intervals approximating a tritone.

In formal terms, the traditional indio melodies are marked by phrases that are relatively short and few in number; these phrases are repeated individually within a melody which itself undergoes several repetitions. Instrumental pieces often begin with a drum introduction (*qallaykuy*); after the much repeated main section (*tukana*, *kantu* or *wirsu*) there is a shorter coda (*tukuchana*). Rhythmically, a binary character predominates, related to the countless forms of the *wayñu* dance (Sp. *huayño*).

The singing (*takiy*) of men and women is mostly accompanied by one or more *charango* players and is combined with particularly lively and rhythmic dances with their own stamping sequences (*tusuna* or *zapateo*). The most important traditional song genres include *wayñu*, *tunada* (*tonada*, *copla*), *yaraví*, *bailesitu* (*bailecito*) and *kwika* (*cueca*). These are now mainly performed in connection with the Christian festivals, such as Carnival, Easter, Holy Cross Day (3 May), All Saints' Day (1 November), and Christmas. Solo singers perform *lari-wayñu* and *burruqhatiy* songs, accompanying themselves on the *charango* while journeying through the countryside (fig.2); there is also ensemble singing (*taki*, *tusuna*) and antiphonal singing between two contesting singers or groups of singers (*takipayanaku*). The individual melodies (*tunadas*, *wirsus*) and types of instrumental ensembles (*tropas*) are tied to specific festivals: examples include the carnival music of the *puka uma* or *pujllay* ensembles (*tonada del carnaval*), the *tonada de la Cruz* and the *cosecha wirsu* (harvest melody).

*2. Charango played by Quechua musician R. Albarracín from Rakaypampa, cantón Molineri, Mizque province, department of Cochabamba, 1977*

*1. Jula-jula panpipe players (arca with 3 pipes, ira with 4): Quechuas from Sikipampa, cantón Ventilla, Arque province, department of Cochabamba, 1977*

Song, dance and music are associated with festive occasions such as the sowing and harvesting seasons, family celebrations, communal celebrations in honour of patron saints and other occasions particular to each group. The festivities and music-making reach their zenith when celebrating the various rites of offering, involving drinks, incense or animals, as well as during animal branding ceremonies. Music, song and dance are always an inseparable part of diverse fertility rites.

The basic figure of the dance ensemble is the circle formation, in which participants dance in single file, the oldest first, the youngest last. In traditional dance ensembles instruments are played by men while women take a leading role in dance and song, often waving coloured flags to the music. The dances always begin in an anticlockwise direction and after a certain time change symmetrically to clockwise; the musicians then make a half-turn on their own axis and continue dancing in the same formation, one behind another. This fundamental pattern can be observed in many dances such as the *charangeada*, the *sikuriada*, the 'wild dance' (*chúkarubaile*) of the *jula-julas* panpipe ensemble and the *ushnizatni* of the Chipayas' duct flute (*ch'utu*) ensemble. The circle dance is also combined with dancing in single file,

with serpentine movements in the *jula-jula* dances or with dancing in double rows, as in *lichiwayu* (*kena*) dances. The leader of the music group, the *tata mayor*, sometimes plays a *pututu* (signal horn) and holds a whip in his hand to signify his authority.

*(iii) Ritual calendar, music and dance.* Traditional musical behaviour is always embedded in a particular context within the ritual and religious annual cycle. Music-making and singing are determined by the two halves of the agricultural cycle: the rainy season and the dry season. The seasons generally determine the kinds of musical instruments to be used and the melodies and dances to be performed.

The various festivals also need to be considered in connection with historical layers and traditional re-interpretations that have been superimposed. Often, for example, the old astronomical (or Inca) calendar, the Christian (or Gregorian) calendar and the annual agricultural cycle simultaneously influence such celebrations. Numerous festivals celebrated the earth deities. In these, offerings of smoke, drink and animal sacrifices are made, related to the tilling of the ground, the sowing of seeds, the growth of crops and prayer for a good harvest. Each has its own set melodies and musical instruments. Music and dance may also be expressions of joy as well as offerings to honour Father and Mother Earth (Pachatata and Pachamama).

The contemporary cosmological-religious world view of the altiplano indios seems to be partially syncretic. Traditional central Andean beliefs partly survive; some have mixed with Christian conceptions of faith and worship. The Virgin Mary is associated with the concept of Pachamama (*pacha* = earth, *mama* = mother) to the extent that Pachamama is generally interpreted as the Virgin Mary, manifesting herself on a local level in the form of individual virgins, such as the Virgen de Candelaria, Virgen de Copacabana, Virgen del Carmen and Mamita Asunta (Virgen de Asunción). More broadly speaking, the female concept of Pachamama is the timeless and female aspect of the Mother Earth. Throughout the centuries, incoming religious figures such as the Virgin Mary have been considered reincarnations of an element of this fundamental principle.

During the rainy season, in the department of Oruro, *charka* flutes are sounded in honour of Pachamama to give thanks for the first good harvest of the season. *Charkas* of various sizes are played by men to accompany dances, together with a cow horn or *pututu*, while unmarried girls sing '*Takisun pachamamaman mañarisun*' ('Let us sing and call to the Pachamama') in a high falsetto voice.

Other duct flutes such as *pinkillos*, *mohoceños* or *aymaras* (fig.3), *ch'utus*, *tokurus* and *tarkas* or *anatas* are traditional to the rainy season, from All Saints' Day until the carnival season in February or March. These instruments belong to the 'female' cycle of the year. The distinction between 'female' and 'male' times of year can be related to the old Inca calendar. Wooden duct flutes symbolize the female principle of irrigation and fertility; they celebrate the sprouting seeds and the harvest. Their connection with water is emphasized by the fact that they are sometimes filled with water so that they can become saturated and airtight. Because of the superimposition of Christian religious concepts on the festivals, duct flutes are also closely related to the numerous festivals of the Virgin Mary in the rainy season, such as the feast of the

*3. Mohoceño ensemble of duct flutes (mohoceño is held horizontally, pinkillo is held vertically): Quechuas from Chamacoma, Calchani, Ayopaya province, department of Cochabamba, 1977*

*4. Mojos performing a machatero dance in Trinidad, department of Beni, 1981*

Immaculate Conception (Fiesta de la Concepción; 8 December) or Candlemas (2 February). The instruments are also played to celebrate Christmas and the New Year.

By contrast with these instruments there are others (panpipes and notched flutes) made of hard bamboo and played predominantly during the dry season. These are closely tied to the 'male' festivals during this part of the year, such as Holy Cross Day (3 May) and Corpus Christi (end of May or beginning of June). They are also played during the numerous festivals honouring male saints. Such festivals are linked to the concept of Pachatata, Tatapacha or Apu. During this dry season the instruments used are predominantly notched flutes made of bamboo (*kenas*, *chokelas*, *kena-kenas*, *lichiwayus*, *pusi-ppias*) and different kinds of panpipes (*sikus*, *sikuras*, *antaras*, *jula-julas*, *laqitas*). These instruments are associated with the male principle, represented also by the sun, the dry season and the wind.

2. Lowland Amerindians. More than 30 large and small ethnic groups live in the tropical lowlands, particularly in the departments of Beni, Santa Cruz, Pando, La Paz, Cochabamba and Tarija. Indios of the savanna and forests, about 150,000 in number, belong linguistically to the Arawak, Tacana, Guaraní and Pano language groups. The languages of the Chiquitos, Chimanes, Movimas, Yaracarés, Itonamas, Canichanas and others also fall into these groups.

Melodies based on characteristic rhythmic patterns make up the most popular songs and instrumental pieces. Typically for music of the eastern lowlands these are extensively marked by the rhythms of the dance or dance-song genres *taquirari*, *chobena*, *machichi*, *cumbia* and *polca*. They are played by various ensembles as monophonic, biphonic or polyphonic melodies, from Rio Mamoré to deep in the vicinity of Santa Cruz de la Sierra. In their simplest form, these ensembles consist of a vertical or transverse flute (*pífano* or *sibibire*) and a large and a small drum. One or two calabash rattles (*sonajes* or *caracachá*) accompany the lively and strophically structured melodies. Two cymbals (*platillos*) may be added for extra rhythmical support. In the cities, groups of one to three guitars or mandolins with a *matraca* (rattle) as rhythmical accompaniment are preferred. String instruments have become popular and accompany one or more singers. Other instruments, such as home-made violins, *bombo* and *tambor* drums, accompany strophic songs for entertainment at church festivities.

There have been few ethnomusicological studies of the indios of eastern Bolivia. This also applies to those of the Chapare region in the department of Cochabamba, to the Yungas north of La Paz and indios in the Chaco area of the department of Tarija. The best documented indio groups, in musical terms, are the Mojos, Sirionós, Morés and Chimanes in Beni.

For almost 100 years, from 1675, the Mojos underwent the missionary influence of Jesuits in 21 missionary stations, receiving instruction in religious singing and church music. Indio dances were partly adapted by the priests, blended with Spanish dances and used in processions on patron saints' days. The *machatero* dances are famous examples (fig.4). Mojos, decorated with colourful head feathers and foot rattles (*cascabales*), perform a variety of dance steps, holding machetes fashioned from wood. In Trinidad (Bolivia) the dancers are accompanied by a six-hole bone flute (*yópeque*) and four drums, which

might include a *caja* (large drum), one each of the smaller *cajita mayor* and *cajita menor* and a *zancuti*. In San Ignacio the melody is played on a transverse flute (*sibibire*). The ensemble can be expanded to include two panpipes (*jerure*). Almost all dances have been influenced by the Jesuits' missionary activities. Like the *machateros*, many traditional dances were functionally changed to become Christian and then allowed to be used in the church festivals and processions. These include the theatrical dances performed between Christmas and New Year including *angelitos*, *barco* ('boot'), *marcha de los reyes* and dances for the saints' days such as *toritos*, *achus* ('the old ones'), *mascaritas* (masked dancers) and *sol y luna*. A form of church music called *coro de la capilla* survives in San Ignacio, performed on feast days by singers and an ensemble of four violins, two transverse flutes, clarinet and large and small drum, with four *bajones* (trumpets) made of palm leaves, up to two metres long and arranged like panpipes. They are played in pairs using hocket technique and imitate the deep bass notes of a church organ.

The Morés, in the region along the border between Bolivia and Brazil, play various idiophones, bamboo trumpets, transverse flutes and panpipes (Snethlage, 1939). Among these is a two-string mouthbow (*mapuíp*), a relatively rare example of an autochthonous South American string instrument. Drums were a later introduction among the Morés. Although they are almost completely acculturated, the Morés formerly had numerous war dances as well as dances and songs honouring nature and the animal world.

Musical instruments were formerly unknown among the Sirionós in the high forests of eastern central Bolivia. The morning song (*hibera*) occupies an important position in their musical life. This is an individually inspired and improvised song sung by a single hunter before dawn; through it he magically enters the proper mood for the hunt. The hunter sings of the specific marsupial that he wants to hunt down, calling for luck in his endeavour. Singing the morning song is at the same time a rite of repentance for the necessity of hunting. The *tyuruki* songs accompanying group dances, performed in the evening, are differentiated from the morning songs in their performance style as well as content; they alternate between solo voice and chorus.

Songs are also performed by the Chimanes in the province of Ballivián (Beni), mostly before sleeping and immediately after daybreak. These songs are built on basic models of two or three pitches or on pentatonic sequences; they are characterized by mythological conceptions of the world of hunters and fishermen, and take as their topics both social relations and entertaining or ironic incidents. Shaman songs, on the other hand, refer to the act of creation.

Little is known about the shamanic songs of the Ayoreós, which are microtonally structured and are performed with the *caracachá* or *paracará* calabash rattle. Their healing power is used to calm natural forces and cast a spell on their evil elements.

There have been hardly any ethnomusicological investigations of the numerous mythical, social and work-related songs and dances of the Chiquitanos, Chiriguanos, Guarayús, Itonamas, Izozeños, Matacos, Movimas or Tacanas. Most of these groups have been influenced by missionaries of the Catholic Church and Protestant denominations to the extent that their Amerindian music has been almost completely suppressed. Secretly, and only in small circles, some traditional conceptions and musical practices still exist, but these have to fight, like most Bolivian lowland indio groups, for survival.

3. Mestizos, folklore groups and 'canto nuevo'. In addition to the music of the indios and the sacred and secular music of Spanish descendants (the *criollos*, about 13% of the population) a unique branch has developed: the music of the mestizos (*cholos*). Mestizos comprise approximately 32% of the population. Their music, which has become urban, is marked by acculturated Spanish social dances (*cueca*, *bailecito*, *carnavalito*, *vals*, *marcha*, *pasodoble*, *polca*, *pasacalle*), as well as Indian forms that have been adapted in the urban areas (*huayño*, *kacharpaya*, *kaluyos taquirari* etc.). The mestizos are brought up bilingually and speak Spanish as well as at least one Amerindian language. Popular among them are *coplas* (song-forms) in the Quechua language, songs for swinging (*columpios* or *wallunkas*), *takipayanaku* antiphonal songs, *villancicos* and *canciones* that they themselves create. Many songs are performed for dancing and entertainment at social events. Numerous music cassettes and singles have been released with Quechua songs sung in a rural style by mestizo women. Famous female singers have established their own entertainment market. Their performances are often accompanied by an *orquesta* that usually contains one or two accordians and a set of percussion (*batería*).

Since the 1950s urban mestizo folklore has also developed in the cities of La Paz, Cochabamba, Santa Cruz, Oruro, Sucre and Tarija, bringing thousands of people together at the large Fiestas del Gran Poder in La Paz, at the Carnaval de Oruro, at the Fiesta de Virgen de Urkupiña in Cochabamba at the Fiesta de San Roque in Tarija, and many others. Brass bands (*bandas*) have pushed traditional ensembles into the background. Choreographed dances are performed to trumpets, trombones, sousaphones, drums of various sizes and cymbals. Brotherhoods of musicians and dancers vow to perform a dance for a saint or the Virgin Mary as a feast day offering at a parade or a church procession. Among the best known of these show dances are the *diablada*, *caporales*, *morenos*, *reyes morenos*, *morenada*, *kullawada*, *llamerada*, *toritos*, *waka tokoris*, *doctorcitos*, *chuntunquis* and *tobas*.

The *peñas folklóricas* began to exert an influence on traditional music among the upper social classes in the early 1960s. These are urban folklore restaurants and performance locations catering for both Bolivians and tourists, in which 'typical' Andean ensembles can be heard. Such *cunjuntos folklóricos* link individuality and virtuosity with traditional genres and Indian musical instruments in an innovatory way. New melodies are created for a standard *cunjunto* instrumentation of guitar, *charango*, *bombo*, *kena* flute and *zampoña* panpipes with texts in Spanish or a mixture of languages. This folklore music establishes a connection between an aesthetic of concert presentation and Amerindian, Spanish and mestizo performance genres. Even Afro-Bolivian dances such as *saya* and *tunduqui* are integrated into this entertainment genre (*música folklórica*), which is considered typically Bolivian. The music is extensively supported by the harmonic progression I–IV–V–I. *Música folklórica* has consciously established itself as a form of commercialized folklore distinct from international pop and rock music,

which, as every other form of pan-American entertainment music, has also found a wide audience through discotheques and the mass media in Bolivia.

As a result of contact with internationally famous singers such as Atahualpa Yupanqui, Mercedes Sosa (Argentina), Violeta Parra, Victor Jara (Chile) and Nicómedes Santa Cruz (Peru), a politically orientated movement called *nueva canción* or *canto nuevo* was formed at the beginning of the 1970s. This was associated with a more progressively minded younger generation which strove to move away from the 'romantic clichés' of the songs concerning the landscape or love. The songs, more direct in manner, using everyday language and showing commitment to social reform, were performed by musicians eager to confront contemporary life in their music. Traditional structures were still followed, but without excluding such international idioms as jazz, the avant garde, Latin American protest song or elements of rock and pop music. A cultural-political movement emerged which celebrated its first large assembly of singer-composers and poets of the new Bolivian song in 1983 at Santa Cruz de la Sierra.

GERARD BÉHAGUE (I), MAX PETER BAUMANN (II)

**Bollioud-Mermet, Louis** (*b* Lyons, 13 Feb 1709; *d* Lyons, 31 Aug 1794). French academician and musician. He was elected to membership in the Académie des Beaux-Arts of Lyons in 1736, and in the Académie des Sciences et des Belles-Lettres in 1739; when these bodies combined in 1758 he was appointed *secrétaire perpétuel*. Between 1736 and 1757 he read before both bodies a number of essays on music, five of which remain in manuscript. His single published work on music, *De la corruption du goust dans la musique françoise*, added to the controversy between the supporters of Lully and those of Rameau. A conservative, he took issue with the musical novelties of the time, rejecting virtuosity in favour of a simple, natural and rational art based on models of an earlier period, particularly the works of Lully and Lalande. While in his works he praised the theories of Rameau, he questioned the practical application of those theories. He proposed two inventions intended for use by performers: the *phtongomètre*, an aid to tuning keyboard instruments, and the *chronomètre harmonique*, a means of regulating musical beats. According to La Borde and contemporary accounts he was a talented organist and singer, and by his own testimony (in the *Athénée de Lyon retabli*) he composed works for keyboard and chamber ensembles, a cantata and at least 40 motets. None of his compositions survives, although two sacred works by him were apparently published in Lyons.

ALBERT COHEN

**Bollius** [Pollius], **Daniel** (*b* Hechingen, Württemberg, *c*1590; *d* Mainz, *c*1638). German composer, organist and teacher. His father, Marcus Bollius, was vice-Kapellmeister of the Hohenzollern court at Hechingen. After attending the University of Dillingen he studied with

Jakob Hassler and Christian Erbach and was then court organist at Sigmaringen – which was also under the Hohenzollerns – from 1613 to *c*1619. By 1626 he had moved to Mainz as organist to the elector, Archbishop Johann Schweikard von Kronberg, a keen supporter of learning and the arts, and he remained there until his death. From no later than 1631 he was Kapellmeister as well as organist. He was renowned in his time as composer, performer and teacher; he had several distinguished organ pupils.

Bollius is primarily important as the composer of one of the earliest examples in Germany of the Italian oratorio form. The *Repraesentatio*, based on St Luke's account of the early life of John the Baptist, dates from between 1615 and 1625 and is thus contemporary with, or earlier than, Schütz's *Resurrection History*. Planned along the lines of the conventional settings of the Passion story, it is distinguished by interludes for a variety of specified instruments, by the expressive, declamatory nature of most of the solo writing, by the characterization of each participant in the narrative and by the homophonic treatment of the turbae and eight-voice epilogue. Bollius's other works, which were also of historical interest for their oratorical or concertato styles, included psalms and hymns and sacred dialogues and concertos; some manuscript copies, once thought to have been destroyed in World War II, survive (in *PL-WRu*). Except in the case of one motet, no printed copies are known to exist. Some vocal exercises, printed in Herbst's *Musica practica*, demonstrate Bollius's interest in the Italian ornamental style of singing; other evidence of this occurs in three of the arias in the *Repraesentatio*.

WORKS

Salve lux mundi, motet, 3vv, bc, in 1623[2]

Repraesentatio harmonica conceptionis et nativitatis S Joannis Baptistae, 4/4vv, insts, bc, *PL-WRu*

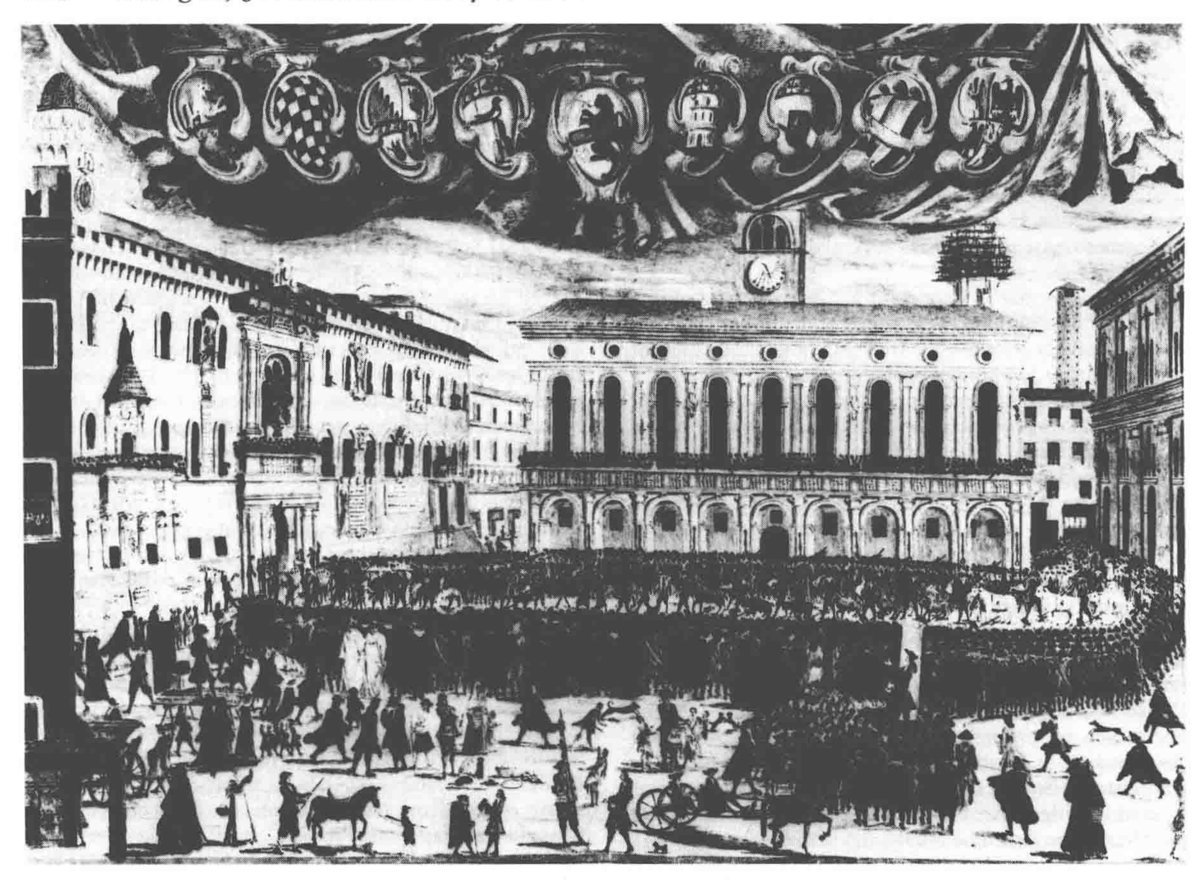
A. LINDSEY KIRWAN/GREGORY S. JOHNSTON



**Bologna.** City in Italy. As one of the chief musical centres of the peninsula, Bologna has maintained a practically uninterrupted outstanding tradition in the cultivation of many aspects of the musical arts. Its central geographic position allowed easy contact with other musical centres in Italy, which resulted in the distinctive cosmopolitan tinge that has characterized the activities of its musical institutions. As the trading and economic hub of Italy, the city remained for centuries a thriving commercial centre whose wealthy classes could patronize the arts. Second in importance only to Rome within the administration of the Papal States, it maintained numerous churches (over 150 in 1700) and religious communities which always played an important role in the city's musical life. As a centre of learning, Bologna has always had an eminence unequalled in Italy and recognized throughout Europe. Its university, founded at the end of the 11th century, maintained for centuries a prominent tradition in the humanistic disciplines, attracting numerous students and scholars from various regions of the continent.

In this environment the study and advancement of music was characterized by a propensity to retain existing traditions while simultaneously promoting experimentation and discussion, thus making it a city of critics and connoisseurs. This tendency was confirmed by the institution of a chair of music at the university in 1450 by Pope Nicholas V. Since then the teaching of music at Bologna has been associated with many illustrious figures.

Ramos de Pareia probably expected an appointment as teacher in the new chair at the university during his decade in Bologna (1472–82). He was giving public lectures before publishing his *Musica practica* (printed in Bologna by Rubiera, 1482), a treatise that aroused a storm of academic controversies. In the 16th century, Spataro (a pupil of Ramos), Bartolomeo Spontone, Melone and Bottrigari were active there as theorists and teachers. At the turn of the century, the staunch conservative G.M. Artusi was at the centre of another controversy as the fanatical opponent of Monteverdi's *seconda prattica*. At the same time Adriano Banchieri took an active part as theorist and teacher in promoting experimentation and defining the newest techniques of musical expression. Intellectual discussion was also fostered by the academies established in the first half of the 17th century. By the mid-century there was a flourishing school of string playing centred on S Petronio and in the 18th the city acquired a wide reputation as a training ground for opera singers who for many years dominated the major Italian and European theatres. The most important treatise on singing of the 18th century, P.F. Tosi's *Opinioni de' cantori antichi e moderni*, was published at Bologna in 1723. Academic conservatism was, however, evident in the didactic activities of the Accademia Filarmonica and of Padre Martini, both responsible for rigidly maintaining the practice of the earlier polyphonic style.

1. GENERAL HISTORY TO 1500. The earliest evidence of musical life at Bologna is furnished by a manuscript (*I-Ra* 123) which includes a gradual-troper in diastematic notation that originated in the area about 1029–39. Moreover, from the first decades of the 11th century a *presbiter-cantor* seems to have played a vital role in the administrative structure of the Cathedral of S Pietro. In the 13th century various *scholae puerorum* were instituted by the Franciscan and Dominican orders. (Bologna was, with Paris, the leading Dominican centre in the 13th

1. *Festival of St Petronius in the Piazza Maggiore, Bologna, 4 October 1701: miniature from 'Le insignia degli Anziani del comune', xi (I-Bas)*

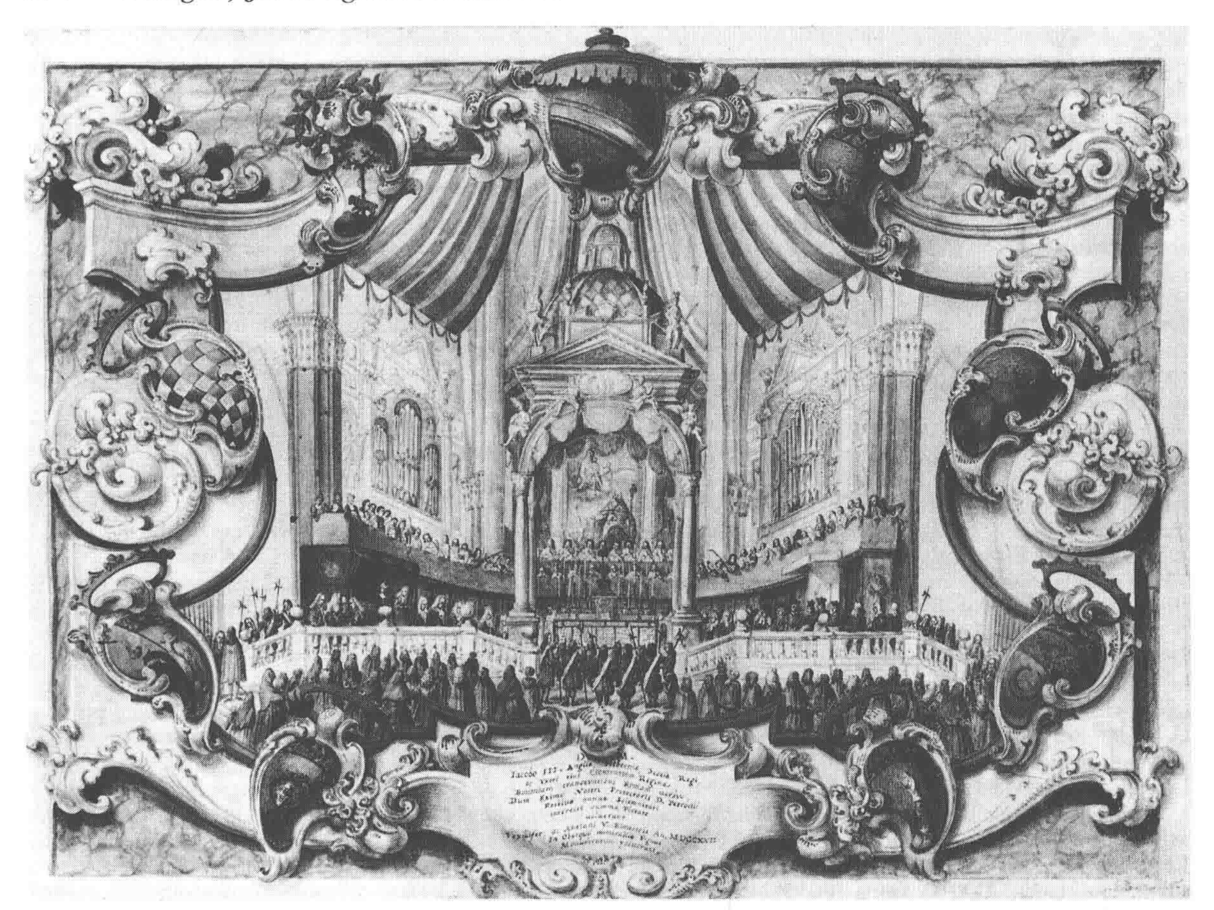
century.) The theorist Guido Faba, active at Bologna from about 1225 to 1240 as professor of rhetoric at the university, furnished useful information on the teaching of plainchant in the city in his treatise *Ars musica* (*D-Bsb* Theol.lat.Qu.261, f.36*r*, and *I-PESo* 1336, f.14*r*). The Bolognese musicians Jacopo and Bartolomeo da Bologna and Johannes Baçus Corregarius made notable contributions to the Ars Nova. By the beginning of the 15th century music at Bologna assumed an international character, as is shown by the Italian–French repertory of a manuscript (*I-MOe* Lat.568) that originated and was probably compiled there in 1410. Du Fay was living in Bologna from late February or March 1426 until August 1428, studying canon law at the university. His motets *Juvenis qui puellam* and *Rite majorem Jacobum* and the *Missa Sancti Jacobi*, written for the church of S Giacomo Maggiore, date from that period. Popular traditions of street vocal performances on Christmas night and during May were also maintained until the end of the 16th century. These street songs were later incorporated in the polyphonic villottas that were widely cultivated in Bologna during the 16th century. The three books of the *Villotte del fiore*, printed in Venice by Gardane in 1557, 1559 and 1569, contain mostly works by the Bolognese Filippo Azzaiolo, though other composers active at Bologna are represented as well: Gherardo da Panico, Francesco Caldarino, Bartolomeo Pifaro, Paolo Casanuova, Ghinolfo Dattari, Bartolomeo Spontone, G.T. Lambertini and Alfonso Ganassi.

A love of massed wind instruments in Bologna can be traced back to the 13th century, when town-criers, called 'trombetti della signoria', accompanied their notices 'a son de trombe e de trombette'. By the beginning of the 15th century the number of players was increased to include eight trumpeters, three fifers and a drummer (also called *naccarino*) to form the nucleus of the Concerto Palatino della Signoria. This was a public body which not only performed for official university, civic and religious functions, but also appeared until the second half of the 18th century in evening concerts held on the terrace of the Palazzo della Signoria in Piazza Maggiore. On special occasions the size of the ensemble was greatly enlarged. At the marriage of Lucrezia d'Este to Annibale Bentivoglio (March 1487), the procession leading to S Petronio was preceded by '100 trombita e 70 pifari e trombuni e chorni e flauti e tamburrini e zamamele'. In the 16th century the Concerto Palatino became as famous throughout Italy as the concerted music at S Petronio. From 1537 onwards the number was standardized at 19 instrumentalists, though this number was occasionally augmented by other performers. Many of its musicians were also employed at S Petronio and their profession became a family tradition (e.g. in the 16th century various members of the Ganassi family, Zaccaria, Giovanni, Vincenzo and Alfonso, served in the ensemble).

2. Religious institutions. The city's musical life centred mainly on the numerous musical chapels found in most of the principal churches and monasteries. The most

important of these was S Petronio. Begun in 1390 and planned to be one of the largest churches in Italy, it became, particularly in the 17th century, an influential centre of vocal and instrumental music, famous throughout northern and central Italy. Its magnificent acoustics favoured the employment of massive groups of performers which eventually contributed to the development of the Baroque concerto style. Moreover, the excellent musicians attached to its *cappella musicale* in the 17th century played a decisive role in the evolution of the Baroque solo sonata, making the formal structure of the sonata (especially in the order and number of movements and the distinctive character of each) increasingly precise. In the second half of the 17th century S Petronio was also associated with the music for trumpet and strings that contributed to the development of the concerto. The emphasis from the early 17th century on a basso continuo instrumental group and on a predominant top line caused a thinning of the harmonic fabric and a polarity between the melody and the bass – a characteristic Baroque texture.

The church has two organs facing each other, placed above the choir stalls, one built in 1470–75 (*in cornu Epistolae*) by Lorenzo di Giacomo da Prato and the other in 1596 (*in cornu Evangelii*) by Baldassare Malamini. The series of organists who held posts at S Petronio begins in 1450 with Don Battista di Nicolò, who remained there until 1475. Later organists (both first and second) include Gregorio di Maestro Zoane Tintore (1468–78), Ogerio di Borgogna (Roger Saignand, 1474–1522), Maestro Guglielmo (also called 'navarrese', 1522–9), Pier Francese (1529–62), Vincenzo Bertalotti (1562–96), Giambattista Mecchi (1596–1613), Ottavio Vernizzi (1596–1649), Lucio Barbieri (1614–59), Giulio Cesare Arresti (1649–61 and 1671–99), G.P. Colonna (1659–74) and C.D. Cossoni (1662–71).



The organization of the *cappella musicale* was officially instituted on 4 October 1436 by Pope Eugene IV. Its temporal affairs fell under the jurisdiction of the *fabbriceria* (vestry board) composed of six laymen, also members of the Bolognese senate, who selected the candidates aspiring for positions; this lay control demonstrates the interest of the citizens in the city's musical affairs.

Giovanni Spataro was the first official *maestro di cappella* (1512–41). A post of *magister cantus et gramaticae*, however, was instituted in October 1466 and held successively by Simone di Pavia (1466–7), Robertus de Anglia (1467–74), Matteo Muzzi da Ferrara (1474–9), Giovanni da Manzolino (as substitute in 1479 and 1486) Giovanni Antonio Pecora da Milano (1479–85), Francesco de' Freschi (as substitute, 1486) and Gabriele Lunerio da Milano (1487–1512). Furthermore, the following *cantores* were active in the basilica from about 1460 to 1480: Pietro de Alemania, Bernardo di Reggio, Guglielmo di Francia, Mariotto di Firenze and Tommaso de' Marinasi. After Spataro, *maestri di cappella* included Michele Cimatore (1541–7), Domenico Maria Ferrabosco (1548–51), Nicolò Cavallari (1551–8), Giovanni Francesco Melioli (1558–70), Stefano Bettini ('Il Fornarino', 1570–77), Bartolomeo Spontone (1577–83), Andrea Rota (1583–97), Ghinolfo Dattari (as substitute in 1597–9), Pompilio Pisanelli (1599–1604), Girolamo Giacobbi (1604–28), Francesco Milani (1630–49), Alberto Bertelli (1650–57), Maurizio Cazzati (1657–71), Orazio Ceschi (as substitute in 1671–4), G.P. Colonna (1674–95), G.A. Perti (1696–1756), G.M. Carretti (1756–74), G.C.A. Zanotti (1774–1817), Stanislao Mattei (1817–25), Giuseppe Pilotti (1825–38), Luigi Palmerini (1838–42), Stefano Antonio Sarti (1842–55), Francesco Roncagli (1855–7), Gaetano Gaspari (1857–81), Luigi Mancinelli (1881–6), Raffaele Santoli (1886) and Giuseppe Martucci (1886–1902).

Instruments were added to the vocal ensemble early in the history of the *cappella musicale* and players from the Concerto Palatino often performed at S Petronio for special occasions (fragments of instrumental music dating from the 15th century and probably used on those occasions survive in the archives; see Hamm). However, the first regularly paid instrumentalists, besides organists, were added in the late 16th century. On special occasions (notably the feast of St Petronius on 4 October, anniversaries of Bolognese popes and Rogation Day) it was customary to hire extra musicians from the city's other *cappelle musicali* and from surrounding areas. For the visit of James the Pretender on the feast of St Petronius in 1722, 107 musicians were hired in addition to the 34 regular members (fig.2).

A landmark in Bolognese musical life was the employment of Maurizio Cazzati at S Petronio in 1657. Under his direction, the *cappella musicale* placed special emphasis on developing instrumental music, notably by hiring distinguished performers from nearby areas. By 1661 the regular *cappella* employed 33 musicians, a size it maintained throughout Cazzati's tenure (he was dismissed as the result of controversy over his compositions in 1671). He is especially noted for the repertory of music for trumpet and strings peculiar to the S Petronio *cappella musicale* which led to the concerto-like opposition of two styles (soloist contrasted with string ensemble), used to a greater extent by later S Petronio composers such as Perti and Torelli. Thanks to Cazzati and even more to his most famous pupil Giovanni Battista Vitali, who was active at the church as a singer and violoncino player, instrumental forms in general and the trio sonata in particular were developed, clarified and consolidated in architectural structure and thematic technique. A school of string playing flourished under Ercole Gaibara, Giovanni Benvenuti and Leonardo Brugnoli, and later under Pietro Degli Antonii, Bartolomeo Laurenti, D. Gabrielli and G.M. Jacchini. Torelli, a violetta player at S Petronio, contributed greatly to the form of the concerto grosso and violin concerto. Colonna (a pupil of Benevoli and Abbatini) succeeded Cazzati as director of the *cappella*, and elements originating in the Roman school were instilled in the Bolognese tradition. Colonna's followers included Giovanni Bononcini, G.F. Tosi, F.A. Urio, G.M. Clari, G.C. Predieri and G.A. Silvani. From February 1696 to February 1701 the regular orchestra was dissolved and only the choir and the choirmaster, G.A. Perti, were maintained on the payroll. This forced many instrumentalists to leave, thus helping to make their style known outside Bologna, in Italy and abroad. After 1701 only string players and a choir were in the regular *cappella*, although this group was augmented for special occasions. The pupils of G.A. Perti, *maestro di cappella* from 1696 to 1756, included Torelli, Jacchini, P.P. Laurenti, G. Consoni, Aldrovandini, G.M. Alberti, F.A. Pistocchi, F. Manfredini and Padre Martini.

Although S Petronio dominated Bolognese sacred music, many other local churches had active *cappelle musicali* associated with them. From the end of the 13th

*2. Basilica of S Petronio, Bologna, on the occasion of the visit of James III (the 'Pretender') and his wife Clementina Sobieski, 4 October 1722: miniature by Leonardo Sconzani from 'Le insignia degli Anziani del comune', xiii, f.37a (I-Bas)*

century choirboys were instructed and employed in the singing of plainchant at S Francesco. The church's expense registry between 1337 and 1430 reports the following names of monks in charge of singing there: Frate Paganino (1337), Antonius de Arimino (1356), Bartholomeus de Fantuciis (1380), Antonius de Ungaria (1386), Nicolaus Ungarus and Carluccius (1396), Johannes de Burgundia and Cristoforus de Alvernia (1423), Blasius Ungarus (1426), Joannes de Tibore and Petrus de Tuscanella (1430). The presence of an organ is documented from 1345; in 1621 a new organ was built by Antonio dal Corno.

A *cappella musicale* was officially instituted in 1537 and directed until 1540 by Bartolomeo da Tricarico; after this, however, the list of *maestri di cappella* is fragmentary. Among them were Bonifacio Pasquale (1567–9), Giuliano Cartari (1573–91 and possibly 1601–12), Bartolomeo Montalbano (1642–9), Felice Arconati (1660–67), Francesco Passarini (1667–73, 1681–91 and 1693–4), Domenico Scorpione (1674–5), Guido Montalbani (1675–80), Francesco Antonio Calegari (1700–02), F.A. Lazari (1702–5), Padre Martini (1725–70) and Stanislao Mattei (1770–97). After the suppression of convents by the French in 1797, a regular *cappella musicale* was never reactivated.

Musical activity at the Cathedral of S Pietro must have begun soon after its construction in the first decades of the 11th century when a *presbiter-cantor* was included in its administrative structure. A gradual troper in diastematic notation (*I-Ra* 123), containing its liturgy, originated there during that period. Only fragmentary evidence of its musical life, however, is recorded until the 16th century. A post of *magister cantus et gramaticae* was officially sanctioned in 1439 by a Bull of Pope Eugene IV and reconfirmed in 1510 by another Bull of Pope Giulio II. In 1491 Ludovico di Gregorio Tintore was appointed organist. Giovanni Guidetti, associated with the assemblage and the revision of chant books for the Roman Church in the second half of the 16th century, had his formation in the *schola* of the cathedral. Among the composers who served as *maestri di cappella* there were Cimatore (1559), Domenico Micheli (1588–91), Paolo Magri (1591–5), Lorenzo Vecchi (1599–1611, 1624), Domenico Brunetti (1611–46), Vincenzo Pellegrini (1676–80), Giacomo Antonio Perti (1691–6), Angelo Antonio Caroli (1742–67), Vincenzo Fontana (1798–1820) and Giovanni Tadolini (1825–9). Organists included Lucio Barbieri (1610–20), Giacomo Predieri (1679–93) and Floriano Arresti (1713–17).

At S Maria dei Servi the earliest evidence of musical activity is given by 11 choirbooks from the 13th and 14th centuries (*I-Bsm*); only scant information, however, exists on the musical life of the convent in the following centuries. *Maestri di cappella* included Antonio d'Alessandria (1509), Arcangelo Gherardini (1615), Giacomo d'Alessandria (1642), Attilio Ottavio Ariosti (1695)

and Domenico Barbieri (1769). In the 17th century performances sponsored by the nearby Accademia Filarmonica were held in the church. Vincenzo Carrati celebrated the founding of the Accademia with solemn services there on 18 July 1667. Musical academies with pastoral plays were held in the 18th century, for example Domenico Barbieri's *Sacrificio di Pane dio d'Arcadia*, performed on 19 July 1758 in honour of the prior-general of the order. A *cappella musicale* was organized in 1934 by Luigi Artusi who was succeeded by Pellegrino Santucci in 1947; it gives orchestral and choral concerts. In 1967 the Crema organ builders Tamburini installed a new organ with mechanical action; seasonal organ recitals are given.

A Confraternita del Rosario governed by the city's nobility was founded at S Domenico in 1596 and, after erecting a chapel for its devotions in 1592, began subsidizing concerts every Saturday as well as on the major feasts of the Blessed Virgin Mary. A regular *cappella musicale* was instituted at the beginning of the 17th century and employed some of the illustrious musicians associated with S Petronio. The first *maestro di cappella* was Francesco Milani (1624–52), followed by Domenico Manzoli (1653–8), Cazzati (1658–71), G.B. Vitali (1671–4), G.C. Arresti (1674–1704), G.A. Perti (1704–55, replaced by G.M. Alberti from 1734), Giovanni Battista Gaiani (1792–1819) and Angelo Ottani (1820–27). A new organ was commissioned from Venetian builders in 1644–5; another organ was built in its place by Petronio Maria Giovagnoni in 1759–61.

In 1618 Pope Gregory XV granted the Filippine Fathers permission to use the church of the Madonna di Galliera as their devotional centre in Bologna; in the years that followed it became the city's seat of oratorio performance. Previously the Congregazione dell'Oratorio, founded at Bologna in 1615, held its *esercizi spirituali* every Sunday at the small church of S Barbara. The oratorios written for the Madonna di Galliera in the first half of the century show the strong influence of the Roman style, for example those of Giovanni Paolo Colonna, a pupil of Carissimi and *maestro di cappella* there from 1673 to 1688. Oratorio composition flourished at Bologna in the last decades of the century, with Vitali, Ariosti, Domenico Gabrielli, Pistocchi, degli Antonii and Perti. These masters departed from the conventional Roman oratorio and focussed their attention particularly on the brilliant instrumental ritornellos.

Detailed research is still to be carried out on musical activities at the many other churches which maintained a *cappella* on a more or less continuous basis, especially for particularly important liturgical celebrations, with contributions by musicians from both within and outside the city. At the basilica of S Paolo Maggiore, with its three organs (one installed in 1624, the other two in 1647), there is evidence that, from 1712 onwards, the polychoric music at the celebration of the feast of the Madonna of S Luca was particularly lavish. Among other *maestri di cappella* were three members of the Predieri family: Giacomo Cesare (1712–21, 1731), Luca Antonio (1725–9, 1733) and Giovanni Battista (*c*1748); and Lorenzo Gibelli (1760–1812), Carlo Rinieri (1812–31) and Luigi Bortolotti (1831–56).

3. The academies and conservatory. The extraordinary flourishing of musical life at Bologna in the 17th century coincided with the establishment of musical academies to patronize, stimulate and consolidate all musical activities. Unlike most of the literary academies of the Renaissance and Baroque, the Bolognese academies, notably the Accademia Filarmonica, were institutions primarily under the control of professional musicians that intended to provide both theoretical and practical training for their members.

The first Bolognese academy to include music among its activities was the Accademia degli Ardenti, founded in 1558; it was renamed the Accademia del Porto when it moved in 1586. From 1581, however, it had functioned mainly as an institution for instructing young noblemen in science, literature and music. The first academy dedicated exclusively to musical activities was the Accademia dei Floridi, which held its meetings at S Michele in Bosco under the leadership of Adriano Banchieri. It was founded in 1615 for the spiritual and cultural education of its members. A description of its organization and accounts of its meetings are found in Banchieri's *Lettere armoniche* (1628, pp.34ff, 141–2). Its activity was interrupted in 1623–4, but was revived in 1625 under the name of Accademia dei Filomusi and sponsored by Girolamo Giacobbi. It had included among its members such composers as Banchieri, Monteverdi and Merula before it was dissolved in 1630 because of a plague. Another academy was formed in 1633, by Domenico Brunetti and Francesco Bertacchi, and called Accademia dei Filaschisi; it continued to prosper until 1666 when most of its members joined the Accademia Filarmonica.

The Accademia Filarmonica di Bologna was formally founded on 26 May 1666 by 50 musicians, meeting at the home of Count Vincenzo Maria Carrati, who had been encouraged to sponsor the academy by the local aristocracy. The first *Regole capitolari* (*I-Baf* vols. 1–3, n.244) divided the academicians into three orders: composers, singers and instrumentalists. The administrative officers were the *principe*, two *consiglieri* and two *censori dei conti* or auditors; the executive committee consisted of the president (elected each year from the composers residing at Bologna), the secretary and the advisers. The motto of the academy was 'Unitate melos' and its patron saint St Anthony of Padua, on whose feast day elaborate performances were prepared each year. The honorary office of founder and protector was hereditary and continued by a member of the Carrati family. New constitutions were drawn up in 1689–90 and 1721, and on 22 February 1749 Pope Benedict XIV granted the academy the same status as Rome's Accademia di S Cecilia, including the authority to supervise performing musicians in all Bolognese churches.

Among the activities of the academy were the *esercizi* for composer members and the *conferenze* for the performing members. The *esercizi* were held twice a week, on Mondays and Thursdays, while the *conferenze* took place on Thursday evenings. The purpose of these meetings was to provide opportunities for discussing theoretical works and for the performance of members' new works to be introduced and then analysed by the academicians. The academy was, therefore, in a strong position to determine taste and to exercise control over its members, thus helping to codify an acceptable and proper musical style.

The most important and influential of the members of the Accademia Filarmonica was Padre Martini, who was elected in 1758. He was *maestro di cappella* at S Francesco

from 1725 to 1770 and lived all his life in Bologna, where he assiduously devoted himself to teaching, composing and collecting historical documents on music in preparation for his *Storia della musica*. His teaching of composition became famous, as did his expertise on the subject, and he conducted an extensive correspondence with most musicians throughout Europe (only a small number of his estimated 6000 letters have been published; many are in *I-Bc*). Among his pupils were J.C. Bach, Gluck, Grétry, Jommelli, Sarti, Abbé Vogler, Padre S. Mattei and Mozart (who submitted a setting of the antiphon *Quaerite primum* K86/73*v* for examination at the academy on 9 October 1770 after a period of study). During the 18th century and part of the 19th the academy remained the absolute dictator of the city's musical life and the bestower of much coveted music diplomas eagerly sought by Italian and foreign musicians alike.

The Accademia Filarmonica declined in the first half of the 19th century, but revitalized itself in December 1853 by inaugurating a series of chamber music concerts; the series lasted until 1864 but was resumed in 1880. The programmes featured performances of string quartets that significantly included works by Beethoven, Mozart, Haydn and Hummel and were the first such performances outside Bolognese private circles. The periodical *L'arpa*, published every five days beginning on 20 August 1853, became the main vehicle of information for the academy's activities, such as meetings, elections and musical performances. Beginning with this period of renewed vigour, many illustrious figures were associated with the academy: Verdi (1868), Wagner (1876), Busoni (1882), Puccini (1899), Respighi (1910) and Ravel (1922). Special concerts and lectures were held in 1966 to celebrate the third centenary of the academy's foundation.

At the end of the 18th century and early in the 19th three academies were active briefly at Bologna. The Armonici Uniti, whose statutes (see Sartori, p.147ff) were drawn up in 1784, emphasized performances by its amateur members as well as by outside professional musicians. In June 1806 the pianist and composer Maria Brizzi Giorgi founded the Accademia Polimniaca, which lasted until her death in 1811. The Bolognese nobility subsidized its concerts, held mainly at the home of the founder, and frequently featuring illustrious performers. Instituted in 1808 by Tommaso Marchesi and continuing its activities to about 1830, the Accademia dei Concordi functioned as a channel for diffusing the Viennese repertory, particularly Haydn's works.

Before a teaching institution was firmly established on 30 November 1804, formal music instruction in Bologna took place at convents, churches and the academies. After the dissolution of the religious orders and corporations during the French invasion of 1796, the Liceo Filarmonico was founded on the site of the former monastery of S Giacomo to replace those that had been dispersed and establish a musical centre in the city. Initially, the Liceo was to absorb the Accademia Filarmonica, the chapel of S Petronio, the Filippini foundation, the libraries of Martini (about 17,000 volumes) and Mattei, as well as Martini's portrait collection and all the various musical collections saved from the plunder of the churches, convents and monasteries. The holdings were reordered and expanded through new acquisitions by Gaetano Gaspari from 1856 to 1881; he also compiled a catalogue. The Liceo also houses manuscripts of sacred and secular polyphony from the 14th to the 16th centuries, and a substantial collection of opera librettos.

The Accademia Filarmonica refused to be absorbed into the Liceo; thus in the first few decades after its foundation a state of tension developed between the two institutions, eased only at the nomination of Rossini in 1839 as *consulente perpetuo*. During his directorship, which lasted until 1848, the musical life of the Liceo was bolstered by the institution of weekly recitals; however a new period of decline followed, until Luigi Mancinelli was appointed director in 1881. He was succeeded by Giuseppe Martucci (1886–1902) and Marco Enrico Bossi (1902–11). Under the leadership of these three men the Liceo had its greatest period, during which it influenced the musical life of the entire city. Bossi was succeeded by Mugellini (1911–12), Torchi (1912) and Busoni (1913–14), by which time the Liceo was equal to other recognized Italian conservatories; directors since Busoni have been G. Marinuzzi (1916–19), F. Alfano (1919–23), Guglielmo Mattioli (1923–4), Francesco Vatielli (1924–5), Cesare Nordio (1925–45), Guido Spagnoli (1945–7), Guido Guerrini (1947–50), Ettore Desderi (1951–63), Lino Liviabella (1950–51, 1963–4), Adone Zecchi (1964–74), Giordano Noferini (1974–6), Cesare Franchini-Tassini (1976–9), Gianni Ramous (1981–4), Lidia Proietti (1979–81, 1984–91) and Carmine Carrisi (1991–). In 1925 it was named Conservatorio di Musica G.B. Martini and in 1942 it came under state control. The library remained city property even after 1942 (although acquisitions after then belonged to the state); it was later named Biblioteca Musicale G.B. Martini and in 1959 renamed Civico Museo Bibliografico Musicale. The university instituted classes in musicology in 1936 and today offers a wide variety of music courses, including ethnomusicology. Musicology periodicals currently published in Bologna include *Quadrivium* (since 1956) and *Il Saggiatore musicale* (since 1994).

4. Societies and music publishing. The Casino dei Nobili was organized in 1787 at the Palazzo Amorini, where it sponsored performances of operas (e.g. Gluck's *Orfeo* and *Alceste*, 1788). During the French occupation (beginning in 1796) it was renamed Società degli Amici; in 1809–10 it was reorganized after moving to the Palazzo Lambertini and called Società del Casino, still maintaining its aristocratic character. From 1810 it took an active part in introducing works of the Germanic repertory (particularly Mozart and Beethoven) and performers of international fame (Paganini in 1811 and 1818) at its evening and Sunday afternoon concerts. In 1823 it moved to the Palazzo Salina Amorini and concentrated until the mid-century on performances by amateur soloists, although illustrious performers were occasionally featured (e.g. Liszt in December 1838). Its legacy has been continued by the Domino Club, founded in 1866, whose archives contain all the documents of the Società del Casino.

In spring 1877 Camillo Pizzardi began to organize chamber music concerts in his home, which led to the institution of the Società del Quartetto. It was publicly inaugurated on 24 November 1879 with an orchestral concert conducted by Luigi Mancinelli, artistic director until 1885. Both its orchestral and chamber music concerts were held at the Liceo Musicale until 1893 and at the Teatro Comunale thereafter. Martucci was director from 1886 to 1902, and frequently played the piano at its chamber concerts. Its repertory shows that the Bolognese

public in the second half of the 19th century preferred Beethoven, works of the Classical Viennese school and chamber recitals; symphonies by Haydn, Mozart, Schubert, Mendelssohn and Brahms were the mainstay of its programmes. Its activities were interrupted in 1937, but were resumed after World War II under the name Società Bolognese di Musica da Camera.

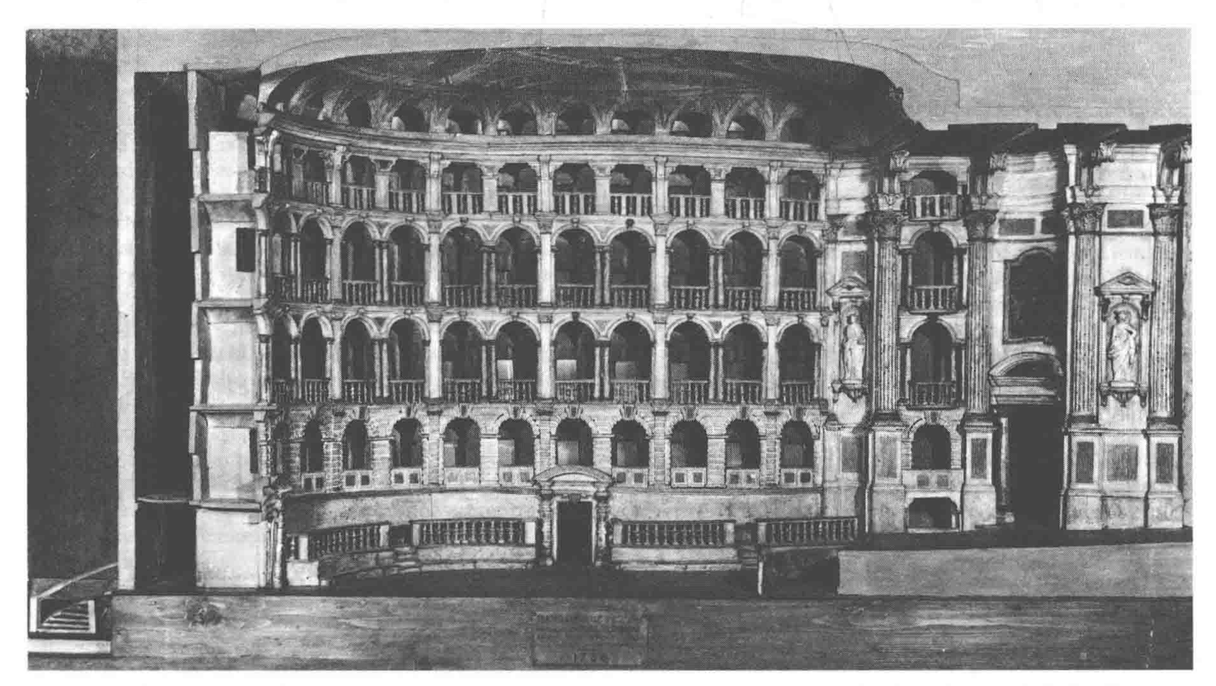
Other societies include the Società Wagneriana, founded by Martucci at the Liceo Musicale in 1887 to give annual concert performances of excerpts from Wagner operas, and the Società Corale G.B. Martini, founded by M.E. Bossi in 1902.

Music publishing flourished comparatively late at Bologna. Throughout the 16th century most Bolognese composers had their works printed in Venice. Among the earliest works printed at Bologna are Ramos de Pareia's *Musica practica* (Rubiera; 1482) and Burtio's *Musices opusculum* (Rugeriis; 1487). It was not until a century later, however, that the first volume of music was set by Giovanni Rossi, a Venetian residing in Bologna: Camillo Cortellini's *Il secondo libro de' madrigali à cinque voci* (1584). His son, Perseo Rossi, published Banchieri's *Terzo libro di nuovi pensieri ecclesiastici* and Ercole Porta's *Vaga ghirlanda* op.3 in 1613. Subsequently, the flourishing musical life in Bologna supported several printing shops. From 1639 to 1688 Giacomo Monti established the most important printing press at Bologna, bringing out numerous editions of works for string instruments. He was succeeded by his son Pier Maria in 1689, who remained active until 1709 although the shop had been taken over in 1685 by Marino Silvani, the head of another prominent family of Bolognese printers. Silvani published from 1665 to 1726 under various names. Other printers at Bologna during the second half of the 17th century include Alessandro Pisarri, who published 10 volumes of works by Cazzati (1660–62); Evangelista Dozza's heirs Carlo Manolesi and Pietro Dozza, who issued Cazzati's opp.31–4 (1663–4); Cazzati, who probably established a shop in his home next to S Petronio in 1667; Giuseppe Micheletti, who printed sacred and instrumental works from 1683 to 1692; and Carlo Maria Fagnani, active particularly in 1695–6. From 1720 Lelio della Volpe issued elegantly printed musical and theoretical works (with engraved plates from 1744), including Martini's *Storia della musica* (1751–81).

5. Theatres. A deep interest in knowledge and culture has always characterized Bologna's theatrical life. Its operatic history is marked by a predisposition to accept and assimilate the prevailing theatrical fashions, stimulated by and often in competition with the major operatic centres in Italy. Until the mid-17th century, opera at Bologna was characterized by a heterogeneity of performances organized and subsidized mainly by prominent aristocratic intellectuals: Nicolò Zoppio Turchi, Virgilio Malvezzi, Carlo Bentivoglio, Paolo Emilio Fantuzzi and Cornelio Malvasia, who depended mostly either on singers from nearby Modena or on Venetian itinerant companies. At the peak of its splendour in the 18th century the city had four major theatres, and operas were produced privately in palaces and suburban villas, convents, monasteries and boarding-schools, subsidized by such aristocratic families as the Bentivoglio, Marescotti, Pepoli, Orsi and Albergati. During this period the city acquired a reputation as a training-ground for opera singers who for many years dominated the major Italian and European theatres. An important 18th-century treatise on singing, P.F. Tosti's *Opinioni de' cantori antichi e moderni*, was published in Bologna in 1723. Such polycentrism assured a multiplicity, variety and autonomy of operatic initiatives. In the 19th century the Bolognese public was exposed to the newest currents in European opera, welcoming first the grand operas of Meyerbeer and then enthusiastically accepting for the first time in Italy Wagner's music dramas. Important music periodicals published in the city contributed to this openess. Significantly Bologna's operatic activity proceeded without interruption (except in 1750) from 1634 to 1792. As the city was not ruled by a court or potentate, public opinion played an important role in conditioning the vicissitudes of its theatrical life.

The Teatro del Pubblico (also known as the Teatro della Sala or Sala del Pallone), in the Palazzo del Podestà and on the Piazza Maggiore, designed by A. Chenda, was used for public spectacles from 1547. Opera performances were mounted from 1610, beginning with Giacobbi's *L'Andromeda* (music lost); on 17 December 1623 it burnt down and was replaced by a wooden structure in 1624. The Teatro del Pubblico, like all Chenda's theatrical buildings, was arranged in superimposed rows of boxes rather than graded seating (a design later imitated in most Italian theatres), making it accessible not only to the nobility but also to the bourgeois paying public. Later in the century important opera productions were mounted elsewhere and entertainment for lower social classes prevailed; it was demolished as a dangerous structure in 1767.

Formally opened in 1636, the Teatro Formagliari was also called Guastavillani and dei Casali until about 1660; in the last quarter of the 18th century it was also known as Teatro Zagnoni. In January 1636 members of the Accademia dei Riaccesi rented the palace of the Formagliari family to stage operatic performances and comedies. Soon afterwards Marchese Filippo Guastavillani commissioned the architect Sighizzi to renovate the small hall with ranges of boxes sloping down and projecting towards the stage, so that the entire audience had an excellent view. Privately managed by Guastavillani, it was frequented by the nobility and devoted mainly to serious opera. In 1640 the singer, composer and impresario Francesco Manelli introduced such works of the fashionable Venetian repertory as his own *Delia* and Monteverdi's *Il ritorno d'Ulisse in patria* in this theatre. Subsequently and well into the 18th century composers previously heard in Venice dominated its stage (Cavalli, Pallavicino, M.A. and P.A. Ziani). During the 18th century its two or three seasons favoured a diversified repertory that included numerous *opere buffe* as well as serious operas. It was renovated in 1776 by Francesco Tadolini, but burnt down in 1802; the Teatro del Corso was built on the same site in 1805.



The Teatro Malvezzi opened on 27 March 1653, built on a site bought in 1651 by Marchese Francesco Pirro Malvezzi. It was restored several times from 1681 to 1691 and enlarged and repainted by the Galli-Bibiena brothers in 1697. Although it staged fewer works, it replaced the Teatro Formagliari as the theatre favoured by the Bolognese aristocracy. Its repertory included works by the best Bolognese composers (D. Gabrielli, Ariosti, Aldrovandini, G.M. Orlandini and particularly Perti), performed by eminent singers (M.M. Musi, M. Scarabelli

and Pistocchi), often using sets designed by members of the Galli-Bibiena family. It burnt down on 19 February 1745 and its leading position was taken over by the new Teatro Comunale.

The Marchese Silvio A. Marsigli-Rossi-Lombardi bought a large warehouse in 1709 and remodelled it to accommodate opera performances. As the Teatro Marsigli-Rossi it opened on 28 October 1710 with L.A. Predieri's *La Partenope*, and after it was enlarged in spring 1711, it reopened on 28 October that year with Predieri's *Griselda*. It remained a theatre of modest size in the shape of an open bell, with three tiers of boxes and an upper gallery circling as far as the proscenium. In keeping with the size of the theatre, performances of *opere buffe* and comedies, particularly by such local writers as G.M. Buini, were favoured, especially in the years 1722–36. During the French occupation it was renamed Teatro Civico, but was found to be a dangerous structure in 1821 and was demolished in 1825.

As a result of the destruction of the Teatro Malvezzi, a group of noblemen proposed in 1750 that a new theatre, the Teatro Comunale, be constructed. Financed by the papal government and the Bolognese senate, the building (designed and built by Antonio Galli-Bibiena; see fig.3) was completed in 1757. The first season was delayed by financial difficulties, but the theatre eventually opened on 14 May 1763 with Gluck's *Il trionfo di Clelia*, given its première under the composer's supervision. It became the leading operatic institution in the city, giving up to three seasons annually. Nevertheless, its activity was at times interrupted for several years (no record of operatic performances has survived for the years 1780–87). During the French occupation it was renamed Teatro Nazionale and from 1820 the administration granted use of the theatre to impresarios on a deposit of 5000 scudi. From 1820 to 1860 the repertory included works of the major Italian composers of the time (Morlacchi, Mercadante, Rossini, Donizetti, Bellini and from 1843, Verdi); there were usually three seasons a year, each comprising up to four new productions that were often repeated 30 to 40 times. The theatre was renovated in 1818–20, 1853–4 and 1859. Angelo Mariani's appointment as 'maestro concertatore e direttore delle musiche' in autumn 1860 inaugurated a splendid period for the theatre. Under his leadership, which lasted until 1872, the quality of the orchestra was greatly improved and the repertory notably revitalized with performances of operas by Meyerbeer, Verdi and Wagner; these included the Italian premières of *L'Africaine* (4 November 1865), *Don Carlos* (27 October 1867), *Lohengrin* (1 November 1871) and *Tannhäuser* (7 November 1872). Mariani's successors (Marino Mancinelli, Franco Faccio, Luigi Mancinelli and Martucci) also expanded the repertory of the Teatro Comunale by channelling it within the mainstream of European musical life (for example Martucci directed the Italian première of *Tristan and Isolde*, 2 June 1888). At the beginning of the 20th century the theatre still featured performances of German operas and gave the Italian première of *Parsifal* (1 January 1914), conducted by Ferrari. From 1931 to 1935 it was closed, following a fire that destroyed its stage. After it reopened it established a regular opera season and continued to be one of the main centres of Italian musical life, organized as an autonomous institution with its own orchestra and chorus.

In June 1980 the theatre was closed because of an infestation of woodworm. A scrupulous restoration, which strengthened the original structure and renovated Bibiena's characteristic white and gold decoration, enabled the theatre to reopen on 5 December 1981 with *Aida*. Contemporary works are given as well as the traditional repertory. Among world premières have been Giacomo Manzoni's *Per Massimiliano Robespierre* (17 April 1975), Adriano Guarnieri's *Trionfo della notte* (3 February 1987), Italian permières include Ligeti's *Le Grand Maca-*

*3. Section of the Teatro Comunale: wooden architectual model by G.B. Martorelli and A. Cambarini after designs by Antonio Galli-Bibiena, built 1775 (Teatro Comunale, Bologna)*

*bre* (5 May 1979) and Henze's *The English Cat* (20 April 1986), Fabio Vacchi's *Il viaggio* (23 January 1990) and Flavio Testi's *La brocca rotta* (30 May 1997). From 1986 to 1993 the principal conductor was Riccardo Chailly; his successors have been Christian Thielemann (1994–7) and Daniele Gatti (from 1997). During its season, lasting from December to June, the company takes its productions to other cities in the region and also makes foreign tours.

The opera house also organizes a series of orchestral concerts, chamber concerts, some in collaboration with 'Musica Insieme', ballets, and other activities aimed at young people and schools. In addition the theatre hosts the Feste Musicali devised by Tito Gotti, which, since 1967 have presented distinctive programmes, including modern revivals of rare works, using locations, instruments and music associated with Bologna, and unusual approaches to contemporary music. Notable events have included performances of the repertory of the chapel of S Petronio in 1967, and the inauguration of its restored organs in 1982 with new works by Franco Donatoni, Salvatore Sciarrino and Adriano Guarnieri. Another memorable event was John Cage's 'grand happening', *Three excursions for prepared train on a theme of Tito Gotti*, in June 1978.

Designed by the architects Santini and Gasparini, the Teatro del Corso opened on 19 May 1805 with Ferdinando Paer's *Sofonisba*, in the presence of Napoleon and with Rossini singing a minor role. The theatre was used for concerts (Paganini in 1818, Malibran in 1835), opera productions and plays. The première of Rossini's *L'equivoco stravagante* was given there in 1811. Its status declined during the second half of the 19th century because of the strong competition of the Teatro Comunale; it was destroyed during the war in 1944.

The Teatro Contavalli, constructed by Marinetti and Nadi on the site of the S Martino convent, opened on 3 October 1814 with Carlo Coccia's *La Matilde*. From 1815 to 1826, in 1840 and in 1843, Rossini supervised numerous performances of his works there. Operas by Donizetti (from 1830) and Verdi (from 1854) were among the most frequently performed. In 1938 the theatre was transformed into a film theatre.

ELVIDIO SURIAN/GRAZIANO BALLERINI

**Bologna, Bartolomeo da.** *See* BARTOLOMEO DA BOLOGNA.

**Bolognese, Il.** *See* SPORTONIO, MARC'ANTONIO.

**Bolognini, Bernardo** (*b* Bologna, ?*c*1570–80; *d* ?Naples, ?after 1605). Italian composer. He is called 'Bolognese' on the title-page of his only surviving music: *Madrigali a cinque voci: il primo libro* (Naples, 1604[15]), dedicated to Giovanni di Sangro, whose father, Fabrizio di Sangro, Duke of Vietri, had entrusted Bolognini with his son's education. All 19 madrigal texts, except two by Marino, come from the 1601 book of madrigal poems by the Venetian poet Francesco Contarini, a member of the academies of the Olimpici, Ricovrati, Immaturi and Serafici. The music shows little influence of Gesualdo: with the exception of a French 6th, the few examples of chromaticism are of a type commonly found in the 1580s. Many of the motifs that Bolognini devised for imitative writing are also old-fashioned – square-rhythmed outlines of triads or alternations of descending 4ths and ascending 3rds – but they are sometimes combined in double subjects or with their inversions. He used phrase repetition, chordal textures and reduction of texture less than other Neapolitan madrigalists of the time. His collection also includes one piece by Scipione Dentice and one by Giovanni de Macque. The 1649 catalogue of the music library of King João IV of Portugal lists a second book of five-part madrigals by him (see *JoãoIL* p.544), but it seems to be lost.

KEITH A. LARSON

**Bolon** [bolombata, bolombato, bulumbata]. Large arched harp of the Manding peoples of West Africa, the Mandinka of the Gambia and Maninka of Guinea and Mali. The harp has a large, whole-calabash resonator with a rectangular soundhole in the side, a laced goatskin soundtable and three or four strings fastened to the handle by leather thongs (see illustration). Formerly used in warfare, when the resonator was beaten as a drum, the *bolon* is now played by professional musicians (mainly descended from slave caste) either as a solo instrument or, more commonly, to accompany singing.

**Bolton, Thomas** (*b* ?London, *c*1770; *d* ?London, *c*1820). English music teacher and composer. The advertisements in his various publications show that he worked as a music teacher in London from the 1790s to about 1820. He advertised: 'Ladies Instructed in Singing, with Accompaniment on the Piano Forte, Lute and Lyre – also Pupils Instructed for the Stage'. He composed many songs, of which those in *The Village Fete* (*c*1810) enjoyed particular popularity. His *Treatise on Singing* (1810, 2/1812) contains 'anatomical observations by John Hunter on the management and delivery of the voice'. He wrote a three-page *Instructions for the Tambourine* (published in Joseph Mazzinghi's *Twelve Airs for the Pianoforte with Accompaniments for a Flute and Tambourine*, 1799) and published collections of piano music: marches, rondos and other movements with percussion accompaniment (op.7, 1799), and airs, marches, dances and hymns (*c*1806).

Less common musical instruments in which he offered specialized tuition were the guitar and pianoforte guitar, for the players of which instruments he published his *Twenty four Easy and Pleasing Lessons for the Guitar or Piano forte Guitar* (*c*1790) and *Six Rondeaus, three Songs, three Preludes composed; and three Songs, selected and adapted, with an Accompaniment for Guitar or Piano forte Guitar*, op.3 (*c*1795). In addition to single songs and keyboard works he also published *A Collection of Lessons, Songs, Marches, and Dances* for harp, lute or lyre (*c*1810); and *A Select Collection of Songs & Airs* arranged for the harp or lute (*c*1815).

OWAIN EDWARDS

**Boluda** [Voluda], **Ginés de** (*b* Hellín, *c*1545; *d* ?Seville, after 24 April 1604). Spanish composer. In 1578 he was *maestro de capilla* of Cádiz Cathedral; following the death in that year of Gabriel Gálvez he became *maestro de capilla* of Cuenca Cathedral from 10 September, with a salary of 200 ducats. Although he remained in this position for little more than a year, he obtained the lasting patronage of the then Bishop of Cuenca, Rodrigo de Castro. In August 1579 Boluda requested permission to apply for a vacancy in Sigüenza Cathedral, but he never took up the position. Shortly afterwards he abandoned his duties in Cuenca.

The death of Andrés Torrentes in September 1580 created a vacancy at Toledo Cathedral, and Boluda was selected to be *maestro de capilla* over such eminent composers as Francisco de Velasco, Sebastián Vivanco and Gabriel Harnández, beginning his 13-year tenure early in 1581. He was extremely ill-paid, however, despite the intercession of Rodrigo de Castro (by then Cardinal of Seville) with the Archbishop of Toledo, Gaspar de Quiroga. Most of Boluda's surviving works date from his time in Toledo, and he conspicuously augmented the cathedral's music library by recommending the purchase of seven volumes of music, most of which remain in the Toledo archives. They included Guerrero's motets of 1570, La Hèle's *Octo missae* (1578), Victoria's *Missarum libri duo* (1583), and an important manuscript copied by Fray Pedro Durán. Boluda's taste is implied by the predominance of Spanish composers in the volumes he selected.

In 1593 Boluda retired from his position in Toledo and apparently from the profession of music; four years later he was in Seville as almoner to Rodrigo de Castro. In 1601 he refused the position of *maestro de capilla* of the royal chapel in Granada as he no longer desired to practise that profession. He is last recorded in 1604, still residing in Seville.

All Boluda's compositions are sacred and most belong to Vespers. Though they are varied in style, all reveal a concern for the intelligibility of the words. The techniques employed range from strict *fabordón* to elaborate imitative counterpoint, and are combined to give polyphonic variety to psalmody, one of the most rigid genres of the Spanish Renaissance. Plainchant is present in all Boluda's compositions (sometimes as cantus firmus); drawn from the Spanish tradition rather than the Roman, it is never varied or embellished even when integrated into the polyphonic texture.

SOTERRAÑA AGUIRRE RINCÓN

**Bolzoni, Giovanni** (*b* Parma, 15 May 1841; *d* Turin, 21 Feb 1919). Italian conductor, teacher and composer. He studied at the music school in Parma with Giuseppe del Maino (violin), Griffini (singing) and Giovanni Rossi (composition). After graduating in 1859 he became leader and assistant conductor at Reggio nell'Emilia (1864–6) and at the Teatro della Concordia, Cremona, under Ponchielli (1866–7). He was director of the Civica Scuola di Musica in Savona (1867–73), and then became conductor at the Teatro Francesco Morlacchi in Perugia (1874–5). From 1876 he directed the Liceo Musicale and conducted the orchestra at the Teatro Municipale in Piacenza. Recommended by Ricordi and Verdi, he became conductor at the Teatro Regio in Turin from 1884 to 1889, where he conducted *Le Villi*, *Lohengrin*, *Tannhäuser* and Verdi's *Otello*, among other operas; in 1885–6 he conducted the last symphonic concerts of the Concerti Popolari there. A strict and gifted teacher, he was, from 1887 to 1916, director and professor of composition at the Turin Liceo Musicale, which he began to reorganize with less emphasis on its strictly operatic tradition; he introduced new instrumental classes, including one for string quartets. As a composer he had technical ability and inventiveness; in a period dominated by opera he wrote mostly chamber and symphonic music, favouring musical sketches, short character-pieces, overtures in a rhapsodic and descriptive style and non-conventional combinations of instruments rather than more academic forms. Significant among his works for string quartet are more than two dozen *romanze senza parole*.

ANDREA LANZA

**Boman, Petter [Pehr] Conrad** (*b* Stockholm, 6 June 1804; *d* Stockholm, 17 March 1861). Swedish music critic, historian and composer. He was a pupil of Per Frigel. He earned his living as a clerk in the Swedish Customs and was for many years music critic for the *Post och inrikes tidningar*. In 1849 he was elected a member of the Swedish Royal Academy of Music, the library of which he helped to catalogue. In 1850 he translated Birch's *Darstellung der Bühnenkunst* into Swedish. He lectured extensively on music history at the conservatory in 1852, and wrote articles for the *Ny tidning för musik* during the whole period of its existence (1853–7). The most important of these was 'En blick på tonkonsten i Sverige', a survey of Swedish music during the previous 50 years. Boman is considered one of the most reliable and important Swedish writers on music before Adolf Lindgren. (*SBL*, T. Norlind)

WORKS

*all first performed and published in Stockholm*

Byn i bergen [The Village in the Mountains] (Spl, 2, after A. von Kotzebue: *Das Dorf im Gebirge*), 1846, *S-St*; Ljungby horn och pipa [The Horn and Pipe in Ljungby] (Spl, 3, G.L. Silverstolpe), 1858, *Skma, St*; Gustaf Wasas dröm (cant., B. von Beskow), *Skma*
5 collections of songs (1828–38), other songs, *Skma*; pubd choruses and pf pieces

KATHLEEN DALE/AXEL HELMER

**Bombarde (i).** A term for various types of SHAWM. *See also* POMMER.

**Bombarde (ii).** A one-key or keyless oboe of Brittany. It takes the leading melodic role when coupled with the *biniou*. *See* BAGPIPE, §6.

**Bombarde (iii)** (Fr.). *See under* ORGAN STOP (*Bombardon*).

**Bombardino** [flicorno baritono] (It.). *See* FLICORNO and EUPHONIUM.

**Bombardon (i)** (Ger., Fr.; It. *bombardone*; Sp. *bombardón*). Tuba, especially in 12′ F and 14′ E♭, and particularly in a band (*see* TUBA (i)). The name was first used in Germany during the 1820s for various keyed bass brass instruments; from the 1830s onwards it was commonly applied to bass valved instruments. Thus the *Bombardon Ophocleide* [*sic*] exhibited by Pfaff of Kaiserslautern in 1851 was in fact a four-valved tuba, its name serving as a reminder that in German-speaking lands 'ophikleide' usually indicated a valved instrument rather than a keyed one (Heyde, 67–9).

'Bombardon' is the German name for the contrabass tuba (in BB♭ or CC). 'Bombardone' is used in Italy for the *flicorno basso-grave* in F or E♭. The E♭ and BB♭ tubas are sometimes 'bombardon contrabasse' in France, 'bombardón contrabajo' in Spain. Care should be taken not to confuse these with *bombardino*, the Italian *flicorno* and Spanish *fiscorn* equivalent to the three-valved euphonium. The Italian four-valved euphonium equivalent is sometimes 'bombarda a 4 pistoni'. All these terms represent band as opposed to orchestral use (for example, Verdi stage-bands, where *bombardino* and *bombardone* are found side by side). In English-speaking countries (although rarely in the USA) 'bombardon' has customarily been a term that is printed (as in some publishers' E♭ bass parts) rather than spoken; the word 'bass' is used among bandsmen. In 1840 Barth of Munich made a valved *kontrastbombardon* of which the distinguishing feature appears to have been its low register. Before 1845 Rivet of Lyons used the name 'bombardon' for a bass brass instrument of the *Néo-alto* family.

**Bombardone** [flicorno basso-grave] (It.). *See* FLICORNO and TUBA (i).

**Bombo (i)** (It.; Ger. *Schwärmer, Schwermer*). A 17th- and 18th-century term for the string TREMOLO – that is, rapid reiteration of a single note bowed either with individual bowstrokes or in groups of slurred tremolo as in portato. W.C. Printz (*Musica modulatoria vocalis*, Schweidnitz, 1678) illustrated *bombi* by the music shown in ex. 1.

Ex.1 Printz: *Musica modulatoria vocalis* (1678)

DAVID D. BOYDEN

**Bombo (ii).** (1) Onomatopoeic and generic name for various forms of large, double-headed frame drums (*see* DRUM, §I, 2(vi)) of Spain, Portugal and South America. Two main types of construction are common: (a) large diameter heads (e.g. 50–70 cm) and a relatively shallow body, such as the military or orchestral bass drum, where the skins are secured and tensioned using cords connected to wooden hoops (see illustration), and a long cylindrical body (e.g. 50–70 cm) and (b) small diameter heads, such as the Argentine *bombo* of Pan-Andean urban folklore ensembles, with or without cords and hoops for tensioning the skins.

Both large diameter and cylindrical forms are found in Argentina, the former referred to as *bombo chato* and the latter as *bombo tubular*. A further conical shaped instrument, of probable African origin, is also played in Argentina for the dance form *candombe*. Unlike other forms of *bombo*, which are usually played standing, walking or seated (see illustration below), the player sits astride the instrument which he plays with his hands or two small sticks. *Bombo* playing techniques vary widely and hard sticks or soft headed beaters may be used (sometimes in combination with a hand) to strike various parts of the skin or shell. For example, in the Colombian song and dance form *cumbia* the single head of a large diameter instrument is played with two sticks, while in other traditions from the coast, both heads and the shell of a cylindrical or barrel-shaped drum are sounded. In the

*Bombo (frame drum) and accordion players, La Rioja, Argentina*

high, Bolivian Andes, where both large diameter and cylindrical forms of *bombo* are used to accompany wind ensembles, a large soft-headed beater is typically used to sound a single head.

(2) The *bombo gulu* or *gulu* is a double-headed bass drum of the Tonga people of the Inhambane region of Mozambique. The name of the drum and its form are of Portuguese derivation, and it is played to accompany dance.

HENRY STOBART

**Bombo (iii).** Mouth bow of the Republic of the Congo. (1) Braced mouth bow of the Mamvu and Mari peoples. The string is fastened to the bow not only at both ends but also by means of a short cord part way along its length. This produces two unequal lengths of vibrating string, giving two different notes. Other names reported are: *dumba, andobu, badingba* (*badinga*), *gedo, bongo-bongo, barikendikendi, kudungba, dingba, undemoü, kandiri kandiri, balu* and *guru*.

(2) Unbraced mouth bow of the Andile, Andekaka, Mari, Daba, Andekote, Kilima, Andemanza, Obvango and Aïmeri peoples.

HENRY STOBART

**Bombus** (Ger.). *See* ORNAMENTS, §8.

**Bomhard** [Bomhart] **(i)** (Ger.). A variant term for POMMER.

**Bomhard** [Bomhart] **(ii)** (Ger.). *See under* ORGAN STOP (*Bombardon*).

**Bommer, Johann Jakob** (*fl c*1720–67). Swiss organ builder. His family came from Weingarten, near Lommis, in the canton of Thurgau. Together with Speisegger he was one of the most important organ builders in eastern Switzerland in the first half of the 18th century. The only certain biographical date is that of his marriage on 15 October 1725 in Kutná Hora (Bohemia) to Anna Daussek of Plzeň. Stylistically Bommer had close links with the Swabian and south German organ builders, but some characteristics of his work probably reflect his years as a journeyman in Bohemia. He built organs in Switzerland at Unterägeri (1720), Fischingen Abbey (positive; 1727), the Cistercian convent at Kalchrain (positive; 1730), Fischingen (rebuild; 1736), the Dominican convent of St Katharinental (1736–41; still extant), Kirchberg (1750), the Iddakapelle at Fischingen (1750), Eschenbach (1761), the Laurenzenkirche, St Gallen (1761) and Frauenfeld (rebuild; 1767).

FRIEDRICH JAKOB

**Bomtempo** [Buontempo], **João Domingos** (*b* Lisbon, 28 Dec 1775; *d* Lisbon, 18 Aug 1842). Portuguese pianist and composer. Son of the Italian oboist F.X. Bomtempo, who belonged to the royal chapel of Dom José I, he studied music with his father and was a pupil at the Patriarchal Seminary. A member of the brotherhood of St Cecilia from the age of 14, he replaced his father in the royal chapel a few years later, after the latter's death in Brazil. But soon afterwards (1801) he left for Paris, where he became well known as a pianist and composer: his first two piano concertos and the Symphony no.1 were widely acclaimed in the *Journal général de la France* and the *Courrier de l'Europe*. His meeting and friendship with Clementi, who published many of his works, date from his first years in Paris. Because of the Napoleonic invasions he left for London in 1810, where he taught music to a daughter of the Duchess of Hamilton for a year. He returned to Lisbon in 1811 but went back to London five years later; in 1820, after another brief sojourn in Paris during which he composed the Requiem Mass in memory of Camões, he finally settled in Portugal. Besides teaching there he also organized concerts; to this end he founded the Philharmonic Society which in August 1822 initiated the first series of regular concerts in which works by Haydn, Mozart and Beethoven were performed, as well as his own compositions. The Vilafrancada movement and the advent of the absolutist regime in 1828 interrupted the concerts and later led to the dissolution of the society itself, but the triumph of liberalism finally brought Bomtempo just reward for his abilities: in 1833 he was appointed the teacher of Dona Maria II and awarded the Order of Christ, and in 1835 he was made principal of the conservatory, which had been inaugurated the same year. He kept this position to the end of his life. Bomtempo was one of the principal reformers of Portuguese music, not only through his establishment of the conservatory, but also through the Philharmonic Society's activities on behalf of instrumental, symphonic and chamber music, in a milieu then completely dominated by Italian opera. To Bomtempo also Portuguese music owes its first examples of native symphonies, and chamber music.

FILIPE DE SOUSA

**Bon** [Boni], **Anna (Lucia)** (*b* ?Russia, ?1739/40). Italian composer and singer. She was the daughter of the (?Venetian) scenographer and librettist Girolamo Bon (Boni, Bonno, Bono, Bonn, Le Bon, Buon, Bunon) and the Bolognese singer Rosa Ruvinetti Bon. In 1743, at the age of four, she entered the Ospedale della Pietà in Venice as a pupil. She probably rejoined her parents at some time during their engagements at St Petersburg, Dresden, Potsdam and Regensburg between 1743 and late 1754. By 1755 she and her family were in Bayreuth in the service of Margrave Friedrich of Brandenburg Culmbach and his wife Wilhelmine, sister of Frederick the Great. After Wilhelmine's death in 1758 music at Bayreuth declined. In 1759–60 the Bon family all sang in opera performances directed by Girolamo in Pressburg. On 1 July 1762 the three Bons were contracted to serve the Esterházy court of Prince Nicolaus at Eisenstadt, where Anna remained until at least 25 April 1765 (Haydn wrote several roles for her mother). By 1767 she was resident in Hildburghausen, married to the singer Mongeri.

WORKS

6 sonate da camera, fl, bc, op.1 (Nuremberg, 1756), ed. B.G. Jackson (Fayetteville, AR, 1989); 6 sonate per il cembalo, op.2 (Nuremberg, 1757), ed. J.S. Hettrick (Bryn Mawr, PA, 1997); 6 divertimenti, 2 fl, bc, op.3 (Nuremberg, 1759), ed. S. Fortino (Bryn Mawr, PA, 1993)

JANE SCHATKIN HETTRICK

**Bon, Josephus Johannes Baptizta.** *See* BONNO, GIUSEPPE.

**Bon, Maarten** (*b* Amsterdam, 20 Aug 1933). Dutch pianist and composer. He studied piano with Hans Sachs and at the Muzieklyceum in Amsterdam with Jaap Spaanderman and Theo Bruins, and bassoon with Brian Pollard. In Paris he continued his piano studies with Magda Tagliaferro, and accompaniment with the singer Noëmie Perugia. Back in the Netherlands, he started a duo with his wife, the violinist Jeannelotte Herzberger, and took lessons in composition with van Baaren. As pianist of the RPO of the Dutch Broadcasting Company (1970–93) he worked under composer-conductors such as Berio, Stockhausen, Maderna and Otto Ketting. His lifelong fascination with Stravinsky's *Le sacre du printemps* resulted in an arrangement of this piece for four pianos, which was authorized by the Stravinsky estate and Boosey & Hawkes (1983), on condition that Bon should be the only pianist entitled to perform the arrangement with his deputies. His use of the sustaining pedal is characteristic of his arrangements for piano. He founded the Amsterdam Piano Quartet (1983) and in 1997 the Amsterdam Piano Quintet. He also inspired other composers to write for these ensembles, like Ivan Fedele (*Armoon per quattro pianoforti*, 1984) and Rob du Bois's *Gaberbocchus* for four pianos, 1996. Bon's *Whistle for a Friend* won a prize at the concourse for compositions for wind instruments (Ancona, 1980).

HUIB RAMAER

**Bon, Willem Frederik** (*b* Amersfoort, 15 June 1940; *d* Nijeholtpade, Friesland, 14 April 1983). Dutch composer and conductor. He studied the clarinet at the Amsterdam Conservatory (1960–64), then composition with Van Baaren at the Hague Conservatory (1963–71). His principal conducting teachers were Louis Stotijn, Fournet, Van Otterloo and Dean Dixon. A versatile artist, he made a career as a musician, critic (on *Het vrije volk*, 1968–9), writer and broadcaster. In 1972 he succeeded Stotijn as conductor of the Amsterdam Sinfonietta and in the mid-1970s founded De IJsbreker, a centre for modern music in Amsterdam, formally opened in 1979. He taught composition at the Groningen Conservatory (1973–83); among his students were Jacob ter Veldhuis and Frans Vuursteen. He was assistant conductor to the Concertgebouw Orchestra (1973–5) and appeared as a guest conductor with several European orchestras. His death was caused by a brain tumour. Both his brother Maarten Bon (*b* 1933) and his sister Marja Bon (*b* 1948) are concert pianists, the former also a composer and music editor.

Bon's works reflect the serialism and atonality current in the 1960s and 70s, and are usually characterized by transparent, colourful and brilliant instrumentation; they can also on occasions reveal a sense of humour. His inspiration was often literary, and his later works are touched by a French, somewhat Impressionistic idiom, allowing a dramatic, neo-romantic expression which was hardly favoured at the time. In later life he professed a fascination for the music of Arnold Bax.

THEODORE VAN HOUTEN

**Bona, Giovanni** (*b* Mondovì, Piedmont, 10 Oct 1609; *d* Rome, 28 Oct 1674). Italian theologian and scholar. He was a cardinal, a member of the Benedictine order and later its head in Italy. He spent much of his life in Rome, where he was one of the highest placed and most influential theologians (for a summary of his life and works see *DBI*). One of his publications, *Psallentis ecclesiae harmonia: tractatus historicus, symbolicus, asceticus de divina psalmodia eiusque causis, mysteriis et disciplinis, deque variis ritibus omnium ecclesiarum in psallendis divinis officiis* (Rome, 1653, 2/1663 as *De divina psalmodia*), appeared in many editions until well into the 18th century, several times in complete editions of his writings. This work, a history of psalmody, is clear, learned and reliable. The comprehensive range of subjects that it considers includes the modes, the use of the organ and other instruments, and the training of singers, his opinions on which echo the Benedictine and Cistercian rules for church music. □

**Bona** [Buona], **Valerio** (*b* Brescia, *c*1560; *d* Verona, *c*1620). Italian composer. He was a Franciscan friar and had a particular connection with Milan and Venice, where some of his works were printed. He was probably a pupil of Costanzo Porta and became *maestro di cappella* at S Francesco in Vercelli in 1591. He can be traced as having been at S Francesco in Milan in 1596, in Monferrato in 1599, in Mondovi in 1601 and at S Francesco in Brescia in 1611. From 1613 until his death he was most probably at S Fermo Maggiore in Verona, where he was also active as *Prefetto della musica* and where he maintained a relationship with the Accademia Filarmonica.

He was a prolific composer of the Venetian school, working during the transition period between the *prima* and the *seconda pratica*. In strict polyphonic textures, principally in his masses, he adopted a style reminiscent of that of Palestrina, while in other types of composition, such as canzoni, he endeavoured to combine the Gabrieli style of writing for double choirs with monodic writing 'con il partito delli Bassi modernamente composti'. In his theoretical work *Regole del contraponto* (1595) he relied largely upon Zarlino's *Istitutioni harmoniche*; he had already freed himself from exaggerated speculative elements in Zarlino's theory, but reproduced its practical elements, in somewhat haphazard form.

**Bonaccorsi, Alfredo** (*b* Barga, 15 Dec 1887; *d* Florence, 12 May 1971). Italian musicologist. He studied at the Lucca Istituto Musicale (diploma 1913), and took courses in musicology under Heinitz at the University of Hamburg and in music criticism at the Hamburg Conservatory. He was music critic for the newspapers *Il mondo*, *Avanti* and (after 1944) *La voce repubblicana*. From 1952 to 1960 he was lecturer in music history and librarian at Pesaro Conservatory, where he edited the *Bollettino del Centro rossiniano di studi* (1954–60) and the *Quaderni rossiniani*; he also edited the four-volume *Classici italiani della musica* and many volumes for the Accademia Musicale Chigiana and the *Quaderni della Rassegna musicale*.

FERRUCCIO TAMMARO

**Bonachelli, Giovanni** (*b* Seravezza, nr Carrara; *fl* 1642). Italian composer. He is known only by a book of motets for one to five voices and continuo, op.1 (Venice, 1642). Some of the motets have parts for three instruments in addition to continuo, and the volume also includes three sinfonias for three and four instruments. □

**Bonadies Codex** (*I-FZc* 117). *See* SOURCES, MS, §IX, 12 and SOURCES OF KEYBOARD MUSIC TO 1660, §2(i).

**Bonaffino, Filippo** (*b* ?Messina; *fl* Messina, 1623). Italian composer. He published a book of *Madrigali concertati* (Messina, 1623; ed. in Micali). The title-page announces pieces for two to four voices, with continuo, but the book also contains two melismatic solo songs for bass and continuo. Bonaffino, who described himself as 'from Messina', dedicated it to 'Signor Gioanni Watchin [John Watkin or Watkins], English gentleman', for whom the two bass solos may specifically have been intended. In addition to these, the volume comprises seven pieces for two voices, four for three voices and five for four voices, all settings of Marinist texts of a high literary order by, among others, Angelo Grillo, Luigi Groto, G.B. Marino, Maurizio Moro and Ottavio Rinuccini. The collection includes one of the last settings of *Ancidetemi pur*, made popular in the previous century by Arcadelt, and four spiritual madrigals, one in honour of the canonization of the saints Ignatius Loyola and Francis Xavier in Messina in the previous year. All of the madrigals reflect some of the mannerist tendencies found in the concertato style of the period. The melodic writing is rather restrained, but the harmony includes repeated unprepared 2nds and 7ths and 4–3 progressions reflecting the more emotive words of the poems. A few of the pieces are in ternary form (*AAB* or *ABB*).

PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI

**Bonagiunta** [Bonagionta], **Giulio** (*b* S Genesio, nr Macerata; *d* after 1582). Italian composer and editor. From 1561 to 19 April 1562, when he became a canon, he was a soprano at the Santa Casa, Loreto. In 1562 he became a singer at S Marco, Venice, where he stayed until 1567 or 1568. He was also employed as a singer, in exchange for board and lodgings, at the Augustinian convent of S Stefano (where his brother Andrea was a friar) for some months during 1565. In 1566 he accepted employment at Graz, but changed his mind shortly afterwards. By the end of the decade he was a singer and teacher to the Duke of Parma, with whom he remained until at least 1582. While in Venice, he edited two sets of three-voice *canzone napolitane* (RISM 1565[12] and 1566[7]), four books of madrigals (1566[2], 1566[3], 1567[13], 1567[16]) and a book of motets (1567[3]), all for the Scotto press. He was also the editor of a volume of madrigals dedicated to the memory of the poet Annibale Caro (1568[16]). These volumes contain several previously unpublished works by Lassus and Rore, as well as some works (mostly *napolitane*) by Bonagiunta himself.

ANDREA MARCIALIS

**Bonaiuto di Corsino** [Bonaiutus Corsini] (*d* Florence, ?1414). Italian craftsman and composer. He was a painter in Florence of wedding *cassoni*. Around 1379 he was a pupil of polyphonist Andreas de Florentia, and from 1375 to 1395 a leading member of the Compagnia dei Laudesi of S Zanobi. Bonaiuto had a wife and children but around 1402, probably ruined by gambling and by a life of pleasure, he became a priest, generating a scandal that is described in an anonymous sonnet of the period. His ballatas, which are stylistically comparable to Landini's, probably date from the period before his religious vocation, since he is referred to as *pitor* in the unequivocal attributions in *GB-Lbl* 29987; it is uncertain whether a similar attribution in the Florentine section of *I-La* 184, to a *pitor* whose name is illegible, refers to the same musician. Bonaiuto became rector of the church of S Remigio (where the composer Gherardello had been prior) and died during the Florentine residence of the antipope John XXIII.

KURT VON FISCHER/GIULIANO DI BACCO

**Bonaldi, Francesco.** *See* BONARDO PERISSONE, FRANCESCO.

**Bonamici, Ferdinando** (*b* Naples, 1827; *d* Naples, Sept 1905). Italian pianist and composer. He was secretary of the Naples Conservatory and later taught the piano there. He shared the interest, widespread in the 1860s, in raising the level of Italian musical culture by fostering an appreciation of instrumental music and the Classical composers. To this end he founded, on the model of the quartet societies of Florence and other centres, the Circolo Musicale Bonamici. This existed until 1867 and from January 1865 published (again on the model of the Florence Society) the *Monitore del Circolo Bonamici*, which periodically issued biographies of great musicians. He organized the first Italian music congress, which opened in Naples on 15 September 1864. His last years were devoted to teaching and composing. He composed three operas (1871–9), which were not performed, and a large number of piano works, including operatic transcriptions, fantasies and salon pieces typical of the time, a number of which (*Momenti musicali*, *Romanze senza parole, Novellette*) in their intimate and expressive style anticipated the art of Martucci later in the century. He was longest remembered, however, for his studies, especially those for the left hand.

SERGIO MARTINOTTI

**Bonamico, Johann Franz.** ?Austrian composer. *See under* his father GUETFREUND, PETER.

**Bonamico, Pietro.** *See* GUETFREUND, PETER.

**Bonamicus, Cornelius.** *See* FREUNDT, CORNELIUS.

**Bonanni** [Buonanni], **Filippo** (*b* Rome, 11/16 Jan 1638; *d* Rome, 30 March 1725). Italian librarian and bibliographer. He seems to have been a Jesuit. He was chief librarian at the Collegio Romano from 1676; he was also in charge of the archives of the Museum Kircherianum, Rome, of which he compiled the catalogue (Rome, 1709). His other, more important work is the *Gabinetto armonico pieno d'istromenti sonori indicati e spiegati* (Rome, 1722, rev. and enlarged by G. Ceruti with 151 plates engraved on copper by A. van Westerhout, 1776). It is one of the principal documents for the history of 18th-century musical instruments.

SERGIO MARTINOTTI

**Bonaparte.** French family of rulers and patrons. *See under* NAPOLEON I.

**Bonard** [Bonnard, Bonart], **Laurent** (*fl* 1547–54). French composer. He was a priest and *maître des enfants* at Amiens Cathedral between 1547 and 1553. Five of his four-voice chansons were published in Paris by Nicolas Du Chemin between 1550 and 1552 and another, arranged for voice and guitar, was printed by Le Roy & Ballard in 1554. Most of the chansons are courtly *huitains* set in the suave homophonic idiom of Pierre Sandrin and his generation. It is not known whether he was related to the Bonard family of instrumentalists (Roland, his brother Vincent and his sons Nicolas and Pierre), active in Paris in the early 17th century. Alternatively he might be related to Francesco Bonardo Perissone or Iseppo Bonardo.

WORKS

Amour et mort ont faict une alliance (G. d'Avrigny), 4vv, 1550[12]; Amour voyant le travail, 4vv, 1551[9]; Au jour, au joli point du jour, Sup, gui, 1554[33]; J'ay tant souffert pour ung plaisir avoir, 4vv, 1550[12]; Mort et amour un jour se rencontrent, 4vv, 1550[12]; Resveje point, Dieu, 4vv, 1552[4]

FRANK DOBBINS

**Bonardo, Iseppo** (*fl* 1588). Italian composer and instrumentalist. He was employed as a 'sonatore' in the service of the Venetian republic at the time of publication of his collection of three-voice villanellas, *Il primo libro delle napolitane a tre voci* (Venice, 1588).

FRANK DOBBINS

**Bonardo** [Bonard, Bonardi] **Perissone, Francesco** [Bonaldi, Bunaldi, Francesco] (*b* ?1520–30; *d* after 1571). Flemish composer, active in Italy. He probably lived in Paris in the early 1550s. He was *maestro di cappella* at Padua Cathedral between 3 April 1565 and 18 March 1571. He was almost certainly a member of the Accademia dei Costanti in Padua, at least in 1565; his only known book of madrigals is dedicated to this academy. It resembles stylistically works of composers belonging within the Venetian orbit. One cannot eliminate the possibility of his being identical with PERISSONE CAMBIO, but this seems unlikely.

WORKS

Il primo libro di madrigali, 4–6vv (Venice, 1565)
3 chansons, 4vv, 1550[12]; 1 chanson, 4vv, 1551[9]; 1 chanson, 4vv, 1552[4]; 1 chanson, inc., *GB-Lbl*
2 greghesche, 4vv, 1564[16]; 4 napolitane, 3vv, 1565[12]; 2 giustiniane, 3vv, 1570[17]; greghesca ed. S. Cisilino (Padua, 1974)
1 madrigal, 6vv, 1570[15]; 1 madrigal, 3vv, 1586[12]; 1 madrigal, 5vv, 1589[12] (only S by Bonardo)

2 motets, 8vv, 1564[1]

JOANNA WIECKOWSKI/R

**Bonarelli della Rovere, Prospero** (*b* Novellara, nr Reggio nell'Emilia, 5 Feb or Nov 1582; *d* Ancona, 9 March 1659). Italian dramatist. He spent his first years in Novellara with his relative Camillo Gonzaga. He was trained at the court of Ferrara and Modena where he lived with his brother Guidobaldo (a writer of tragedies) and then at the Collegio Borromeo in Pavia. Despite an offer of service with the Este family he established himself in Ancona (*c*1604), retaining his residency when he entered the service of the Medici in Florence. He was a member of various academies (including the Intrepidi of Ferrara, the Gelati of Bologna and the Umoristi of Rome); in Ancona he founded the Accademia dei Caliginosi (7 Jan 1624) and organized the activities of the public theatre of the 'Arsenale'.

Bonarelli's works were performed in various Italian cities and in Vienna, for which court he provided opera-ballettos, pastorals, *tornei* and *intermedi* (*c*1630–38), some of them set to music by Lodovico Bartolaia, for example the *torneo L'Antro dell'Eternità* and the *opera regia La Fidalma* (both for Vienna, 1636). His reputed collaboration with Antonio Bertali is doubtful. Mention of his occasional activity as a composer is found in his *Lettere* (Bologna, 1636), which also contains evidence of his connections with other writers and musicians and sets out his ideas on contemporary dramaturgy. A collection of his dramas, *Melodrami, cioè opere da rappresentarsi in musica*, was published in Ancona in 1647. He may have written the music for the *intermedi Esilio d'Amore* (for Ancona, 1623), but none of his music seems to have survived.

**Bonart, Laurent.** *See* BONARD, LAURENT.

**Bonastre i Bertram, Francesc** (*b* Montblanch, Tarragona, 20 April 1944). Catalan musicologist. While at the diocesan seminary in Tarragona he won the attention of music professor Francesc Tápies, achieving in 1963 distinction in a course at the Tarragona Conservatory. At the Universitat Autònoma, Barcelona, he became a licentiate (1967) and later gained the doctorate (1970) in Romance philology. Concurrently he directed the university Schola Cantorum. In 1973 he co-founded the Societat Catalana de Musicologia and in the same year became a corresponding member of the Real Academia de S Fernando, Madrid. In 1976, newly elected as professor of musicology in his home university, he won a Juan March Foundation's musicological prize enabling him to investigate Antonio Rodríguez de Hita's theoretical and creative enterprises.

In 1981 Bonastre i Bertram founded *Recerca musicològica*, a Barcelona university yearbook that in the double volume xi-xii, 1991–2 (1996), published research articles in Catalan, Spanish, English, Italian and French. Between 1972 and 1993 he discussed Catalonian topics in his articles for *Anuario musical*, and in 1983 began work editing a number of neglected Catalonian works from the 17th century to the 19th. These range from oratorios by Luis Vicente Gargallo, Josep Carcoler's *Stabat mater* and Bernat Beltran's Symphony in E♭ (1798) to Pedrell's orchestral symphonic poem *Excelsior*.

ROBERT STEVENSON

**Bonaventi, Giuseppe.** *See* BONIVENTI, GIUSEPPE.

**Bonaventura da Brescia** [de Brixia] (*fl* Brescia 1487–97). Italian music theorist. He studied in Padua in 1487, but seems to have spent the rest of his life as a friar in the Franciscan convent in Brescia. At the request of a fellow friar he undertook a brief treatise on the fundamentals of music 'for the use of poor and simple religious'. It was first published under the title *Breviloquium musicale* (Brescia, 1497), but all subsequent editions bear the title *Regula musicae planae*. In 42 short chapters Bonaventura covered the Guidonian hand, the staff, note names, hexachords and their properties, clefs, mutation, the 13 species of intervals, modes and intonations. Although the chapter headings are in Latin, the treatise itself is mostly in Italian; this may account for its substantial popularity and success.

Bonaventura's classification of the modes and the discussion of three semitones show his dependence on Marchetto da Padova. This is made explicit in the *Brevis collectio artis musicae* (also called *Venturina*), the earlier manuscript version (1489) from which the printed version was distilled: it quotes extensively from Marchetto's *Lucidarium* and Nicolò Burzio's *Florum libellus*, and parts are taken from D.B. de Francia's treatise (*I-Vnm* lat. VIII. 64=1315). Bonaventura's treatise, however, is

directed towards scholars, and acknowledges the correctness of the Pythagorean division of the tone.

BONNIE J. BLACKBURN

**Bonbarde.** *See* PERRINET.

**Bonci, Alessandro** (*b* Cesena, nr Rimini, 10 Feb 1870; *d* Viserba, nr Rimini, 9 Aug 1940). Italian tenor. After study with Pedrotti and Felice Coen in Pesaro, and with Delle Sedie in Paris, he made his début in Parma (1896) as Fenton in *Falstaff*. In the early years of the new century he was for some time regarded as Caruso's only serious rival, excelling in roles demanding lightness, agility and elegance rather than in the heavier and more dramatic parts. After some appearances at Covent Garden, he scored a great success in New York in 1906, singing in *I puritani* at the opening of Hammerstein's new Manhattan Opera House; but for the next three seasons he transferred his activities to the Metropolitan, where he sang 65 performances of 14 roles. In World War I he served with the Italian Air Force; he made only sporadic appearances thereafter, devoting most of his time to teaching in Milan. In the older repertory he excelled by virtue of the sweetness of his tone and the finish of his phrasing, qualities especially evident in his earlier recordings.

DESMOND SHAWE-TAYLOR

**Bond, Capel** (*b* Gloucester, bap. 14 Dec 1730; *d* Coventry, 14 Feb 1790). English organist and composer. A son of William Bond, a bookseller in Gloucester, he probably attended the Crypt school under his uncle, the Rev. Daniel Bond, before being apprenticed (for £2 10s.) to the cathedral organist, Martin Smith, at the age of 12. In 1749 he moved to Coventry, becoming organist of St Michael and All Angels and, from Easter 1752, organist of Holy Trinity. Both churches were large; St Michael's, then said to be the second largest parish church in England and later to become Coventry Cathedral, housed an exceptionally fine three-manual organ by Thomas Swarbrück. Bond held both posts until his death in 1790, filling them with such distinction that from 1770, in consideration of his 'superior merit and regular attendance', he was given £10 per annum over and above his £30 salary for the Holy Trinity post, as a 'Compliment'. Bond did much to develop musical life in the Midlands. He organized subscription concerts, and under his direction the Musical Society in Coventry became choral as well as instrumental; in 1760 it held a festival, giving *Messiah* and *Samson* with professional choristers from Worcester and Gloucester. Bond directed in the first Birmingham Festival (1768), and brought oratorio to other Midland towns.

The subscribers to Bond's *Six Concertos in Seven Parts* (London, 1766/*R*) included many prominent musicians in the Midlands as well as 12 musical societies. The set has features in common with those published earlier by the Midlands composers Richard Mudge (1749) and John Alcock (1750). Indeed, Mudge's no.1 and Bond's no.1, both trumpet concertos, are closely related. Nos.2–5 in Bond's set are concerti grossi of a more orthodox type, mixing elements of Geminiani, Handel, Stanley and Domenico Scarlatti as arranged by Charles Avison, while no.6, a *galant* bassoon concerto, has points of contact with the bassoon writing in 'Softly rise, O southern breeze' from Boyce's *Solomon* (1742) and, perhaps, Boyce's lost bassoon concerto of 1745.

Nevertheless, Bond's concertos have a quiet individuality and are attractive and fluent. The set is arguably the best produced by an English provincial composer, and two of them were played in the Concerts of Antient Music until 1812. Nos.1 and 6 have been edited by Gerald Finzi (London, 1957, 1964). Bond's only other known music, *Six Anthems in Score* (London, 1769), belongs to the parish church repertory, but has much of the complexity and polish of contemporary cathedral music. It was reprinted five times (1769–77), and nos.2, 4 and 5 appeared in Robert Willoughby's *Sacred Harmony in Parts* (London, 1799).

OWAIN EDWARDS/PETER HOLMAN

**Bond** [Jacobs-Bond], **Carrie** (*b* Janesville, WI, 11 Aug 1862; *d* Hollywood, CA, 28 Dec 1946). American composer and publisher. She showed early talent for improvising songs to her own words and in painting. Her only formal study was with local teachers and at 18 she married E.J. Smith, by whom she had one child. They separated in 1887 and in 1889 she married Frank Lewis Bond. She published her first songs in 1894. Frustrated by difficulties in getting further songs published, and displaying the enterprising spirit that characterized the rest of her life, she formed her own publishing company, Carrie Jacobs-Bond & Son. By performing her songs she cultivated influential contacts. The baritone David Bispham sang a recital exclusively of Bond songs in Chicago in 1901, and friends arranged for her to perform for President Roosevelt at the White House. She published about 175 songs, of which two were highly successful. *I Love you Truly* (1901) sold over a million copies, and *A Perfect Day* (1910) sold eight million copies of sheet music and over five million records. She designed her own music covers, and the wild rose was a prominent image. Her publishing company moved eight times in Chicago to accommodate the growing business, and in 1920 she

moved it to Hollywood. In 1927 she published her autobiography *The Roads of Melody*; in 1928 she stopped composing for a time after her son's suicide. Her last song, *Because of the Light*, was copyrighted in 1944 when she was 82.

WORKS
(*selective lsit*)
*most works published in Chicago*

Songs (texts by Bond unless otherwise stated): 7 Songs as Unpretentious as the Wild Rose (1901); California, the Land of Blossoms (1902); 2 Songs for Contralto: His Lullaby (B. Healy), Longing (1907); Love and Sorrow (P.L. Dunbar) (1908); A Perfect Day (1910); Half Minute Songs (1910–11); A Cottage in God's Garden (1917); Roses are in Bloom (1926); Because of the Light (F. Carlton) (1944)

Arrs. (transcr. M. Gillen and O. Chalifoux): Negro Spirituals of the South (1918); Old Melodies of the South (1918)

Pf: The Chimney Swallows (1897); Memories of Versailles (1898); Reverie (1902); Betty's Music Box (1917)

Principal publisher: Boston Music Co.

PAMELA FOX

**Bond, Graham (John Clifton)** (*b* Romford, 28 Oct 1937; *d* London, 8 May 1974). English jazz, blues and rock musician. Already an established jazz saxophonist, having played with Don Rendell Quintet, Bond was a formative influence on the British Blues revival of the early 1960s, and played in Alexis Korner's Blues Incorporated. He formed the Graham Bond Organisation with Ginger Baker (drums), Jack Bruce (bass) and John McLaughlin (guitar); McLaughlin left after a few months, and Baker and Bruce later formed Cream. The group's combination of blues, rock and jazz was innovative, marked by Bond's distinctive use of the Hammond organ and, later, the Mellotron. Their albums *Sound of '65* (Col., 1965) and *There's a Bond Between Us* (Col., 1966) were influential and presented original songs alongside covers. Bond moved to the USA, releasing the albums *Mighty Graham Bond* and *Love is the Law* (both Pulsar, 1968). They were not well received and Bond moved back to England in 1969, forming a new band, the Graham Bond Initiation. Despite further albums, notably with Pete Brown for *Bond and Brown: Two Heads are Better than One* (Chapter One, 1972), he never regained his early success. In 1973 Bond formed Magus with English folk singer Carolanne Pegg; it disbanded for financial reasons without recording. He died in a rail accident in 1974. Along with John Mayall and Alexis Korner, Bond was one of the great catalytic figures of 1960s rock. He has been called the 'founding father' of British rhythm and blues and the 'father of British blues'.

□

**Bond, Victoria (Ellen)** (*b* Los Angeles, 6 May 1945). American composer and conductor. She studied at the University of Southern California with Ingolf Dahl and at the Juilliard School (MMA 1975, DMA 1977), where her teachers included Roger Sessions, Vincent Persichetti, Jean Morel, Sixten Ehrling and Herbert von Karajan; she was the first woman to be awarded the doctorate in orchestral conducting from Juilliard. After making her American conducting début at Alice Tully Hall, New York (1973), Bond became affiliate conductor of the Pittsburgh SO and music director of the New Amsterdam SO (1978–80). She made her European début with the RTÉ Orchestra, Dublin in 1982 and her Chinese début with the Shanghai SO in 1993. In 1985 she received an award from the National Institute for Musical Theater to assist Christopher Keene at the NYC Opera. She has also appeared with the Houston SO, the Buffalo PO and the Wuhan (China) SO, and held conducting posts with the Albany and Empire State (New York) SO Youth Orchestra (1984–7), the Roanoke (Virginia) SO (1986–95), the Bel Canto Opera Company, New York (1982–8), Opera Roanoke (1989–95) and the Harrisburg (Pennsylvania) Opera (from 1998).

Bond's compositions combine Baroque forms (passacaglia, canon, fugue, etc.) and contemporary techniques such as dissonant counterpoint, 12-tone rows and metric complexity. Some works also show the influence of jazz and Asian music. *Urban Bird*, a programmatic work, quotes two jazz classics: Charlie Parker's *Au private* and John Coltrane's *Blue Train*. Variations on a Theme of Brahms, written during a residency at the Brahmshaus in Germany, is based on a theme from Brahms' String Sextet, op.18. Other important works include the opera *Travels* and the string quartet *Dreams of Flying*.

SAM DI BONAVENTURA, BARBARA JEPSON/ ADRIENNE FRIED BLOCK

**Bondeman, Anders** (*b* Eksjö, 16 Feb 1937). Swedish organist. He studied at the Swedish Royal Academy of Music (1953–9) and then abroad, with Helmut Walcha (Bach interpretation) and Cor Kee (improvisation). He won the international organ competition in improvisation in Haarlem in 1965. After serving as church musician at Bengtsfors (1960–62) and Eksjö (1962–71), he was appointed organist at the Jacobskyrka in Stockholm in 1971 and a teacher at the Royal University College of Music the same year, becoming a professor in 1995. A consummate organist, Bondeman has given numerous concerts in Sweden and abroad and has become known as a leading exponent of modern organ improvisation, which he has also taught at the Royal College of Music. He was made a member of the Swedish Royal Academy of Music in 1989.

HANS ÅSTRAND

**Bondeville, Emmanuel (Pierre Georges)** (*b* Rouen, 29 Oct 1898; *d* Paris, 26 Nov 1987). French composer. He studied the organ at Rouen Cathedral, deputizing for his teacher at the age of ten. Subsequently, he studied with Deré at the Paris Conservatoire, also benefiting from an association with Dupré, to whom he showed all of his works before publication. In the 1930s Bondeville produced orchestral epics and his first opera, *L'école des maris*. In 1936 he was appointed director of the Poste de Radiodiffusion de la Tour Eiffel, later becoming music director of the RTF. He held operatic appointments at Monte Carlo (1945), at the Paris Opéra-Comique (1949) and at the Opéra (1952–70); he was as well known for his administrative abilities as for his compositions. In 1959 he was elected to succeed Florent Schmitt at the Académie des Beaux-Arts, of which he was made secretary in 1964. While better known for his operatic works, Bondeville wrote a number of orchestral works. His *Illustrations pour Faust*, commissioned by Radio France and based on poems by Goethe, shows the influence of Fauré's harmony. The *Symphonie chorégraphique* (1965) demonstrates his ability to combine traditional 19th-century forms with bolder musical elements.

ANDREA MUSK

**Bondini, Pasquale** (*b* ?Bonn, ?1737; *d* Bruneck, Tyrol, 30/31 Oct 1789). Italian impresario and bass. He is first mentioned as a *buffo* bass in Cajetan Molinari's opera company at Prague in the 1762–3 season. He was later a prominent member of Bustelli's company in Prague and Dresden. In 1777 he became director of the Elector of Saxony's new company at Dresden; he also assumed responsibility for Leipzig. Under J.C. Brandes and later J.F. Reinecke as heads of drama the company's repertory also included plays by Shakespeare, Lessing and Schiller. Operas performed included works by virtually all the leading Italian composers of the day. In 1781 Bondini also took over direction of the theatre at Count Thun's palace in Prague and shortly afterwards Count Nostitz's theatre. His company performed at Leipzig mainly in the summer and gave *Die Entführung* there at Michaelmas 1783 and at Dresden on 12 January 1785. But because he and his personnel were so heavily extended by his many activities, Bondini was obliged to engage other troupes and managers. His most important assistant was Domenico Guardasoni, who in 1787 became his co-director and in 1788 or 1789 his successor as impresario of the operatic side of his companies. Johann Joseph Strobach became musical director in 1785, and though the opera ensemble was small, it was highly regarded and very popular.

In December 1786 Bondini mounted *Figaro*, and in January he invited Mozart and his wife to Prague to share in the triumph the opera was enjoying; during his stay Mozart conducted a performance. Before returning to Vienna in February he had been commissioned by Bondini to write *Don Giovanni*; after delays due to illness in the company, the work was first performed on 29 October 1787 with Mozart conducting. His letter to Gottfried von Jacquin of 15–25 October contains valuable but tantalizingly brief comments on Bondini's ensemble and on the preparations for the work. Within a year of the première Bondini's fortunes had waned; ill-health led him to make Franz Seconda responsible for the drama company, and in summer 1789 he handed over his remaining assets before setting off for a visit to Italy. He died at Bruneck on the way.

Bondini's wife Caterina was a popular soprano in her husband's company in the mid-1780s. She sang Susanna in the first Prague production of *Figaro* in early December 1786, and on 14 December a performance was given for her benefit; her praises were sung in poems distributed in the theatre. She created the role of Zerlina in *Don Giovanni*; from the rehearsals dates the anecdote that Mozart taught her to scream effectively during the abduction scene in the finale of Act 1 by grabbing her unexpectedly round the waist.

The Bondinis' daughter Marianna (1780–1813) sang Susanna in the French première of *Figaro* and often appeared with her husband, the bass Luigi Barilli, who was later manager of the Théâtre de l'Odéon in Paris.

PETER BRANSCOMBE

**Bondioli, Giacinto** (*b* Quinzano, nr Brescia, 1596; *d* Brescia, 1636). Italian composer. He was the uncle of Biagio Marini and prior of the Dominican monastery in Venice from at least 1618 to 1625; he subsequently occupied a similar position in Brescia. Six of the eight published volumes of his music have not survived. Two extant volumes of psalms (op.4, Venice, 1622; op.8, Venice, 1627) are respectively for four and five voices; antiphonal elements occur in the later set. The motets, settings of the *Magnificat* and canzonas of his *Soavi fiori* (Venice, 1622) are for two performers and continuo; the vocal works use the concertato techniques fashionable at the time, while the instrumental canzonas tend to be conservative in both length and style. Bondioli is also represented by a canzona for violin and trombone in Marini's op.1 (1617) and by a motet in Leonardo Simonetti's collection *Ghirlanda sacra* (Venice, 1625, 2/1636). He was almost certainly related to the composer Giovanni Bondioli (*fl* 1638), who was in holy orders and associated with Ferrara. A volume of his settings of litanies and Marian antiphons for four voices and continuo was published in 1638.

ELEANOR SELFRIDGE-FIELD

**Bondon, Jacques (Laurent Jules Désiré)** (*b* Boulbon, Bouches-du-Rhône, 6 Dec 1927). French composer. He studied at the Ecole César Franck (1946–8) and at the Paris Conservatoire (1948–53) with Milhaud and Rivier (composition), Dandelot (harmony) and Koechlin (counterpoint and fugue). In 1962 he formed the Orchestre de Chambre de Musique Contemporaine which became the Ensemble Moderne de Paris in 1968. He has been a member of the ORTF music committee (1963–5) and the Commission Nationale de la Musique Populaire (since 1970). In 1981 Bondon became director of the Conservatoire de Paris 20e Arrondissement, Paris. A prolific composer, he has drawn on a wide range of tonal precedents, and also on ideas from science fiction. He was able, without fearing triviality, to write music for the 1968 Winter Olympics in Grenoble, matching the setting in the brittle iciness of his orchestration. In 1972 he was awarded the prize of the Académie du Disque for *Giocoso*. In this three-movement work for violin and string orchestra, Bondon fuses folk and jazz elements with brief excursions into serialism. His percussion quartet *Musique pour un jazz différent* highlights his exploration of the rhythmic potentials of jazz, the use of pitched instruments allowing the rhythmic interplay to be supported by a tonal aspect.

WORKS

(*selective list*)

Stage: La nuit foudroyée (op, 4, Y. Mauffret), 1961–3, concert perf., Paris, 26 Nov 1964, staged Metz, 10 Feb 1968; Les arbres (chbr op, 1, Mauffret), 1964, ORTF, 6 March 1965; Mélusine au rocher (op, 1, S. Lanoux), Radio Luxembourg, 14 Nov 1968, ORTF, 30 Nov 1969; Ana et l'albatross (op, 4, Mauffret), 1970, Metz, 21 Nov 1970; 1–330 (op, 4, J. Goury after E. Zamiatine), 1974, Nantes, 20 May 1975

PAUL GRIFFITHS/ANDREA MUSK

**Bonds** [née Majors], **Margaret Allison** [Jeannette] (*b* Chicago, 3 March 1913; *d* Los Angeles, 26 April 1972). American composer, pianist and teacher. The daughter of a physician, Dr Monroe Alpheus Majors, and his second wife, Estelle C. Bonds, an organist, she first studied with her mother, whose home was a gathering place for black writers, artists and musicians, including the composers Will Marion Cook and Florence Price. In high school Bonds studied piano and composition with Price and later with Dawson; she received the BM and MM degrees from Northwestern University (1933, 1934). She moved to New York in 1939 and in 1940 married Lawrence Richardson, though she retained the surname 'Bonds' (her mother's maiden name) throughout her life. At the Juilliard Graduate School she studied the piano with Djane Herz and composition with Starer; other teachers included Harris.

Bonds won the Wanamaker prize for her song *Sea Ghost* in 1932. In 1933 she was the first black soloist to appear with the Chicago SO, playing Price's Piano Concerto at the World's Fair. During the 1930s Bonds opened the Allied Arts Academy in Chicago, and was active as a pianist in Canada and the USA. In New York she taught and served as music director for music theatre institutions, and organized a chamber society to foster the work of black musicians and composers. Later, she worked at the Inner City Institute and the Inner City Repertory Theater in Los Angeles.

Bonds's output consists largely of vocal music. Best-known are her spirituals for solo voice with or without chorus, but she also wrote large music theatre works, notably *Shakespeare in Harlem*, *Romey and Julie* and *U.S.A.* As a popular-song writer she collaborated with Andy Razaf, Joe Davis and Harold Dickinson; the most popular of their works are *Peachtree Street* and *Spring will be so sad*. Her works for orchestra and for piano are programmatic and reflect her strong sense of ethnic identity in their use of spiritual materials, jazz harmonies and social themes (e.g. *Montgomery Variations*, dedicated to Martin Luther King and written at the time of the march on Montgomery in 1965). Her last major work,

*Credo*, was first performed a month after her death by the Los Angeles PO under Mehta. Some of her arrangements of spirituals were commissioned and recorded by Leontyne Price during the 1960s.

WORKS

Stage: Shakespeare in Harlem (music theatre, L. Hughes), Westport, CT, 1959; Romey and Julie (music theatre, R. Dunmore); U.S.A. (music theatre, J. Dos Passos); The Migration (ballet), perf. 1964; Wings over Broadway (ballet); 4 other music-theatre works

Orch: 4 works, incl. Montgomery Variations, 1965

Choral: The Ballad of the Brown King (Hughes), solo vv, chorus, orch, 1954; Mass, d, chorus, org, perf. 1959 [only Kyrie is extant; reconstructed score in Thomas, 1983]; Fields of Wonder (Hughes), song cycle, male chorus, pf, perf. 1964; Credo (W.E.B. Dubois) S, Bar, chorus, orch, perf. 1972; many other sacred and secular works

Songs: 42, incl. Sea Ghost, 1932; The Negro Speaks of Rivers (Hughes), 1941; To a Brown Girl, Dead (Hughes), 1956; 3 Dream Portraits (Hughes), 1959; The Pasture (R. Frost), 1958; Stopping by the woods on a snowy evening (Frost), 1963

Popular songs: 14, incl. Peachtree Street, collab. A. Razaf, J. Davis, 1939; Spring will be so sad when she comes this year, collab. H. Dickinson, 1940; Georgia, collab. Razaf, Davis, *c*1939

Spirituals (all or most arrs.): 5 Spirituals, perf. 1942 (1964); Ezekiel saw the wheel, 1v, pf (1959), arr. orch, 1968; I got a home in that rock, 1v, orch/pf (1959), rev. 1968; Sing Aho, 1v, pf (1960); Go tell it on the mountain, 1v/chorus, pf (1962); This little light of mine, S, chorus, orch; Standin' in the need of prayer (1v, pf)/(S, chorus); He's got the whole world in his hands, 1v, pf (1963); Ev'ry time I feel the spirit, 1v, pf (1970); I wish I knew how it would feel to be free, S, chorus, orch; Sinner, please don't let this harvest pass (1v, pf)/(S, mixed chorus); 6 others

Pf: 4 works, incl. Spiritual Suite, Troubled Water, 1967

Principal publishers: Beekman Music, Dorsey, Sam Fox, W.C. Handy, Mutual Music Society, Ricordi, Hildegard

BARBARA GARVEY JACKSON

**Bondt, Cornelis de** (*b* The Hague, 9 Dec 1953). Dutch composer. He studied with Jan van Vlijmen and Louis Andriessen at the Hague Conservatory, graduating there in 1984. Since 1988 he has been teaching music theory at this conservatory.

Apart from Andriessen, de Bondt is the foremost composer of what has been coined the Hague School – a direction in Dutch composition characterized by a penchant for loud, angular, percussive sound, a strong emphasis on harmony and rhythm and a Stravinskian objectivity. Typical composers in this never clearly defined group are Huib Emmer, Diderik Wagenaar, and to a lesser extent, Gilius van Bergeijk and Dick Raaijmakers.

De Bondt first attracted attention in 1979 with *Bint*, written for the group Hoketus. *Bint* was process music, a powerful grid of pulses, shifting gradually to ever higher gears. De Bondt's subsequent works all share these qualities of power and process, and the processes soon became increasingly complex. De Bondt was one of the first Dutch composers to use the computer as a composing tool, devising programmes of his own making for ordering, sifting, shifting and controlling the building materials for his monumental compositions.

In the five-work cycle *Het gebroken oor* he explored the domain of 'lost tonality', in search of a dramatic power and a musical hierarchy that, in his view, had disappeared from music after the collapse of tonality. With this aim, he employed fragments of works by Bach, Schoenberg, Purcell, Beethoven and Stravinsky, torn to shreds, stretched in time, and changed beyond recognition.

Several later works feature the use of electronic equipment, with the aim of realizing note durations of extreme length. Among these, *De tragische handeling* (Actus tragicus, 1993), written for the ensemble LOOS, is the most striking example of De Bondt's relentless, highly individual way of composing.

FRITS VAN DER WAA

**Bonell, Carlos (Antonio)** (*b* London, 23 July 1949). British guitarist of Spanish parentage. He began to play the guitar at the age of five, learning with his father, and at ten made his first public appearance. He studied at the RCM with John Williams and Stephen Dodgson (1968–72), and made his London début in 1971. In 1972 he was appointed professor of guitar at the RCM. His international career began in 1975 with tours of Europe and the USA, and in 1978 he made his New York début. In 1983 he formed the Carlos Bonell Ensemble to perform Spanish and Latin American music.

Bonell is a virtuoso performer of sensitivity and refinement. He has a deep natural affinity with the Spanish Romantic repertory, which he interprets with warmth and precision, but is equally esteemed in the music of Ginastera, Britten, Petrassi and Berio. Many composers have dedicated works to him, including Ottavio Négro, Bryan Kelly, Michael Blake Watkins, Stephen Oliver and Douglas Young. He has recorded the complete guitar works of Walton and Britten, and in 1981 made the first digital recording of Rodrigo's *Concierto de Aranjuez*. He has composed for his instrument, and also edited works by Sanz and Tárrega.

GRAHAM WADE

**Bonelli, Aurelio** (*b* Bologna, ?1569; *d* after 1620). Italian composer, organist and painter. According to Eitner and Gerber he was active at Milan about 1600. In 1602 he was organist of the monastery of S Michele in Bosco, Bologna, where between 1605 and 1616 he collaborated with his master Annibale Carracci on a series of frescoes and other paintings. He was still at Bologna in 1620, as organist of S Giovanni in Monte. Only his *Primo libro de ricercari et canzoni* (Venice, 1602) survives complete. Its contents, mostly in four parts, belong to the 'classical' Venetian tradition of instrumental music; they are also found, transcribed into German organ tablature and decked out with organ-style embellishments and diminutions, in a source in the Biblioteca Nazionale Universitaria, Turin (VIII, Giordano, 8), which dates from 1639–40. The two volumes by him that survive incomplete are *Primo libro delle villanelle a tre voci* (Venice, 1596) and *Messe e motetti a quattro voci* (Venice, 1620).

COLIN TIMMS

**Bones.** Concussion idiophones or CLAPPERS. Instruments derived from the ancient use of animal ribs are commonly made of flat hardwood sticks, about 15 cm long and slightly curved. They are played in pairs (usually a pair in each hand); one 'bone' is held between the first and second fingers, pressed to the base of the thumb, and the other, held between the second and third fingers, is clacked against the first with a rapid flicking of the wrist. The bones produce a castanet-like sound capable of great rhythmic complexity. The bones were played in China before 3000 BCE, in Egypt around that date, and in ancient Greece, ancient Rome and medieval Europe. There are occasional references to bones (as 'knicky-knackers') in 17th-century English sources. They are also known in sub-Saharan Africa. In the USA, they are associated primarily with black tradition and the minstrel show. It has been suggested that when the use of drums by slaves was banned in the 18th century the bones were used as a substitute. Their use by black Americans before the 1840s is little documented. In the early minstrel shows, however, the bones were an essential rhythmic constituent in the ensemble (fiddle, banjo, tambourine and bones); they also played solos, usually imitations of drums and horses. There has been a minor revival of interest in playing the bones.

ROBERT B. WINANS

**Bonesi, Barnaba** (*b* Bergamo, 1745/6; *d* Paris, 25 Oct 1824). Italian theorist and composer. His first name has sometimes mistakenly been given as Benedetto. He studied singing under a pupil of Bernacchi, then composition for ten years under Giovanni Andrea Fioroni, *maestro di cappella* at Milan Cathedral. About 1778 he went to Paris, where he lived as a music teacher and composer (there is no evidence for Gerber's statement that he was *maître de chant* at the Comédie-Italienne). Choron was one of his pupils. He composed several operas of which *Le rosier* (Paris, *c*1788) had a good success at the Théâtre des Beaujolais in April 1788, as did his oratorio *Judith* at the Concert Spirituel (3 June 1781). He published in Paris *Six quatuors concertans* (*c*1779) and two collections of symphonies, both lost. He is best known for his *Traité de la mesure, ou de la division du tems dans la musique et dans la poésie* (Paris, 1806). Fétis praised Bonesi's erudition in this work, but criticized him for wrongly identifying musical measure with poetic metre and pointed out his indebtedness to Giovenale Sacchi for some of his ideas.

□

**Bonet, John.** *See* BENET, JOHN.

**Bonet (i Armengol), Narcís** (*b* Barcelona, 22 Jan 1933). Catalan composer. His musical training from 1940 to 1950 was undertaken with Joan Massià, María Carbonell, Joan Llongueres, Eduardo Toldrá and Nadia Boulanger, and he continued his studies in Paris with Igor Markevich (1966–8). In addition to his work as a composer and orchestral conductor, he has taught at the Conservatoire and acted as teaching adviser to the Schola Cantorum in Paris, at the National School of Music in Créteil and at the American Conservatory in Fontainebleau, where he substituted for Boulanger. He was appointed president of the Joventuts Musicales de Catalunya and of the UNESCO International Music Council, and made secretary of Òmnium Cultural (an organization set up in Paris to promote Catalan culture) and of the Spanish Radio and Television SO and Choir. He has also produced a number of programmes for French radio.

His music has won several prizes and has been performed widely in Spain and France. It can readily be identified with 20th-century trends, without betraying its roots in Catalan folk music. He has a gift for communication, and his music's formal coherence reflects his absolute technical mastery. In Bonet's style one can find correspondences with Stravinskian neo-classicism.

FRANCESC TAVERNA-BECH

**Bonet de Paredes, Juan** (*b* Orihuela; *d* Toledo, 25 Feb 1710). Spanish composer. According to Francisco Asenjo Barbieri, he was sent to Madrid when he was still young. His first known musical post was *maestro de capilla* at the collegiate church in Berlanga de Duero (Soria); in 1680 he applied unsuccessfully for a similar position at Palencia Cathedral, but on 26 February 1682 he became *maestro de capilla* at Avila Cathedral. In September 1684 he successfully sought permission to be transferred to Segovia Cathedral following the death of Miguel de Irízar; he was later expelled for 'angry words' with a canon in the course of a procession. On 1 January 1687 he became *maestro de capilla* at the Monasterio de Encarnación, Madrid. According to Barbieri he acted as notary for the Toledo Inquisition in 1688, and from 1691 to 1706 he was *maestro de capilla* at the Descalzas Reales. On 5 November 1706 Bonet succeeded Pedro Ardanaz as *maestro de capilla* at Toledo Cathedral, where he remained until his death.

In 1694 Bonet de Paredes was involved in a dispute over a fragment of a composition by the then master of the Chapel Royal, Sebastián Durón, in which he resolved a sustained note, causing a series of dissonances.

Bonet, subscribing to the conservative wing, did not support Durón's stance. Later Manuel de Egüés, choirmaster of Burgos Cathedral, intervened, relating that 'a heated debate occurred a few years ago between Maestros Paredes and Durón, and the other chapel masters of the principal churches did not approve. I wrote at length on that occasion, condemning Durón [. . .] Whenever I see such positions being adopted, I shall consider them as opposed to the art of music, which consists of very clear and definite rules'.

Most of Bonet's works are in the archives of the cathedrals of Segovia, Segorbe, Burgos, Cuenca and Salamanca, and in the monasteries of El Escorial, Guadalupe and Santa Ana de Avila. He most often writes for two choirs, although there are also works for a solo choir of four voices. A small number of pieces (*tonos*, solos, duos or quartets) are for one or more soloists. His music generally falls within the old-style polychoral baroque style, with basso continuo. In carols such as *Clarísimas luces* he uses two choirs which, by the use of enjambment or by alternating, provide the basis of the musical discourse, whereas in the carols *Ah de la selva* and *Si arrepentida vuelas* he falls back on the contrast between the solo and the rest of the choir. From a formal point of view these carols consist of refrain-couplet, a structure inherited from the 16th century, which indicates Bonet's overall conservatism. While his works show a remarkable mastery of counterpoint and great skill in construction, the fact that he does not take liberties or use bold harmonies deprives his work of a certain freshness.

PAULINO CAPDEPÓN VERDÚ

**Bonetti, Carlo** (*fl* 1648–62). Italian composer. He was an Augustinian monk. He may have received his musical education at Loreto: according to the title-page of his publication of 1662 he was 'in alma aede Lauretana musicae praefectus'. This volume, which appeared in Rome, consists of motets for one to six, eight, nine and 11 voices, together with 12-voice litanies. He is also represented by a sacred piece in two anthologies (RISM $1648^1$ (= $1649^4$) and $1661^1$).

□

**Boneventi, Giuseppe.** *See* BONIVENTI, GIUSEPPE.

**Bonfichi, Paolo** (*b* Livraga, nr Lodi, ?6 Oct 1769; *d* Lodi, 29 Dec 1840). Italian composer and organist. The birthdate given is from his autobiographical sketch in the *Allgemeine musikalische Zeitung*; Fétis gave 16 October and others 17 December. He taught himself to play the harpsichord and organ before becoming a student at the university in Parma, where he also had lessons in figured bass. In 1787 he entered the order of the Servi di Maria and was obliged to give up music, but on being sent to Rome in 1790 for a course of theology, he also studied counterpoint under Guglielmi and began to compose. Returning to Parma after six years, he remained in his monastery until its suppression in 1805. He then settled in Milan as a singing teacher and composer. In 1807 he lost to Asioli in his candidacy for the posts of composition master and *censore* at the conservatory. In 1828 he failed to become *maestro di cappella* at S Petronio, Bologna, but from 1829 to 1839 he held that post at the Santa Casa of Loreto.

Bonfichi composed church music primarily, but also instrumental and vocal works and at least four operas (in his autobiographical sketch he admitted only to the two

serious ones). He was best known for his sacred cantatas and oratorios, most of the latter first performed at Rome, either privately or in the Chiesa Nuova of the Filippini. These were highly regarded for their dramatic style, a quality that caused his church music to be condemned by the reformers later in the century.

DENNIS LIBBY

**Bonfigli, Lorenzo** (*b* Lucca, *c*1800; *d* Lucca, Jan 1876). Italian tenor. The year after his début in 1827 he created the title roles in Luigi Ricci's *Ulisse in Itaca* and Magagnini's *Osmano Pascia* at the Teatro S Carlo, Naples. In 1829 he sang in the premières of Persiani's *Eufemio di Messina* (Teodoto) and *Constantino in Arles* (title role), and the following year created Tebaldo in Bellini's *I Capuleti e i Montecchi* at La Fenice, Venice. His arrogant nature, which on occasion offended Mercadante and Donizetti, nearly provoked a duel with Bellini, to whom Bonfigli complained about the specially written 'E serbato questo acciaro'. He did, however, apologise to the composer following the Cavatina's considerable success.

In 1831 Bonfigli created the duke in Donizetti's *Francesca di Foix* and Nerestano in Mercadante's *Zaira*. He also sang in the premières of Mercadante's *Francesca Donato* (1835) and operas by Granara, R. Manna, Guglielmi, Combi and F. Ricci. His repertory also included Rossini's *Il barbiere di Siviglia* (Almaviva), *Otello* (title role) and *Bianco e Falliero* (Contareno), Bellini's *La sonnambula* (Elvino) and *Norma* (Pollione), Donizetti's *Gemma di Vergy* and works by the young Verdi. His vocalism was florid and agile, but within a central tessitura suited to heroic parts. Initially a *tenore di forza*, he was among those (like Donizelli and Basadonna) who catalyzed the transition to the modern tenor voice. His career continued successfully until about 1847.

RICCARDO LA SPINA

**Bonfiglio** [de Bonfiglio], **Corrado** (*fl* Noto, Sicily, 1636–63). Italian composer and organist. In August 1636 he was appointed organist of the church of the SS Crocifisso, Noto, for three years. Among the witnesses to the contract was Mario Capuana, who was probably his teacher. In 1639 and 1645 he was listed among the city's confessors and canons, and in 1647 he was invested with an ecclesiastical living. The title-page of his *Madrigali spirituali concertati* (Rome, 1663), for two to four voices and harpsichord continuo, describes him as 'maestro di cappella del Senato della città di Noto'. Only one copy of this collection survives, in the museum of Mdina Cathedral. It was dedicated to the Baron of Belludìa, a nobleman of Noto, by the Roman Tomaso Giustiniano, who obtained the manuscript without the composer's knowledge during one of his trips to Sicily and decided to publish it after having 'experienced its artifice in a performance by some of the most exquisite and best Roman musicians'.

The collection contains 22 motets on Italian verses (or spiritual Madrigals), four for two voices (one described as a villotta), 16 for three voices and two for four voices. The erotic nature of the texts, the sacred sublimations of secular love and the musical style, with its contrasting tempos, rhythm and dynamics, all derive from the madrigals of Capuana. The harmony, however, is even bolder and more dissonant than that of Capuana, with anticipations of the tonic above the seventh and the flattened supertonic ('Sicilian leading-note') above the seventh.

PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI

**Bonfilio, Paolo Antonio** (*b* Vivegano, Sardinia, *fl* 1589). Italian composer. His only known publication, *Canzonette alla napolitana a tre voci . . . libro primo* (Ferrara, 1589, inc.), suggests that he was then established in northern Italy since it was published by Baldini, printer to the Duke of Ferrara. The pieces themselves are strophic, cast in the classic light manner with internal repetitions; the final setting, to a dialect text, is somewhat more elaborate and with its alternation of duple- and triple-time sections was perhaps conceived as a dance. Baldini issued Bonfilio's *Canzonette* in the small pocket-sized format favoured by other printers of this repertory, with text and music on facing pages.

IAIN FENLON

**Bongos** [bongo drums]. A pair of small Afro-Cuban single-headed drums with conical or cylindrical hardwood shells; one of the main drum types of Cuba, smaller than the *tumbadora.* They are classified as membranophones: struck drums. Bongos are made from hollowed tree-trunks. The shells, which are joined together horizontally, are of the same height but of different diameters. The heads (membrane or plastic material) are nailed or, in the tunable version, screw-tensioned, in which case the drums – invariably a pair – are tuned to clear high-sounding notes at least a 4th apart. In general, bongos are played with the bare hands, the fingers striking the heads like drumsticks.

Created in Cuba around 1900 to answer the needs of small ensembles, bongos remain integral instruments in Latin-American dance bands, rumba bands and jazz and pop bands. Here it is usual for the player to position the large drum to the right, a common practice in the history of drumming. Great virtuosity is possible, the players obtaining numerous subtle effects of tone control, including glissandos, by pressure from the fingertips, flat fingers and butt of the hand.

Many composers have included bongos in their scores, e.g. Varèse, *Ionisation* (1929–31); Orff, *Astutuli* (1953); and Boulez, *Le marteau sans maître* (1953–5, rev. 1957).

Some have used sets larger than the basic pair: Boulez called for a run of six in *Pli selon pli* (1959–62) and a run of four in *Figures–Doubles–Prismes* (1963). With the development of sets of 'concert toms' (a sequence of eight single-headed drums from 15 cm to 41 cm in diameter) composers began to use them in place of bongos, as the sound is similar (*see* TOM-TOM).

JAMES BLADES/JAMES HOLLAND

**Bonhomme, Andrée (Marie Clémence)** (*b* Maastricht, 1 Dec 1905; *d* Brunssum, 1 March 1982). Dutch composer and pianist. After gaining a teaching certificate in 1927, she studied the piano with Maria Gielen and composition with Henri Hermans. She made her début with the Maastricht city orchestra (conducted by Hermans) in 1928, both as a soloist in Mozart's Piano Concerto K488 and as a composer with her *Drie schetsen* for chamber orchestra. From 1929 to 1942 and from 1944 to 1947 she regularly performed with this orchestra. During World War II she refused to sign a 'non-Jewish declaration', and consequently resigned from the Maastricht city orchestra. In 1932 she was appointed teacher of theory and piano at the music school in Heerlen, where she worked until 1972. She travelled to Paris each summer from 1930 to 1937 to study with Milhaud.

Some of Bonhomme's compositions are late Romantic in style, showing the influence of Franck, others are French Impressionistic in harmony and instrumentation, reminding one more of Ravel and Roussel than of Milhaud. Her earliest works, such as the *Berceuse*, are introverted and delicately composed. Her mature orchestral works avoid heavy brass, but include a colourful array of percussion (*Le tombeau d'Antar*). From Milhaud she may have learned the use of polymelodic lines and chordal juxtaposition without modulating. She liked giving melodic lines to unusual combinations of woodwinds (*Triptique*, *Quatre mélodies de Tristan Klingsor*). She was often inspired by poetry, writing many songs, a number of which she orchestrated.

HELEN METZELAAR

**Bonhomme** [Bonhomio, Bonhomius, Bonomi], **Pierre** (*b* *c*1555; *d* Liège, shortly before 12 June 1617). Flemish composer. He received the tonsure in 1579, and from 1580 to 1584 he was *duodenus mutatus* at the cathedral of St Lambert in Liège. On 13 November 1594, while resident in Rome, he received from Pope Clement VIII a canonry at the collegiate church of Ste Croix in Liège. The *litterae tonsurae* which he presented to the Liège chapter on 26 January 1595 show that he was a native of the diocese of Liège, where he was educated and where he resided from 1595 until his death. His name figures regularly in the chapter records of Ste Croix, particularly in connection with the rebuilding of the organ (2 September 1604), his election as *Grand Chantre* (1608), a pilgrimage to Our Lady of Loreto (2 September 1612), and the proving of his will (12 June 1617). He dedicated his two published works – the 38 *Melodiae sacrae* for five to nine voices (Frankfurt, 1603; Antwerp, 2/1627, with additional motet for ten voices) and the 13 *Missae* for six, eight, ten and twelve voices (Antwerp, 1616) – to the Prince-Bishop of Liège, Ferdinand of Bavaria. Four of his motets were printed in anthologies (RISM 1609[1] and 1613[2]).

In the richness of its harmony, the elegance of its counterpoint, the melodious quality of its vocal lines and particularly in its restrained word-setting, Bonhomme's music is closely akin to that of the Roman school of Soriano and the Nanino brothers (whom he may have known while he was in Rome). His music was copied into several manuscripts (*CZ-RO*, *D-Mbs*, *Rp*, *H-Bn*, *I-Rvat*, *PL-WRu*, *US-Wcu*) and some motets were arranged for organ (*D-Mbs*).

JOSÉ QUITIN/HENRI VANHULST

**Boni, (Pietro Giuseppe) Gaetano** (*fl* 1st half of the 18th century). Italian composer. He has sometimes been thought to be the composer of the opera *Il figlio delle selve*, performed at Modena in 1700, but according to Schmidl this results from a confusion of his name with that of Cosimo Bani. He may have studied in Bologna, since he was recommended from there to Corelli in Rome in 1711 (only Corelli's reply to the letter of recommendation is extant). It has been assumed that he remained in Rome for some time, since his 12 *Sonate per camera a violoncello e cembalo* op.1 were published there in 1717. That year, perhaps as a result of this publication, he was made a member of the Accademia Filarmonica, Bologna. On the title-page of his *Divertimenti per camera a violino, violone, cimbalo, flauto e mandola* op.2 (Rome, n.d.) he is described as a priest. In 1719 he had a *Cantata per la*

*notte di Natale* performed in Perugia; this may be the same piece as the *Cantata per il SS natale di Nostro Signore Giesu Christo*, for two voices and instruments, in manuscript at Manchester (*GB-Mp*). His opera *Tito Manlio* (text by Matteo Noris) was performed in Rome on 8 January 1720 and his oratorio *S Rosalia* at Bologna in 1726. In the libretto of this work he is referred to as *abate*. His 12 *Sonate a violino e violone e cembalo* op.3 were published in Rome in 1741. The set of manuscript sonatas (*I-Bc*) thought by Gaspari to be for keyboard has been shown by Newman to be for violin and continuo.

GUIDO SALVETTI

**Boni (da Cortona), Giovanni Battista** (*d* 1641). Italian harpsichord maker. He originated in Cortona but spent all of his working life in Rome. He was employed at various times by three nephews of Pope Urban VIII to maintain and supply harpsichords, and also to work on chamber organs. His successor in these establishments was Girolamo Zenti. Five surviving harpsichords (only two of which are signed) can reliably be attributed to Boni. Of the two virginals bearing his name (both in the Smithsonian Institution, Washington, DC), only the 1602 instrument might be his work, the 1617 virginals having been made by Bolcioni (see Wraight, 1997). His instruments are chiefly of interest as examples of the Italian practice of using split sharps to provide enharmonically equivalent notes (*see* ENHARMONIC KEYBOARD, esp. fig.1). One harpsichord of about 1619 (private collection) also has divided natural keys in the bass octave, being the earliest example of this.

DENZIL WRAIGHT

**Boni** [Bony], **Guillaume** (*b* St Flour, Auvergne; *d* after 1594). French composer. He was *maître des enfants de choeur* at Toulouse Cathedral and in 1565 participated in a reception for the French royal family and the court, at which were performed some motets and his new nine-voice 'symphony' which won King Charles IX's approbation. The six partbooks of his 1573 collection of 24 motets contain variously Boni's dedicatory epistle in Latin to Charles IX, a Latin eulogy on Boni's motets by the poet laureate Jean Dorat, and another Latin panegyric addressed to Boni by 'Hurealdus', an advocate from Saint-Siège. Three of the five-voice motets from the collection were reprinted in 1580 in Genevan anthologies. In 1576 Du Chemin published 35 four-voice settings by Boni of sonnets by Pierre de Ronsard, following the vogue for his verse among French and Dutch composers (e.g. Monte, Clereau, Castro, Bertrand and Maletty). This collection, edited by Henry Chandor and dedicated to the new king, Henri III, contained a number of errors and was disavowed in a privilege for reprinting granted on 15 September 1576 to Le Roy & Ballard; the latter's edition includes prefatory verses addressed to Boni by Jean Bert, Louis Du Pin and Jean Dorat. 23 more sonnets and a chanson by Ronsard were published in a *Second livre*. Le Roy & Ballard issued at least seven editions of the first book and four of the second between 1576 and 1624; after 1594 the editions of the second book include a sonnet signed by Boni himself, apologizing for publishing the work of his 'tender years' in an age when a 'learned' and new style of music prevailed, no doubt a reference to the *musique mesurée* of Le Jeune and Baïf's Académie. The popularity of Boni's settings was such that both books were provided with sacred contrafacta by the Protestant pastor Simon Goulart and published at Geneva in 1579. In 1576 Boni contributed a sonnet to the *Premier livre des Amours de P. de Ronsard* by Antoine de Bertrand, also active in Toulouse. As a composer 'doucereau Bonin' was mentioned (with Le Jeune, Lassus, Bertrand and others) in a hymn to music by the philosopher-poet J.F. Du Monin, and Le Fèvre de la Boderie's *La Galliade* (1578) referred to the 'heavenly music of Boni and Costeley'.

The motets of 1573 are framed by the joyous five-voice psalms *Cantate Domino* and *Exultate Jesu* and are presented in modal order. The collection presents a sequence of psalms and responsories on the Lenten themes of penitence and redemption, culminating in the moving seven-voice cry for the resurrection of Lazarus, *Fremuit Jesu*. The motet textures are consistently imitative with judicious use of homophonic passages, where tessitura and rhythm (notably elongation and syncopation) are effectively used for word-painting. The tonally orientated modal harmony is occasionally inflected with melodic chromaticism (e.g. E♭–D–C♯, B♭–C–B♮ in *Adesto dolori meo*, 1573) and the dramatic juxtaposition of mediant-related chords. The same tendencies are found in the Ronsard sonnets, but unlike the contemporary Italian madrigal and 'mannerist' chanson, chromatic or unusual chordal juxtaposition is often used for aural variety as much as for verbal expression. Imitation and homophony again alternate freely, but the style is predominantly slow, suave and syllabic. The sonnet structures are conventionally symmetrical, almost invariably using the same music for the initial quatrains and repeating that of the final tercet ($A^1A^2BCC$); in the second book the initial repeat is often replaced with a written-out varied reprise, and the final reprise is sometimes modified or omitted. His texts were gleaned virtually unchanged from the editions of Ronsard's *Oeuvres* that appeared between 1567 and 1572. Like Bertrand, he rarely chose poems previously set by other musicians and the few exceptions show complete thematic independence from other settings; his choice of verses with much personal or mythological reference is unusual.

The 19 *Psalmi Davidici* (1582), also dedicated to Henri III, are composed in motet style and divided into two *partes*; they are generally rather simpler in texture than the motets, the six-voice writing encouraging syllabic clarity and sonority. The *Quatrains* (1582), dedicated to Henri's brother François d'Anjou, are settings of 126 moralistic strophes by Du Faur de Pibrac. They are presented as 21 separate groups each of six quatrains, the first two of which are for four voices, the next two for three and the last two for five (the final group is exceptional in having six voices for all six sections); in the preface the publisher, Adrian Le Roy described the arrangement 'en dix douzaines et six de reste' as following the order of the

modes. Like the psalms, the *Quatrains* are largely syllabic, favouring verbal repetition but avoiding excessive word-painting. Boni's works show him as a restrained composer who shunned contemporary humanists' preoccupation with the chromatic and enharmonic genera, the syncopated fragmented rhythms of the *note nere* madrigal and the quantative metre of the more recent *musique mesurée*.

FRANK DOBBINS

**Bonifacio, Mauro** (*b* Milan, 9 March 1957). Italian composer and conductor. He studied composition with Corghi and the piano with Piero Rattalino at the Milan Conservatory. His conviction that composers should also perform led him to study conducting with Karl Österreicher (Verein Wiener Musikseminar, 1983) and Mario Gusella (Accademia Musicale Pescarese, 1985). He is one of the founders of AGON, a centre for electro-acoustic and computer music in Milan.

Bonifacio's ordered process of construction is often based on a principle of opposition: between, for example, wind and string timbres (*Ondes et cordes*, 1990); suspended and agitated movement, as in *Inquieto* (1993), which sways between rarified sonorities aligned with a slow isorhythm and dense contrapuntal textures built out of rapid, irregular pulses; and, notably, notions of physical and metaphysical time and space, as in *Mar de l'eterno* (1995). In this work, and also in the *Quattro studi* (1998), electronics are used to vary the distance between the resonating sound source and the listening space, in so doing generating new regions of musical tension. Such tension is further achieved in Bonifacio's work through the relationship between harmonic fields and linear chromaticism, at times combined with a use of historical forms and materials (*Il frutto senza nome*, 1994; *Il dio cancellatore*, 1997; *La morte de Didon*, 1999).

MARINELLA RAMAZZOTTI

**Bonighton, Ian (William George)** (*b* Beaufort, Victoria, 4 May 1942; *d* Norwich, 30 May 1975). Australian composer. After training as a teacher, he studied at the Melbourne University Conservatorium (1963–7), where he went on to hold a teaching position (1968–73). The following year he moved to England, where he taught at the University of East Anglia (1974–5). As curator of the Grainger Museum in Melbourne he was responsible for the reconstruction of aleatory works by Grainger, most notably *Random Round*, and with Keith Humble established one of the first electronic music studios at an Australian university. He is remembered for his innovative teaching style and for his introduction of avant-garde music to Australian audiences through the ISCM and the Melbourne Autumn Festival of Organ and Harpsichord. His compositions concentrate on chance elements within specific acoustic environments. After his accidental death, interest in his music was sustained through a series of commemorative recordings.

WORKS

Dramatic: Herod (theatre mosaic), 1971; film scores
Orch: Divertimento, chbr orch, 1965; Org Conc., 1967; Textures, 1967; Concerto grosso, chbr orch, 1968; 3 Pieces, ?1969; Concerto da camera, org, chbr orch, 1972; Variations, 1972; Ensembles, 1973

PHILIP NUNN

**Bonini** [Romano], **Francesco** (*b* Rome; *fl* Bologna, 1630–66). Italian composer, singer, lutenist and theorbo player. He was employed as a theorbo player at S Petronio, Bologna, under the *maestri di cappella* Francesco Milani (1630–49), Alberto Bertelli (1650–57) and Maurizio Cazzati (1657–71). From 1631 he was also a lutenist in the Concerto Palatino, Bologna. He held both posts until 1666 but from 1661, due to ill-health, he was joined by his son Giovanni Battista, who succeeded him at S Petronio. His other son Antonio succeeded him at the Concerto Palatino.

Although Bonini's music is lost, three librettos survive. *Cirillo tradito* (Bologna, 1635), particularly notable for its instrumentation, states that Bonini composed the music, sang in the performance and was a member of the Accademia dei Filomusi, with the name 'Il Raddolcito'. *La Siringa, ovvero Gli sdegni d'amore* (Bologna, 1646), performed at the Teatro Guastavillani during Carnival, was dedicated to Bonini's patron Odoardo Pepoli. *Il Mida* (Bologna, 1647) also bears a dedication to Pepoli, signed by Bonini and Camillo Cevenini.

KATHRYN R. BECKETT

**Bonini, Pietro** [Pier'] **Andrea** (*b* ?Florence, mid-16th century; *d* ? early 17th century). Italian composer. Schmidl suggested that he was born in or near Florence and lived to the end of the 16th century. The title-page of his *Primo libro de madrigali a 5 voci* (Venice, 1591) states that he was the *maestro della musica* at the cathedral at Belluno, in the Venetian Alps. He announced this volume as his first collection, though he had already contributed a three-part canzonetta to an earlier Venetian collection (RISM 1587[7]); it is also his only extant book. It contains 16 five-part works and a seven-part dialogue by him as well as two madrigals by Domenico Pace. Bonini also contributed single pieces to four important madrigal collections (1591[23], 1592[11], 1594[6] and 1598[9]).

The text of *Baci sospiri e voci* (1591[23]) seems to have been used again by Banchieri in his *Zabaione musicale* (1604) for the madrigal concluding the second act. His contribution to *Il trionfo di Dori* (1592[11]) is a sensitive setting of Francesco Corazzini's *Quando lieta e vezzosa* in which the textural and rhythmic contrasts (hemiola on several levels) are skilfully worked out. In the two German versions of this madrigal, *Lucretiae ihr Tugend* in 1613[13] and *Sihe wie fein und lieblich ist es* in 1619[16], music and text are less closely related.

E. HARRISON POWLEY

**Bonini, Severo** [?Jacopo, ?Luca] (*b* Florence, 23 Dec 1582; *d* Florence, 5 Dec 1663). Italian composer, writer on music, organist and poet. His baptismal name may have been either Jacopo or Luca; he adopted the name 'Severo' when he became a monk. He received the habit of the Vallombrosan Benedictines on 3 December 1595 and was professed on 30 April 1598. In 1601 he left Vallombrosa to complete his humanistic and theological studies at the congregation's university at Passignano; he himself reported that young Benedictines at both Vallombrosa and Passignano also received training in plainchant and polyphony and on the organ. He was assigned first to the abbeys of Santa Trìnita (1605, 1609), Ripoli (1607) and S Pancrazio (1608), all in or near Florence. He apparently studied with Caccini during his earlier stay at Santa Trìnita, where he also acquired the patronage of the prior, Simone Finardi; his association with these two men won him entry into Florentine musical circles. During these early years of success he published four collections of music and a poem celebrating the wedding of Prince Cosimo de' Medici in 1608. In the same year he was elected scribe at S Pancrazio, and in 1611 he was appointed organist of Santa Trìnita. By 1613 he had left Florence and became organist of the abbey of S Mercuriale, Forlì; while there he published at least three more volumes of music. Under the patronage of Abbot Ilario Mortani he sang his works before aristocrats and ecclesiastics in the Romagna. In 1615 he was appointed *camarlingo* of the abbey of S Michele in Forcole, Pistoia, and he returned in a similar capacity to S Mercuriale in 1619. From 1623 to 1637 he was curate of S Martino in Strada, a parish in the environs of Forlì. He then spent two more years at S Mercuriale and returned in 1640 to Santa Trìnita, Florence, where he remained organist and *maestro di cappella* until his death.

As a composer Bonini succeeded in assimilating and combining a number of different styles. He was an early, enthusiastic devotee of the new monodic style and an admirer of Giulio Caccini, as is clear from his *Discorsi e regole* and the preface to his *Madrigali e canzonette spirituali* (1607); in this volume he applied Caccini's vocal style to the *lauda* tradition in setting strophic, vernacular, sacred texts as monodies. Two years later, with the concerted motet as a model, he published in his op.3 simple accompanied three-part polyphonic pieces enlivened by concertato motifs and embellishments. Also in 1609, his book of solo madrigals and motets displays a fusion of concerted motet and sacred monody. His setting of a long extract from Rinuccini's *Arianna* (1613), including Ariadne's lament, is one of a number of works at this period influenced by Monteverdi's setting of the lament. The interaction of styles culminated in the *Affetti spirituali* in – to cite the title-page – a 'mixed style' combining the techniques and formal clarity of the concerted motet with the affective language of the 'Florentine style'. Some dialogue motets here are embryonic cantatas consisting of short, alternating sections of recitative and arioso, and the highly ornamented motets of the *Serena celeste* exhibit further experimenting with integrated structures. Bonini continued to write music but published no more. In a letter of 1649 lamenting lack of patronage he claimed a total of ten published and 12 unpublished works. The Vallombrosans had sustained the cost of publishing his music, but that support apparently ceased after 1615, and no manuscripts of his later music are extant.

Bonini's *Discorsi e regole* is traditionally thought to have been completed by 1649–50, although internal

evidence (see Fabbri) prompts a later dating of 1651–5. It is an important source of information about the rise of monody and opera. This ambitiously designed treatise, which also encompasses such traditional questions as music's place in the universe and the origins of music and musical instruments, is informed by Bonini's prejudices and sermonizing tone. His manner is digressive and anecdotal and his heightened language borders alternately on poetry and farce. Some marginal references to sources are misleading, for the discussion is almost entirely derived from Zarlino, Galilei, Caccini, Grégoire de Toulouse and various biblical commentaries. Bonini's main aims were to defend the nobility of music against those who called it 'buffoonery', to prove the superiority of modern music (specifically the *stile recitativo*) over that of antiquity, to maintain that Caccini invented the *stile recitativo* and to endorse (with substantial reservations) the use of concerted music in church. Besides valuable information on contemporary Florentine musicians, he also discussed many composers of polyphonic music.

WORKS

Madrigali e canzonette spirituali, 1v, chit/spinet/other insts (Florence, 1607)

MARYANN BONINO/R

**Boninsegna, Celestina** (*b* Reggio nell'Emilia, 26 Feb 1877; *d* Milan, 14 Feb 1947). Italian soprano. She studied first with Guglielmo Mattioli at Reggio nell'Emilia, where at the age of 15 she sang Norina in *Don Pasquale*, then with Virginia Boccabadati at the Pesaro Conservatory, and in 1897 made her official début at Bari in *Faust*. Subsequently she sang Rosaura in the first Rome performance of Mascagni's *Le maschere*, and made her first appearances at Covent Garden (1904), La Scala (1904–5), Madrid (1905–6) and the Metropolitan (1906–7). She also appeared in Boston (1909–10), Barcelona (1911–12) and St Petersburg (1914), but until her retirement from the stage in 1921 sang mostly in less important theatres in Italy and abroad. She then took up teaching.

Her rich, resonant voice with its wide compass was particularly suited to Verdi, as were her smooth delivery and the dignity and refinement of her vocal line; she was considered one of the finest interpreters of Aida, Amelia, and Leonora in both *Il trovatore* and *La forza del destino*. In an era of dynamic and passionate singing actresses (Bellincioni, Burzio, Carelli, Destinn, Krusceniski), her primitive acting and unfamiliarity with the *verismo* repertory, except for *Cavalleria rusticana* and *Tosca*, prejudiced her career. However, she scored a great success on gramophone records, being one of the first dramatic sopranos whose voice recorded well.

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

**Bónis, Ferenc** (*b* Miskolc, 17 May 1932). Hungarian musicologist. At the Budapest Academy of Music he studied composition with Szervánszky (1949–52) and musicology with Bartha, Kodály and Szabolcsi (1952–7), taking the doctorate there in 1958 with a dissertation on Mihály Mosonyi. He worked as an editor at Hungarian Radio (1950–52, 1957–70), where he was director of youth music programmes (1970–94). Concurrently he worked at the musicology institute of the Hungarian Academy of Sciences (1961–73); he was reader in musicology at the Budapest Academy of Music (1972–80). He was awarded the Erkel State Prize in 1973. He became president of the Ferenc Erkel Society (1989), and president of the Hungarian Kodály Society (1991). He was a guest lecturer at the University of Cologne.

Bónis is an outstanding scholar of Hungarian music history. As editor of the *Magyar zenetudomány* (from 1959), *Magyar zenetörténeti tanulmányok* (from 1968) and the collected writings of Bence Szabolcsi (from 1977) he has proved to be a many-sided representative of Hungarian musicology in the tradition of Bartók and Kodály. Of particular importance are the two volumes of Szabolcsi's writings and three volumes containing all Kodály's articles and studies (1964–89). *Magyar zenetörténeti tanulmányok* contains studies in virtually every sphere of musicology (including complete lists of works, bibliographies, correspondence data, cultural history, the history of music publishing companies and plate-number research). Bónis is also a leading authority on Bartók, particularly the iconography. He has recorded the reminiscences of Bartók and his contemporaries (*Így láttuk Bartókot* ('Thus we saw Bartók') and *Így láttuk Kodályt* ('Thus we saw Kodály')), which have become an important part of biographical research. Of equal importance are

the facsimile editions, accompanied by large-scale studies, of Bartók's *Dance Suite* and Kodály's *Psalmus hungaricus*.

JÁNOS DEMÉNY/ZSUZSANNA DOMOKOS

**Bonis, Mélanie (Hélène)** [Mel-Bonis] (*b* Paris, 21 Jan 1858; *d* Sarcelles, Seine-et-Oise, 18 March 1937). French composer. She used the pseudonym Mel-Bonis. Born into a middle-class family, Bonis began piano lessons at an early age and made remarkable progress. A family friend, Professor Maury of the Paris Conservatoire, introduced her to César Franck in 1876. The following year she was admitted to the Conservatoire, where she studied harmony with Ernest Guiraud and the organ with Franck. She won second prize in harmony and accompaniment in 1879, and first prize in harmony a year later. Claude Debussy and Gabriel Pierné were also students during her years there.

Bonis married Albert Domange in 1883, and for about ten years devoted herself to raising a family. She began composing regularly in about 1894, writing more than 300 compositions, most of which were published. Among her works are 20 chamber pieces, 150 works for piano solo, 27 choral pieces, and organ music, songs and orchestral works. Her music was warmly praised by Camille Saint-Saëns, Célestin Joubert and Pierné. Already unwell, she suffered acutely the death in 1932 of her younger son; she died five years later. Her children assembled a memoir from her notebooks and published it as *Souvenirs et réflexions* (Paris, n.d.).

JUDY TSOU

**Boniventi** [Boneventi, Bonaventi, Beneventi], **Giuseppe** (*b* Venice, ?1670–73; *d* ?Venice, after 1727). Italian composer. He was born some time between 1670 and 1673 according to several membership lists of a Venetian musicians' guild (*I-Vas*) and was no more than 20 years old when his first opera, *Il gran Macedone*, was staged at the Teatro S Cassiano, Venice, in November 1690. His composition teacher Legrenzi, under whom he may have sung at S Marco, had died earlier that year, but may have recommended Boniventi to the Mantuan court where he later found employment. His first opera was dedicated to Ferdinando Carlo Gonzaga, Duke of Mantua, and in 1708 the libretto for his *Armida* designated him *maestro di cappella* there, a position he may have assumed as early as 1702 but which ended with the duke's death in 1708. On 10 January 1712 he entered the service of the Margrave Karl III Wilhelm of Baden-Durlach as *maestro di cappella*. With an orchestra of 34 players (in 1715–16) he directed about six operas annually, although only one of his own was given (*Armida al campo*, 1717). His salary of 500 florins, plus expenses and a servant, far exceeded that of all other musicians including J.B. Trost and J.P. Käfer whose German operas dominated the Margrave's

theatre. Court records show that, some time before 15 May 1718, when nearly all his Italian singers had been replaced by Germans, Boniventi left Durlach. His opera *La virtù tra nemici* was performed at Venice in the 1718 carnival season, so in all probability he had returned to Italy in 1717. However, the libretto of *Filippo re di Macedonia* (1720) still refers to him as the Margrave's *maestro di cappella*. He wrote operas for Turin and Venice during the next three years but no information about his subsequent career has come to light except the libretto for an opera, *Bertarido, re dei Longobardi*, composed for Venice in 1727.

SVEN HANSELL (with OLGA TERMINI)

**Bonizzi, Vincenzo** (*b* Parma; *d* Parma, 17 July 1630). Italian composer and instrumentalist. In Parma he studied the viola with Orazio Bassani and the organ with Claudio Merulo; his fellow students included Camillo Angleria and Girolamo Diruta. He was already in Ferrara, in the service of Lucrezia d'Este, Duchess of Urbino, when he published his first book of *Motecta* in 1595, and he may have been there from about 1582 when Lucrezia created her own *concerto di dame*, the members of which had been fellow students of Bonizzi. On 1 February 1599, soon after the death of Lucrezia, he moved to the Farnese court at Parma, where he stayed for many years as an organist and *maestro di cappella*. On 15 October 1610 he was appointed organist of Madonna della Steccata, a post once occupied by Merulo. He resigned on 25 April 1614 but resumed the position on 31 January 1619, when he was also appointed *maestro di cappella*. In July of the same year he was appointed organist of Parma Cathedral and in the summer of 1627 was also appointed *maestro di cappella*, holding both posts until his death.

Bonizzi was better known as a performer than as a composer. While his first book of *Motecta*, for four to eight voices (Ferrara, 1595), reflects the religious activities of Lucrezia and her circle in Ferrara, his only other surviving publication, *Alcune opere di diversi auttori a diversi voci, passagiate principalmente per la viola bastarda, ma anche per ogni sorte di stromenti, e di voci* (Venice, 1626[15]/*R*), contains the music he wrote for the three female viola da gamba virtuosos from the Avogadri family. The collection includes embellished madrigals and chansons by 16th-century composers. One of the madrigals, *La bella e netta e igniuda mano*, had appeared earlier in the *Lezioni di contrappunto* (MS, 1621–2, *I-Bc*) of F.M. Bassani, Orazio Bassani's nephew, but with different embellishments.

ARGIA BERTINI/DINKO FABRIS

**Bonizzoni, Eliseo** (*fl* 1569–74). Italian composer. In 1569 he was in the service of Sforza Pallavicino, then General of the Venetian Republic, and some time between this date and 1574 he took holy orders. Only two of his works are extant: *Il primo libro delle canzoni a quattro voci* (Venice, 1569) and *Delli Magnificat a quattro voci ... libro primo* (Venice, 1574). The fact that the earlier of these is dedicated to Giovanni Francesco Sanseverini, Count of Colorno (near Parma), and that it contains three pieces by Pietro Taglia, then active in Milan, suggests Bonizzoni's wide-ranging contacts.

IAIN FENLON

**Bonlini, Giovanni Carlo** (*b* Venice, 7 Aug 1673; *d* Venice, 20 Jan 1731). Italian amateur musician and writer. He published anonymously at Venice in 1730 a detailed catalogue of the operas performed in the city to that time: *Le glorie della poesia e della musica contenute nell'estatta notizia de' Teatri della città di Venezia, e nel catalogo purgatissimo dei drammi quivi sin'hora rappresentati, con gl'auttori della poesia e della musica e con le annotazioni ai suoi luoghi propri*. Drawing on earlier works by Leone Allacci and Cristoforo Ivanovich, Bonlini provided valuable information about the history of Venetian opera, and particularly about the works of Monteverdi and Cavalli. His work was continued by the Venetian Antonio Groppo, who published in 1745 a *Catalogo di tutti drammi per musica recitati ne' teatri di Venezia dall'anno 1637 ... fin all'anno presente 1745*.

**Bonmarché** [Bonmarchié, Bon Marchier], **Jean de** (*b* ?Douai, *c*1520–25; *d* ?Madrid, Sept 1570). Franco-Flemish composer. He may have been the Joannes Bonmarchié who took degrees at the universities of Leuven (1547) and Douai. Jean de Bonmarché was dean of Lille Cathedral and was appointed master of the choirboys at Cambrai Cathedral in 1560. Contemporary accounts describe him as an able composer over 40 years old with a poor singing voice. In a letter dated 30 November 1564, Margaret of Austria, Duchess of Parma and Regent of the Low Countries, offered him the position of master of Philip II's Flemish chapel in Madrid, a post that had recently become vacant because of the death of Pierre de Manchicourt. Bonmarché accepted the post on either 17 or 26 December, left the southern Netherlands on 14 April 1565 and arrived in Madrid on 8 June. Philip wrote to the Duke of Alba on 16 September 1570 requesting a new master for his Flemish chapel because his own had died a few days earlier.

One motet by Bonmarché, *Constitues eo principes*, survives in a printed collection (RISM 1568[7], ed. L.J. Wagner, Athens, OH, 1987). It is an impressive quadruple canon in which a notated four-voice choir gives rise to a canonic second choir. His remaining known works are now lost. The Cambrai Cathedral archives contain records of payments made to him in 1561 for a motet for the feast of St Anthony, one for the feast of St Claude and hymns and motets composed for the feast of St Luke. The cathedral also possessed a *Te Deum* with the title 'Pater de Sainte-Claire' and a seven-voice mass, both of which were copied in 1568. The 1597 inventory of choirbooks in the Palacio Real, Madrid, mentions a mass and a motet by him.

JOHN D. WICKS

**Bonn.** German city in North Rhine-Westphalia. Drusus built a Roman stronghold on the existing settlement in 10 BCE. In Frankish times two Christian settlements were formed round the respective centres of the Dietkirche (later the Stiftskirche) and the Cassiuskirche, the latter being named Villa Basilica *c*800 and Civitas Verona *c*1000; this Verona is mentioned in the sequence *Majestati sacrosanctae* (Analecta hymnica, lv, no.150). The Cassiuskirche had connections with the churches of St Gereon in Cologne and St Viktor in Xanten, all three dedicated to martyrs of the Theban legion. In 1244 Bonn was accorded civic rights; in 1257 it was designated the residence of the electors, which it remained until 1794. From 1949 to 1991 it was the capital of the Federal Republic of Germany.

At the Cassiuskirche Gregorian and German hymns were sung, but not polyphonic works. The oldest records, in the chapter rolls of 1568, mention the choirboys and their director as 'Choralen' and 'Pincernatus'; by a contract of 8 October 1568 Servatius Christiani was appointed organist. Documents of 1595 refer to two organs. The choral manuscripts of Bonn are of little importance; apart from a few 18th-century processionals, those extant consist only of a gradual of the Poppelsdorfkirche with sequences and a gradual with tropes (1728) of the Engeltal monastery. The editor of the *Theatrum musicae choralis* (1782) was a Bonn chorister, Reiner Kirchrath. During the Reformation, the Protestant *Bönnisches Gesangbüchlein* (1544), an important source for hymns of both confessions, was compiled, and reprinted 31 times up to 1603.

Only a few names bear witness to musical life at the court in the 16th century: Jean Taisnier, Jacobus de Kerle, Antonius Gosswin and Jean de Castro. The heyday of the

Hofkapelle, much influenced by Italian music, began during the first half of the 17th century under the Elector Ferdinand with the careers of Gilles Hayne, Francesco Foggia, Carlo Farina, Bartolomé de Selma y Salaverde and Massimiliano Neri. Later reigning princes encouraged music and practised it themselves; the Elector Joseph Clemens attempted composition, and his successor Clemens August played the viola da gamba. Joseph Clemens's musicians included Johann Christoph Pez, and among those who served Clemens August were Gioseffo Trevisani, Hieronymus Donnini, Joseph Zudoli, Joseph Touchemoulin, Joseph-Marie-Clément Dall'Abaco, Joseph Karl Gottwald, Francesco Zoppis, Anton Raaff, Johann Ries, Johann Peter Salomon and Gilles van den Eeden. The last two electors, between 1761 and 1794, employed among others Andrea Lucchesi, Gaetano Mattioli, Josef Reicha and his nephew Antoine, and the two cousins Andreas and Bernhard Romberg. Beethoven's grandfather Ludwig was conductor of the electoral orchestra, his father Johann a tenor, and Beethoven himself a viola player and organist. Throughout his life he maintained a warm friendship with the old violin teacher Franz Ries and his son Ferdinand, and also with Nikolaus Simrock, the horn player who founded the important music publishing firm.

During the electoral period the opera and theatre were dominated by companies from elsewhere – in 1745 Pietro Mingotti's Hamburg company under J.B. Locatelli, and in 1757 and 1764 that of Angelo Mingotti. Between 1767 and 1771 smaller Italian companies appeared. In 1771 Lucchesi came with his ensemble; in 1779 Neefe worked with the Grossmann company at the Bonner Nationaltheater (opened 1778) with a repertory of *opera buffa*, *opéra comique* and Singspiel. In the post-electoral period the repertory was of vaudeville and theatre music resembling that of the Cäcilia Wolkenburg in Cologne; Peter Grabeler, Anton Mohr and Johanna Kinkel were the chief contributors. The theatre, destroyed during World War II, was replaced by the Theater der Stadt Bonn on another site in 1965.

In the late 18th century music in Bonn was fostered in the aristocratic houses of Metternich, Belderbusch and Hatzfeld. In the Zehrgarten in the market place the widowed Frau Koch and her attractive daughter Babette drew together an artistically minded circle of townspeople and students (to which Beethoven belonged, as did Eleonore von Breuning, her brothers, Franz Wegeler and the teacher Neefe), to whose Dilettanterien people paid subscriptions. The so-called 'Minervalkirche von Stagira', founded under Neefe's leadership in 1781 as the Bonn branch of the Illuminati, was dissolved in 1785, but its intellectual interests were reasserted in the Bonn Lesegesellschaft (founded in 1787), which has continued as a literary and recreational society.

In the first half of the 19th century Heinrich Carl Breidenstein was the chief promoter of musical life; the Städtische Akademische Singverein, which he founded in 1823, continued until 1853, while a Musikverein bei der Lese- und Erholungsgesellschaft, which he forged from three existing societies in 1834, was dissolved the next year. A rival group of enthusiastic singers was immediately formed under Peter Grabeler in 1826–9; after his death in 1830 it was directed by the classical scholar Friedrich Heimsoeth, who had made his name by performances of early *a cappella* music in the Minorite church (now St Remigius). The rival academic and civic societies were reconciled for special occasions, such as the unveiling of Ernst Hähnel's Beethoven memorial in 1845. The Concertverein (founded 1852) has continued since 1861 without interruption as the Städtische Gesangverein. During the years 1827 to 1848 a highly individual music circle was maintained by the gifted Johanna Mockel (later Mathieux and, from 1843, Kinkel), a keen composer, whose group of singers, the Bonner Gesangverein, gave performances of opera and oratorio with piano accompaniment. The Concordia, the oldest continuing men's choral society, was founded in 1846 out of the Liederkranz (founded in 1838). Instrumental music was fostered by the privately subsidized Orchesterverein (founded in 1843 by Breidenstein) and the Beethovenverein (founded in 1850 by Ludwig Bischoff) until in 1911 a permanent municipal orchestra was organized, the ground having been prepared from 1907 onwards by the appearances of Heinrich Sauer and musicians from Koblenz, who played in Bonn in the winter and in Bad Neuenahr in the summer. The post of municipal director of music, salaried from 1859, was held successively by Albert Dietrich, Joseph Brambach (1861), W.J. von Wasielewski (1869), Leonhard Wolff (1884), Hugo Grüters (1898), F. Max Anton (1922), Gustav Classens (1932), Otto Volkmann (1949), Volker Wangenheim (1957–79), Gustav Kuhn (1983–5), Dennis Russell Davis (1987–95) and Marc Soustrot (from 1995). Wolff and Grüters introduced Reger's works to Bonn.

Beethoven matriculated in the faculty of philosophy at the Academy (described by Braubach as the bulwark of the Enlightenment on the lower Rhine), which in 1786 was raised to the rank of university; the present university was founded in 1818. Bonn has the oldest institute of musicology in Germany, Breidenstein's Musikalischer Apparat, established in 1823. Breidenstein completed his *Habilitation* in 1824 and was given a professorship in 1826. He was instrumental in gaining the Klein collection of 550 manuscripts and *c*150 18th-century publications for the university. His successors as professor have included Leonhard Wolff (1891), Ludwig Schiedermair (1915), under whose direction the Musikwissenschaftliches Seminar was founded in 1919, Joseph Schmidt-Görg (1948), Günther Massenkeil (1966) and Eric Fischer (1992).

Since 1889 the Verein Beethoven-Haus has looked after Beethoven's birthplace and its collections (seeillustration); since 1890 the Verein has run a biennial series of concerts of chamber music. In 1956 it inherited a Beethoven collection from H.C. Bodmer of Zürich. On the centenary of Beethoven's death (1927) the Beethoven Archives Research Institute was founded as the Stiftung beim Verein Beethoven-Haus under the direction of Schiedermair, whose successors have included Joseph Schmidt-Görg (1945–72), Martin Staehelin (1976–83) and Sieghard Brandenburg. In 1947 the Reger Institute began its activities as the Elsa Reger Foundation.

Schumann died at Bonn-Endenich in 1856, and the town of Bonn arranged the Schumann house as a memorial building. Schumann was buried in the old cemetery in the centre of the town, as was his widow; this was also the burial ground of Beethoven's mother and of Mathilde Wesendonk and Elsa Reger.

The Johannes Klais firm of organ builders was founded in Bonn in 1882.

HANS SCHMIDT

**Bonnal, (Joseph) Ermend** [Ermend-Bonnal, Joseph; Marylis, Guy] (*b* Bordeaux, 7 July 1880; *d* Paris, 14 Aug 1944). French organist and composer. At the Paris Conservatoire, he studied piano with Charles-Wilfrid Bériot, organ with Guilmant and composition with Fauré. A disciple of Tournemire and Albert Périlhou, he sometimes deputized for them at Ste Clotilde and St Sévérin (where he met Saint-Saëns), while he was titular organist at St Médard in Paris and at Notre-Dame in Boulogne-sur-Seine. In 1920 he became director of the Bayonne Conservatory, which flourished under his leadership up until the occupation, while he also found the time for yet another post as organist of St André in Bayonne and for composition. His organ symphony *Media Vita*, first performed in 1932 at the competition of the *Amis de l'orgue*, drew attention to his music. In 1942 he succeeded his master Tournemire at Ste Clotilde, where he remained until his death in 1944.

He left a substantial number of works composed in a wide variety of genres, from popular dances (published under the pseudonym of Guy Marylis) to his oratorio *Poèmes franciscains* (1930). His organ music is an original body of work, indebted to the harmonic language of Vierne and to the modality and rhythmic freedom of Tournemire. Steeped in the atmosphere of the Basque country, his works are also characterized by a fondness for nature and the Impressionist nuances suggested by changing light. This is expressed in Bonnal's organ music from the *Paysage landais* (1904) onwards, and above all in his evocative *Paysages euskariens* completed in 1931, which concludes with 'Cloches dans le ciel', a grand carillon reminiscent of similar pieces by Vierne.

FRANÇOIS SABATIER

**Bonnard, Laurent.** *See* BONARD, LAURENT.

**Bonnefond, Simon de** (*fl* Clermont-Ferrand, 1551–7). French composer. According to the title-page of his five-voice *Missa pro mortuis* (Paris, 1556), he was a canon and master of the choirboys at Clermont-Ferrand. Three four-voice chansons by him were included in anthologies also printed by N. Du Chemin in Paris (1551[9] and 1557[10]). The Requiem includes the introit, Kyrie, Sarum gradual (*Si ambulans*), Sanctus, Benedictus, Agnus Dei and communion. The five voices are retained throughout the polyphonic sections; the cantus firmus is occasionally presented in the upper voices, with the lower voices paraphrasing the chant in imitation.

FRANK DOBBINS

**Bonnel, Pietrequin** [Pierre]. *See* PIETREQUIN BONNEL.

**Bonner, Eugene MacDonald** (*b* Washington, NC, 1889; *d* Taormina, Sicily, 8 Dec 1983). American composer and critic. He attended the Peabody Conservatory, Baltimore, where he studied composition with Brockway and the piano with Ernest Hutcheson. He went to England in 1911 and remained there until 1917, when he enlisted in the US Army. After the war Bonner worked in Paris, where he studied conducting under Albert Wolff, 1921–7. He then returned to New York and served as music critic for *The Outlook* magazine (1927–9) and several newspapers, including the *Daily Eagle*, *Daily Mirror* and

*New York Herald Tribune*. In all Bonner composed five orchestral works, four chamber works and five operas. The orchestral piece *Whispers of Heavenly Death* (1925) and a suite from his opera *La comédie de celui qui épousa une femme muette* (1923) were performed by the Baltimore SO.

The stylistic ferment in the musical world during Bonner's lifetime had little, if any, effect on his work. His early compositions carry considerable Puccinian influence, a trait that has never fully left his scores. Although displaying an occasional chromatic tartness, his music for the most part remains conservative. It has been described as delicate and containing a sweetness not uncommon to works of the 18th-century Italian repertory.

CHARLES H. KAUFMAN

**Bonnet, Jacques.** *See* BOURDELOT family, (3).

**Bonnet, John.** *See* BENET, JOHN.

**Bonnet, Joseph** (*b* Bordeaux, 17 March 1884; *d* Sainte Luce, PQ, 2 Aug 1944). French organist and composer, active in the USA and Canada. He studied first with his father, who was organist of Ste Eulalie in Bordeaux, and at the age of 14 became organist at St Nicolas at Bordeaux and then of St Michel, where he gave his first recital in 1901.

Bonnet worked with Tournemire in Paris, then with Guilmant at the Conservatoire, gaining a *premier prix* in organ and improvisation in 1906. From 1906 to 1944 he was organist at St Eustache in Paris, and in 1911 was appointed organist of the Société des Concerts du Conservatoire. Heir of Guilmant, he toured widely in France and Europe, and from 1917 in the USA and Canada, where he frequently appeared as teacher and recitalist. In 1921 he established the organ class at the University of Rochester, NY, and he contributed to the creation of the Institut Grégorien de Paris in 1923. In 1937 he succeeded Vierne as professor at the Ecole César Franck, and in 1940 founded the organ class at the Montreal Conservatoire.

Bonnet was one of the first to record, in the 1930s, the works of Grigny and Marchand. His recital programmes, which covered organ repertory from the 12th century onwards, were published in six volumes as *Historical Organ Recitals* (New York, 1917–40). He was also involved in an edition of the works of Bach, and in one of Frescobaldi. A perfectionist and man of high ethics, Bonnet was also a Benedictine oblate. His works for organ, which include the *Variations de concert*, *Poèmes d'automne* and three volumes of *Pièces d'orgue*, opp.5, 7 and 10, are still played in recital; elegant in style, they are characterized by traditional harmony and rigorous counterpoint.

GILLES CANTAGREL

**Bonnet, Pierre** (*b* ?Limousin; *fl* 1585–1600). French composer. He composed his first book of *airs* (Paris, 1585) while in the service of Georges de Villequier, *gouverneur et lieutenant general* of the Haute and Basse Marche, at Chauvigny in Poitou. Printed after the dedication (to his employer) are two poems in Bonnet's praise, one by Jean Dorat and the other by J. Megnier, who wrote:

> . . . Bonnet, qui de son art heureux
> La passion, l'esprit & le coeur genereux
> Esmeut, charme et ravit doucement par l'oreille.

The collection contains 20 pieces for four voices, 16 for five, two for six and one for eight, mostly composed in the new homophonic style. Settings of amorous courtly verse by Desportes, Bertaut, Baïf and others found in earlier settings by Guillaume Tessier, Salmon and La Grotte alternate with more rustic villanelles in a dance-like vein; the collection ends with a noël for an angel solo and shepherds' chorus. An enlarged edition dated 1588 referred to Bonnet as 'Chantre de la Royne mère du Roy' (i.e. Catherine de' Medici).

A second collection, *Airs et villanelles* for four and five voices, was dedicated to a new patron – Gaspard de Rochechouart, Marquis de Montemart. Its music reflects the new monodic trend with some interesting dialogues, in two of which a solo soprano alternates with a four-voice chorus (*Le poète et les muses* and the more melismatic *Sonnet en dialogue sur la mort d'une demoiselle*, 'where the upper voice represents the lady and the answering chorus Charon'). There are written-out diminutions in the upper voice at some of the cadences, and, more unusually in this new declamatory style, dissonance is here and there treated with considerable freedom, notably with regard to accented passing notes and appoggiaturas, as in ex.1*a* and *b*.

WORKS

Premier livre d'airs, 4–6vv (Paris, 1585, 3/1588)

Airs et villanelles, 4, 5vv (Paris, 1600, 2/1610): 10 ed. in FCVR, v (1926/*R*); 1 ed. in Lesure, *Anthologie de la chanson parisienne* (Monaco, 1953); 1 ed. in Durosoir

10 sacred contrafacta, 1615[9]; 1 in 1619[9]; 3 in 1621[9]

FRANK DOBBINS

**Bonnet-Bourdelot, Pierre.** *See* BOURDELOT family, (2).

**Bonney, Barbara** (*b* Montclair, NJ, 14 April 1956). American soprano. She studied at the University of New Hampshire, then in Salzburg, where she sang with several choirs. In 1979 she joined Darmstadt Opera, making her début as Anne Page (*Die lustigen Weiber von Windsor*), also singing Blonde, Cherubino, Adina, Gretel, Gilda, Ilia, Massenet's Manon and Natalie (Henze's *Prinz von Homburg*). At Frankfurt (1983–4) she sang Aennchen (*Der Freischütz*), Norina, Marzelline and Papagena. In 1984 she made her débuts in Munich and at Covent Garden as Sophie (*Der Rosenkavalier*), a role she has also sung at the Vienna State Opera (1994). She sang Pamina at La Scala (1985) and in Zürich (1986), where she returned in 1989 as Susanna. Meanwhile, Bonney made her Metropolitan début in 1988 as Naiad (*Ariadne auf Naxos*), followed by Adèle (*Die Fledermaus*), Sophie, Nannetta (*Falstaff*) and Susanna. She sang Despina at San Diego (1991), Eurydice (Gluck's *Orfeo*) at Geneva (1995) and Alphise in Rameau's *Les Boréades* at the Salzburg Festival and the Proms (1999). As a concert singer she has appeared in works such as Brahms's *German Requiem*, Haydn's *Creation*, Handel's *Acis and Galatea* and Mahler's Fourth Symphony. She is also a fine lieder singer and has recorded songs by Purcell, Mozart, Mendelssohn, Wolf, Strauss, Grieg and Zemlinsky. Born with perfect pitch, she has a beautiful, pure-toned voice, a charming personality and sings with an assured sense of style. (J. Allison: 'Barbara Bonny', *Opera*, l (1999), 905–14)

ELIZABETH FORBES

**Bonno, Giuseppe** [Bon, Josephus Johannes Baptizta; Bono, Josef] (*b* Vienna, 29 Jan 1711; *d* Vienna, 15 April 1788). Austrian composer of Italian origin. The son of an imperial footman from Brescia, he received his first musical instruction from the court composer and Kapellmeister of the Stephansdom, J.G. Reinhardt. In 1726 Charles VI sent Bonno to Naples, where he remained for ten years, studying composition (primarily of church music) with Francesco Durante and dramatic composition with Leonardo Leo; he also had singing lessons. In 1732 he made his début as a composer with the pastorale *Nigella e Nise* (text by G.C. Pasquini).

In February or March 1736 Bonno returned to Vienna. On 26 July of that year his *festa di camera* in one act, *L'amore insuperabile*, was performed to celebrate the name-day of the Archduchess Maria Anna, and on 1 October *Trajano* was performed, the first of several stage works written for the birthday of Charles VI. The following year he applied unsuccessfully for the post of court composer. Kapellmeister J.J. Fux, who judged him 'as yet insufficiently trained in the rudiments of counterpoint', recommended instead that he be appointed as a 'court scholar in composition', with himself providing the necessary instruction. On 6 February 1739 Bonno was made a court composer. With the oratorio *Eleazaro*, written the same year, he succeeded in capturing the taste of the Viennese public. On 25 January 1740 he married Elizabeth Staltzinger (1714–61); four children of the marriage survived. From about 1749 to 1761 Bonno was Kapellmeister to the household of Field Marshal Joseph Friedrich, Prince of Sachsen-Hildburghausen, in Schlosshof and Mannersdorf, where his fellow musicians included Gluck (1754–6) and Dittersdorf (1751–61). During the winter Bonno directed the prince's Friday evening concerts at the Palais Rofrano (now the Palais Auersperg) in Vienna.

In 1774 Bonno succeeded F.L. Gassmann as Kapellmeister to the imperial court in recognition of his particular talent 'in the composition of chamber music and stage works'. He was later assisted in this position by Antonio Salieri, his eventual successor, who conducted the Italian opera when Bonno was unable to do so. Bonno also succeeded Gassmann as conductor of the Tonkünstler-Societät, the benevolent society for musicians' dependants, which he also served from 12 February 1774 as vice-president, and from 1775 as president, replacing Prince Khevenhüller. By 1781 or 1782 ill-health had forced him to give up his direction of the society's concerts; on 1 March 1788 he relinquished his position as president, and at the same time retired from his court duties.

Bonno was a highly esteemed figure in Viennese musical life. He collaborated closely with Metastasio, composing the first settings of the poet's *Il natale di Giove*, *Il vero omaggio*, *Il re pastore*, *L'eroe cinese*, *L'isola disabitata* and *L'Atenaide, ovvero Gli affetti più generosi*. Of *Il re pastore*, Metastasio wrote to Farinelli, 'The music is so graceful, so well adapted and so lively, that it enchants by its own merit, without injuring the passion of the personage, and pleases excessively'. Bonno was also notable as a teacher: both Dittersdorf and Marianne von Martínez studied composition with him. Dittersdorf remarked that he had 'an extraordinary gift for teaching singers'; his singing pupils included Therese Teyber, Karl Frieberth and Katharina Starzer.

Bonno composed principally operas, oratorios and, after his withdrawal from the operatic stage in 1763, church music. Stylistically he stands between the late Venetian Baroque style that survived in Vienna with Fux and Caldara and the Classicism of Gluck and Haydn. True to his Neapolitan training, he was not a reformer like Gluck; he thoroughly mastered the difficulties of opera and was generally content to work within the conventions of his time, though a growing concern for greater dramatic realism occasionally affected the melodic and rhythmic style of his recitative. His orchestration rises above the routine, showing a taste for colourful instrumentation and picturesque effects. Especially in his later operas he synthesized the Neapolitan style of his early training with the late Venetian style in Vienna; the arias have mellifluous Neapolitan melodies as well as contrapuntal forms. His oratorios contain French overtures and fugal arias, while his use of extended ritornellos and his preference for da capo form are striking. His church music reflects the increasingly secular approach of the time: the liturgical text is often subordinated to the music, giving rise to instances of incongruous word setting.

WORKS

OPERAS

*unless otherwise stated, first performed at Vienna at the Burgtheater, MSS in A-Wn; catalogue in Breitner 1961*

L'amore insuperabile (festa di camera, 1, G.C. Pasquini), 26 July 1736

Trajano (festa di camera, 1, Pasquini), 1 Oct 1736
La gara del genio con Giunone (serenata, 1, Pasquini), Laxenburg, 13 May 1737
Alessandro Severo (festa di camera, 1, Pasquini), 1 Oct 1737
La generosità di Artaserse (serenata, Pasquini), 4 Nov 1737
La pace richiamata (festa di camera, Pasquini), 26 July 1738
La pietà di Numa (festa di camera, 1, Pasquini), 1 Oct 1738
La vera nobilita (festa di camera, Pasquini), 26 July 1739
Il natale di Numa Pompilio (festa di camera, 1, Pasquini), 1 Oct 1739
Il nume d'Atene (festa di camera), 19 Nov 1739
La generosa Spartana (serenata, 1, Pasquini), Laxenburg, 13 May 1740
Il natale di Giove (azione teatrale, 1, P. Metastasio), Vienna, Favorita, 1 Oct 1740
Il vero omaggio (componimento drammatico, 1, Metastasio), Vienna, Schönbrunn, 13 March 1743
Danae, 1744, ?unperf., lost
Ezio, 1749, ?unperf., lost
Il re pastore (dramma per musica, 3, Metastasio), Vienna, Schönbrunn, 27 Oct 1751
L'eroe cinese (dramma per musica, 3, Metastasio), Vienna, Schönbrunn, 13 May 1752
Didone abbandonata, 1752 (Metastasio), unperf., lost
L'isola disabitata (azione teatrale, 1, Metastasio), Aranjuez, 31 May 1753
L'Atenaide, ovvero Gli affetti più generosi, 1762 (azione teatrale, 2, Metastasio), unperf.
Il sogno di Scipione, 1763 (Metastasio), unperf.
Music in: Catone in Utica, 1742; L'Armida placata, 1750

ORATORIOS

*full thematic catalogue in Breitner, 1961*

Eleazaro (azione sacra, 2, ?Pasquini), Vienna, Hofkapelle, 1739
San Paolo in Athene (azione sacra, 2, Pasquini), Vienna, Hofkapelle, 31 March 1740
Isacco figura del redentore (azione sacra, 2, Metastasio), Vienna, Palais Rofrano, 18 March 1759, ed. in IO, xxi (1987)
Il Giuseppe riconosciuto (azione sacra, 2, Metastasio), Vienna, Tonkünstlersocietät, 20 March 1774

SACRED

*thematic catalogue in Schienerl, 1925, and 'Catalogo', A-Wn*

Masses: 23 in C, 3 in G, 2 in D, 2 in F, 1 in A, B♭, E♭; frags., *D-Bsb*, *GB-Cfm*; 2 Requiem, c, E♭
Grads: Benedicia; Domine praevenisti; Felix es; Lauda Sion salvatorem; O virgo tristissima; Propter veritatem; Requiem aeternam; Specie tua; Victime Paschali; Viderunt omnes fines
Offs: Assumpta est; Beata es virgo; Domine Jesu Christe; Haec dies; Sacerdotes; Sacerdotes Domini; Tui sunt coeli; Veni dilicta sponsa; Veni sponsa; Veritas mea
Other works: 2 TeD; 3 Litaniae de Beata Vergine, F, G, C; 50 Proprium songs; 3 Ambrosian hymns; 3 Mag ants; 3 vesper hymns; Asperges me; Magnificat; Pange lingua, *I-Gl*, *Nc*; Salve regina; Tantum ergo; Laudate Dominum; Vidi aquam, *A-HE*; Cum sancto spiritu, 5vv, in The Fitzwilliam Music, iii (London, 1825), 54; In tento terrae jubilo, *CZ-Pak*; Per campos colles portanta, *Pak*

OTHER WORKS

Arias (in *A-Wgm*, *D-Dl*, *MÜp*, *SWl*, *GB-Lbl*, *I-Nc*; catalogue in Breitner, 1961): Ah per voi la pianta umile; Amen se non poss' sequie l'amato; Alla selva, al prato, al fonte; In pensar che men sdegnose; Odia la pastorella; Pastorella io giurei; So che la gloria perde; So che pastor son io; Tu sai come t'amo
Inst: Fl Conc., G, *D-KA*; Sinfonia a 4 a il giorno natalizo di Carlo VI, *A-Wgm*; Sinfonia a 3, G, *I-Mc*; Sym., D, *D-Rtt*; waltzes, *I-PLcon*

RUDOLPH ANGERMÜLLER/RON RABIN

**Bonnus** [van Bunnen, Bunnus, Bonnius], **Hermann** (*b* Quakenbrück, 1504; *d* Lübeck, 12 Feb 1548). German evangelical theologian and hymn writer. In 1523 he entered Wittenberg University, where he was a pupil of Luther and Melanchthon, both of whom later became his friends. From 1525 he held various teaching posts in Greifswald (until 1527), Gottorf (the Danish prince's household, in 1528), and Lübeck (1530) before being appointed first senior minister there in 1531 by Bugenhagen. Bonnus played an important part in promoting the Reformation in Lübeck, and in 1543 was also active in Osnabrück, where he drew up an evangelical liturgy in which he proposed that psalms should be sung in schools. Back in Lübeck he revised the Rostock hymnal, which Slüter had published in Low German in 1531. Bonnus added some of his own hymns in a second volume, *Enchiridion: geistlike Lede und Psalmen* (Lübeck, 1545), among which was *Ach wir armen Sünder*, still found in some German hymnals. *Hymni et sequentiae*, intended for school use, appeared posthumously (Lübeck, 1559). Bonnus may be regarded as the creator of the Low German hymn.

**Bono, Pietro.** *See* PIETROBONO DE BURZELLIS.

**Bonomi, Pierre.** *See* BONHOMME, PIERRE.

**Bononcini** [Buononcini]. Italian family of musicians.

**(1) Giovanni Maria Bononcini (i)** (*b* Montecorone, nr Modena, bap. 23 Sept 1642; *d* 18 Nov 1678). Composer and theorist. He probably left his provincial home while still a boy to study in Modena with Marco Uccellini, who in 1641 had initiated an important tradition of Modenese violinist-composers (antedating the more famous Bolognese school by about 15 years). As to his other training, Bononcini himself reported in his treatise *Musico prattico* that he studied counterpoint with Padre Agostino Bendinelli. However, he was never a pupil of Colonna in Bologna, nor did he serve in the orchestra at S Petronio or as *maestro di cappella* at S Giovanni in Monte, as has sometimes been stated; these posts were held by his eldest son, (2) Giovanni. The confusion seems to have originated with a letter of 1686 from Giovanni to Colonna, which

appears in the first volume of La Mara's *Musikerbriefe aus fünf Jahrhunderten* (Leipzig, 1886) with the incorrect date 1656. On 19 February 1662 Bononcini married Anna Maria Prezii. Of their eight children, only (2) Giovanni and (3) Antonio Maria survived; each was to enjoy an international career as a composer. After publishing three books of sonatas, Bononcini received a dual appointment in 1671 as violinist at the cathedral and chamber musician of the Dowager Duchess Laura d'Este. An intriguing sketch (*c*1670) drawn by Giovanni Antonio Pistocchi in a copy (*I-Bc*) of the violino primo part of Bononcini's *Varii Fiori* reveals that Bononcini also played the *violoncello da spalla*, a large instrument held over the shoulder and sometimes strapped to the chest.

Bononcini's predilection for counterpoint, perceptible in his earliest publications, became fully evident in the canons of op.3 (1669), which included a puzzle canon whose authorship was challenged by critics. Bononcini replied not only in the dedication of op.4 (1671) but also in the brief unpublished *Discorso musicale* (reproduced by Valdrighi and Klenz). In the dedication of op.4, Bononcini also indicated that he had finished preparing his *Musico prattico*, first printed in 1673, the year he succeeded Padre Mario Agatea as *maestro di cappella* of Modena Cathedral. Apparently a favourite of the duchess, he won her recommendation and was elected unanimously before the cathedral chapter received a message from her 13-year-old son, Francesco II, supporting Giuseppe Colombi. In the face of the *fait accompli*, the young duke acceded, but in the following year Colombi obtained the post as head of the votive chapel by applying before Bononcini. From op.6 on (1672–8) Bononcini used the title 'Accademico filarmonico'. No records appear to document his membership in the celebrated academy, but Bononcini's ties with Bologna, especially to the publishers Monti and Silvani, suggest that his claim to the title was justified. His treatise circulated widely and may have served as a model for the academy.

Bononcini composed only instrumental music up to op.9 (1675), but in his last years he turned to vocal genres. Besides two sets of cantatas and a volume of madrigals, he produced *I primi voli dell'aquila austriaca*, a *dramma da camera* of which only the libretto is extant. He seems to have been the first to have used the term 'cantata per camera', and his cantatas were probably performed for occasional academic activities at Modena. He dedicated the chamber opera and madrigals, as well as *Musico prattico*, to Emperor Leopold I, which no doubt helped to prepare the way for the eventual engagement of both his sons at the Habsburg court.

Four months after the death of his first wife, on 29 June 1677, Bononcini married Barbara Agnese Tosatti. A son, (4) Giovanni Maria (ii) (called Angelo), was born on 18 November 1678, an hour after his father's death.

Bononcini's sonatas represent the highest achievement of the late 17th-century Modenese instrumental school. Along with north Italians such as Cazzati, he transformed the sectional, canzona-style sonata into one consisting of several distinct movements. His *sonate da camera* show many French characteristics, perhaps reflecting the taste of the duchess, who was Mazarin's niece. His dances include the most popular French and Italian types, as well as some that combine features of the two traditions, and are probably among the last examples to be used for actual social dancing. A cycle of dances known as the brando (branle) was common at the Modenese court; examples of such brando-suites appear in collections by Bononcini and contemporaries such as Colombi, Vitali and Uccellini. In Bononcini's opp.1 and 2 the brando consists of several sections followed by a *gavotta* and one or two correntes. Some flexibility with regard to the number of performing instruments can be seen in the *sonate da camera*; dances in four parts may be played *a due* by omitting the second violin and violone, leaving only the first violin and *spinetta* (the keyboard instrument preferred by Bononcini for the continuo in secular music). The forms of the *sonate da chiesa* of opp.1 and 6 are still closely related to the mid-17th-century canzona, but in the five mature pieces of op.9 Bononcini tended to alternate affective, homophonic movements with quicker contrapuntal ones in patterns that, like the brando-suites, anticipate Corelli.

Bononcini's harmony stands at the threshold of major–minor tonality. He seems to have been the first theorist to accept a tonal answer as 'regolare'. Filled with the traces of modality and rapid tonal shifts that characterize much middle Baroque music, his sonatas nevertheless show awareness of basic key relationships, the circle of 5ths and secondary harmonies. Bononcini rarely exploited mere technical virtuosity; he made only sparing use of the scordatura effect favoured by Uccellini, and he never required fingering above the 3rd position on the violin. For variety, he instead called upon his skill as a contrapuntist, and naturally excelled in the fugal movements of the *sonate da chiesa*. He occasionally demonstrated his contrapuntal skill by writing abstract compositions such as the canons of op.3 or the concluding sinfonia of op.5, which can be performed in retrograde. His influence on Purcell seems entirely plausible: Maria Beatrice, the daughter of Laura d'Este, married the Duke of York (the future James II) in 1673 and probably took the latest Italian instrumental music to England with her. Bononcini's sonatas continued to be printed in England by Walsh as late as the 1730s.

As a theorist, Bononcini conforms to the broad traditional format of Zarlino's *Istitutioni harmoniche*, but his rules for consonance and dissonance, recognition of freedoms in accordance with the *seconda pratica* and full acceptance of the tonal answer reveal his basic agreement with contemporary harmonic practice. The reprints of *Musico prattico* (Venice, 1678; Bologna, 1688) and its wide distribution (about 80 copies in libraries throughout Europe and the USA) attest to its influence in the decades after Bononcini's death. The second half of the manual appeared in a German translation (Stuttgart, 1701), which served as a model for chapters on the fugue in J.B. Samber's *Manuductio ad organum* (Salzburg, 1704), J.G. Walther's *Praecepta der musicalischen Composition* (Weimar, 1708) and Mattheson's *Vollkommene Capellmeister* (Hamburg, 1739).

WORKS

op.

1 Primi frutti del giardino musicale, 2 vn, bc (Venice, 1666); 10 sonate da chiesa, 5 dances ed. in Klenz (1962); sonata no.6 ed. in Hausmusik, cxxx (Vienna, 1952) and Diletto musicale, cdxlv (Vienna, 1969)

2 Delle sonate da camera e da ballo, 2 vn, bc (Venice, 1667); 8 dances in Klenz (1962)

3 Varii fiori del giardino musicale, overo Sonate da camera … aggiunta d'alcuni canoni, 2–4 str (2 vn/va/vle), bc (Bologna, 1669/*R*); 6 canons, 5 dances, 2 sonate in Klenz (1962); 1 canon, 12vv, in GMB

4 Arie, correnti, sarabande, gighe, & allemande, vn, vle/spinet (Bologna, 1671); ed. M. Abbado (Milan, 1968); 10 dances in Klenz (1962)

5 Sinfonia, allemande, correnti, e sarabande, 5–6 str (2 vn/tr viol/ a viol/t viol/vle), bc, aggiunta d'una sinfonia a quattro, che si può suonare ancora al contrario (Bologna, 1671); 6 dances in Klenz (1962)

6 Sonate da chiesa, 2 vn, bc (Venice, 1672/*R*); ?Eng. edn (?1721); see Smith (1948), no.604, and Smith (1968), no.224; 7 sonatas in Klenz (1962); 1 sonata ed. in Mw, vii (1954)

7 Ariette, correnti, gighe, allemande, e sarabande, 1–4 str (2 vn, va, vle) (Bologna, 1673); repr. as A Second Set of Bononcini's Aires, 2 fl, b (London, 1711); 6 dances in Klenz (1962)

9 Trattenimenti musicali, 2–3 str (2 vn/vle), bc (Bologna, 1675); 4 sonate da chiesa, 4 dances, 1 sonata da camera in Klenz (1962)

10 Cantate per camera a voce sola, libro primo, S and/or B, bc (Bologna, 1677/*R*)

11 Madrigali, 5vv, libro primo (Bologna, 1678)

12 Arie e correnti, 2 vn, vle (vc) (Bologna, 1678); as Ayres in 3 Parts, 2 vn, hpd (London, 1701); as Aires, 2 fl, b ad lib (London, 1705), with numerous transpositions, ed. F.J. Giesbert (Mainz, 1939) for 2 rec/a, bc; ? as Preludes, allemandes ..., 2 fl/vn, bc (Amsterdam, n.d.); 3 dances in Klenz (1962)

13 Cantate per camera a voce sola, libro secondo, S/A/B, bc (Bologna, 1678)

I primi voli dell'aquila austriaca del soglio imperiale alla gloria (dramma da camera, V. Carli), Modena, Teatro di Corte, June 1677; only lib extant

Guidita (orat, Giardini), undated, possibly by Giovannini Bononcini, music lost, lib. *I-MOs*

1 sonata da chiesa, 2 vn, org, in 1680[7]; ed. in Klenz (1962)

THEORETICAL WORKS

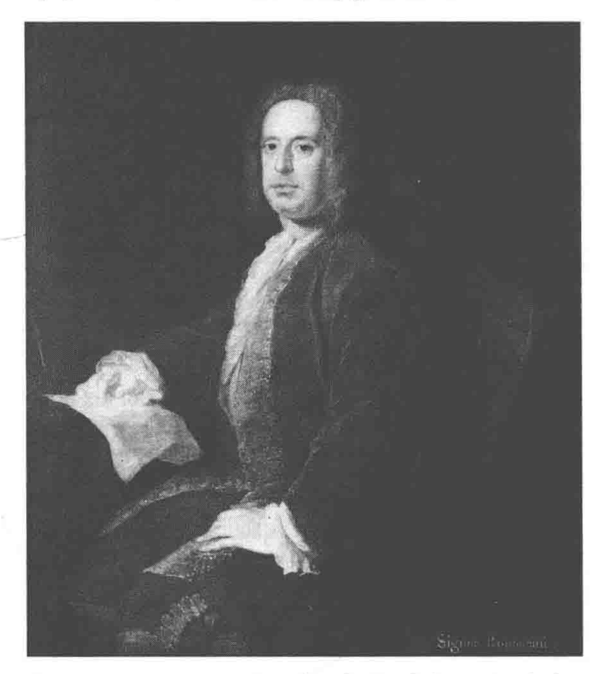
*Musico prattico che brevemente dimostra il modo di giungere alla perfetta cognizione di tutte quelle cose, che concorrono alla composizione de i canti, e di ciò ch'all'arte del contrapunto si ricerca*, op.8 (Bologna, 1673/*R*; Ger. trans. of pt. ii, Stuttgart, 1701)

**(2) Giovanni Bononcini** (*b* Modena, 18 July 1670; *d* Vienna, 9 July 1747). Composer and cellist, son of (1) Giovanni Maria Bononcini (i).

1. Life. Giovanni Bononcini moved to Bologna when his father's death made him an orphan at the age of eight. There he studied counterpoint with G.P. Colonna at S Petronio; at the age of 15 he published three instrumental collections and was accepted into the Accademia Filarmonica on 30 May 1686. During the next two years he published three more collections, was engaged at S Petronio as a string player and singer, composed two oratorios which were performed in both Bologna and Modena, and succeeded G.F. Tosi as *maestro di cappella* at S Giovanni in Monte. For this church he wrote the double-choir masses that were printed as his op.7 in 1688. He composed a new oratorio for Modena in 1690, and in 1691 dedicated his op.8, consisting of well-wrought vocal duets, to Emperor Leopold I and played in the orchestra of the papal legate, the Roman Cardinal Benedetto Pamphili.

In 1691 Bononcini went to Rome, where he entered the service of Filippo Colonna, his wife Lorenza, and her brother Luigi della Cerda, the Spanish ambassador. The librettist Silvio Stampiglia had served the Colonnas since the 1680s, and from 1692 to 1696 he and Bononcini created six serenatas, one oratorio and three, possibly five, operas. The last of these, *Il trionfo di Camilla*, was produced at Naples after Luigi della Cerda became Spain's viceroy there. Bononcini was accepted into the Congregazione di S Cecilia by October 1695, and on 20 May 1696 he was one of the seven musicians proposed as founding members of a 'chorus', or performance wing, of the Arcadian Academy. Perhaps this 'chorus' performed at meetings, for on Bononcini's opera and oratorio librettos of 1737 he termed himself 'Arcade e Filarmonico'. In Rome he taught young musicians, the evidence for which is a sonnet in praise of his teaching by Giuseppe Valentini. According to Geminiani, *Camilla* 'astonished the musical world by its departure from the dry, flat melody to which their ears had until then been accustomed'. By 1710 it had been produced in 19 other Italian cities and in London. These productions were probably all based on Bononcini's setting, which should thus be regarded as a touchstone of Italian taste around 1700.

A few months after the death of his Roman patron Lorenza Colonna in August 1697, Bononcini was accepted into the service of Leopold I in Vienna. There he earned the unusually high salary of 5000 florins a year from 1698 to 1712. Between 1698 and 1705 Leopold's heir, Joseph, contributed 2000 florins to this salary, and Bononcini was clearly Joseph's favourite composer: six of his ten dramatic works performed at the court during Leopold's reign were dedicated to the heir or his wife. In 1702 the War of the Spanish Succession caused an interruption of musical festivities in Vienna, so Bononcini led a group of musicians to Sophie Charlotte's court in Berlin, where he became the centre of the queen's daily musical life and composed two 'petites bagatelles', *Cefalo* and *Polifemo*. He apparently went to Italy during the year of mourning for Leopold's death (May 1705 to June 1706): a new opera by him was produced at Venice during Carnival 1706.



By 1706 Bononcini was famous throughout Europe. Raguenet, who had seen the 1698 production of *Camilla* in Rome, declared in 1705 that more than 200 cantatas as well as entire operas by Bononcini were known in Paris, where he was the 'modèle pour le gracieux'. In London 63 performances of *Camilla* were given from 1706 to 1709, an attempt was made to attract Bononcini himself in 1707, arias from his works were inserted into eight pasticcios produced during the period 1707–11, and he was regarded as 'indisputably the first' among cellists. Gasparini ended his 1708 treatise with praise for the '*bizzaria*, beauty, harmony, artful study and fanciful invention' in Bononcini's cantatas, of which about 300 are extant. According to Benedetto Marcello, the standard cantata which singers gave at auditions was Bononcini's *Impara a non dar fede*.

During Joseph's reign (1705–11) Bononcini set seven operas and five shorter dramatic works. His great favour probably prompted Joseph to engage his brother (3) Antonio and his former librettist, Stampiglia. These three were not retained by Joseph's successor, Charles VI, though Stampiglia and Giovanni did write a serenata for the new empress's arrival at Milan in 1713. Giovanni Bononcini then entered the service of Charles's ambassador at Rome, Johann Wenzel, Count Gallas. His service began with a 1714 serenata and a 1715 opera, both written in collaboration with Paolo Rolli, and he remained musical director at the embassy until the count's death in July 1719. The predominant taste in Rome was conservative. Alessandro Scarlatti and Francesco Gasparini were still highly favoured, and the latter wrote in 1715 that Bononcini 'had truly composed items worthy of paradise'.

In summer 1719 the Earl of Burlington was on his second trip to Italy, and it was he who was chiefly responsible for obtaining Bononcini as a composer for the Royal Academy of Music in London. Bononcini went to London in October 1720, and his first two seasons were outstandingly successful, perhaps largely because the ruling taste in London was as conservative as that in Rome: five of his works (including *Muzio Scevola*, for which he wrote only Act 2) accounted for 82 of the 120 performances given by the Royal Academy of Music; his *Cantate e duetti* were engraved with an impressive list of 238 subscribers; and his *Divertimenti da camera* appeared in two editions, a plain one for an accompanied treble instrument and an ornate edition for harpsichord alone. At the end of his second season he was commissioned by Francis Atterbury, dean of Westminster, to write the anthem for Marlborough's funeral and by the Duchess of Buckingham to set the choruses ending the acts of her late husband's play, *Marcus Brutus*.

The duchess was a notorious Jacobite, and Atterbury was imprisoned for treasonous Jacobite activities in August 1722. Mainly because of his Jacobite acquaintances and Italian Catholic heritage, Bononcini soon saw his London success ruined. Even though his operas had led the Royal Academy to its only profitable season in 1721–2, the directors apparently did not re-engage him in autumn 1722. His *Erminia* was produced in March 1723, but it seems to have been written mainly for a Parisian production, with singers from the Royal Academy, in July 1723; this production was cancelled, but Bononcini and at least Anastasia Robinson did perform in Paris during the summer. The Royal Academy re-engaged Bononcini for 1723–4, but cabals against him were strong, and he planned to leave London at the end of the season to accept a position offered him by the mistress of the first minister of France. He and several London singers, including Cuzzoni, spent summer 1724 in France, and for Cuzzoni he composed two pieces, probably the *Veni Jesu sponse chare* and the *Laudate pueri* in F, to be performed at the Fontainebleau chapel on 10 September. Then he returned to England.

His mind had been changed by an offer, made on 14 May 1724, of £500 a year for life from Henrietta, Duchess of Marlborough. In return for this stipend, he directed performances of his own music at her private concerts until 1731, his only public venture during these years being *Astianatte*, the performances of which are infamous because of fighting between the partisans of Cuzzoni and Faustina. Although *Astianatte* was produced 20 years before his death, it virtually ended his career as a dramatic composer. Bononcini was an active member of the Academy of Ancient Music from 1726, and it was in 1727 or 1728 that his friend Maurice Greene introduced an unsigned manuscript of *In una siepe ombrosa* at a meeting. Bononcini apparently claimed to be the composer of this madrigal until, at the meeting on 14 January 1731, Bernard Gates directed a performance of the same work drawn from Lotti's *Duetti, terzetti e madrigali* (Venice, 1705). An unusually flagrant example of the age's ubiquitous custom of unacknowledged borrowing had been uncovered, and the academy's directors made a great noise about it in order to discredit Bononcini and Greene. Bononcini went to France for the summer of 1731. He apparently remained in the Duchess of Marlborough's service at least until November 1731, the date of a suite

*Giovanni Bononcini: portrait attributed to Bartholomew Dandridge, c1730 (Royal College of Music, London)*

in honour of her daughter's eighth birthday; but they must have ended their relationship by 1732, when he published *XII Sonatas* dedicated to Henrietta's chief antagonist, her own mother Sarah, the dowager duchess. His final London venture was a performance on 24 June 1732; cabals prevented him from presenting the *festa pastorale* he had written for the occasion.

Bononcini, then aged 62, went to Paris, where he wrote vocal works for performances of the Concert Spirituel on 7 February and 2 April 1733, and published a *Laudate pueri*. He proceeded to Madrid in December 1733 and then to Lisbon, where he apparently stayed until 1736; in both cities he performed and wrote music, but nothing for the stage. He returned to Vienna in mid-1736 and set two operas and an oratorio for performance in 1737. The Empress Maria Theresa commissioned a *Te Deum* in 1741 and on 1 October 1742 increased his small pension to an amount which allowed him to spend his final five years in comfortable frugality. It is not known if his wife Margherita Balletti (who was in London from 1736 to 1738) was with him in Vienna during his last years, but their 22-year-old daughter died there on 10 May 1743.

2. Works. Giovanni Bononcini was between 15 and 21 when the first eight prints of his music appeared. The first six each contain 12 instrumental works, each work typically including four movements with at least the last three in binary form; but instrumental music *per se* is a very small part of his output and his only later prints appeared in 1722 and 1732 in London. His op.7 contains five-movement, double-chorus masses in declamatory style; but religious music too made up a small part of his output and the only later works printed under his supervision were the 1722 anthem for Marlborough's funeral, written entirely in slow tempos and in keys from two to four flats, and the 1733 *Laudate pueri*, written in a ritornello structure with a well-balanced harmonic scheme and nicely varied instrumentation. His op.8

contains vocal duos, which were popular enough to be reprinted and then discussed by Le Cerf de la Viéville in 1705 and Riccati in 1787; these duos of 1691 show Giovanni's contrapuntal facility more clearly than any other works before his *Ezechia* (1737) and *Te Deum* (1741).

Contrapuntal artifice was not appreciated by the ruling taste, which was instead gratified by the very many solo cantatas and dramatic works which Giovanni Bononcini produced. His first dramatic works, written for Bologna from 1687 and for Rome from 1692, contain brief arias, mainly in da capo form and accompanied by continuo only. Handel extended several arias from Bononcini's *Xerse* of 1694 for use in his *Serse* of 1738 (see Powers, 1962); even after extension, the 1738 arias fall far short of usual Handelian length. Arias in *Camilla* of 1696 have been singled out (by Downes, 1961) for many elements which contribute to the later, *galant* style of Vinci, Leo, Pergolesi and others. *Camilla*'s great success may well have caused various composers to adopt aspects of *galant* style. Chrysander and Dent have regretted the presence of such traits in works by Handel and Alessandro Scarlatti, citing Bononcini virtually as a scapegoat. Probably they have overemphasized his importance; he was more of a participant than a leader in the gradual changes of style around 1700.

Plaintive tunefulness, such as that of 'Per la gloria d'adorarvi' in *Griselda* (1722), was always a hallmark of Bononcini's dramatic works. Hawkins aptly found that 'Bononcini's genius was adapted to the expression of tender and pathetic sentiments. His melodies, the richest and sweetest that we know of, are in a style peculiarly his own; his harmonies are original, and at the same time natural'. In the decades after 1700, however, when Bononcini's arias became markedly longer and more fully accompanied, their Handelian proportions were infrequently supported by the musical substance and inner propulsion which justifies such length in Handel's works or by the neutral, concerto-like figuration which maintains the momentum in Vivaldi's or Vinci's. Thus Burney was less complimentary in his assessment of Bononcini: 'his melody was, perhaps, more polished and vocal, though not so new as that of his powerful Saxon rival'. It may indeed have seemed antiquated to partisans of new stars, such as Faustina and Farinelli, whose agility was astounding.

A secondary attraction was Bononcini's superb text setting, which the librettist Rolli lauded in 1724 as indescribably expressive of human passions. Such expressiveness was undoubtedly encouraged by his extensive work with noted Arcadian librettists, especially Stampiglia and Rolli. In his recitatives, according to Hawkins, 'those manifold inflexions of the voice, which accompany common speech, with the several interjections, exclamations and pauses proper thereto, are marked with great exactness and propriety'. Burney concurred by stating that his recitative 'was universally allowed to be the best of the time, and in the true genius of the Italian language'. Such expressiveness is best judged by Italian connoisseurs, and much of it must have passed unnoticed in Vienna and London, the cities for which Bononcini produced most of his dramatic works between 1699 and 1737.

Since Arcadian writers favoured the pastoral realm, it is not surprising that Bononcini's works typically feature sighing emotions and tender moods, which 'Primcock' (1728) contrasted with Handel's heroic emotions and tyrannical rage. In 1716 J.E. Galliard had termed Bononcini's style 'agreeable and easy', but by the late 1720s it was found to be lulling rather than exciting, and was derided by some 'very fine Gentlemen for its too great Simplicity' (*The Craftsman*, 10 June 1727). If we hear this 'simplicity' as both the final stages of 17th-century bel canto and the precursor of *galant* and pre-Classical melodies, it aptly becomes the touchstone of taste at the turning-point around 1700.

WORKS

*music lost unless otherwise stated*

*† – attributed to Bononcini with no first name given*

OPERAS

*3-act drammi per musica unless otherwise stated*

Eraclea, o vero Il ratto delle Sabine (?S. Stampiglia, after N. Minato; pasticcio, with at least 20 arias by Bononcini), Rome, Tordinona, 12 Jan 1692, arias *B-Bc*, *D-MÜs*, *I-Rsc*, *Rvat*

Xerse (Stampiglia, after Minato), Rome, Tordinona, 25 Jan 1694, *D-MÜs*, *GB-Lbl* (facs. in Handel Sources, viii, 1986); arias *B-Bc*, *D-MÜs*, *I-Tn*

Tullo Ostilio (Stampiglia, after A. Morselli), Rome, Tordinona, *c*10 Feb 1694, arias *B-Bc*, *D-MÜs*, *F-Pn*, *I-Rvat*, *Sc* and *Tn*

Muzio Scevola [Act 2] (?Stampiglia, after Minato), Rome, Tordinona, 5 Feb 1695, arias *D-MÜs*, *I-Bc*, *Mc*, *Rc*, *Rli*, *Rvat*, *REm*, *Sc* and *US-NY libin*; Florence, 1696, arias *F-Pn*; Naples, S Bartolomeo, carn., 1698, comic scenes *D-Dl*, arias *F-Pn*, *I-Nc* and *PAVu*; Turin, Teatro Regio, 1700, arias *Tn*; as Le garre dell'amore eroico, o sia Il Muzio Scevola, Genoa, *c*1700; rev. Stampiglia and Bononcini as Mutio Scevola, Vienna, Hof, 30 June 1710, *A-Wn*

L'amore eroico fra pastori [Act 3] (favola pastorale for puppets, 3, P. Ottoboni), Rome, Palazzo della Cancelleria, Feb 1696 [Act 1 by C.F. Cesarini, Act 2 by G.L. Lulier]; rev. A. Scarlatti as La Pastorella, Rome, Venetian Embassy, 5 Feb 1705, arias *GB-Lbl*; rev. P.A. Motteux and V. Urbani as Love's Triumph, London, Queen's, 26 Feb 1708, 70 arias (London, 1708)

Il trionfo di Camilla regina de Volsci (Stampiglia), Naples, S Bartolomeo, 27 Dec 1696, *D-Bsb*, *Dl*, *MÜs*, *F-Pc* [Act 3 only], *GB-ABu* (facs. in IOB, xvii, 1978), *Lbl* (2 copies), *I-MOe*, *Nc*, *US-AUS*, *Wc*, comic scenes *D-Dl*, arias *F-Pn*, *GB-Lbl*, *Ob*, *I-Mc*, *Nc*, *Rvat*; as La rinovata Camilla regina de Volsci, Rome, Capranica, 18 Jan 1698, *A-Wgm*, *GB-Cfm*, *CDp*, *Lbl* [Acts 2 and 3]; arias *D-MÜs*, *F-Pn*

La clemenza d'Augusto [Act 3] (C.S. Capece), Act 3, Rome, Tordinona, 4 Feb 1697, *E-Mn*, arias *GB-Ob* [Act 1 by S. De Luca, Act 2 by C.F. Pollarolo]

Temistocle in bando [Act 3] (after Morselli), Rome, Capranica, Feb 1698, arias *B-Br*, *F-Pn*, *GB-Lam*, *Lbl*, *Lcm*, *Ob*, *I-Bc*, *REm* [Act 1 by Lulier, Act 2 by ? M.A. Ziani]

La fede publica (D. Cupeda), Vienna, Hof, 18 Jan 1699, *A-Wn* (Acts 1 and 3 only)

Gli affetti più grandi vinti dal più giusto (Cupeda), Vienna, Favorita, 30 Aug 1701, *Wgm*, *Wn*

Cefalo [Pastorella] (1, A. Guidi), Berlin, Lietzenburg (now Charlottenburg), spr. 1702, *D-WD*, *GB-Lbl*

Polifemo (1, A. Ariosti), Berlin, Lietzenburg, sum. 1702, *D-Bsb*

[Feraspe], Vienna, Hof, ?*c*1702, *A-Wn* (Acts 2 and 3 only)

La regina creduta re (M. Noris), Venice, S Angelo, carn. 1706, arias *D-Bsb*, *SWl* and *GB-Lcm*; as Semiramide, o vero La reina creduta re, Brunswick, 1708

Endimione (favola per musica, ?Stampiglia, after F. de Lemene), Vienna, Palais Belfonte, 6 July 1706, *A-Wn*; Vienna, July 1720

Etearco (Stampiglia), Vienna, Hof, carn. 1707, *Wgm*, *Wn* (2 copies; one lacks the act in *GB-Cfm*), *D-WD*, *GB-Cfm* (Act 1 only); Naples, Fiorentini, carn. 1708; rev. Haym, London, Queen's, 10 Jan 1711, ov., 36 arias (London, 1711); rev. version Rome, Pace, carn. 1719, arias *B-Bc* and *F-Pc*

Turno Aricino (Stampiglia), Vienna, Favorita, 26 July 1707, *A-Wn*, *D-MEIr*, *GB-Lbl* (2 copies); ov., 6 arias in Almahide (London, 1710)

Mario fuggitivo (Stampiglia), Vienna, Hof, 8 Feb 1708, *A-Wgm*, *Wn*, *D-Dl*, *MEIr*, *W*; Leipzig, 1709; Wolfenbüttel, 1710; Brunswick, *c*1710; 11 arias in Almahide (London, 1710)

Abdolomino (Stampiglia), Vienna, Hof, 3 Feb 1709, *A-Wn*; rev. F. Mancini, Naples, S Bartolomeo, 1 Oct 1711

Caio Gracco (Stampiglia), Vienna, Hof, 16 Feb 1710, *D-W*
Astarto (P.A. Rolli, after A. Zeno and P. Pariati), Rome, Capranica, Jan 1715, *MÜs*, arias *I-Rsc*; rev. version London, King's, 19 Nov 1720, arias *GB-Lcm*, ov., sym., 33 arias (London, 1721/*R* 1984 in BMB, section 4, xx)
Erminia (favola pastorale, 5, 'd'un accademico Quirino' [? D.O. Petrosellini]), Rome, Pace, carn. 1719; arias *F-Pc*, *I-Rc*, *US-Wc*; rev. version (favola boschereccia, 3, Rolli), London, King's, 30 March 1723, arias *GB-Lbl*, 5 arias (London, 1723)
Crispo (drama, 3, Lemer), Rome, Capranica, carn. 1721, arias *B-Bc*, *D-MÜs*, *F-Pc* and *I-Rc*; rev. version (Rolli, after Lemer, London, King's, 10 Jan 1722, arias *IRL-Dam*, 10 arias (London, 1722), 4 arias in Cyrus (London, 1722); rev. A. Pampino, Pesaro, Sole, carn. 1730
Muzio Scevola [Act 2] (drama, Rolli), London, King's, 15 April 1721, *GB-Lbl* (2 copies), arias *D-Bsb*; ov., 4 arias (London, 1721) [Act 1 by F. Amadei, Act 3 by G.F. Handel]; Hamburg, 7 Jan 1723
L'odio e l'amore [Cyrus] (drama, 3, Rolli), London, King's, 20 May 1721, arias *IRL-Dam*, *US-SFsc*, *Wc*; 2 arias (London, 1722); Brunswick, carn. 1724; as Ciro, Wolfenbüttel, Hof, 15 May 1724
Griselda (drama, 3, Rolli), London, King's, 22 Feb 1722; ov., 29 arias (London, 1722); London, 22 May 1733
Farnace (drama, 3 after L. Morani), London, King's, 27 Nov 1723, *D-WD*; 10 arias (London, 1724)
Calfurnia (N. Haym, after G. Braccioli), London, King's, 18 April 1724, arias *GB-ABu*, *Er*; 11 arias (London, 1724)
Astianatte (drama, 3, ?Haym, after Salvi), London, King's, 6 May 1727, arias *Er*, *US-Wc*; 7 arias, minuet (London, 1727); 1 aria in *HawkinsH*
Alessandro in Sidone (tragicommedia, 5, after Zeno and Pariati), Vienna, Kleines Hof, 6 Feb 1737, *A-Wgm*, *Wn*, arias *D-MÜs*
Zenobia (P. Metastasio), Vienna, Favorita, 28 Aug 1737

SERENATAS ETC.

La nemica d'Amore (S. Stampiglia), 3vv, Rome, Palazzo Colonna, 10 Aug 1692, arias *F-Pn*, *I-Rvat*
La nemica d'Amore fatta amante (Stampiglia), 3vv, Rome, Palazzo Colonna, 10 Aug 1693, *D-MÜs*, *US-Wc* (facs. in ICSC, x, 1985); arias *I-Rli*
La costanza non gradita nel doppio amore d'Aminta (Stampiglia), 3vv, Rome, Palazzo Colonna, 17 Aug 1694, *D-Bsb*, *F-Pc* (inc.), *US-NH*
La notte festiva (Stampiglia), 3vv, Rome, Piazza di Spagna, 5 Aug 1695, arias *I-MOe*
Amore non vuol diffidenza (Stampiglia), 3vv, Rome, Palazzo Colonna, 10 Aug 1695, *D-Bsb*
Amor per amore (Stampiglia), 4vv, Rome, Palazzo Colonna, 10 Aug 1696, *MÜs*
La gara delle quattro stagioni (D. Cupeda), 4vv, Vienna, Hof, 21 April 1699, *A-Wn* (2 copies)
Euleo festeggiante nel ritorno d'Alessandro Magno dall'Indie, 10vv, Vienna, Favorita gardens, 9 Aug 1699, *Wn*, *F-Pn*; Bologna, 1699; as La città di Sion festeggiante, Bologna, 1702 (see ORATORIOS below)
I varii effetti d'Amore (scherzo musicale, Cupeda, after Minato), 7vv, Vienna-Neustatt, 1700
Proteo sul Reno (poemetto drammatico, P.A. Bernardoni), 5vv, Vienna, Hof, 19 March 1703, *A-Wn*
Il fiore delle eroine (trattenimento, Cupeda), 7vv, Vienna, Hof, 10 July 1704, *Wn*
Il ritorno di Giulio Cesare vincitore della Mauritania (festa, Cupeda), 6vv, Vienna, Hof, Dec 1704 or early 1705, *Wn*
La nuova gara di Giunone e di Pallade terminata da Giove (poemetto drammatico, Bernardoni), 5vv, for Vienna, Hof, 26 July 1705, perf. ?cancelled, *Wn*
Il natale di Giunone festeggiato in Samo (componimento, Stampiglia), 5vv, Vienna, Hof, 21 April 1708, *Wn*
Li sagrifici di Romolo per la salute di Roma (componimento, Stampiglia), 5vv, Vienna, Hof, 26 July 1708, *Wn*
Enea in Caonia (componimento, Stampiglia), 5vv, Vienna, Hof, 19 March 1711
L'arrivo della gran madre degli dei in Roma (componimento, Stampiglia), 4vv, Milan, Corte, 6 May 1713, *Wn*, *D-MÜs*
Sacrificio a Venere (P.A. Rolli), 4vv, Rome, Piazza de' SS Apostoli, 28 Aug 1714, *A-Wn*
Concerto di musica per il giorno della nascita di sua eccellenza il signor Gio. Wenceslao conte di Galasso ambasciatore (cant.), 4vv, Rome, 1718, text and music unknown
Amore per amor (festa pastorale), London, King's, 24 June 1732
Clori da te sol chiedo, 3vv, *D-MÜs* (attr. A. Bononcini), *F-Pc*, *Pn*; Così l'intendo o Filli, 4vv, *GB-Lbl*; Gelosia madre d'amore, 2vv, *D-Bsb*; Gl'amanti felici, 3vv, *A-Wn*; Non amo e amar desio, 2vv, *Wn*, *D-Bsb*, *MÜs*, *F-Pc*, *I-Fc* (reduced score); Silvio trionfante degl'amori di Dorinda e Clori, 3vv, *D-Bsb*

CANTATAS

*for solo voice and continuo unless otherwise indicated*

Edition: *Cantatas by Giovanni Bononcini*, ed. L. Lindgren, ICSC, x (1985) [facs.] [L]

[10] Duetti da camera, op.8 (Bologna, 1691) [1691]

(3) **Antonio Maria Bononcini** (*b* Modena, 18 June 1677; *d* Modena, 8 July 1726). Composer and cellist, second son of (1) Giovanni Maria Bononcini. He worked alongside his more famous elder brother, (2) Giovanni, until 1713. By 1686 both were students of G.P. Colonna in Bologna. When Cardinal Pamphili was papal legate there during the period 1690–93 both played in his orchestra. Antonio composed a *Laudate pueri* with a florid obbligato for cello in 1693, and about the same time a set of 12 cello sonatas that employ the same kinds of patterned figuration. Only two cello sonatas preceded them, both by Gabrielli. In 1694 Bononcini was listed first among the cellists active in Rome; by November 1696 he had joined the Congregazione di S Cecilia; and during the years 1694–8 he or his elder brother played for six events sponsored by Cardinal Ottoboni. In 1698 he wrote *La fama eroica*, a work praising the Venetian Cardinal Giorgio Vivente Cornaro, who might have employed Antonio.

Around 1700 Antonio joined his brother in Vienna, and Telemann heard them perform at Berlin in summer 1702. Antonio was first commissioned to compose for the Viennese court in 1705, the year in which Joseph I became emperor. During Joseph's reign Antonio was appointed Kapellmeister to Joseph's brother, who was living in Spain as Charles III, claimant to the vacant throne. The emperor's great favour for Giovanni Bononcini extended to Antonio, who provided the Viennese court with 13 richly scored cantatas, six festive serenatas, four two-part oratorios and a three-act opera. Only his brother and Joseph's vice-Kapellmeister M.A. Ziani wrote a comparable number of works for the Viennese court between 1705 and 1711. Scores survive for all except the oratorio of 1705, and they are distinguished by intricate textures that incorporate contrapuntal artifice and extensive sequential development, underscored by the rapid harmonic movement characteristic of Corelli. Arias are mainly in minor keys, and they often feature dotted rhythms, angular melodic lines and chromatic harmonies that convey great pathos. Perhaps mainly on the basis of such style traits, Geminiani judged Antonio to be 'much beyond his brother in point of depth and knowledge'. Joseph I must have appreciated their superb craftsmanship, for in 1710 he named Antonio a 'composer to the emperor', made the appointment retroactive to the beginning of 1707, provided a lucrative salary (equivalent to Ziani's) and commissioned Antonio's first opera, *Tigrane*. A year later Joseph died of smallpox, and his brother, Charles VI, did not retain the Bononcinis.

Antonio may have accompanied his brother to Rome when the two returned to Italy in 1713, but he settled in Modena, where his wife, Eleonora Suterin, bore him four sons and a daughter between 1715 and 1722. He subsequently achieved a modicum of fame throughout Italy with his settings of ten operas for Venice, Rome and cities ruled or dominated by the Austrian emperor. In these works his style resembles Vivaldi's more than Corelli's, since it features tuneful rather than angular lines, enticing syncopations rather than excruciating dotted notes, and doublings of voices rather than contrapuntal accompaniments for treble instruments. His acceptance of some *galant* features did not, however, suffice to make his dramatic works popular, for none of them received a second production. He also 'directed' (i.e. perhaps compiled the music for) *L'enigma disciolto* and *Lucio Vero* at Modena in October 1716 and *Mitridate Eupatore* at Reggio nell'Emilia in January 1723.

During his last five years Bononcini was *maestro di cappella* at the Modenese court, and this appointment presumably terminated his need to compose operas in order to earn a living. He presumably wrote his extant mass and *Stabat mater* during his final years, and the contrapuntal complexities in the latter were largely (and perhaps wholly) responsible for Padre Martini's judgment of his style: 'so elevated, lively, artful and delightful, that he is distinguished above most early 18th-century composers'.

**(4) Giovanni Maria Bononcini (ii)** [Angelo Bononcini] (*b* Modena, 18 Nov 1678; *d* Rome, Nov 1753). Violinist and composer, son of (1) Giovanni Maria Bononcini (i). He was born one hour after his father's death and was given the same name. Nothing is known of any association with his elder half-brothers, and the suggestion made by La Via that Ghezzi's drawing of 'Bononcino [and] nephew of Bononcino' might represent (2) Giovanni and Giovanni Maria (ii) seems unlikely, although they both did work at Rome during the period 1714–19. In 1704 Giovanni Maria wrote from Venice to a friend in Modena; his other extant letters (in *I-MOe*) were written from Rome to Modena during the period 1707–15. In Rome he was employed as a professional violinist, by Cardinal Pamphili (1707–9), Prince Ruspoli (1707–15), the church of S Carlo ai Catinari (1715–36), Cardinal Ottoboni (1717–37), the Palazzo Apostolico (1725, 1733), the Oratorio di S Girolamo della Carità (1730) and the Collegio del Nazareno (1733, 1743, 1745). He joined the Congregazione di S Cecilia on 9 May 1710, ran unsuccessfully seven times for its post of 'guardian' of instrumentalists (1723–39), was elected guardian for a two-year term (1742–3), was twice elected an auditor (*sindaco*, 1745–6), and last appeared at a meeting on 16 Nov 1752 (*I-Rsc*, Atti della Congregazione di S Cecilia). He joined the musicians of Campidoglio as a trombonist in 1720 and played the organ for its communion services.

The few extant pieces by him include a cantata, *Ohimè che veggio misero mio core* (*I-MOe*), and a set of 11 motets for SSATTB almost certainly written in Rome, possibly for Ottoboni. Most of the motets begin chordally, proceed to a contrasting section and end with a fuga. The only extant copy (*GB-Ob* Tenbury 1218) has Latin text incipits but lacks Latin texts, presumably because it was intended to set the works to English texts, as was done for the first motet and part of the second.

LAWRENCE E. BENNETT (1), LOWELL LINDGREN (2–4)

**Bononia, Bartholomeus de.** *See* BARTOLOMEO DA BOLOGNA.

**Bonporti, Francesco Antonio** (*b* Trent, bap. 11 June 1672; *d* Padua, 19 Dec 1749). Italian composer. Of good family, he was educated in his native city and Innsbruck in philosophical and humanistic subjects appropriate to the clerical vocation he was to follow. While studying theology at the Collegio Germanico in Rome in 1691–5 Bonporti took music lessons (presumably not his first). Corelli is said to have instructed him in violin playing, and Pitoni in the composition of sacred vocal music, but there is only slender evidence of this. Bonporti returned to Trent ordained as a priest and obtained a minor office in the cathedral in 1697. His op.1, a set of ten trio sonatas (he consistently grouped his instrumental works in tens rather than twelves), had been published the year before. On the title-page the composer called himself 'gentiluomo di Trento', noting his non-professional status as a musician. 11 further sets followed, all except one (op.3) consisting of secular music with a bias towards *da camera* specifications; of these the majority appeared during the first decade of the 18th century, when there was an unprecedented boom in the publishing of Italian instrumental music both inside and outside Italy.

Bonporti regarded himself as primarily a priest rather than a composer, although, ironically, his clerical advancement was no more rapid than the spread of his musical renown. This explains the otherwise puzzlingly 'secular' nature of his musical output; for despite the care which he obviously lavished on even the least substantial of his compositions, music was for Bonporti a means towards a non-musical end: his appointment to a canonry at Trent or an equivalent clerical post elsewhere. Each new opus saw an increasingly desperate attempt to win the favour of a dignitary who might secure his advancement. Beginning modestly with dedications to local, mostly ecclesiastical potentates, he worked his way up the feudal and ecclesiastical hierarchy until in a letter of 1716 we hear of no less a person than George I of England being solicited. (In letters to the secretary of the Elector of Mainz written in 1715 Bonporti offered to forgo a year's salary if appointed chaplain to the emperor at Vienna.) Such gains as Bonporti made through these representations were merely titular. In 1721 he signed himself in a letter to Prince Schwarzenberg 'maestro dei concerti di S. M[aes]tà Ces[are]a e Catt[oli]ca', and in 1727 he was made an 'aulic familiar' by Charles VI. The canonry remained remote. It is known that rivalry between German and Italian speakers in the church hierarchy at Trent (where the former, associated by language and culture with the seat of the empire, enjoyed an advantage) prevented his appointment whenever vacancies arose. Embittered by this failure, Bonporti moved to Padua in 1740, lodging in the house of a fellow priest. A final appeal to Empress Maria Theresa in 1746, in which op.12 was enlisted, proved fruitless. He died three years later and was buried in Padua.

Bonporti's merits as a composer were first realized in modern times when it was announced in 1911 by Werner Wolffheim that four of his inventions for violin and continuo, op.10 nos.2, 5, 6 and 7, had been included by Alfred Dörffel in volume xlv of Bach's works following an incorrect attribution to Bach in a manuscript source. Not only may Bach have imitated Bonporti in his use of the unusual term 'Invention' as a title, but the third movement ('Ecco') of the tenth invention in Bonporti's op.10 may have provided Bach with a model for the corresponding movement, similar in conception, of his *Ouverture* in B minor for harpsichord (BWV831). The celebrated violinist F.M. Veracini is known to have included op.10 in his repertory on German tours in 1715. By then the work, which had originally appeared in 1712, was known as *La pace*, the composer having seized the opportunity afforded by the Peace of Utrecht in 1713 to add this ingratiating sobriquet to later editions. (The

'Triumph of the Grand Alliance', opp.8 and 9, dating from *c*1710, betrays similar motives.)

In common with other north Italian instrumental composers of his generation, Bonporti based his musical language on Corelli. But whereas the main concern of many of his contemporaries, such as Dall'Abaco, was the expansion and clarification of form, Bonporti seems to have concentrated on the enhancement of melodic detail. (A limited parallel with Bach can be drawn here.) In the Recitativo movement of the first work in op.10 Bonporti offers what is in effect a copiously graced Adagio, entirely instrumental in idiom. But the similarly titled movement in the fifth concerto of op.11 (a very impressive publication in the domain of the concerto) introduces inflections of unmistakably vocal origin, highly original and effective in their unexpected context. Beneath the 'extravagance' (as contemporary writers would have termed it) of Bonporti's technically highly evolved writing for the violin a solid musical intention can be discerned; this is expressed through cogent, if not always highly systematized, forms, imaginative harmony and lively part-writing.

The present-day neglect of Bonporti's music owes something to the scarcity of surviving source material, something to the undervaluing of works in the chamber idiom and something to his non-adherence to any regional school of acknowledged historical importance, such as the Venetian. It does scant justice to his stature as a composer.

WORKS

*published in Venice unless otherwise stated*

| op. | |
|---|---|
| 1 | [10] Sonate a tre (1696) |

MICHAEL TALBOT/ENRICO CARERI

**Bontempi** [Angelini, Angelini-Bontempi], **Giovanni Andrea** (*b* Perugia, 21 Feb 1625; *d* Brufa, nr Perugia, 1 July 1705). Italian composer, singer, librettist, historian and architect. Born Angelini, he studied under Sozio Sozi, father superior of the Oratorio dei Filippini at Perugia, in 1635, continuing in Rome as a protégé of Cesare Bontempi, a nobleman whose name he adopted. There he studied singing under Virgilio Mazzocchi and won the patronage of Cardinal Francesco Barberini. In 1641 he travelled to Florence for an apparently fruitless audition, but from 1643 to 1650 he was a singer at S Marco, Venice, under Monteverdi, Rovetta and Cavalli. In 1651 he entered the service of the Elector Johann Georg I of Saxony in Dresden, where, after the elector's death and the amalgamation of the two Kapellen in 1656, he was appointed joint Kapellmeister along with Schütz and Vincenzo Albrici. The favour that Albrici enjoyed with Johann Georg II and the arrival in 1667 of Carlo Pallavicino were given by Bontempi, in the preface to his *Historia della ribellione d'Ungheria* (Dresden, 1672), as reasons why he turned his attention away from music; but he had already been appointed stage designer and master of the machines at the court theatre in 1664 (and was later inspector of the comedy house), and his first non-musical publication, a (lost) discourse on civil architecture, appeared before his *Historien des durchlauchtigsten Hauses Sachsen* (Dresden, 1666). From 1666 to 1670 he was in Italy, but by 1671 he was back in Dresden as designer and master of the machines. When Johann Georg II died in 1680, his musicians left Dresden and Bontempi returned to Italy, retiring to his villa near Perugia. He sang and composed for S Maria Maggiore at Spello, near Foligno, and was *maestro di cappella* there from January to July 1682, but he devoted most of his time to study and writing. Apart from his *Historia musica* (1695), the first history of music in Italian, he published an *Historia dell'origine dei Sassoni* (Perugia, 1697) and in the same year was elected to the Accademia degli Insensati of Perugia.

Bontempi is remembered for his two surviving operas and his *Historia musica*. *Il Paride* (1662), the first opera in Italian to be performed at Dresden, was given in the castle on the marriage of Erdmuthe Sophia, the daughter of the elector of Saxony, and Christian Ernst, Margrave of Brandenburg. The scenery was by Giacomo Torelli and the performance lasted five hours. The staging of the opera and the publication of the printed full score in celebration, a practice by then abandoned in Italy, suggest that Dresden was attempting to reproduce the atmosphere of the festive early Italian court operas. The action is in five acts and 39 scenes, with many minor roles and episodes revolving around the central plot. Stylistically it shows Venetian influence, of Monteverdi, Cavalli and Cesti, and is characterized by a predominance of *arioso*. In the text, however, 25 passages of 'Rede' (recitative) and 'Lied' (aria) are clearly indicated. Each act ends with a dance, the music of which does not appear in the score; there is only one chorus, of minor gods, but there are many numbers for two and three voices.

*Il Paride* has often been cited as a forerunner of Cesti's *Il pomo d'oro*, performed in Vienna six years later. They are on similar subjects and both are more lyrical than dramatic, showing a taste for Italian bel canto which in Bontempi is accentuated by the modest instrumentation (two violins and continuo). Ermillo's lament in Act 5, on

a chromatic bass descending by a 4th, is an important example of a 17th-century operatic lament, although its comic context (the character wrongly believes he is wounded) modifies the dramatic tension, which is also affected by an interruption. *Il Paride* represents, along with Loreto Vittori's *Galatea*, a rare instance of a 17th-century opera for which the composer had sufficient classical background to be able to write his own libretto. Bontempi described the work as neither comedy, tragedy, tragicomedy nor drama but 'erotopegnio musicale'.

*Dafne* (1671) and *Jupiter und Io* (1673), both in German, were written with the literary and possibly the musical collaboration of M.G. Peranda. *Dafne* was inspired by early Florentine opera, borrowing directly from Rinuccini's libretto which had been translated by Martin Opitz in 1627 for Schütz. *Jupiter und Io*, of which only the libretto survives, has many comic and grotesque moments deriving from the contrast between the ideal world of the gods and the humble condition of the peasants; the model appears to be A.M. Abbatini's *Ione*.

The *Historia musica* was apparently stimulated by the *Sistema musico* (Perugia, 1666) of Lemme Rossi. Bontempi devoted most of his work to the music of the ancients, arguing that Greek music was not polyphonic, but he also touched on the theory and practice of Baroque music. His interest in theory had already been manifested in his *Nova ... methodus* (1660), dedicated to Schütz and described by Bukofzer as one of 'the four outstanding treatises on counterpoint' of the Baroque period; in the *Historia* he anticipated modern ideas on the nature of fugue. On the practical side, his account of the daily timetable of the pupils of Mazzocchi is justly famous: apart from singing practice it included music theory, counterpoint, letters and harpsichord playing or composition. Judged literally as a history of music, however, his book is less satisfactory: 'Bontempi merely perpetuates the scholastic treatment of the subject as a mathematical discipline' (Allen) and for doing so was scathingly censured by Burney and Hawkins.

WORKS

OPERAS

*all first performed in Dresden*

Il Paride in musica (erotopegnio musicale, 5, Bontempi), Riesensaal, 3 Nov 1662 (Dresden, 1662/*R*); 1 recit and aria ed. in *BurneyH*; 1 aria ed. in R. Rolland: 'Les origines de l'opéra allemand', *EMDC*, I/ii (1921), 914–15

BIANCAMARIA BRUMANA, COLIN TIMMS

**Bonvicino** [Bonvicini], **Agostino** (*d* 1576). Italian composer and singer. He had entered the service of the Gonzaga family at Mantua in succession to Giacomo Buserachi, probably by 1563 and certainly before the appointment in 1565 of Wert as *maestro di cappella* of the recently completed ducal chapel of S Barbara. As the leader of a faction of the *cappella* that resented Wert's preferment, he was active in a number of attempts to humiliate and discredit him. These included challenges to Wert's musical competence and culminated in March 1570 in the disclosure of Bonvicino's adultery with Wert's wife, as a result of which both she and Bonvicino seem to have left the Mantuan court. Two masses by Bonvicino, *Missa in festis semi duplicibus maioris* and *Missa in festis Beatae Marie Virginis*, both for five voices, survive in manuscript (in *I-Mc*) and were presumably composed for S Barbara. The latter involves a good deal of contrapuntal elaboration and concludes with a seven-voice Agnus Dei.

IAIN FENLON

**Bonville, Jean.** *See* BULL, JOHN.

**Bon Voisin** [Bon Voysin] (*fl* 1537–44). French composer. He is known for five four-voice chansons, four of them printed by Attaingnant in Paris (RISM 1537[4], 1538[13],

1539[16] and 1540[11]) and one by Moderne in Lyons (RISM 1544[9]). Judging from the texts he seems to have been a specialist in ribald songs composed in the light, syllabic manner of Janequin, who set two of the same texts (*Larras-tu cela* and *L'espous à la première nuyt*).

SAMUEL F. POGUE/FRANK DOBBINS

**Bony, Guillaume.** *See* BONI, GUILLAUME.

**Bonynge, Richard (Alan)** (*b* Sydney, 29 Sept 1930). Australian conductor. He studied the piano at the NSW Conservatorium (Sydney) with Lindley Evans, formerly Melba's accompanist, and in London with Herbert Fryer, and developed a special interest in vocal technique. Having known the soprano Joan Sutherland in Australia, he became her adviser in London and decisively influenced the direction of her vocal and artistic development; they were married in 1954. Although not formally trained as a conductor, he secured engagements to conduct many of his wife's operatic performances, beginning with *Faust* in Vancouver in March 1963 following his début at a concert in Rome the previous year, and *La sonnambula* in San Francisco (September 1964). His Covent Garden début was in March 1964 with *I puritani*. In 1965 he and Sutherland returned to Australia on a joint tour, he as artistic director and chief conductor of the specially formed Sutherland/Williamson International Grand Opera Company. He made his Metropolitan Opera début in 1966 in *Lucia di Lammermoor*. He was artistic director of the Vancouver Opera, 1974–8, and of Australian Opera, 1975–86. He was made a CBE in 1977 and received the Order of Australia in 1983 and the French Ordre des Arts et des Lettres in 1989.

Although his place on the rostrum had been secured through his wife, Bonynge soon demonstrated his positive abilities. On records as in the theatre he cultivated the revival of vocal ornamentation as it had flourished in the 18th and early 19th centuries, and he wrote Sutherland's (and other singers') cadenzas. His recording of *Don Giovanni* is notable for such ornamentation and for the prominence of its harpsichord continuo. In Handel, and also in Graun's *Montezuma* (one of several Baroque rarities he revived on records), his ornamentation may have been excessive, but the alliance of his and his wife's artistry helped to secure the public's new acceptance of ornamentation as an expressive vocal art. Bonynge's many other recordings, mostly with Sutherland, include previously unfamiliar operas by Shield, Massenet and Delibes and several ballet scores, notably the first complete *Sylvia*. He has done much to intensify interest in Bellini and Donizetti, and in French operas of the mid- and late 19th century.

ARTHUR JACOBS/NOËL GOODWIN

**Bonzanini, Giacomo** (*b* Mantua; *fl* *c*1616). Italian composer. His only known work, the *Capricci musicali per cantare, e suonare a quattro voci* (Venice, 1616), is dedicated to the Cardinal of Trent and contains 31 pieces including eight *gagliarde* and seven canzonas.

TIM CARTER

**Boobams.** A series of small tunable drums introduced in the 1950s in the USA; they are classified as membranophones: struck drums. Boobams have a distinctive 'dark' tone quality. In the original form of the drum, a membrane drumhead about 11 cm in diameter was secured to the top of a long open stem of bamboo (hence boobam) which acted as a resonator. Later the heads and resonators were made of plastic and a three-octave chromatic range was available (*C–c″*). The pitch is governed by the frequency of the air column in the resonator and by the tension on the drumhead.

Boobams are played with timpani or vibraphone mallets or with the fingers. They are used in many types of music, usually in chromatic form, but sometimes as a set of four or five drums with definite or indefinite pitch. Henze used two octaves in *Tristan* (1974) and one octave in *Voices* (1973); Tippett used two octaves in *The Mask of Time* (1980–82). Boulez called for two players each with two boobams in *Notations I–IV* (1977–80).

Octobans, drums resembling boobams in sound and appearance but of indefinite pitch, were developed at the end of the 20th century.

JAMES BLADES

**Boogie-woogie.** A percussive style of piano blues favoured, for its volume and momentum, by bar-room, honky-tonk and rent-party pianists. The term appears to have been applied originally to a dance performed to piano accompaniment, and its widespread use stems from the instructions for performing the dance on the recording *Pine Top's Boogie Woogie* (1928, Voc.) by Pine Top Smith.

The boogie style is characterized by the use of blues chord progressions combined with a forceful, repetitive left-hand bass figure; many bass patterns exist, but the most familiar are the 'doubling' of the simple blues bass (ex.1) and the walking bass in broken octaves (ex.2).

**Ex.1** Doubling of the blues bass

**Ex.2** 'Walking' bass in broken octaves

Walking basses are reported to have been developed by ragtime pianists in the 19th century, and the first published example appears to be in Blind Boone's *Rag Medley no.2* (1909). Clay Custer used the same device on his recording *The Rocks* (1923, OK), which George Thomas may have made under this pseudonym, and which was one of the first recorded examples of a walking bass. The right-hand configurations played against the bass patterns were both rhythmic and melodic, with sharp ostinato passages and sequences in 3rds and 5ths. Some performances, such as Meade 'Lux' Lewis's *Bass on Top* (1940, BN), display subtly shifting patterns, while Wesley Wallace's train imitation *No.29* (1930, Para.) employs 5/4 time in the bass and 4/4 in the treble. Such a feat is possible through

the independence of the right-hand improvisations from the steady, rolling rhythm maintained by the left hand. Startling dissonances occur through the juxtaposition of the two strands, and cross-rhythms are also frequently created. Deliberate discords and rapid 'crushed' or 'press' notes, obtained by the striking of adjacent notes in rapid succession, are evident on Lewis's *Honky Tonk Train Blues* (1927, Para.).

The first generation of boogie-woogie pianists – blues pianists who prominently featured walking bass and 'eight-to-the-bar' rhythms – included Romeo Nelson, Arthur Montana Taylor and Charles Avery, rent-party pianists who were forgotten in the Depression years. In 1938 a revival was initiated by the record producer and critic John Hammond, who sought out Albert Ammons and Meade 'Lux' Lewis, then working in Chicago as taxi drivers. With Pete Johnson from Kansas City and his singer Joe Turner, the Boogie Woogie Trio became popular at Café Society, New York, and, linked with the swing craze, boogie-woogie enjoyed a brief vogue. These authentic boogie pianists made a number of outstanding recordings, including Pete Johnson's *Goin' Away Blues* (1938, Voc.) with Big Joe Turner, and Albert Ammons's *Chicago in Mind* (1939, BN). The brief but widespread popularity of boogie-woogie also led to the discovery of Jimmy Yancey and 'Cripple' Clarence Lofton, who brought singular rhythmic conceptions to their playing. The connection with swing is exemplified in such recordings as *Boogie Woogie* by Tommy Dorsey and his Orchestra (1938, Vic.) and Count Basie's *Basie Boogie* (1941 OK).

In the late 1940s boogie-woogie reverted to the blues, becoming a standard element in every blues pianist's playing. Chicago and Detroit pianists gained inspiration from the recordings of Big Maceo (Major Merriweather), whose *Chicago Breakdown* (1945, Bb) was a tour de force.

Boogie-woogie has proved to be one of the most enduring elements in blues performance, and has provided the background for scores of recordings by the Chicago blues bands of Muddy Waters and Howlin' Wolf. Futhermore, it has permeated the rock and roll of pianists such as Little Richard and Jerry Lee Lewis, and was employed by pianists in many rhythm and blues bands. It was featured on stage by Winifred Atwell and other popular performers, and has persisted in Europe in the playing of Axel Zwingenberger and the 'Austrian school' of boogie-woogie pianists.

PAUL OLIVER

**Booker T. and the MGs.** American instrumental soul group. They formed in the summer of 1962 when the four original members Booker T. Jones (*b* 1944, keyboards), STEVE CROPPER (*b* 1941, electric guitar), Al Jackson (1935–75, drums) and bassist Lewie Steinberg were hired for a session at Stax records. That year they had their first hit with *Green Onions* which has since become the best-known soul instrumental of all time. With Donald 'Duck' Dunn replacing Steinberg in 1964 they achieved success in the rhythm and blues and pop charts with such singles as *Bootleg* (Stax, 1965), *Groovin' (Stax, 1967)*, *Hip hug-her* (Stax, 1967), *Soul Limbo* (Stax, 1968), *Hang 'em high* (Stax, 1968) and *Time is tight* (Stax, 1969). Until 1969 they served (with Isaac Hayes occasionally replacing Jones or acting as a second keyboard player) as the rhythm section for virtually every record made at the Memphis-based Stax. The group originally stopped working together in 1971 when Jones became disenchanted with the ownership of the label. They reunited for an album and a tour in 1977 with former Bar-Kays and Isaac Hayes drummer Willie Hall and again with various drummers in 1989. Three years later they were inducted into the Rock and Roll Hall of Fame and in 1994 they released a new album, *That's the Way It Should Be* (Sony).

As the primary architects of the 'Stax sound', they can be heard on such seminal soul recordings as Redding's *(Sittin' on) The Dock of the Bay* (Volt, 1968), Rufus Thomas's *Walking the Dog* (Stax, 1963), Sam and Dave's *Soul Man* (Stax, 1967), Carla Thomas's *B-A-B-Y* (Stax, 1966) and Johnnie Taylor's *Who's making love* (Stax, 1968). Often doubling bass and guitar, keyboard and guitar or keyboard and bass, Booker T. and the MGs were classicists who opted for a spare sound. To that end Jackson employed little cymbal work and rarely played fills when backing other artists. With Cropper, Jackson developed a characteristic groove in which both players would slightly delay the backbeat, one of the hallmarks of the Stax sound. Although Jones was accomplished on both piano and organ, with the MGs he generally preferred the Hammond B-3. Both he and Cropper were concerned with timbral coloration, employing a variety of complementary sounds from their instruments. While most bass players largely fulfilled rhythmic and harmonic functions, Dunn tended to play lines that also served as melodic counterpoint. In 1978, Steve Cropper and Duck Dunn joined the Blues Brothers with whom they preceeded to have chart success for the next three years.

ROB BOWMAN

**Boom, van.** Dutch family of musicians.

**(1) Johannes (Eduardus Gerardus) van Boom** (*b* Utrecht, 17 April 1783; *d* Utrecht, 17 March 1878). Flautist and composer. The son of an artisan, he studied the flute with Louis Drouet and became solo flautist in the court of Louis Bonaparte at Utrecht from 1807. He later succeeded his teacher, and was also solo flautist of the Société Noble and the Collegium Musicum Ultrajectinum. He composed a Flute Concerto op.4, many variations and other virtuoso pieces for flute with piano, guitar or orchestral accompaniments, duets and trios for flute, waltzes for piano, all written in an early Romantic style, and some Dutch songs.

**(2) Jan** [Johannes] **van Boom** (*b* Utrecht, 15 Sept 1807; *d* Stockholm, 19 March 1872). Pianist, teacher and composer, son of (1) Johannes van Boom. After studying with his father, he made concert tours and took lessons in piano with Hummel and Moscheles. He settled in Stockholm in 1825. His playing won some admiration there, and he accompanied Berwald on his Norwegian tour in 1827. By 1847 he had given up active concert work to concentrate on teaching. In 1849 he was appointed to the Swedish Royal Academy of Music, where his pupils included Ludvig Norman, Berwald's protégée Hilda Thegeström and members of the royal family. He published a piano treatise *Teoretisk och praktisk pianoskola* in 1870. His compositions include sets of variations, operatic paraphrases, studies, short salon pieces and concertos for the piano, a piano quartet, a piano sonata in C minor, orchestral works, chamber music, violin duos and a number of songs. His opera *Näcken, eller Elfspelet* ('The Watersprite, or The Elf-play'), produced in Stockholm in 1844, shows some influences of Swedish folk music. His music in general is in a virtuoso salon style with static harmonizations in the style of Thalberg.

**(3) Hermanus Marinus van Boom** (*b* Utrecht, 9 Feb 1809; *d* Utrecht, 5 Jan 1883). Flautist, son of (1) Johannes van Boom. He studied with his father and with Tulou in Paris (1826), then returned to Utrecht to teach and to study with Drouet. In 1830 he settled in Amsterdam, succeeding Drouet's teacher Arnoldus Dahmen as first flute in the Felix Meritis orchestra. From 1841 he was also flautist in the Caecilia orchestra. The greatest Dutch flautist of his time, he was appointed solo flautist to King Willem III in 1863.

JAN TEN BOKUM (1, 3), ROBERT LAYTON (2)

**Boone, Charles** (*b* Cleveland, 21 June 1939). American composer. He studied at the Vienna Academy of Music (1960–61), the University of Southern California (BM 1963) and San Francisco State College (MA 1968). During the 1960s he served as chair of the San Francisco Composer's Forum and coordinator of the Mills College Performing Group and Tape Music Center. In the early 1970s he founded the San Francisco BYOP (Bring Your Own Pillow) concert series (now the San Francisco Contemporary Music Players). Under the auspices of the Deutscher Akademischer Austauschdienst, he was composer-in-residence in Berlin from 1975 to 1977. He has written and lectured internationally on new music and its relationship to the other arts, and has taught at the San Francisco Art Institute and the California College of Arts and Crafts.

Boone's early works, inspired by Polish music of the early 1960s, employ static, slow-evolving sound blocks, a feature that became characteristic of later compositions as well. His early interest in bright instrumental colours, however, gave way to a more monochromatic palette. In his compositions, he has striven for what he calls a 'complex simplicity', exploiting complex juxtapositions of relatively simple formal and sonic structures expressed through timbral relationships and changing textures. While his music can be considered freely atonal, it contains tonal relationships of the kind found in the music of Webern, Ligeti and Lutosławski.

CHARLES SHERE

**Boone, (Charles Eugene) Pat(rick)** (*b* Jacksonville, FL, 1 June 1934). American popular singer. With his clean-cut college boy manner and warm tenor voice, Boone briefly rivalled Elvis Presley as the favourite singer of American teenagers in the late 1950s. Guided by Randy Wood of Dot Records, Boone at first specialized in recording cover versions of songs already made famous by black rock and roll performers. In 1955–7 he had hit singles with songs from Fats Domino (*Ain't that a shame*), Little Richard (*Tutti Frutti*), the Flamingos (*I'll be home*) and Ivory Joe Hunter (*I almost lost my mind*). These invariably outsold the original recordings and caused Boone to be accused of unfairly exploiting the creativity of black singers, not least because his versions generally lacked the passion of the originals. If Boone had a more individual vocal personality, it was one best suited to the sentimental romantic ballads which provide many of his hit recordings, including *Friendly Persuasion* (*Thee I Love*), *Love Letters in the Sand* (from the film *Bernadine*) and *April Love*. In the early 1960s he had two of his biggest hits with the uncharacteristic 'death disc' *Moody River* and the novelty number *Speedy Gonzales*. As a teenage idol, Boone had publicly proclaimed his conservative Christian beliefs, and in later years he performed country and gospel music with his Pat Boone Family Show whose members included his daughter Debby (*b* 1956), a minor pop star of the 1980s.

DAVE LAING

**Boosé, Carl** (*b* Darmstadt, 1 April 1815; *d* London, 30 Aug 1868). German bandmaster, active in Great Britain. At the age of 15 he entered the 1st Hessian Regiment as a bandsman, taking his discharge in 1832. After giving concerts at Heidelberg, Karlsruhe and Strasbourg in 1833, he returned to Darmstadt and founded the Liedertafel in that city. Being a first-class clarinettist he was offered a post in London in 1835. He soon went to Liverpool and Edinburgh, and in the latter city played at the Theatre Royal for four years (1835–8), as well as at the concerts of the Edinburgh Society of Musicians (1836–41). In 1841 he accepted the post of bandmaster of the 9th

(Queen's) Lancers and in March 1842 was the successful candidate for a similar post in the Scots Guards, where his excellent band arrangements were much appreciated. Regimental bands were at that time constituted on no fixed pattern, and in this area Boosé exercised a deep influence by means of *Boosé's Military Band Journal*, which he began in 1846 as the first publication of its kind in Britain, though Wessell's brass band journal was the first to use the monthly subscription. The first issue was a selection from Verdi's *Ernani*. For the earlier issues Boosé not only wrote the parts on stone for lithographing, but with the help of a friend printed them by hand.

Boosé's journal was such a success that Boosey & Co. acquired and ran it until 1883 under the name *Boosey's Military Band Journal*, retaining Boosé as editor until his death. Boosé's supplemental Military Journal was issued in the series *Jullien's Journal for Military Bands* (1858–1903). His instrumentation was based on that of Wieprecht (1802–72), the Prussian army-band reformer, and when British army bandmasters became subscribers to the journal they found it necessary to reconstitute their bands, gradually thus adopting the Prussian system of instrumental organization. Boosé, who was decorated by the Grand Duke of Hesse with the Order of Merit, transferred to the Royal Horse Guards Band in 1859, where he remained until his death. His son, George, was a violinist who played for the Philharmonic Society.

H.G. FARMER/TREVOR HERBERT

**Boosey & Hawkes.** English music publishers and instrument manufacturers. The Boosey family was of Franco-Flemish origin, and though the early family history is somewhat confused, it appears that the firm's founder was the Thomas Boosey (i) who opened a bookshop in London in about 1792. This business continued until 1832, being known from 1819 as Boosey & Sons, or T. & T. Boosey. A separate music side of the business was started in 1816 under the control of the founder's son, Thomas (ii) (1794/5–1871). They began as importers of foreign music, but soon became the English publishers of composers such as Hummel, Mercadante and Rossini, and later of important operas by Bellini, Donizetti and Verdi. The House of Lords' decision in 1854, which deprived English publishers of many of their foreign copyrights, severely affected the firm. Among the earliest publications of T. Boosey & Co. was an English translation of Forkel's life of Bach (1820).

From 1851 the firm also manufactured wind instruments, and in 1856 made arrangements with the flautist R.S. Pratten (1846–1936) to work out his new ideas on flutes. In 1868 the firm purchased the business of Henry Distin; this enabled it to develop the manufacture of brass instruments in which, among other innovations, the firm pioneered the widely acclaimed design for compensating valves developed by D.J. Blaikley in 1874.

In the latter part of the 19th century Boosey & Co., as the firm had become known, centred its publishing activities on the increasingly popular ballad; to promote sales the London Ballad Concerts were established in 1867 by John Boosey (*c*1832–93), son of Thomas (ii), at St James's Hall, and later at the new Queen's Hall; Clara Butt and Sims Reeves were among the artists. Among its successes were Sullivan's *The Lost Chord* and Stephen Adams's *The Holy City*. From around the end of the century the firm began to emphasize educational music. In 1930 the firm of Boosey & Hawkes came into being on the amalgamation with Hawkes & Son, a firm of instrument makers and publishers founded by William Henry Hawkes in 1865 as Hawkes & Co. (later Rivière & Hawkes) and particularly known for handling brass and military band music, a speciality which has been continued. Boosey & Hawkes developed greater artistic ambitions, and notable musical figures such as Erwin Stein and Ernst Roth, both formerly with Universal Edition in Vienna, helped it to secure the copyrights or agencies for an impressive array of composers, including Richard Strauss, Stravinsky, Prokofiev, Bartók, Kodály, Copland, Mahler and Rachmaninoff, in addition to all of Benjamin Britten's output from 1938 to 1963. Maxwell Davies is the most prominent name among living English composers in the catalogue, and the firm's continuing interest in contemporary music is also reflected in the magazine *Tempo*, which it started in 1939. Boosey & Hawkes's scale of operation is now worldwide, with branches in five countries on four continents. The New York branch of the firm, established in 1892, has developed its own catalogue, which emphasizes the works of American composers including Elliott Carter, David Del Tredici, Walter Piston, Ned Rorem and Steve Reich.

D.J. BLAIKLEY/WILLIAM C. SMITH/PETER WARD JONES

**Boot** (Dut. *stevel*; Fr. *pied*; Ger. *Fuss*, *Stiefel*). The lower part of a reed pipe, into which the block fits (*see* ORGAN, fig. 19). The corresponding part of a flue pipe is called the foot (*see* FOOT (iii)).

**Booth** [née Santlow], **Hester** (*b c*1690; bur. Cowley, Middx, 21 Jan 1773). English dancer and actress. She made her début in 1706 at Drury Lane, London, where she was a leading dancer until she retired in 1733. John Weaver chose her for major roles in his innovative 'dramatick entertainments in dancing': Venus in *The Loves of Mars and Venus* (1717), Eurydice in *Orpheus and Eurydice* (1718), Andromeda in *Perseus and Andromeda* (1728, by Weaver and Roger) and Helen of Troy in *The Judgment of Paris* (1733). John Thurmond gave her dancing roles in his pantomimes for Drury Lane: both Daphne and a Nymph in *Apollo and Daphne* (1725), a Harlequin Woman in *The Escapes of Harlequin* (1722), Diana in the Masque of the Deities in *Harlequin Doctor Faustus* (1723) and Pomona in *Harlequin's Triumph* (1727). Mr Isaac and Anthony L'Abbé, dancing-masters at court and in the theatre, choreographed dances for her,

seven of which were published in Beauchamp-Feuillet notation (*The Union*, London, 1707; *The Saltarella*, London, 1708; four in L'Abbé's *New Collection of Ball Dances*, London, ?1725; and *The Prince of Wales's Saraband*, London, 1731). The *passacaille* and chaconne in L'Abbé's collection are to music from the operas *Armide* and *Acis et Galatée* by Lully.

MOIRA GOFF

**Bootleg.** An unauthorized copy of a recording of a concert or live broadcast. More recently the term has come to encompass recordings of rehearsals and Demo sessions. Music industry organisations distinguish between bootlegs, counterfeit recordings which are manufactured to resemble legitimate discs and tapes, and pirate copies which make no attempt to duplicate the packaging of legitimate releases. In all cases, the recordings are issued without the permission of the copyright owners of the music or the performance. The earliest bootleg recordings were said to have been made at the Metropolitan Opera in New York in 1901–3 and many subsequent bootleg discs were circulated in the USA before Congress granted copyright protection to sound recordings in 1951. Elsewhere, ineffective copyright laws in Italy (which protected performances for only 20 years) enabled the manufacture and export of numerous bootleg recordings of opera performances and radio broadcasts given by Maria Callas and other stars. In popular music, fanatical followers of such artists as Bob Dylan, David Bowie and Led Zeppelin have made recordings of hundreds of concerts and circulated them in a semi-clandestine manner. Some groups, notably the Grateful Dead, have actively encouraged audience members to make recordings of their concerts. See also C. Heylin: *The Great White Wonders: a History of Rock Bootlegs* (London, 1994).

DAVE LAING

**Bop** [bebop, rebop]. A modernist movement in jazz which had a deep influence on the genre's history (*see* JAZZ, §7). It was developed in Harlem, New York, during World War II by musicians such as Dizzy Gillespie, Thelonious Monk, Charlie Christian and later Charlie Parker. Among other innovations, they superimposed on the harmonic structure of 'standard' songs melodic themes closer to the spirit of jazz improvisations, creating a new repertory. The improvisation became more searching than hitherto, and the speed of harmonic, rhythmic and melodic motion led to dense, compact performances. Instrumental sonority (without vibrato) became more tense and mobile. The rhythm section was thinned out, the guitar was often omitted, and the pianist spaced his accompanying chords more irregularly; the drummer explored the tension between a permanent beat on the cymbal (supported by a walking bass) and syncopated strokes divided among the snare, tom-tom and bass drums, often interacting closely with the implied polyrhythms of the solo line. The range of tempos became wider, with a tendency to the extremely fast (at times exceeding 360 crotchets per minute). After the death in 1955 of Parker, the most important bop soloist, many jazz musicians reacted against the refined intimacy of the 'cool' and West Coast styles in a movement known as hard bop.

ANDRÉ HODEIR

**Boquay** [Bocquay], **Jacques** (*b* *c*1680; *d* 19 May 1730). French violin maker. He ranks with Claude Pierray as the most important of the early Paris luthiers. His shop was in the rue d'Argenteuil from 1712 to 1725, and then in the rue de la Juiverie, near Notre Dame, until his death. He was half-brother to Louis Guersan. Like Pierray, he worked on an adaptation of the Amati model. His wood was usually that available locally; the fronts are not ideal tonally, but in the 18th century, as now, his instruments were in good repute among players. The varnish is Italian in appearance, if rather more brittle in consistency, and as a result his work is quite often seen with more illustrious names attached. In particular this is true of his cellos, which are fine instruments tonally.

CHARLES BEARE/SYLVETTE MILLIOT

**Boquet.** *See* BOSQUET.

**Bor, Modesta** (*b* Juangriego, 1926; *d* Mérida, 7 April 1998). Venezuelan composer. She studied composition in Caracas with Vicente Emilio Sojo, graduating from the Conservatorio José Angel Lamas in Caracas (1959). She studied with Khachaturian at the Tchaikovsky Conservatory, Moscow (1960–62). On her return she began a career in composing and teaching. She was musicologist for the Servicio de Investigaciones Folklóricas Nacionales (1963–4), director of children's choirs at the Juan Manuel Olivares Conservatorio (from 1965), director of cultural activities at the Central University of Venezuela (1974–90), then taught at the Centro Universitario de Artes, Mérida, until her death. She won five national composition prizes and the National Music Prize in 1991.

Bor's early works employed elements from Venezuelan folklore, with considerable attention to counterpoint, as part of the post-Impressionist language advocated by the school of Caracas. After 1962 she gradually adopted several modernist techniques, even atonal serialism, while retaining Venezuelan elements in an abstract form. A warm and unassuming aspect of her style is reflected in her many choral compositions and arrangements, now extremely influential in the development of choral singing in Venezuela, particular children's choirs.

WORKS

CARMEN HELENA TÉLLEZ

**Borbolla (Téllez), Carlo** [Carlos] (*b* Manzanillo, 1 Feb 1902; *d* Havana, 13 April 1990). Cuban composer and teacher. He studied harmony and composition with Aubert and the piano with Pierre Lucas in Paris (1927–31) and returned to his home town as a builder of dance organs. In 1950 he moved to Havana, where he worked as a private music teacher. His mildly advanced style, related to that of Ignacio Cervantes, employs Cuban white, mestizo and black folk rhythms in an elegant manner. Working in relative isolation, he never became directly involved with official Cuban music activities. Shortcomings he perceived in the work of professional Cuban performers prompted him to write four educational booklets (all unpublished) on syncopation in Cuban music.

WORKS
(*selective list*)

Pf: 25 Cuban Studies, 20 habaneras, 25 rumbas, 35 sones, 5 suites, Variations on Ma-Teodora, Variations on La Bayamesa; music for 2/3 pf

AURELIO DE LA VEGA

**Borboni** [Borbone], **Nicolò** (*b* Pergola, *c*1591; *d* Rome, 20 Oct 1641). Italian composer, organist, organ builder and engraver. He probably spent his whole life in Rome and may have been related to the Roman painters Jacopo, Domenico and Matteo Borboni (the last of whom was also an engraver). He may have studied music with Ottavio Catalani and probably harpsichord and organ with Frescobaldi until 1614. He was organist of S Maria della Consolazione from 1623 to 1629, and of S Giovanni in Laterano from 1638 to 1641. In the intervening years he was possibly *maestro di capella* of the Seminario Romano. He also looked after the organs at S Maria della Consolazione (1623–41), S Giovanni in Laterano (1628–41), S Apollinare and S Maria Maggiore (both 1633–41). Doni called him an 'excellent organist' and praised a regal that he had made. Following Simone Verovio, whose pupil he may have been, he espoused the method of printing from engraved copper plates for a series of music books published between 1615 and 1637. The bulk of these comprised the various editions, seven in all, of Frescobaldi's two volumes of toccatas (and other pieces), in which the engraving of the frontispieces was done by Cristoforo Bianchi. Like all Borboni's productions, they are accurate and elegant, with attractive decoration, and no less fine than the work of Verovio himself.

Another of Borboni's productions, which he engraved himself, was his own *Musicali concenti ... libro primo* (Rome, 1618 or perhaps 1619) for one and two voices and continuo, his only known collection of music. It contains 26 pieces, all but three for solo voice; they comprise six madrigals, eight canzonettas, six sonnet settings, three strophic-bass arias and three ottava settings over the romanesca, all forms popular in Italian vocal chamber music at the time. Since Borboni was an undistinguished melodist the canzonettas are the least interesting pieces, but many of the others, which depend less for their effect on melody, include a good deal of resourceful writing, in particular some imaginative, carefully written embellishments, which seem to have been influenced by those of Caccini. Some pieces include ritornellos for a keyboard instrument. A solo song and duet by Borboni also survive (in RISM 1622[11]). He engraved the volumes of *Salmi passeggiati* (1615) by Francesco Severi, and perhaps also Michelangelo Rossi's *Toccate e correnti*.

NIGEL FORTUNE/ARNALDO MORELLI

**Borbonius** [Bourbon], **Nicolaus** (*b* Vendeuvre-sur-Barse, *c*1503; *d* Candé, nr Angers, after 1550). French poet and composer. After studies in Troyes he lived in Paris and later in London at the court of Henry VIII. Although his neo-Latin poetry was printed as early as 1517, his *Nugae* (Paris, 1533) is the best-known collection of his works. Because it aroused clerical opposition, he became tutor in 1539 of Jeanne d'Albert, daughter of Marguerite, Queen of Navarre, who supported the reformers. Shortly thereafter he went to Candé. The name of Borbonius is connected with four compositions. He wrote the text of the ode *Praedita vero*, but not the music (as Eitner claimed); the composer is Johann Heugel. Borbonius is the poet and possibly the composer of *Cur violas mittis*, although the motet *Quid ultra debui facere*, usually assigned to him, is anonymous (both motets are in *D-Rp*

A.R.940/41). The text of *Huc me sydereo*, made famous through Josquin's setting, has been attributed to him, but in fact is by the Milanese poet Maffeo Veggio, although published with a few alterations by Borbonius under his own name.

CLEMENT A. MILLER

**Borchgrevinck, Melchior** (*b* ?*c*1570; *d* Copenhagen, 20 Dec 1632). Danish composer, anthologist, organist and instrumentalist probably of Dutch origin. Bonaventura Borchgrevinck, who was possibly his father, took him with him as a treble when he was appointed director of music at the Danish court at Copenhagen on 1 January 1587. Bonaventura left six months later but Melchior stayed on as an instrumentalist and rapidly gained the respect and confidence of the new king, Christian IV. In 1593 his salary was almost doubled, making him, despite his youth, the best-paid musician at court. In 1596 he was sent to Danzig to buy instruments and engage choristers, and at Christmas of that year he was appointed an organist with a further rise in salary. The next year he travelled to England, again to buy instruments, with the party that was sent to bring back the late King Frederik II's Order of the Garter. In 1599 he led a party of Danish musicians, which included Mogens Pedersøn and Hans Nielsen, to Venice to study with Giovanni Gabrieli. On his return in 1600 he was promoted to court organist and given the care of four pupils, among them Pedersøn and Nielsen. Other gifts and honours were bestowed on him, including a canonry of Roskilde Cathedral. For the winter of 1601–2 he was again in Venice, where he seems to have enjoyed a high reputation: Orazio Vecchi praised him in the dedication (to Christian IV) of *Le veglie di Siena* (1604) and added the authority of Giovanni Gabrieli, who, he said, considered him 'one of the most outstanding musicians of our time'. Borchgrevinck achieved the rank of principal instrumentalist in 1603. After Trehou was dismissed in 1611, he became the virtual leader of the court music, but it was not until 1618 that he was confirmed in the position as principal director. Circumstances forced the reduction of the musical establishment in 1627, and he appears to have retired to Roskilde. In 1631 he was reinstated in his musical duties.

Borchgrevinck was responsible for the first major music publications in Denmark: two collections, under the title *Giardino novo bellissimo di varii fiori musicali scieltissimi* (Copenhagen, 1605[7] and 1606[5]; 20 ed. H. Glahn: *20 Italian Madrigals from Melchior Borchgrevinck 'Giardino novo' I–II*, Copenhagen, 1983), of five-part madrigals, mainly by some of the most popular Italian composers of the day. He was up-to-date enough to include *Cruda Amarilli* from Monteverdi's fifth book (1605), but strangely he omitted Marenzio. He himself contributed the last madrigal in each volume, *Amatemi, ben mio* and *Baci amorosi e cari* respectively, and included in the second volume two other madrigals by Danish colleagues, one by Hans Nielsen (Giovanni Fonteio) and one (in two *partes*) by Nicolas Gistou (editions of the Danish madrigals, together with facsimiles of the title-pages, dedications to King Christian IV of Denmark and King James I of England respectively and tables of contents, in *Dania sonans*, iii, 1967). A *Missa 'Baci amorosi e cari'* for eight voices by Borchgrevinck, which survives incomplete in a manuscript (at *DK–Ou*), testifies further to the influence of his visits to Italy and of Gabrieli. Of his other church music, only a single chorale setting in four parts, adapted for use with a poem by Hans Møllen Koch published under the title *En nye Viise om Guds Ord* (Copenhagen, 1623) is known, whereas *IX Davids Psalmer, med fire stemmer rimvis udsat* (Copenhagen, 1607) – rhyming versions of the psalms set for four voices – is lost. Five five-part dances by him survive (three in RISM 1607[28] and two in 1609[30]; ed. B. Engelke: *Musik und Musiker am Gottorfer Hofe*, i, Breslau, 1930 and J. Bergsagel: Music for Instrumental Ensemble, Copenhagen, 1988).

JOHN BERGSAGEL

**Borck, Edmund von** (*b* Breslau, 22 Feb 1906; *d* Nettuno, Italy, 16 Feb 1944). German composer and conductor. He studied composition, the piano and conducting in Breslau and at the Berlin Hochschule für Musik, and musicology at the universities of Breslau and Berlin. After brief employment as Kapellmeister at the Frankfurt Opera, Borck returned to Berlin to assume a post as teacher of theory and composition at the Kittel Conservatory. In 1940 he entered military service, and was killed in action. As a composer Borck is best known for his orchestral music. The successful première in 1933 of his *Fünf Orchesterstücke* op.8 at the ISCM Festival in Amsterdam brought him to public attention, although his uncompromising polyphonic style, strongly influenced by Hindemith, aroused some suspicion among the more conservative members of the Nazi musical hierarchy. Borck's subsequent compositions further emphasized his contrapuntal skills, as well as his veneration for Baroque idioms – a trait which he shared with many other German composers of his generation. The most distinguished of his compositions include the *Präludium und Fuge* for orchestra (1934), the Piano Concerto (1941) and his last work, the opera *Napoleon*. It was performed in 1942 in Gera, and draws much inspiration from Handel. Borck was also a gifted conductor, making guest appearances at an early age with the Berlin PO and the Concertgebouw.

CHARLOTTE ERWIN/ERIK LEVI

**Bord, Antoine-Jean Denis** (*b* Toulouse, 1814; *d* Paris, 1888). French piano maker. He started business in 1843 after learning the craft in Marseilles and Lyons. In 1843 he invented the *capo tasto*, a metal bar which exerts downward pressure on the strings, increasing their resistance to the up-striking hammers and also improving sonority. In 1846 he patented a double-escapement grand action, which is of interest because it employed a spiral spring, later embodied in modern upright actions. The firm's early success, however, was primarily a result of Bord's talent as an entrepreneur. Concentrating on the mass production of small robust uprights, he succeeded in cutting costs and establishing his 'pianettes', particularly in France and England, as the best available cheap instruments. Annual output was increased from 500 in 1850 to more than 2000 by the 1870s. A decade later their inherent limitations were becoming increasingly apparent in contrast with the new German overstrung iron-framed instruments. After Bord's death his successors failed, despite a more diversified output, to re-establish the firm's reputation outside France. In 1934 the business was taken over by Pleyel.

CYRIL EHRLICH

**Borda, Germán** (*b* Bogotá, 27 Jan 1935). Colombian composer. He studied philosophy and literature at the University of the Andes before attending the University of Vienna (1957–63, 1966–8), where he obtained a PhD in music theory and composition. He continued his post-graduate studies in 1970 with Alfred Uhl, whom he later acknowledged as his most important influence. Among his other teachers were Siegl, Cerha and Clemencic. Although he does not adhere to a particular school or style, his music, especially works such as *A la busca del tiempo perdido* (1973) and his *Seis macroestructuras* (1988) for string quartet is atonal and expressionistic. He has been active as a music critic and lecturer; his weekly television programme has played an important role in introducing classical music to the Colombian public. He is the author of two novels, one of which has proved a catalyst for musical compositions including the *Oda a los Dioses* (1995) for oboe, harp and percussion and *Flumina 1* (1995) for string orchestra. His works have been performed in Italy, Japan and Russia, but above all in Germany, where several of his compositions have been recorded.

SUSANA FRIEDMANN

**Borde, Jean-Benjamin de la.** *See* LA BORDE, JEAN-BENJAMIN DE.

**Bordeaux.** City in France, capital of the ancient province of Aquitaine and now capital of the département of Gironde. The earliest known composer there was Paulinus of Nola (353–431), bishop of Campania and hymn writer. Eleanor of Aquitaine (1122–1204), the wife of Henry II, patronized the music of troubadours including Bernart de Ventadourn. In the second half of the 14th century, musical life centred on the archbishop's court, led by his nephew, Pierre de la Mote. In about 1529, poets and musicians (including Eustorg de Beaulieu, author of the *Gestes des solliciteurs*, and Clément Janequin, who spent 25 years in Bordeaux, mostly in the entourage of Lancelot du Fau) gathered at the home of the king's lawyer Bernard de Lahet. Local violinists formed the Frayrie de Monsieur Saint Genès, founded within the church of Notre Dame de la Mercy, with a decree promulgated in Bordeaux on 5 February 1621. Pierre Trichet, a lawyer in the Parliament of Bordeaux, began work on a *Traité des instruments de musique* in about 1630. He owned an important collection of instruments and corresponded with Marin Mersenne.

The choir school at St André Cathedral was founded in 1463. In 1531 a new organ loft was built; Andrew Borde called the organ 'the finest and biggest organ in the whole of Christendom', and mentioned its 'several appliances and giant mechanisms and stars that move their jaws and eyes as fast as the organist plays'. On 5 October 1650, Louis XIV was solemnly received with a *Te Deum* sung in the cathedral. For the funeral service for Queen Anne of Austria on 27 March 1666, the mass was performed by three choirs. The theorist and composer René Ouvrard was choirmaster at St André in about 1657; in 1686 Nicolas Jacquet, the elder brother of Elisabeth Jacquet de La Guerre, gave harpsichord and organ lessons to the choristers. He was subsequently organist of St Projet and

of St Pierre. The cathedral choir school was dissolved in 1792. Other important choir schools were at St Pierre (founded 1481), where Guillaume Piétrequin (also known for his chansons) was choirmaster from 1517, and at St Seurin. The latter school was dissolved in 1776, so much did the singers' voices 'make the public laugh'.

The organ builder Valéran de Hémani lived in Bordeaux from about 1623 to 1635, restoring the organs of St André, St Seurin and St Projet. During the 18th century the celebrated François Bédos de Celles worked on the organ of the church of Ste Croix for 20 years. Charles Levens (1689–1764), a choirmaster of the cathedral, published his *Abrégé des règles de l'harmonie* in Bordeaux (1743). He composed masses and motets (his *Paratum cor meum* was performed at the Concert Spirituel in Paris), and a *cantatille* of his was given in 1749 for the Infanta's visit.

In 1707 a group of amateur musicians formed the Académie des Lyriques. On 5 September 1712, Louis XIV issued letters patent for the founding of the Académie des Belles-Lettres, Sciences et Arts. An early director was Sarrau de Boynet (1685–1772), a pupil of Marin Marais and writer on music history and theory. Montesquieu praised his *Dissertation sur l'ancienne musique française*. Rameau was in touch with members of the Académie; he presented a copy of his *Démonstration du principe de l'harmonie* to President Barbot, a friend of Montesquieu. Dissolved during the French Revolution, the Académie was revived as the Académie Nationale des Sciences, Lettres et Arts (1796). It is no longer in existence. Other musical societies were the Musée Littéraire (established 1783), the Lycée (1787) and the Société Philomathique (1808), which replaced the Musée.

In 1785 Bordeaux had 12 makers of string instruments, four organ builders, 56 professional musicians and 15 dancing masters. Franz Ignaz Beck encouraged the development of musical life. He was organist at St Seurin and conductor of the orchestra of the Grand Théâtre; he introduced the symphonies of Haydn and of the Mannheim composers, as well as his own works (melodramas, *opéras comiques*, symphonies, chamber music and religious and patriotic pieces). The violinist Pierre Gaviniès, a native of Bordeaux, had a brilliant career as teacher, performer and composer in Paris. From 1817 Pierre Galin taught popular classes using a new method (*Exposition d'une nouvelle méthode pour l'enseignement de la musique*, 1818) called 'méloplaste', partly based on Rousseau's figured notation; his pupils were called 'galinistes'.

The Société Ste-Cécile, founded in 1843 by Costard de Mézeray (1807–87), set up a symphony orchestra and a conservatory. From 1904, under Louis Pennequin, the conservatory made great strides, becoming a municipal body in 1920. The society also organized a competition; Saint-Saëns won the prize in 1857 with his *Urbs Roma*

*Cutaway section of the interior of the Grand Théâtre, Bordeaux, designed by Victor Louis, opened 1780: engraving by Pierre-Gabriel Berthault from Louis' 'La salle de spectacle de Bordeaux' (Paris, 1782)*

symphony (his public conducting début) and in 1863 with his overture *Spartacus*.

The Grand Théâtre, built by Victor Louis, was inaugurated on 7 April 1780 (see illustration). Racine's *Athalie* was performed there, with music and choruses by Beck, as was the allegorical prologue *Le jugement d'Apollon*. In the 19th century the great French operas were performed, and important modifications were made to the architecture and decoration. The theatre's heyday was from 1921 to 1939 under the management of René Chauvet and Georges Mauret-Lafage. Subsequent directors were Roger Lalande (1954), Gérard Boireau (1971) and Alain Lombard (1990–96). The music collection of the Grand-Théâtre, currently preserved at the municipal library, holds some 1500 works by Lully, Destouches, Campra, Haydn, Gluck, Donizetti and others.

In the 19th century the salons of the Samazeuilh brothers, Vieillard and Duval attracted such composers as Berlioz and Wagner. In January 1826 the 15-year-old Liszt gave six recitals, playing variations by Czerny as well as his own compositions on an Erard piano. Distinguished organists emerged in Bordeaux: Charles Tournemire, Ermend Bonnal (1880–1944), Joseph Bonnet and Fernand Vaubourgoin (1880–1952), also an esteemed composer. The cathedral organ was restored by Cavaillé-Coll and Barker in 1839. Other musicians born in Bordeaux were Charles Lamoureux, Edouard Colonne, Paul Taffanel, the violinist Jacques Thibaud, the pianist Dominique Merlet (*b* 1938) and the composers Roger-Ducasse, Barraud and Sauguet.

In 1926 Henri Bordes founded the Société de Musique de Chambre. The orchestra of Bordeaux, now known as the Orchestre National de Bordeaux-Aquitaine, was taken into municipal control in 1936. Its conductors have been Jules Pennequin, Croce Spinelli, Gaston Poulet, Jacques Pernoo, Roberto Benzi and Alain Lombard. Jacques Chaban-Delmas founded the Mai Musical festival in 1950. Contemporary music is played at the Sigma (since 1965) and at the Conservatoire National de Région, whose director since 1989 is Michel Fusté-Lambezat.

CATHERINE CESSAC

**Borden, David (Russell)** (*b* Boston, 25 Dec 1938). American composer and keyboard player. He studied composition with Louis Mennini, Bernard Rogers and Howard Hanson at the Eastman School (BM 1961, MM 1962) and with Billy Jim Layton, Leon Kirchner and Randall Thompson at Harvard University (MA 1965). He also studied at the Berkshire Music Center with Wolfgang Fortner (1961) and Gunther Schuller (1966); on a Fulbright fellowship with Boris Blacher at the Berlin Hochschule für Musik (1965–6); privately with jazz artists Jimmy Giuffre and Jaki Byard; and with Robert Moog, inventor of the Moog synthesizer and other electronic instruments. After serving as the Ford Foundation's composer-in-residence for the Ithaca, New York, public school system (1966–8), he became composer and pianist in the dance department of Cornell University, where he later assumed the directorship of the digital music programme. He is perhaps best-known for his work with Mother Mallard's Portable Masterpiece Co., a performing group comprised of electronic keyboard instruments, synthesizers and voices (1969–91).

From 1967 Borden has used synthesizers in live performances, and, through the use of solo improvisations, wave-form manipulation and multi-track tape techniques, he has developed a personal polyphonic style. His music from the early 1980s is minimalist, characterized by a steady rhythmic pulse and running lines of quavers accompanied by melodic counterpoint. Later works comment on history by using an entire work by another composer as a cantus firmus. *Notes From Vienna* (1993–4), for example, borrows movements from Haydn and Beethoven's cello works.

JOAN LA BARBARA

**Bordes, Charles (Marie Anne)** (*b* Rochecorbon, nr Vouvray, 12 May 1863; *d* Toulon, 8 Nov 1909). French music scholar, teacher and composer. He was taught composition by Franck and the piano by Marmontel and was *maître de chapelle* and organist at Nogent-sur-Marne from July 1887 until March 1890 when the minister of education commissioned him to assemble a collection of early Basque music (published in 1897 as the *Archives de la tradition basque*). In 1890 he went to Paris where, as *maître de chapelle* at St Gervais-St Protais, he organized (1892) the Semaines Saintes de St Gervais, a series of musical services at which the best-known works of French and Italian Renaissance composers were performed by Bordes' singers, the Chanteurs de St Gervais. Indeed, he dedicated most of his short life (sometimes at the expense of his other creative work) to the revival of sacred and secular Renaissance polyphony, much of which had been completely neglected for centuries, and to encouraging young musicians to look to the past for inspiration.

With the help of Guilmant and d'Indy, Bordes founded in 1894 the society for sacred music known as the Schola Cantorum, which was transformed (1896) into a school for the revival of old church music. As one of its professors, he promoted performances of Gregorian chant and the polyphonic music of Victoria, Josquin, Palestrina etc., and worked to create a modern repertory of vocal and instrumental liturgical music. He encouraged the leading French music scholars to write for his *Tribune de Saint-Gervais*, which became the school's bulletin. In his eagerness to bring early French music to new audiences, Bordes took his singers on tour in the French provinces and in other European countries. In 1899 he founded the Schola Cantorum of Avignon, and in 1905 that of Montpellier, where he organized the first national Congrès du Chant Populaire in 1906, and a new staging of Rameau's *Castor et Pollux*.

Bordes' musicological interests are reflected in his own compositions, which include a *Suite basque* and a *Rhapsodie basque* as well as 33 sacred and secular songs. He also published several collections of French folk music and edited numerous anthologies of early music.

WORKS

*all printed works published in Paris*

SACRED VOCAL

Pie Jesu, op.10 (1889); O salutaris, solo v, chorus, op.12 (1889); Litanies de la très Sainte Vierge, 2 female vv, chorus, op.17 (1891); Tantum ergo, motet, S, T/(T, org), op.18 (1889); Le drapeau de Mazagran, chant de patronage (H. Hello) (1895); Mariale, cantique en l'honneur de la très Sainte Vierge (*c*1896); Cantique aux saints (Hello) (1897); Cantique de pénitence (Le Dorz) (*c*1897); 4 antiennes à la Sainte Vierge, 2vv: 1 Alma redemptoris, 2 Ave regina, 3 Regina coeli, 4 Salve regina (*c*1898); Beata viscera, antienne brève, 2vv, acc. (n.d.); Faux bourdons, 3vv (n.d.)

Salut au saint sacrement, 3vv: 1 Beata es, Virgo Maria, 2 Laudate dominum, 3 O sacrum convivium, 4 Tantum ergo (*c*1900); Verbum caro factum est, response to Sacrement, 4 male vv (*c*1900); Ave Maria, motet, 4vv (1897); Fili quid fecisti, dialogue spirituel, 4vv (?1899) [for foundation of the Schola Cantorum of Avignon, 1899]; Domine, puer meus jacet, dialogue spirituel (1900) [for inauguration of new location of Schola Cantorum in Paris]; Nunc dimittis, paraphrase of Cantique de Siméon (Hello), 1v, org (1909); Vierge lorraine, cantique à Jeanne d'Arc (Virolet) (1920)

SONGS

*for solo voice and piano unless otherwise stated*

Avril (A. Maudit) (1883); Chanson (M. Bouchor), 1883, in *Oeuvres vocales révisées par Pierre de Bréville* (1921); Pleine mer (V. Hugo), 1880–84, in *Oeuvres vocales révisées par Pierre Bréville* (1921); Soirée d'hiver (F. Coppée) (1883); Amour évanoui (Bouchor) (1883); Le temps des lilas (Bouchor), 1884; Paysages tristes (P. Verlaine) (1886): 1 Soleils couchants, 2 Chanson d'automne, 3 L'heure du berger, 4 Promenade sentimentale; Colloque sentimental (Verlaine), 1884 (1924); O triste, triste était mon âme (Verlaine), 1886 (1902); 3 Madrigaux amers (L. Valade), op.5, 1885, in *Oeuvres vocales révisées par Pierre de Bréville* (1921): 1 Profonds cheveux, 2 Le rire, 3 Sur la mer

Spleen (Verlaine), 1886 (1902); Green (Verlaine) (1887); Epithalame (Verlaine) (1888); 3 mélodies (J. Lahor), op.8 (1889): 1 Chanson triste, 2 Sérénade mélancolique, 3 Fantaisie persane; Pensées orientales (Lahor), ?1889 (1901); La bonne chanson (Verlaine) (1889); Dansons la gigue (Verlaine) (1890); Le son du cor s'afflige vers les bois (Verlaine), 1888–96, in *19 oeuvres vocales revues d'après les manuscrits par P. de Bréville* (1914); Paysage vert (Verlaine), 1894 (1902); Sur un vieil air (Verlaine), 1895 (1902)

Promenade matinale (Verlaine) (1896); La ronde des prisonniers (Verlaine), 1899 (1900); Mes cheveux dorment sur mon front (C. Mauclair) (1901); 4 poèmes (F. Jammes), 1901 (1902): 1 La poussière des tamis chante au soleil, 2 La paix est dans le bois silencieux, 3 Oh! ce parfum d'enfant dans la prairie, 4 Du courage? mon âme éclate de douleur; Petites fées, honnêtes gnomes (J. Moréas), 1901 (1902); O mes morts tristement nombreux (Verlaine) (1903); Paysage majeur (L. Payen) (1908); L'hiver (Bouchor), 2vv, op.18, 1886 (1903); Madrigal à la musique (W. Shakespeare: *Henry VIII*, trans. Bouchor), S, A, T, B (1895)

OTHER WORKS

Les trois vagues (drame lyrique, C. Bordes), 1890–1906, inc., *F-Po*

Orch: Pastorale, 1888; Ouverture pour le drame basque Errege Jan (1888); Trois danses béarnaises, op.11 (1888); Rhapsodie basque, pf, orch, op.9 (1889); Euskal Herria, musique de fête pour accompagner une partie de paume au pays basque: 1 Barcus, 2 Lequito, 3 Fuentarabia (1891); Divertissement, tpt, orch (1929)

Chbr: Suite basque, fl, 2 vn, vc, op.6 (1887); Caprice à cinq temps, pf (1891); 4 fantaisies rythmiques, pf, op.16 (1891); Divertissement sur un thème béarnais, 2 pf, 1904, in *Album pour enfants, petits et grands* (1905)

Versets pour les 2es vêpres de plusieurs martyrs (*c*1898)

ELAINE BRODY/PIERRE GUILLOT (text), PIERRE GUILLOT (work-list)

**Bordes-Pène** [née Pène], **Léontine Marie** (*b* Lorient, 25 Nov 1858; *d* Rouen, 24 Jan 1924). French pianist, sister-in-law of Charles Bordes. She studied the piano at the Paris Conservatoire, winning a *premier prix* in Félix Le Couppey's class in 1872. Franck dedicated his *Prélude, aria et final* to her, and she gave the first performance of his violin and piano sonata with Ysaÿe in Brussels. She was the pianist in the first performance of d'Indy's *Symphonie sur un thème montagnard*, which was also dedicated to her. A sensitive interpreter of new French music, she promoted the works of Chabrier, Duparc, Chausson, Bordes, Bréville, Franck and Fauré. After suffering a paralytic stroke in 1890, she retired to Rouen, where she pursued a successful teaching career until her death.

ELAINE BRODY

**Bordewijk-Roepman, Johanna (Suzanna)** (*b* Rotterdam, 4 Aug 1892; *d* The Hague, 8 Oct 1971). Dutch composer. After studying English, she began to compose at the age of 25. Except for some lessons in orchestration with Eduard Flipse (1936–7), she was self-taught.

Bordewijk-Roepman's first major success was in 1940 with a performance of *Les illuminations* (based on three Rimbaud poems) by the Rotterdam PO conducted by Flipse. During World War II she refused to join the Kultuurkamer, as all Dutch composers were required to do. Her works were regularly performed during the 1940s and 50s and she received numerous government commissions, as well as a government prize for the Piano Sonata (1943).

Eclectic in style, Bordewijk-Roepman's works are mostly based on Classical formal principles and show a concern for solid construction and logical development. She wrote ten orchestral works and many pieces for men's chorus. Some of her choral works acknowledge the influence of Debussy, although others employ a close-harmony style. She was married to a well-known writer, Frans Bordewijk, who contributed texts for two works, the one-act opera *Rotonde* (1943) and the oratorio *Plato's dood* (1949). The latter work was first performed in 1990 by students at the University of Amsterdam.

HELEN METZELAAR

**Bordman, Gerald M(artin)** (*b* Philadelphia, 18 Sept 1931). American writer on musical theatre. He graduated from Lafayette College (BA) in 1952, then undertook graduate studies at the University of Pennsylvania (MA 1953, PhD 1956). Although he has written on English folklore, his main work has been in the field of the American theatre, particularly the American musical. His *American Musical Theatre: a Chronicle* (1978, 2/1992) is an extensive and exhaustive summary from the origins of the form to 1978, and displays his characteristic chronicling of detail and thorough examination of narrative history. Consequently, his publications have proved invaluable in the early establishment of what is still a developing field of academic study. He has also published biographies of Jerome Kern and Vincent Youmans.

PAULA MORGAN

**Bordogni, Giulio (Marco)** (*b* Gazzaniga, nr Bergamo, 23 Jan 1789; *d* Paris, 31 July 1856). Italian tenor. He studied with Simone Mayr in Bergamo and made his début in 1813 at the Teatro Re, Milan, as Argirio (*Tancredi*), a role he also sang at La Scala (1817) and other theatres. Engaged at the Théâtre Italien, he sang in the Paris premières of Paer's *Agnese* (1819), Mercadante's *Elisa e Claudio* (1823) and of ten Rossini operas: *L'inganno felice* (1819); *Otello* and *La gazza ladra* (1821); *Elisabetta, regina d'Inghilterra*, *La Cenerentola* and *Mosè in Egitto* (1822); *Ricciardo e Zoraide* and *La donna del Lago* (1824); *Semiramide* and *Zelmira* (1826). He created the role of Libenskof in *Il viaggio a Reims* (1825). He retired

in 1833 and taught singing in Paris; his pupils included Henriette Sontag, Giovanni Mario and Laure Cinti-Damoreau. His voice was small, though perfectly placed, while he sang with great elegance and style though his acting ability was restricted. He published a singing method and several collections of exercises.

ELIZABETH FORBES

**Bordón** (Sp.). *See* BOURDON (i).

**Bordon** [Bourdon, Bordoen], **Pieter** (*b* Ghent, ?1450; *d* after 1483). South Netherlandish composer. His parents were the Ghent singer Valeriaen Bordon and Margriete van Wijniersch. He was active as a singer in his home town for at least 12 years, holding appointments at the churches of St James (1466–9 and 1470–72) and St Michael (1471–4 and 1478); he then departed for Italy, where he briefly joined the choir of Treviso Cathedral in 1479–80, and was paid in September 1484 as 'chonpositore de chanto figurato' at Siena Cathedral. Although the accounts of the latter church mention his having composed 'motets, Credos, and other mensural works for this church' (probably on commission), no liturgical compositions have survived under his name. Bordon may, however, be responsible for the four-part arrangement of the anonymous *Il sera pour vous/L'homme armé* (attributed to 'Borton' in *I-Rc* 2856), as well as a three-part setting of *De tous biens plaine* ascribed in Petrucci's *Odhecaton A* to 'Pe. Bourdon', but elsewhere to Alexander Agricola.

**Bordone** (It.). *See* DRONE (i).

**Bordoni** [Hasse; Bordon Hasse], **Faustina** (*b* Venice, 30 March 1697; *d* Venice, 4 Nov 1781). Italian mezzo-soprano. She was brought up under the protection of the brothers Alessandro and Benedetto Marcello and taught by Michelangelo Gasparini. For many years she was in the service of the Elector Palatine. She made her début in 1716 in C.F. Pollarolo's *Ariodante* in Venice, where she sang until 1725, in operas by Albinoni, Lotti, M. and F. Gasparini, C.F. and A. Pollarolo, Orlandini, Giacomelli, Vinci and others. She appeared at Reggio nell'Emilia in 1717, 1719 (Gasparini's *Bajazet*) and 1720, Milan in 1719, Modena in 1720, Bologna in 1721–2, Naples in 1721–3 (seven operas, including Leo's *Bajazete*), Florence (1723) and Parma (1724–5, including Vinci's *Il trionfo di Camilla*). She made her German début in 1723 at Munich in Torri's *Griselda*, and enjoyed great success there during the 1720s; she was also a favourite at Vienna (1725–6), appearing in operas by Caldara, Fux and others.

Faustina (as she was commonly known) made her London début as Roxana in Handel's *Alessandro* at the King's Theatre in 1726, with Cuzzoni and Senesino in the other leading roles. In the next two seasons (1727–8) she created four other Handel parts – Alcestis in *Admeto*, Pulcheria in *Riccardo Primo*, Emira in *Siroe* and Elisa in

*Faustina Bordoni: portrait by Rosalba Carriera, pastel (Ca' Rezzonico, Venice)*

*Tolomeo* – and sang in Ariosti's *Lucio Vero* and *Teuzzone*, Giovanni Bononcini's *Astianatte* and Handel's *Radamisto*. Her rivalry with Cuzzoni, professional and personal, was notorious, and culminated in an exchange of blows on stage at a performance of *Astianatte* (6 June 1727), but despite this scandal they were both engaged for the following season. She sang at Florence, Parma, Turin, Milan, Rome, Naples and frequently at Venice in 1728–32; the operas included Orlandini's *Adelaide*, two by Giacomelli, and Hasse's *Dalisa*, *Arminio*, *Demetrio* and *Euristeo*. From her marriage to Johann Adolf Hasse (*see* HASSE family, (3)) in 1730 she was associated chiefly with his music, and in 1731 both were summoned to the Saxon court at Dresden, where she enjoyed great success in his *Cleofide*. Hasse was Kapellmeister there for more than 30 years and Faustina sang in at least 15 of his numerous operas between *Caio Fabricio* (1734) and *Ciro riconosciuto* (1751), but also paid many long visits to Italy, singing in Naples, Venice, Pesaro and other cities in operas by Vinci, Pergolesi and Porpora as well as Hasse. In all she sang in more than 30 operas in Venice. After retiring from the theatre in 1751 she kept her salary and her rank as *virtuosa da camera* until 1763. She and Hasse lived in Vienna until 1773, then in Venice; their two daughters were both trained as singers.

Faustina was universally ranked among the greatest singers of her age. Quantz described her voice as a mezzo-soprano, 'less clear than penetrating', with a compass of *b*♭ to *g″* (about a tone lower than Cuzzoni's range). In her Handel parts it is *c′* to *a″*. She was a very dramatic singer, with equal power and flexibility, and a fine actress. Arteaga spoke of 'a matchless facility and rapidity in her execution ... exquisite shake [and] new and brilliant

passages of embellishment'. Tosi contrasted her pre-eminence in lively arias with Cuzzoni's gift for the pathetic, and considered the virtues of the two complementary. An observer in 1721 remarked that Faustina 'always sang the first part of an aria exactly as the composer had written it but at the da capo repeat introduced all kinds of *doublements* and *maniere* without taking the smallest liberties with the rhythm of the accompaniment'. Burney emphasized her perfect intonation and exceptional breath control. His statement that 'E was a remarkably powerful note in this singer's voice, and we find most of her capital songs in sharp keys', is confirmed by the fact that half the arias Handel composed for her are in A or E, major or minor. Quantz (translated by Burney) gives perhaps the clearest account of Faustina's quality:

Her execution was articulate and brilliant. She had a fluent tongue for pronouncing words rapidly and distinctly, and a flexible throat for divisions, with so beautiful and quick a shake, that she could put it in motion upon short notice, just when she would. The passages might be smooth, or by leaps, or consist of iterations of the same tone, their execution was equally easy to her ... She sung *adagios* with great passion and expression, but not equally well, if such deep sorrow were to be impressed on the hearer, as might require dragging, sliding, or notes of syncopation and *tempo rubato*. She had a very happy memory, in arbitrary changes and embellishments, and a clear and quick judgment in giving to words their full power and expression. In her action she was very happy; and as she perfectly possessed that flexibility of muscles and features, which constitutes face-playing, she succeeded equally well in furious, amorous, and tender parts; in short, she was born for singing and for acting.

Metastasio described her and Hasse in 1744 as 'truly an exquisite couple'.

WINTON DEAN

**Bordun** (Ger.; Lat. *bordunus*). *See* DRONE (i).

**Bore (i)** (Fr. *perce*; Ger. *Bohrung*). The interior of a tubular wind instrument, whatever its material. Although some instruments are loosely described as cylindrical and others as conical or conoidal, the measured bores of wind instruments usually deviate significantly from these simple mathematical forms. The bore of an instrument determines the length and proportions of the contained AIR COLUMN, and is the principal factor governing the pitches of the notes which may be sounded on it (*see* ACOUSTICS, §IV). A relatively narrow bore may prevent the sounding of the fundamental frequency, while a wide one may make higher harmonics difficult to sound. The length of the bore in brass instruments may be varied by the use of valves to add or subtract supplementary tubing, while in woodwind the effective length is altered by opening or closing side holes. When the air column is vibrating, irregularities in the bore such as constrictions or the cavities under closed side holes, depending on their position relative to nodes and antinodes, may modify the frequency. Since the sounds of almost all wind instruments are complex, containing harmonic frequencies in varying proportion, the configuration of the bore affects the tone quality of every note. For further information see C. Karp: 'Woodwind Instrument Bore Measurement', *GSJ*, xxxi (1978), 9–28.

**Boree** (It. *borea*). *See* BOURRÉE.

**Borek, Krzysztof** [Christophorus] (*d* probably at Kraków, *c*1570). Polish composer and singer. From 1547 he worked at the Polish royal court, as a singer in Queen Bona's chapel. By 1558 he was *praepositus* of the Cappella Rorantistarum at Kraków Cathedral; he apparently held this post until his death. Two five-part masses by him survive (in *PL-Kk*, incomplete): *Missa 'Te Deum laudamus'* (ed. H. Feicht, *Muzyka staropolska*, Kraków, 1966) and an untitled mass (Sanctus, ed. Z.M. Szweykowski, *Muzyka w dawnym Krakowie*, Kraków, 1964). Both are for men's voices and were thus probably intended for the Cappella Rorantistarum. Two other masses attributed to him (in *Kk*) are of doubtful authenticity.

ELŻBIETA GŁUSZCZ-ZWOLIŃSKA

**Boresini, Antonio.** *See* BOROSINI family, (1).

**Boretti, Giovanni Antonio** (*b* Rome, *c*1638; *d* Venice, 29 Dec 1672). Italian composer and singer. Much of the information concerning his brief career, spent primarily in Venice, derives from prefaces to librettos of operas he wrote in the late 1660s and early 70s. The preface to *Alessandro amante* (dated 1667) cites him as the composer of the opera and also as interpreter of one of the leading roles. His singing career had in fact begun somewhat earlier, but he is not the Guid'Antonio Boretti from Gubbio who was listed in the cast of *La maga fulminata* (1638, Venice) and who was a singer in the papal chapel (1619–46). He was a bass singer at S Antonio, Padua, between 1659 and 1661, when he was dismissed for being absent without leave. He probably moved to Venice in 1662, spending much of the next nine years there. However, his name appears in the cast-list of an opera performed in Turin in 1662, *Le fortune di Rodope e di Damira* by P.A. Ziani, and he was listed as a *musico* at the Savoy court there in 1663. The preface to a later libretto, *Claudio Cesare* (December 1671), mentions his recent appointment as *maestro di cappella* to the Duke of Parma, but he apparently did not take up a post there until April of the following year, and then it was only that

of *vicemaestro*. He died in Venice several months later during preparations for his last opera, *Domitiano*. The only non-operatic works by Boretti to have survived are a cantata and the oratorio *Ezzelino*, for four voices and violins.

Except for the earliest known opera, *La Zenobia*, possibly first performed in Vienna on 18 November 1662, all Boretti's operas received their premières in Venice, many of them appearing subsequently in other Italian cities. His musical language is richly varied and dramatically flexible, moving easily between recitative, arioso and aria. Yet the frequency and elaboration of the arias in several of his operas reflect the growing tendency to abandon the realistic musico-dramatic flow characteristic of early opera in Venice, notably Cavalli's, in favour of the more static, hedonistic vocal exhibitionism demanded by Venetian audiences from about the mid-17th century onwards. His most attractive arias include laments accompanied by strings and pieces in which a running bass participates in communicating the emotions of the text.

WORKS

OPERAS

La Zenobia (drama per musica, 3, M. Noris), Venice, S Cassiano, ded. 10 Jan 1666, possibly already perf. Vienna, 1662 [Act 3 of a Zenobia opera in *A-Wn* may be Boretti's]

Alessandro amante (drama per musica, 3, anon. reworking of G.A. Cicognini: *Gli amori di Alessandro Magno e di Rossane*, 1651), Venice, S Moisè, ded. 28 Jan 1667

Eliogabalo (drama per musica, 3, A. Aureli), Venice, SS Giovanni e Paolo, ded. 10 Jan 1668, *I-Vnm*, 3 arias ed. in Rosand

Marcello in Siracusa (drama per musica, 3, Noris), Venice, SS Giovanni e Paolo, 1669/70, *Vnm*, 1 aria ed. M. Zanon (Milan, 1914)

Ercole in Tebe (drama per musica, 3, Aureli, after G.A. Moniglia), Venice, SS Giovanni e Paolo, ded. 12 Dec 1670, *GB-Lbl* (facs. in IOB, vi, 1977), *I-Vnm*, 1 aria ed. M. Zanon, *Raccolta di 24 arie di vari autori del secolo XVII* (Milan, 1914), 2 arias ed. in Rosand

Dario in Babilonia (drama per musica, 3, F. Beverini), Venice, S Salvatore, ded. 24 Jan 1671

Claudio Cesare (drama per musica, 3, Aureli), Venice, S Salvatore, ded. 27 Dec 1672 [1671], *Nc*, *Vnm*, 1 aria ed. M. Zanon (Milan, 1914), 1 aria ed. in Worsthorne

Domitiano (drama [per musica], 3, Noris), Venice, SS Giovanni e Paolo, ded. 27 Dec 1672

OTHER VOCAL

2 arias, 1679[6]

Ezzelino (orat), 4vv, *I-MOe*

Cantata, 1v, bc, *D-Mbs*

ELLEN ROSAND/BETH L. GLIXON

**Boretz, Benjamin** (*b* New York, 3 Oct 1934). American composer and theorist. He began composing at an early age and studied philosophy as well as music in high school and at Brooklyn College (BA 1954). He received the MFA in composition at Brandeis University (1957), where he was a pupil of Arthur Berger and Irving Fine. He also studied with Foss at UCLA and Milhaud at Aspen. In 1970 he received the PhD from Princeton, where he had been a pupil of Sessions and Babbitt. From 1973 he taught at Bard College, Annandale-on-Hudson, New York. Among his awards have been the Fromm Composition Prize, 1956, a Fulbright scholarship, 1970–71, and a Princeton University Council of the Humanities fellowship, 1971–2.

His early work demonstrates concern for systematic design and the realization of complex and multiple networks of nested musical relationships. Later he explored contexts for improvisatory music making: scenarios and texts for group interaction, notational and gestural stimuli for performance, and so-called soundscores, i.e. taped sound intended as a 'text' for performance. Beginning in 1980 he taped many hundreds of episodes of 'solo and collaborative soundmaking expression'.

Boretz's work as a writer and editor has had a particularly great impact. He was music critic for the *Nation*, 1962–9, and with Berger founded the journal *Perspectives of New Music* in 1962, of which he remained a co-editor (with Berger, Edward T. Cone and Elaine Barkin, in succession) until 1982. The lengthiest of his writings, *Meta-Variations: Studies in the Foundation of Musical Thought*, which appeared in that journal in installments (1969–73), applies principles of empiricist philosophy in examining the possibility of discourse about music. In later writings, he investigated varieties of musical-verbal discourse in which the sonority of language, changes in narrative voice, and the graphic presentation of the text play a fundamental role. He has also written on other composers such as Sessions, Perle and Babbitt.

Boretz has continued his radical exploration and rethinking of the aspects of musical experience and has continued to extend the scope of his work, incorporating video and audio collaborations, extended 'conversations' between different texts (verbal and musical), and the discourses (and sonorities) of recent writing on gender, sexuality and identity. He has founded '"laboratories" for holistic music learning based on a fusion of experientially guided theory and theoretically informed practice', designing the Music Program Zero at Bard, which he directed until 1996, and co-directing the Integrated Arts Program since 1996. He has also included the systems of music distribution among the aspects of musical life that he has critically reconsidered, co-founding (with Mary Lee Roberts) The Open Space, which produces and distributes printbooks, compact discs, and videotapes of his own work and that of numerous musicians. While his interests continue to broaden – and his work further breaks down traditional distinctions between varieties of texts, genres, and the modes and occasions of performance – a deep engagement with questions of the ontology of musical experience has remained a constant of Boretz's ongoing musical project.

MARTIN BRODY

**Borg, Kim** (*b* Helsinki, 7 Aug 1919; *d* Copenhagen, 28 April 2000). Finnish bass-baritone and composer. He studied at the Sibelius Academy, Helsinki, and later in several cities abroad including Vienna, Rome and New York. He confined himself to concert work for three years and then made his operatic début in 1951 at Århus, Denmark, as Colline in *La bohème*. An international career opened up in 1956 when he sang at Salzburg and Glyndebourne, his roles there being Don Giovanni, Pizarro (1958) and Prince Gremin in *Yevgeny Onegin* (1968). He made his Metropolitan début in 1959 as Count Almaviva. From 1960 he was a member of the Swedish Royal Opera, also singing regularly in Hamburg where in 1966 he appeared in the world première of Schuller's *The Visitation*. His repertory included Boris and Pimen (sung in 1977 at Tel-Aviv), Baron Ochs, Méphistophélès and Osmin; he also sang Fafner and Hagen in the 1971 Stockholm *Ring*. Borg retired from the stage in 1980. From 1972 to 1989 he was professor of singing at the Copenhagen Conservatory. A fine linguist and a cultivated musician, he can be heard in many recordings from the 1950s and 60s (including *The Dream of Gerontius* with Barbirolli) when his firm, full-bodied voice was in its prime. Borg also composed a number of orchestral works (including two symphonies, and concertos for trombone and double bass), chamber music, songs and a setting of the *Stabat mater*.

J.B. STEANE/R

**Borgatti, Giuseppe** (*b* Cento, Ferrara, 17 March 1871; *d* Reno di Leggiuno, Varese, 18 Oct 1950). Italian tenor. Of humble origin, he studied with Alessandro Busi at Bologna, and made his début in Gounod's *Faust* at Castelfranco Veneto in 1892. During the following years he sang in Turin, Madrid and St Petersburg; at La Scala in 1896 he took the part of Andrea Chénier with great success in the opera's first performance. Over the next ten years he appeared in the leading Italian theatres and in Spain, Portugal and Argentina, most notably as Des Grieux in Puccini's *Manon Lescaut* and as Cavaradossi. From 1906 he devoted himself to Wagner (having already sung Siegfried and Tristan at La Scala in 1899 and 1900 under Toscanini) with exceptional results. In 1914, after appearing in the Italian première of *Parsifal* at Bologna and La Scala, he was forced by glaucoma to retire from the stage, and in 1923 he became completely blind. He performed for the last time at a concert in Bologna in 1927, and subsequently devoted himself to teaching. His autobiography *La mia vita d'artista* was published in Bologna in 1927.

Borgatti's voice was large, robust and of beautiful timbre; he could also, especially in his early years, sing with delicacy and sweetness. Driven, perhaps, by his intensely dramatic temperament, he was the first tenor to introduce into the performance of *verismo* operas a forcefully emphatic delivery and an incisive, vehement declamatory manner. This was in contrast to the lyrical approach and virtuosity still frequently shown by the tenors of the preceding generation, such as Stagno and De Lucia. These qualities, together with a strong physique, vigorous acting and remarkable insight into the character of his roles, made him an exceptional Heldentenor who did much to further the cause of Wagner's operas in Italy.

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

**Borge, Victor** [Rosenbaum, Borge] (*b* Copenhagen, 3 Jan 1909). American pianist, musical humorist and conductor of Danish birth. After early training with his father, he gave a piano recital at the age of eight in Copenhagen, which won for him a scholarship to the conservatory; he later studied with Frederic Lamond and Egon Petri in Berlin. He performed in amateur musical revues in Copenhagen, but his satires of Hitler placed him in danger and he fled, first to Sweden and then to the USA, where he later became a citizen. In New York in 1940 he began regularly to appear on Bing Crosby's 'Kraft Music Hall' radio series, which led to a radio show of his own. Starting in the autumn of 1953 he gave nearly 850 daily recitals under the title 'Comedy in Music' at the Golden Theater on Broadway. He has toured in many parts of the world and has appeared widely on radio and television and in films. His routines (which are partly improvised) are a mixture of verbal and musical humour, delivered at the piano; though his comic reputation is based on his continually forestalling and interrupting his own playing, he is an accomplished performer, as his elaborate musical jokes (such as the composite piano concerto consisting of well-known passages from the repertory skilfully run together) demonstrate.

When he was well past 60 Borge began to appear as a guest conductor with such orchestras as the Amsterdam

Concertgebouw and the New York PO. He sang and played with Beverly Sills in the Opera Company of Boston production of *Die Fledermaus* (25 January 1980), and made his opera conducting début in *Die Zauberflöte* with the New Cleveland Opera Company (30 November 1979). He has written two books, *My Favorite Intermissions* (1971) and *My Favorite Comedies in Music* (1980), and made several recordings. Among his many honours are knighthoods conferred by Denmark, Norway, Sweden and Finland.

KAREN MONSON

**Borges, Raúl** (*b* Caracas, 4 Feb 1882; *d* Caracas, 24 June 1967). Venezuelan guitarist, teacher and composer. He came from a family well known for its artistic leanings. Little is known about his musical education except that he was self-taught. He began with popular instruments, playing, in addition to the guitar, the cuatro, the bandola, the mandolin and, apparently, the harp. In 1912 he belonged to the Círculo de Bellas Artes, a group in which the plastic arts dominated and the first artistic group with modernist concerns in Venezuela. During those years he began his work as instrumental teacher. In the 1920s he wrote mostly guitar pieces in a nationalistic style, the first in Venezuela to be written for the guitar as a solo instrument. In 1926 he went to Paris as a diplomat. At the beginning of the 1930s he struck up a close friendship with Agustín Barrios Mangoré, and this led to the creation of a chair in classical guitar at the Caracas National Conservatory, established on 2 September 1932. From then on he devoted himself entirely to teaching. Among his most distinguished pupils are the composer Antonio Lauro, performers Alirio Díaz and Rodrigo Riera, and the teacher Manuel Enrique Pérez Díaz, who succeeded him in the chair for guitar in January 1960. He composed and arranged many pieces for guitar trio, these forming an essential part of the repertory of the group that bears his name, directed by Antonio Lauro.

WORKS

*all for guitar solo, published New York, 1964*

Canción antigua, D; Canción de cuna, D; Canción de cuna, G; El criollito (Waltz), A; Estudio, C; Fuente morisca (Trémolo), d; Marisol (Venezuelan Waltz), b; Melodía, D; Preludio, e; Sueño de opio (Fantasy on a Theme by Jervis-Scalisi), d; Valse sobre motivos franceses, D; Valse venezolano, a

ALEJANDRO BRUZUAL

**Borgetti, Innocenzio** (*b* Piacenza; *fl* 1640). Italian composer. He was in holy orders. He was working at Bologna Cathedral in 1640, having previously been at Piacenza Cathedral, as he explained in his *Salmi intieri per li vespri di tutte le feste dell'anno*, for four voices and continuo, published in Venice in that year.

□

**Borghese** [Borghesi, Borghesy], **Antonio D.R.** (*fl* late 18th century). French composer and theorist. He may have been born in Rome and seems to have travelled widely. The publication of his Six Sonatas op.1 in London about 1776 and a performance of his opera *The Fair Venetian* in Dublin in that year would seem to indicate his presence in the British Isles at that time. The *Gazette de St Pétersbourg* of 16 June 1780 carries a notice that a certain *maître de chapelle* Borghese had arrived in that city and wished to teach the piano and singing. His name next appears in connection with a performance of his opera *Der unvermuthete glückliche Augenblick* in Riga in 1783. He arrived in Paris no later than 1785, when his name was listed in the *Tablettes de renommée des musiciens*; this states that he composed several symphonies, sextets, quartets, trios, sonatas, concertos and harpsichord pieces, but none of these has been found. In December 1785 he received a privilege to publish his *L'art musical ramené à ses vrais principes … traduites de l'italien*, and in 1786 his opera *La basoche* was performed in Paris.

English editions of *L'art musical* appeared in London in 1790 and 1795, indicating that Borghese may have emigrated to England to escape the Revolution. The 1790 edition is a revision of the earlier French one, despite its claim to have been 'translated from the original Italian'. Divided into three main sections ('Theory', 'Practice' and 'Execution of Music'), with chapters on the nature and composition of harmony, the treatise deals mainly with the art of accompaniment, and is therefore concerned more with the harmonic implications of melody than with harmony *per se*. The preface to this edition shows Borghese's apparent dissatisfaction at the earlier reception of his 'system' in France, where it had been unfavourably reviewed in the *Mercure de France*.

In 1799 Borghese was back in Paris, performing in a concert with his wife, the violinist and pianist Agathe-Elisabeth-Henriette Larrivée (the younger daughter of the singers Henri and Marie Jeanne Larrivée). Apart from his three operas and his treatise, Borghese wrote only a few minor instrumental and vocal pieces; his wife composed a set of three piano sonatas with violin and bass accompaniment.

WORKS

STAGE

The Fair Venetian (comic op), Dublin, Crow Street, 18 March 1776, unpubd, lost

KENNETH LANGEVIN

**Borghi, Giovanni Battista** (*b* Camerino, Macerata, 25 Aug 1738; *d* Loreto, 25 Feb 1796). Italian composer. Early accounts often confuse him with the violinist Luigi Borghi

and the harpsichordist Giovanni (or Giuseppe) Borghi. He studied at the Conservatorio della Pietà dei Turchini, Naples, from 1757 to 1759. He served first as *maestro di cappella* at Orvieto Cathedral from 1759 to 1778 and then at the Santa Casa of Loreto until his death, taking frequent leave to produce operas throughout Italy, principally in Venice, Florence and Rome.

During the first 15 years of his career he wrote an equal number of *opere buffe* and *opere serie*. Typical of the 1770s, his serious operas have arias of extreme length, short third acts, multiple exits following individual arias, long ballets as entr'actes, trios and duets concluding the first two acts and aria-length cavatinas late in Act 3. The comic operas open with short static *introduzioni*, proceed with a succession of recitatives and arias and conclude with finales with increasing numbers of personnel. *Il filosofo amante* stands out for its many short ensembles, including a quartet, a quintet and a trio involving some action.

After 1777 Borghi turned exclusively to *opera seria*. His operas of the 1780s show innovatory traits common in the works of the librettist Sertor, such as the ensemble that increases from duet to trio in *Piramo e Tisbe*. In his setting of Metastasio's *Olimpiade* (1784) violence appears on the stage, and he carved a multi-sectional finale from the final scene of Metastasio's text. Accompanied recitative becomes more prevalent; such scenes may encompass cavatinas and employ wind instruments for 'ghost scenes' and other special effects.

Borghi's arias show extreme textural contrasts: a thin string accompaniment sometimes follows the voice and sometimes provides rhythmic background, thickening abruptly with the addition of wind instruments and obbligato commentary during vocal caesuras and ritornellos. Nevertheless, his accompaniments are often denser than those of many of his contemporaries and his forms less clearly sectional. Though he was judicious in his use of wind, his harmonic vocabulary was at times chromatic, his orchestration programmatic and his ornamental vocal style virtuoso.

In the two operas of the 1790s the amount of accompanied recitative increases significantly to encompass entire scenes, particularly near the end of each act. The *introduzione* becomes a component of serious opera, and the chorus assumes a more important role, participating in ensembles and concluding arias. Arias incur commentary from other characters, the chorus and even a full military wind band. Borghi's most successful work, *La morte di Semiramide*, proved to be a herald of the decade. In this early example of the new Venetian style, pioneered by the librettist Sografi, the traditional stark delineations of form disappear in great scene complexes of continuous music moving seamlessly among the textural options of accompanied recitative, aria, ensemble and chorus. There are only 11 arias, and some are interrupted or overlaid with choral or solo interpolations; in one of Semiramide's a military wind quartet is heard, and public comments restore her tranquillity. There are extended continuous scenes as each act draws to its climactic conclusion: the ghost scene in Act 1, the mother–son confrontation in Act 2 and the tomb and death scene in Act 3. Other features of this opera soon to become common are the *introduzione* for duo and chorus, the *giuramento* for quartet and chorus and the *nottorno* for duo.

Borghi may have been best known for his sacred music. Its widespread use is suggested by the many manuscripts surviving in libraries and church archives. He also composed many oratorios and occasional pieces for ecclesiastical ceremonies. La Borde described Borghi as an original composer, highly regarded by connoisseurs, but 'more esteemed than applauded, for lack of that naturalness so necessary in music to win the approval of the multitude'. Gervasoni praised Borghi's sacred works for their elegant melodic style and for their harmonic and contrapuntal correctness, but Tebaldini (1921) judged them as belonging to 'the most decadent genre', in which 'the absolute virtuosity of the singer has taken the upper hand over the composer'.

## WORKS

### OPERAS

dm – *dramma per musica*

Adriano in Siria (os, 3, P. Metastasio), Turin, carn. 1759, *P-La*
Il tutore deluso (intermezzo, 2, A. Gatta), Lucca, Pubblico, carn. 1762
Le nozze disturbate (farsetta, Gatta), Florence, Pallacorda, 1762

MARITA P. McCLYMONDS (with DENNIS LIBBY)

**Borghi, Luigi** (*b* Bologna, ?1745; *d* London, *c*1806). Italian violinist and composer. He was a pupil of Pugnani and friend of Sir William Hamilton, and settled in London around 1769. A prominent orchestral violinist, he was leader of the second violins at the Handel Commemoration of 1784 and at the Professional Concert from 1785 until 1792, and played regularly with Cramer in quartets and other chamber music. He composed ballet music for the Italian opera, was assistant manager of O'Reilly's opera company at the Pantheon in 1791 and, shortly afterwards, married the prima donna Anna Casentini (*fl* 1787–96). His works, among which the violin concertos are notable examples of the *galant* style, were published both in England and on the Continent.

WORKS

JOHN A. PARKINSON/SIMON McVEIGH

**Borgho** [Borghi], **Cesare.** *See* BORGO, CESARE.

**Borgia, Giorgio** (*fl* 1580). Italian composer. According to his only extant work, *Il primo libro delle canzoni spirituali* (Turin, 1580) for three to five voices, he was *maestro di cappella* at Turin Cathedral in 1580. The work contains 37 compositions; Eitner wrongly gave 1586 as its date of publication, and Fétis incorrectly attributed it to Gregorio Borgia whom he described as an organist at Novara (*EitnerQ*; *FétisB*). A volume of *Madrigali e canzonette* for three and four voices is listed in the Giunta catalogue (*MischiatiI*).

PIER PAOLO SCATTOLIN

**Borgiani, Domenico** (*b* Rome; *fl* 1646–78). Italian composer. He was *maestro di cappella* of Viterbo Cathedral in 1646 and for some years afterwards. He published two volumes of sacred music in the concertato style: *Sacri concentus* for two and five voices (Rome, 1646) and *L'arpa di David accordata co' sacri concerti* for two to five voices (Rome, 1678); the latter survives incomplete.

□

**Borgioli, Dino** (*b* Florence, 15 Feb 1891; *d* Florence, 12 Sept 1960). Italian tenor. He studied with Eugenio Giachetti, and made his début in 1914 as Arturo in *I puritani* at the Teatro Corso, Milan. More significantly he sang Fernand in *La favorite* under Serafin at Milan's Teatro Dal Verme in 1917. He was soon in demand for the lighter roles in other Italian theatres, and in 1918 began a long association with La Scala. His voice, of clear timbre but limited volume, was highly trained and well produced, and his elegant style made him a favourite in England, where he sang at Covent Garden (first in 1925, in *Lucia* and *Il barbiere di Siviglia* with Toti dal Monte and in *Rigoletto* with Norena; then in other roles, notably as Don Ramiro to the Cenerentola of Conchita Supervia in 1934–5) and at Glyndebourne (Don Ottavio 1937–9,

Ernesto in *Don Pasquale* 1938). Borgioli also made some appearances in the USA, but settled in London as a teacher of singing, and acted as artistic director and producer to the Jay Pomeroy opera seasons of 1946–8 at the Cambridge Theatre. His recordings, which include complete versions of *Il barbiere di Siviglia* and *Rigoletto*, support his claim to be considered the best light tenor of his day after Schipa.

DESMOND SHAWE-TAYLOR

**Borgo** [Borgho, Borghi, Burgo, Burgho], **Cesare** (*b* Milan, 2nd half of the 16th century; *d* ?Milan, March 1623). Italian composer and organist. He was a friar. According to a document quoted by dalla Libera, he lived in the parish of S Salvatore in Milan. In 1584 he became organist at S Pietro di Gessate in the province of Milan, and on 11 October 1590 he was appointed to play the new organ built by Valvassori at Milan Cathedral. On 10 June 1591 he applied to the cathedral chapter to play the old Antegnati organ, an appointment left vacant on the death of G.B. Morsellino; he succeeded to this post on 12 December with a salary of 400 imperial lire a year, and held it until his death. Borgo is important for his application of the Council of Trent directive concerning Ambrosian chant.

PIER PAOLO SCATTOLIN

**Borgstrøm, Hjalmar** (*b* Kristiania [now Oslo], 23 March 1864; *d* Oslo, 5 July 1925). Norwegian composer. He studied composition and theory with Johan Svendsen, L.M. Lindeman and Ole Olsen. From 1887 he studied for two years at the Leipzig Conservatory, and in 1890 he went to Berlin where he stayed until 1901. He settled in Kristiania in 1903.

Borgstrøm exerted a great influence on Norwegian music in the first quarter of the 20th century, both as a prolific composer (his most important works are five symphonic poems, written in a late Romantic idiom) and as a highly respected music critic (in *Verdens gang* 1903–13, and in *Aftenposten* 1913–25).

WORKS

*MSS including autographs in N-Ou*

Operas: Thora på Rimol [Thora from Rimol], 1894; Fiskeren [The fisherman], 1900

Sym. poems: Hamlet, pf, orch, 1903; Jesus in Gethsemane, orch, 1904; John Gabriel Borkman, orch, 1905; Die Nacht der Toten, pf, str, tpt, perc, 1905; Tanken [The Thought], orch, 1916

Orch: 2 syms., G, 1890, d, 1912; Pf Conc., C, 1910; Vn Conc., G, 1914

Chbr: Sonata, vn, pf, G, 1906; Cl Qnt, 1919; str qt, c, 1887

Choral works, incl. Hvem er Du med de tusene Navne [Who are you with a thousand names], cant, soloists, choir, orch, 1889; Reformasjonskantate, 1917

*c*45 songs, incl. 5 Gedichte aus Buch der Liebe; Svalerne [The swallows]; Rød valmue [Red poppy]; Frossen skog [Frozen forest]

*c*20 pf works

FINN BENESTAD

**Borguñó (Pla), Manuel** (*b* Rubí, Barcelona, 5 May 1886; *d* Madrid, 23 Sept 1973). Spanish teacher, choirmaster and composer. After seven years at the Escolania of Montserrat under Guzmán, he went in 1900 to the Barcelona Municipal Music School, where he studied with Nicolau, Pellicer and Lamote de Grignon. In 1911 he was appointed assistant conductor of the Euterpe Choral Society, of which he was later conductor; subsequently he also conducted the Rubí Choral Society. He founded a notable choral society at Graus, Huesca (1914), a music academy at Barcelona (1918), a popular conservatory at Igualada, Barcelona (1921), and the Asociación de Amigos de la Educación Musical at Barcelona (1934). In 1942 he established the Coro de Santa Cecilia and the Instituto Musical de Pedagogía Escolar y Popular at Santa Cruz, Tenerife, where he reorganized the seminary's Schola Cantorum, a choir which reached great heights under his direction. He also taught at the Córdoba Conservatory, Mexico (1948–9). An apostle of music education, he gave numerous demonstrations in several different countries of his 'eurhythmic method' of teaching singing and music. He was an honorary member of the Spanish Musicology Institute and represented Spain at international congresses on music education in Paris (1937), Brussels (1953) and Moscow (1970). From 1932 he taught musical education in Barcelona at the Institut-Escola and the French school groups.

His compositions include a ballet, *La fiesta de la calle*, staged in New York, sacred and secular choral pieces, songs and piano works. A large part of his output was intended for pedagogical use and consists of arrangements of popular music for amateur, especially children's, choirs. Borguñó was also a prolific writer; among his several treatises on music education are *La música y la escuela*

(Barcelona, 1924), *La música, el cant i l'escola* (Barcelona, 1933), *Educación musical escolar y popular* (Barcelona, 1950), *¿ Cómo salvar la educación musical?: un problema internacional* (Santa Cruz de Tenerife, 1969) and *La educación musical masiva en la escuela: apremiante llamada a los músicos* (Santa Cruz de Tenerife, 1973).

A. MENÉNDEZ ALEYXANDRE/ANTONI PIZÀ

**Bori, Lucrezia** [Borja y Gonzáles de Riancho, Lucrecia] (*b* Valencia, 24 Dec 1887; *d* New York, 14 May 1960). Spanish soprano. She studied first in Spain and then in Milan with Melchiorre Vidal and made her début in 1908 at the Teatro Adriano, Rome, as Micaëla. She gave a guest performance of Puccini's Manon during the Metropolitan's visit to Paris in 1910 at the Théâtre du Châtelet, and repeated the role in 1912 at her official Metropolitan début in New York. Between 1911 and 1914 she appeared at La Scala, notably as Octavian in the first Italian performance of *Der Rosenkavalier* and as Nannetta under Toscanini in the Verdi centenary performances of *Falstaff*, and at the Colón, Buenos Aires. She stopped singing in 1915 because of vocal problems but resumed her career in 1919. Except for the years 1916 to 1920, she continued to appear at the Metropolitan until 1936; she was elected a member of the Metropolitan board of directors in 1935 and in 1942 became chairman of the Metropolitan Opera Guild.

Endowed with a voice of modest size, rather limited in the upper register, Bori used its clear and delicate timbre to draw characters of pathetic fragility (Mimì, Manon, Juliet); she imbued them with intense and passionate feeling and, in the comic repertory, with gentle and stylized charm. She may be considered a modern version of the 'sentimental' 18th-century prima donna.

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

**Borisovsky, Vadim (Vasilyevich)** (*b* Moscow, 7/19 Jan 1900; *d* Moscow, 2 Aug 1972). Russian viola player and pedagogue. He studied the violin at the Moscow Conservatory with Mikhail Press but was encouraged by the viola professor Vladimir Bakaleynikov to take up that instrument and graduated in 1922 with a first prize in viola. From its foundation in 1923 until 1964 he played in the Beethoven Quartet and in 1927 he succeeded Bakaleynikov as professor at the Moscow Conservatory. Borisovsky, who played a large Gasparo da Salò instrument with ease, is considered the father of the modern Russian viola school; along with Yuri Kramarov (1929–82) at the Leningrad Conservatory he raised the standard of playing immeasurably. As early as 1927 he made important contacts with Hindemith and Wilhelm Altmann. With the latter he compiled a catalogue of viola repertory – the *Literaturverzeichnis für Bratsche und Viola d'amour* (Wolfenbüttel, 1937) – over a period of ten years. He himself was to contribute 253 editions or transcriptions to the literature. He also played a viola d'amore made for him by T.F. Podgorny and contributed to the instrument's revival in Russia. Many works were dedicated to him, notably Shostakovich's 13th Quartet. He left a handful of solo recordings in addition to many with the quartet.

TULLY POTTER

**Borja, Alonso Lobo de.** *See* LOBO, ALONSO.

**Borja, S Francisco de,** Marquis of Lombay, 4th Duke of Gandía (*b* Gandía, Valencia province, 28 Oct 1510; *d* Rome, 30 Sept 1572). Spanish administrator and composer. He came of an illustrious family and served the Emperor Charles V, who appointed him viceroy and captain-general of Catalonia in 1537; he became Duke of Gandía in 1543. In 1546, following the death of his wife, he joined the recently founded Jesuit order and became its general in 1556. He was beatified by Pope Urban VIII in 1624 and canonized by Clement IX in 1671.

A competent musician, he was a forerunner of the great Valencian polyphonic school, whose most famous composer was J.B. Comes. His works include the *Misa de Adviento y Cuaresma* (ed. J. Climent, *Tesoro sacro musical*, lvi/1, 1973, suppl.), motets, the psalm *Beati immaculati in via*, music for a mystery play on the subject of the Resurrection (ed. in Baixauli and Ripollés Pérez), and secular *cuatros* and *cantadas* (some ed. in Soriano Fuertes); some of this music was formerly in the archives of the collegiate church at Gandía.

GUY BOURLIGUEUX

**Borja y Gonzáles de Riancho, Lucrecia.** *See* BORI, LUCREZIA.

**Borjon de Scellery, Pierre** (*b* Pont-de-Vaux, Ain, 24 April 1633; *d* Paris, 4 May 1691). French lawyer and man of letters. He is often confused with his great-grandson, Charles-Emmanuel Borjon de Scellery (*c*1715–95). He was active in the law courts of both Dijon and Paris and is known chiefly for his writings on jurisprudence. He also composed poetry (noëls 'en patois bressan'), published after his death and later set to music, and is credited with *Traité de la musette, avec une nouvelle méthode, pour apprendre de soy-mesme à jouer de cet instrument facilement, et en peu de temps* (Lyons, 1672, 2/1678/*R*), which describes an instrument in vogue throughout France at the time and includes examples of music collected by the author.

ALBERT COHEN

**Borkh, Inge** [Simon, Ingeborg] (*b* Mannheim, 26 May 1917). Swiss soprano. She began her career as an actress, before studying singing in Milan and making her début in 1940 at Lucerne as Czipra (*Der Zigeunerbaron*), followed by Agathe. She appeared in Zürich, Munich, Berlin, Stuttgart, Vienna and Basle, where she sang Magda in the first German-language performance of *The Consul* (1951). She sang Freia and Sieglinde at Bayreuth (1952) and made her American début in 1953 at San Francisco as Strauss's Electra, returning for Verdi's Lady Macbeth. In 1954 she sang Eglantine (*Euryanthe*) at Florence and in 1955 created Cathleen in Egk's *Irische Legende* at Salzburg. She took part in the American première of Britten's *Gloriana* (1956, Cincinnati) and made her débuts at the Metropolitan (1958) and at Covent Garden (1959) as Salome. A notable exponent of 20th-century opera, she counted Turandot, Orff's Antigone and Bloch's Lady Macbeth among her roles, as well as the Dyer's Wife (*Die Frau ohne Schatten*). Her voice, bright and incisive, was capable of great dramatic intensity. Her Turandot, Salome and Antigone are preserved on disc.

ALAN BLYTH

**Bořkovec, Pavel** (*b* Prague, 10 June 1894; *d* Prague, 22 July 1972). Czech composer and teacher. His studies in philosophy at Prague University were unfinished when he entered military service in World War I. On his return he studied composition with J.B. Foerster and Jaroslav Křička. In 1925–7 he attended the masterclass of the Prague Conservatory under Suk. Bořkovec's early compositions, with their late-Romantic orientation, had success with both audiences and critics; they included the symphonic poem *Stmívání* ('Growing Dark', 1920), the String Quartet no.1 (1924–5) and the Symphony no.1 (1927). At the end of the 1920s he developed an interest in contemporary musical trends. He became a member of the MÁNES MUSIC GROUP in Prague, thus becoming associated with composers such as Martinů and their response to the stimulus of European neo-classicism. In the years after World War II Bořkovec was professor of composition at the Prague Academy of Musical Arts (1946–64) and taught many eminent composers.

Pavel Bořkovec was one of the most important Czech composers in the 1920s and 1930s, and in the two decades following World War II. In the 1930s he was ranked beside Hába as an innovator. The development of his new style can be viewed in the symphonic allegro *Start* (1929), the Piano Concerto no.1 (1931), and the *Partita* (1936). Much of Bořkovec's work is governed by neo-classical principles, with the use of individual timbres for dramatic effect. His concisely constructed forms are thus combined with an expressive lyricism. The most significant works of his maturity are the ballet *Krysař* ('The Ratkiller') (1939), the Nonet (1940), the Concerto grosso (1941), the opera *Paleček* ('Tom Thumb') (1947) and the String Quartet no.4 (1947). In the postwar years Bořkovec continued to refine his own idiom while striving for greater emotional intensity in works such as the String Quartet no.5 (1961), the *Sinfonietta in uno movimento* (1963–4) and *Silentium turbatum* (1965).

WORKS
(*selective list*)

Stage: Satyr (op, after J.W. von Goethe), 1937–8; Krysař [The Ratkiller] (ballet), 1939; Paleček [Tom Thumb] (op, F. Kubka), 1945–7

ALENA BUREŠOVÁ

**Borkowski, Bohdan** (*b* Tęczynek, nr Kraków, 7 Nov 1852; *d* Warsaw, 6 Nov 1901). Polish composer. At the Music Institute in Warsaw he studied the piano with Nowakowski and harmony with Moniuszko. After graduating he continued to take private composition lessons with Moniuszko and then went to Vienna for further study under Louis Saar. On his return to Warsaw he devoted his time to composition and private piano tuition. He was primarily a composer of vocal music, and of religious music in particular – his Mass in C won a prize at the International Competition of the Carillon Society in Brussels in 1893. His choral works are marked by a sound assessment of the capabilities of different ensembles; secular pieces include *Natarcie jazdy* ('A Cavalry Charge'), which received special mention at the Warsaw Music Society competition in 1887, and a folksong cycle which earned a similar distinction four years later. Borkowski's songs have a prominent lyrical quality and show great care in the evocation of mood; the best is *Drapieżna ptaszyna* ('The Little Bird of Prey') which received a prize in the competition organized by the weekly paper *Echo* in 1895. The vaudeville *Urwipołeć* ('The Scamp') was staged at the Vaudeville Theatre in Warsaw in 1895, but with little success. (*PSB*, T. Ochlewski; *SMP*)

WORKS
*most MSS lost, but some published in Warsaw*

Stage: Urwipołeć [The Scamp] (vaudeville, Wołowski), Warsaw, 1895; Filius Chami (op, 4, B. Grabowski), 1899

Sacred: 3 masses, incl. Mass, C, 1893; Ave Maria; Salve regina; Sub tuum praesidium; Hymn na dzień Zwiastowania Najświętszej Marii Panny [Hymn for the Feast of the Annunciation of the BVM] (A. Mickiewicz), T, chorus, orch, 1894

Vocal: Natarcie jazdy [A Cavalry Charge], chorus, 1887; solo songs

Inst: Epizod, orch, 1893; Marsz radosny [March of Joy], orch, 1894; Polski kwartet; works for vn and pf, and solo pf

JERZY MORAWSKI

**Borlasca** [Parlasca, Perlasca, Burlasca, Barlasca, Borlasco], **Bernardino** (*b* Gavio, nr Genoa, *c*1580; *d* in or after 1631). Italian composer, singer and instrumentalist. He was active mostly in Germany and Austria. There seems to be no documentary evidence to support Giazotto's claim that Borlasca was born about 1560; since his first published compositions appeared in 1609, a later date seems more plausible. By 1 July 1611 he was appointed vice-Kapellmeister at the Munich court of Maximilian I, and from 1612 until 1615 Borlasca had sole charge of the Bavarian music chapel. He also had contacts with the Habsburg court at Innsbruck, receiving money for travel in 1612. After Ferdinand de Lassus's return to Munich from studies in Italy, Borlasca shared the post of Kapellmeister with him. By 1617, however, Lassus had been appointed sole Kapellmeister, and Borlasca was relegated to the dual position of vice-Kapellmeister and Konzertmeister, with primary responsibility for the instrumentalists. In 1621, Borlasca dedicated pieces, now lost, to Emperor Ferdinand II, asking to be ennobled, a request that the emperor granted in 1623. Borlasca left Munich hurriedly in 1625 to avoid creditors, but maintained contacts with the Bavarian court, receiving a gift for Italian compositions in 1628. By 1629, Borlasca was an instrumentalist at the imperial court of Ferdinand II in Vienna, where his presence is documented in 1629 and 1630. He left the service of the emperor before 1637. The dedications to his *Fioretti musicali* (which survives in two manuscript copies with differing dedications, but identical contents) place him in Regensburg in February 1630 and in Frankfurt in 1631, after which there is no further trace of him.

Many of Borlasca's early works, including at least two collections of sacred music and the first book of canzonettas, are lost. His surviving compositions include two books of polychoral sacred music, but most of his works are in the newer few-voice concertato idiom. His earliest published compositions, the *Scherzi musicali ecclesiastici* (1609) dedicated to Cardinal Giustiniano, the papal legate in Bologna, show Borlasca's early importation of the recitative style into sacred music. These settings of texts from the Song of Songs are, according to the title-page, suitable for singing with 'concerti gravi in stile rappresentativo'. The canzonettas of 1611 and the *Fioretti musicali* show that Borlasca could write light, strophic, three-voice canzonettas in a fluent but unremarkable style dominated by syllabic declamation, symmetrical sequences, and passages in parallel 3rds and 6ths. Many of these pieces recall the simpler passages of Monteverdi's three-voice canzonettas of 1584.

Several of Borlasca's published collections carry revealing prescriptions concerning performing practice. The foreword to his *Cantica divae* (1615) contains suggestions for the disposition of voices and instruments in polychoral compositions, and the *Ardori spirituali* (1617) includes advice to the singers concerning subtle changes in tempo and projection of the text.

STEVEN SAUNDERS

**Borlet** (*fl* ?*c*1397–1409). French or Spanish composer. The name may be an anagram of Trebol, and there was a composer of that name in the service of King Martin I of Aragon from 1408 to 1409, when he moved into the service of King Martin of Sicily. He may be identifiable with Johan Robert, a singer in the chapel of Charles III of Navarre between 1397 and 1399; Robert may have been the composer known (also from the Chantilly Manuscript) as TREBOR. The only known composition ascribed specifically to Borlet is the four-voice virelai *He, tres doulz roussignol joly* (*F-CH* 564; ed. in CMM, liii/1, 1970, and in PMFC, xix, 1982). The tenor *Roussignoulet du bois* was obviously a popular melody. A three-part variant of this piece exists anonymously with the title *Ma tré dol rosignol*.

GILBERT REANEY/R

**Bornefeld, Helmut** (*b* Stuttgart-Untertürkheim, 14 Dec 1906; *d* Heidenheim, 11 Feb 1990). German composer and organist. He did not begin his studies at the Stuttgart Hochschule für Musik until 1928, where his principal teachers were Ewald Strässer, Hugo Holle, H. Roth (composition), A. Kreutz (piano) and Hermann Keller (organ). After 1935 he gave his full attention to church music. From 1937 to 1971 he was a choirmaster and organist, and from 1951 director of church music, in Heidenheim. Together with Siegfried Reda he founded the Heidenheim Arbeitstage für Neue Kirchenmusik (1946–60), and the two men had a strong influence in renewing Protestant church music by introducing techniques from the music of Hindemith, Bartók and Stravinsky, which had been banned during the Third Reich.

Bornefeld was constantly at pains to abolish any barrier between new compositional techniques and the great mass of the listening public, and he tried to integrate the tonal melodic lines of the chorales with 20th-century harmonies. His compositional development began with a brief and impetuous period of experiment, after which he made a deep study of 16th- and 17th-century music (as his church music training required) and was influenced by such contemporaries as Distler and Orff, so evolving a style that was individual, deeply expressive and able to maintain extended forms. He stood apart from post-1950 developments in compositional procedure, while not rejecting them totally. Bornefeld was also active in organ restoration: he supervised the reconstruction of almost 100 instruments in Württemberg, and prepared the specifications for organs in other parts of Germany.

WORKS
(*selective list*)

Das Choralwerk, collection of liturgical music, 1930–64 and 1979–84

Other vocal works incl. Memento mori, 1v, org, 1954; Hirtenlieder, 1v, org, 1955–7; Siona, 1v, org, 1965; Psalm der Nacht, 1v, org; Patmos (J.C.F. Hölderlin), 1v, perc, 1969; Atlanta-Litanei, 1v, org, 1970–71; Das Buch Versammler, spkrs, chorus, org, 1971; Die Heimsuchung, S, T, ob, tpt, trbn, orgs, 1973

Inst music incl. Sonata, org, 1965–6; Introduction and Capriccio, org, brass, 1969; Trivium, rec, va da gamba, kbd, 1969; Canticum canticorum, org, perc, 1970; Melodram, fl, 1970; Epitaph, ob, org, 1971; Tanah, org, timp, 1972; Souvenirs, wind qnt, 1972; Barcarole (In memoriam Igor Strawinsky), org, hpd, cel, 1972–3; Psalmen ohne Worte, ww, hpd, perc, 1973; Chorea sacra, org, 1974

Arrs. for org of pieces by Bach, Bartók, Brahms, Busoni etc.

Principal publishers: Bärenreiter, Hänssler

KLAUS KIRCHBERG

**Borneman, Ernest** (*b* Berlin, 12 April 1915; *d* Scharten, Upper Austria, 4 June 1995). German writer on jazz. He studied privately with Hornbostel while attending school in Berlin. After leaving Germany in 1933 for political reasons he settled in London, where he came into close contact with jazz musicians and took advantage of the rich collections of the British Library to compile his first book on jazz in 1940. The 600-page manuscript and the separate 200-page bibliography remained unpublished due to the outbreak of war. Borneman was deported to Canada, where he joined the Canadian Film Board and he continued his studies with Melville J. Herskovits and Richard Waterman at Northwestern University. In 1947 he joined the UNESCO film department in Paris and he worked for the BBC in London, 1950–60. Between 1944 and 1960 he wrote numerous articles for journals such as *Jazz*, *Jazz Hot*, *Jazz Illustrated*, *Jazz Journal*, *Jazz Music*, *Jazz Record* and *Melody Maker*, making him one of the most influential writers in the field. He placed a special emphasis on the influence of Latin American music on jazz. He also wrote and produced radio shows on musical topics. He returned to Germany in 1960 and from then on focussed on psychology. In the late 1960s he planned to write a comprehensive history of Afro-American music, but the project was left incomplete. In 1975 he published his classic gender study *Das Patriarchat*, which made him a public figure in German-speaking countries. The Ernest-Borneman-Archive was established in 1995 at the Akademie der Künste, Berlin, to house his published and unpublished writings.

WERNER GRÜNZWEIG

**Borneo.** *See* BRUNEI; INDONESIA, §VII, 1; and MALAYSIA, §§II–III.

**Bornet** *l'aîné* [first name unknown] (*fl* 1762–90). French violinist and composer. He played the violin at the Paris Opéra from 1762 to 1790. His *Journal de violon*, consisting mostly of airs arranged for violin and various other instruments, was published from 1784 to 1788. He was best known for his *Méthode de violon* (1786), which the *Mercure de France* (7 Oct 1786) praised for its remarkable order and clarity; the method does, in fact, give precise instructions for achieving a good tone. Bornet's compositions include pieces for one or two violins with basso continuo (primarily arrangements of operatic airs), the ballet *Daphnis et Florise*, performed in Paris in 1765, and ariettes for the *comédie*, *Le laboureur devenu gentilhomme* (1771), which was never performed.

Bornet's younger brother, Bornet *le jeune* (*fl* 1768–1807), was a member of the Opéra orchestra in 1768 and was probably the Bornet who played the violin in the orchestra of the Pantomime Nationale in Paris in 1797 and the Opéra-Bouffe as late as 1807.

ARISTIDE WIRSTA

**Borodin, Aleksandr Porfir'yevich** (*b* St Petersburg, 31 Oct/12 Nov 1833; *d* St Petersburg, 15/27 Feb 1887). Russian composer, by profession a medical doctor and professor of chemistry.

1. EARLY LIFE. Borodin was the illegitimate son of Prince Luka Stepanovich Gedianov (more correctly Gedianishvili) and his mistress Avdot'ya Konstantinovna Antonova. As was customary in such cases, he was registered and baptized as the son of one of his father's serfs, Porfiry Ionovich Borodin. Thus in the eyes of the law he was born a serf himself, but thanks to Gedianov's affection for his mother, the boy's childhood was privileged nevertheless.

He spent his first five years living with his parents in his father's apartment in St Petersburg. Then in 1839, as a means of securing a respectable future for Avdot'ya and her son after his own death, the prince arranged a marriage for her with Christian Ivanovich Kleinecke, an elderly retired army physician, and even provided a dowry in the form of a four-storey house in St Petersburg. Kleinecke died within two years of the wedding; Borodin's father died two years after that, at the age of 69, having first freed his son from serfdom.

Borodin's mother educated him at home, along with a girl cousin who resided in the household. He seems to have been an imaginative child with a placid and gentle disposition, perhaps somewhat introverted. While still very young, he would play at pretending to be an organ grinder and enjoyed improvising stage plays for his mother and their housekeeper. His first composition, a polka for piano entitled 'Hélène', was written at the age of nine as the result of a case of puppy love. After the family moved to a new house near the Semyonovskiy Regiment's parade ground, Borodin and his nurse often went out to listen to the regimental band, and upon returning home he would sit at the piano and pick out the tunes he had heard. Soon thereafter his mother hired a soldier from the band to give her son flute lessons at 50 kopecks a lesson. In 1846 she accepted a boarder of her son's age, Mikhail Shchiglev (later a well-known musician and teacher), and the boys shared tutors and began a lifelong friendship. They took piano lessons from a German musician named Pormann, whom Shchiglev's father had selected. When the boys found Pormann to be patient and painstaking, but dull, they began to play four-hand arrangements of symphonies by Haydn, Beethoven and Mendelssohn for their own pleasure, becoming particularly fond of Mendelssohn. They attended the university concerts in the winter, and in the summer travelled to Pavlovsk, in the suburbs, to hear the dance orchestra of the Hungarian conductor and composer Johann Gungl. In order to take part in chamber music, Shchiglev taught himself to play the violin, while Borodin taught himself the cello. In 1847 Borodin composed for them a 'concerto' for flute and piano and a trio for two violins and cello on themes from Meyerbeer's *Robert le diable*. Three pieces of salon music (Fantasia on a theme of Hummel, an étude entitled 'Le courant', and the 'Adagio patetico' in A♭) were published in 1849 and reviewed favourably in the newspaper *Severnaya pchela*, though there is reason to believe that the reviewer may well have been a friend of Borodin's mother. As a teenager, Borodin also began to study chemistry, starting with experiments in making fireworks but progressing quickly towards a passion for science that rivalled – indeed, ultimately exceeded – his passion for music. Also in 1849, his mother, knowing how difficult it was for a freed serf to make his way in the world, registered her son as a merchant of the third guild, thereby assuring his access to educational and professional opportunities that otherwise would have remained closed to him. In 1850, just before turning 17, he entered St Petersburg's Medical-Surgical Academy, the training ground for physicians in the tsar's service.

He began his studies with courses in the natural sciences and anatomy. Even in his first year, however, chemistry was his passion. He zealously attended the lectures of Professor Nikolay Nikolayevich Zinin, holder of the chair of chemistry, a brilliant scientist and science educator who believed that a thorough understanding of both chemistry and physics was basic to modern medicine. In the third year, Borodin approached Zinin to ask permission to work under his supervision in the professor's chemistry laboratory, and once Zinin was assured of the young man's seriousness he agreed to the request. At first surprised by the degree of Borodin's interest, Zinin quietly watched his work, ever more pleased at his ability and diligence. At the same time, he was troubled by the enthusiasm which Borodin continued to show for music, even announcing in his lecture hall on one occasion: 'Mr Borodin, busy yourself a little less with songs. I'm putting all my hopes in you as my successor, but all you think of is music: you can't hunt two hares at the same time' (Stasov, B1889).

As a relaxation from his scientific work, Borodin continued to play chamber music with Shchiglev. Soon the two friends added the brothers Kirillov to their circle – Petr, a good violinist, and Vladimir, a bass who afterwards sang at the Imperial Theatres under the name 'Vasil'yev I'. These four began to attend chamber music evenings at the home of amateur cellist Ivan Gavrushkevich, where they played and heard octets by Gade and Spohr, as well as quintets by Boccherini, Onslow and Franz Xavier Gebel, a German many years resident in Russia. Gavrushkevich encouraged Borodin to attempt a string quintet of his own, but the resulting work, the String Quintet in F minor, was left with an incomplete finale and was first published only in 1960, in a completion by the Soviet composer Orest Yevlakhov. Perhaps to provide repertory for Gavrushkevich's evenings of chamber music, Borodin arranged the two movements of Haydn's Piano Sonata in D (H XVI:51) for flute, oboe, viola and cello (with alternative parts for two violins, replacing the winds). He fleshed out the arrangement with a slow movement and minuet of his own composition, though both original movements are slight. Of greater interest is a Trio in G minor for two violins and cello, based on the folksong *Chem tebya ya ogorchila* ('How I did grieve thee'), a work which Shchiglev characterized as part German, part Glinka's *Life for the Tsar*. Four songs, all written in 1852–5, are not very different from the salon romances by Aleksandr Gurilyov, Aleksandr Varlamov and Konstantin Villebois, which the young scientist-musician was accustomed to hearing and playing.

On 25 March/6 April 1856, Borodin graduated from the Medical-Surgical Academy 'with exceptional distinction' and was posted as an intern to the Second Military-Land Forces Hospital, where he first met Musorgsky, then a newly commissioned officer in the Preobrazhenskiy Regiment, when the two were assigned together as duty physician and duty officer. That September he passed a series of preliminary examinations for the degree of Doctor of Medicine and was given a theme for his dissertation. The following summer he was sent abroad for four months, to make the acquaintance of foreign chemists, inspect foreign chemical laboratories and acquire chemical apparatus for the Academy, and to attend an international ophthalmological congress in Brussels. On his return to Russia, in autumn 1857, he ceased to practise as a physician, having concluded that his principal interests lay in chemical research and teaching. In March 1858 he presented a paper, 'Report on the Action of Ethyl Iodide on Hydrobenzamide and Amarine and the Constitution

of these Compounds', to the Academy of Sciences in St Petersburg; this work was the first of more than 40 scientific publications. Then on 3/15 May 1858 he successfully defended his dissertation *On the Analogy of Arsenic Acid with Phosphoric Acid in Chemical and Toxicological Behaviour* and was awarded the degree of Doctor of Medicine. In the autumn of 1859 he again met Musorgsky, who by then had resigned his commission to devote himself to music.

Also in autumn 1859, the governing board of the Medical-Surgical Academy voted to send Borodin abroad for further scientific study. He left Russia on 1/13 November 1859, travelling directly to Heidelberg, where he found a thriving Russian scientific community, centred socially in the home of the distinguished research chemist Dmitry Mendeleyev. Within a week of arriving in Heidelberg, he had settled into an apartment, attended a concert, hired a harmonium (for 4 gulden a month) and subscribed to rental libraries of books and music. From January 1860 he worked in the laboratory of the chemist Emil Erlenmeyer, travelling from time to time to other cities in Germany and even to Paris to acquire the apparatus he needed for his experiments. He also quickly found musicians with whom to enjoy his recreational pastime, writing to his mother (1 May 1860) that he was attending concerts, playing string quartets and quintets once a week, and playing piano and cello duets three times a week. Apparently for his own use on one of these occasions, he composed a Cello Sonata in B minor, the first and last movements of which derive their melodic material from the subject of the fugue in J.S. Bach's Sonata in G minor for unaccompanied violin, BWV1001.

In the summer of 1860 Borodin travelled down the Rhine to Rotterdam, examining the chemistry laboratories in the university towns that he visited; when he returned to Heidelberg in August, his mentor Zinin was there, and soon the two of them, together with Mendeleyev, set off on a holiday tour of southern Germany and Switzerland, stopping in Freiburg to hear the large organ in the Cathedral. From Switzerland they travelled to Karlsruhe to attend an important international congress of chemists (3–6 September 1860). Then in late October Borodin and Mendeleyev set out on another short holiday, this time in Italy. After spending a tourist's week in Rome – attending a mass celebrated by Pope Pius IX and viewing the city's artworks – Borodin left for Paris by himself. Arriving in November 1860, he spent the rest of the winter attending lectures in physics, crystallography, bacteriology and physiology, and of course conducting laboratory work. At some time during these busy months, probably before leaving Heidelberg in October 1860, Borodin very likely began both the Piano Trio in D major, which survives lacking its finale, and the String Sextet in D minor, of which only the first two movements have been found.

Leaving Paris in April 1861, Borodin first returned to Italy on scientific business, then went on to Heidelberg, arriving on 8/20 May 1861. Although his Russian friends of the year before had dispersed, he soon made the acquaintance of a 29-year-old Russian pianist, Yekaterina Sergeyevna Protopopova, who had been sent to Germany for treatment of tuberculosis. An admirer of Chopin and particularly of Schumann, she quickly converted Borodin to her tastes. Because of their common interest in music, their friendship developed quickly, and at a concert in Baden-Baden they realized they were in love; he proposed on 10/22 August 1861. That summer, at Mannheim, they heard *Der fliegende Holländer*, *Tannhäuser* and *Lohengrin*for the first time and were astonished by the beauty of Wagner's orchestration. Taking advantage of Yekaterina's abilities as a pianist, Borodin wrote a pair of short piano duets in the summer of 1861, the Scherzo in E major and the Allegretto in D♭ major.

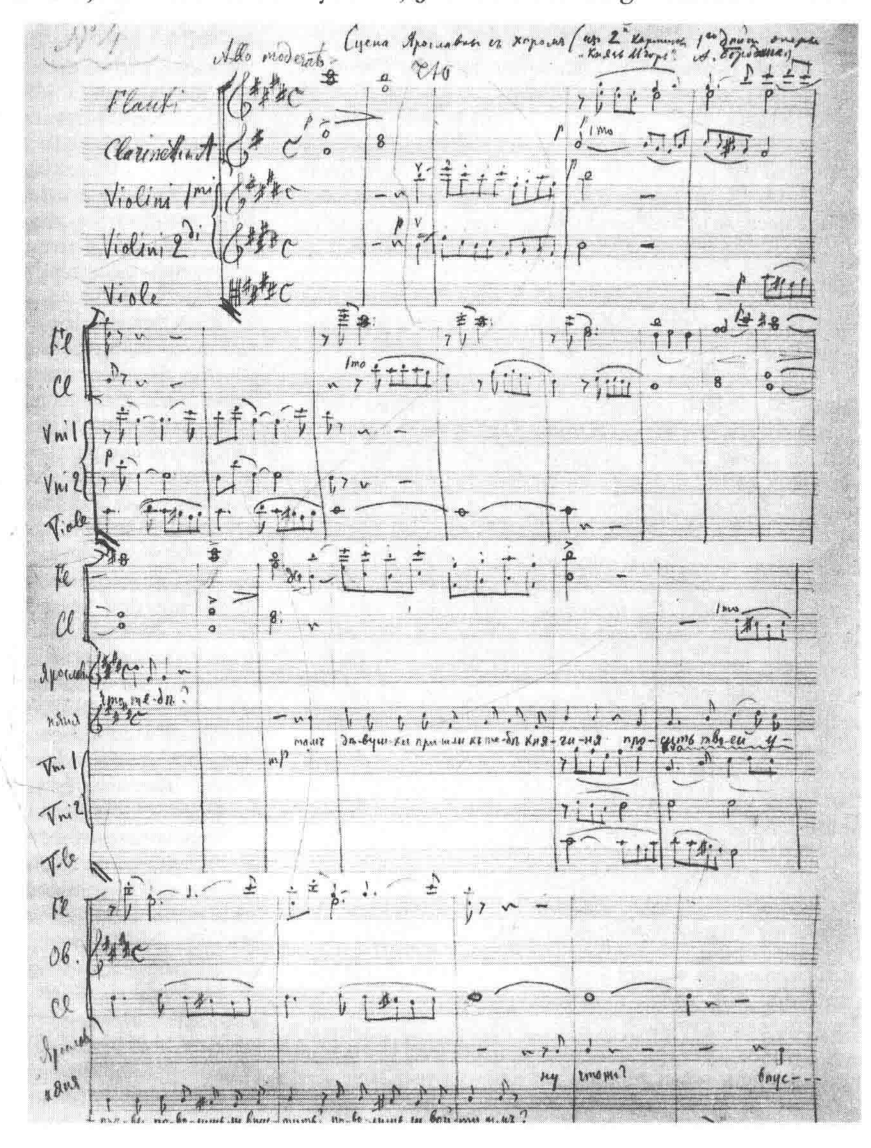
In September, upon returning to Heidelberg from another chemical congress, Borodin found his fiancée gravely ill; her doctor insisted that she spend the winter in Italy, suggesting Pisa, and Borodin took a few days off to travel there with her and to find comfortable rooms for her. When she became distraught at the prospect of his returning to Germany and leaving her alone in a strange country, he arranged to conduct his scientific work in the laboratory of two distinguished Italian chemists, Sebastiano de Luca and Paolo Tassinari. For relaxation that winter he and Yekaterina played chamber music with other amateurs, attended the opera (hearing among other works Bellini's *Beatrice di Tenda* and *Norma*) and toured in the countryside. In May he began the most important chamber composition of his youth, the Piano Quintet in C minor, which was destined to be the last piece he would complete before meeting Balakirev. He worked intensely on the Quintet for a month, finishing it on 17 June 1862 at a villa in Viareggio, where he and Yekaterina had moved soon after his experiments were concluded. They left for Russia in August and crossed the frontier at Verzhbolovo on 20 September/2 October 1862.

As soon as he returned to St Petersburg, Borodin began to teach in the Medical-Surgical Academy, and on 8/20 December 1862 he was confirmed in the position of

*1. Aleksandr Porfir′yevich Borodin*

assistant professor of chemistry. Upon Zinin's retirement from teaching 16 months later, in spring 1864, Borodin was elevated to the chair of chemistry, with the rank of full professor. From 1863 he also lectured on chemistry at the Forestry Academy, and in 1863–5 he earned additional income by translating scientific books for the publisher Vol′f. In October 1863 the Medical-Surgical Academy's new laboratory, near the Aleksandrovsky Bridge, was opened, and Borodin, who had married Yekaterina the previous April, was given an apartment in the same building. There he lived for the rest of his life, except for summer vacations, and there for ten years he continued his investigation of the condensation products of valeraldehyde, enanthaldehyde and acetaldehyde.

2. After meeting Balakirev. In October 1862, within a month of returning to Russia, Borodin met Mily Balakirev at a musical evening in the home of Dr Sergey Botkin, a colleague from the Medical-Surgical Academy. He quickly joined Balakirev's musical circle, which already included Cui, Musorgsky (with whom he was delighted to renew acquaintance) and Rimsky-Korsakov (then a young naval officer away from St Petersburg on a three-year cruise). With Balakirev's guidance and encouragement, Borodin immediately began a symphony in E♭ and by December had completed the first movement, which he played for Yekaterina while visiting her in Moscow, at her mother's home, before they were wed. According to Yekaterina's memoirs, the remaining movements were composed over the next three years – a portion of the finale by May 1863, the scherzo in 1864, and the slow movement during a holiday at Graz in summer 1865 – but it seems likely that the movements were not committed to paper until well after they had taken shape in the composer's mind. Although Borodin announced completion of the work in a letter to Balakirev thought to date from Christmas-time 1866, the symphony's finishing touches were probably applied in 1867. On 24 February/7 March 1868, after Balakirev had become the conductor of the Russian Musical Society's concerts, he played through the work at a closed rehearsal for the Society's directors. Although the session went badly, because of many errors in the parts, Balakirev insisted upon programming the E♭ Symphony anyway, and it received its first public performance the following season, on 4/16 January 1869. The public (and some critics) admired it, but others – owing as much to St Petersburg's musical politics as to any absence of merit – disparaged it. Aleksandr Serov, for example, wrote that the 'symphony by a certain Borodin pleased hardly anybody. He was warmly applauded and called onto the platform by his friends only' (quoted in Lloyd-Jones, A1961).



Meanwhile, in 1867, Borodin had composed the first of his mature songs, *Spyashchaya knyazhna* ('The Sleeping Princess'), to his own words, and had completed his first music for the theatre, the opera-farce *Bogatïri* ('The Heroic Warriors'), with a libretto by the poet and playwright Viktor Krïlov. The work not only lampoons 'Russian heroic opera' – especially Aleksey Verstovsky's *Askol′dova mogila* ('Askold's Grave') and Serov's *Rogneda* – but also pokes good-natured fun at ideas of operatic realism and 'musical truth' held dear within the Balakirev circle itself. The music is largely pastiche. About a quarter of the score is original; the rest is adapted from popular works by Offenbach, Meyerbeer, Rossini, Verdi, Hérold and (naturally enough) Verstovsky and Serov themselves. *The Heroic Warriors* was performed only once, at Moscow's Bol′shoy Theatre, on 6/18 November 1867; it failed largely because its audience did not realize it was intended as a spoof. The composer, unidentified in the programme, was not present, having written to friends in Moscow that he would attend a performance at Christmas-time, 'once *The Heroic Warriors* is going along successfully'.

During the summer and autumn of 1868 Borodin's domestic life was disturbed when a 22-year-old married woman, Anna Kalinina, sister of the composer N.N. Lodïzhensky, developed an infatuation for him, which aroused Yekaterina's jealousy. Although Borodin was touched by Anna's affection, he deflected it by treating her paternally and remained devoted to his wife. Then in 1869 he and Yekaterina adopted a seven-year-old girl, Yelizaveta Gavrilovna Balaneva (subsequently the wife of Aleksandr Pavlovich Dianin, Borodin's scientific pupil and colleague, and the mother of Sergey Aleksandrovich Dianin, the composer's biographer and editor of his collected letters). Between December 1868 and March 1869, Borodin stood in for Cui (anonymously) as music critic of the *Sankt-Peterburgskiye vedomosti*, while Cui was involved in the production of his opera *William Ratcliff* at the Mariinsky Theatre. His critiques are reprinted in Borodin (1982) and in German translation in Kuhn (1992).

Also in 1868 Borodin finished four more songs: *Morskaya tsarevna* ('The Sea Princess'), *Pesnya tyomnogo lesa* ('Song of the Dark Forest'), *Fal′shivaya nota* ('The False Note'), all to his own verses, and a setting of Lev Mey's translation of Heine's *Vergiftet sind meine Lieder*. Between December 1869 and February 1870, he wrote another song, *More* ('The Sea'), likewise to his own words, and in the winter of 1870–71, an additional setting of Heine, *Aus meinen Tränen*, again in Mey's translation. Two men's partsongs also belong to the 1870s, the first written as a joke for his musical friends, the second for the men's amateur chorus at the Academy.

For about ten years after finishing the E♭ Symphony and *The Heroic Warriors*, the only works Borodin brought to final completion were the songs listed above. Although he began several ambitious compositions in these years, he always seemed to find his progress stymied, either by waning interest, changing circumstances, or the press of his laboratory research and teaching duties at the Academy. The composer's large-scale projects often remained 'works in progress' for years. Music created for one work was recycled into another, only to be recycled again into a third, or back whence it had come. Several pieces, for one reason or another, were never finished.

Thus in 1867, following a suggestion of Balakirev's, Borodin began to sketch an opera based on Mey's drama *Tsarskaya nevesta* ('The Tsar's Bride'); the opera was abandoned the following year, though some of the material later was put to use elsewhere. Thanks to the success of the E♭ Symphony, Borodin began to think about writing a second symphony, in B minor, immediately after the performance of the first; he even seems to have written some music for it in the first months of 1869. All the while, however, he remained strongly drawn to opera (despite the false start of *The Tsar's Bride*), and soon he found a new subject to excite his interest in a

*2. Autograph MS of the opening of Yaroslavna's scene with the Nurse and the chorus from Act 1 scene ii of Borodin's 'Prince Igor', composed 1869–70 (RUS-Mcm)*

scenario by Vladimir Stasov based on the putative 12th-century epic *Slovo o polku Igoreve* ('The Lay of the Host of Igor'), with supplementary material drawn from two medieval Kievan chronicles, the *Ipatiyevskaya*and the *Lavrentiyevskaya*. He thus set the B minor Symphony aside in the summer of 1869 and began to work on *Knyaz' Igor'* ('Prince Igor'), gathering materials, studying literary sources, and visiting historical sites. He began composition in the late summer, writing words and music at the same time. The first number in Stasov's scenario, 'Yaroslavna's Dream', was completed in September 1869 and greeted enthusiastically within the circle; its music was adapted from material originally written for *The Tsar's Bride*. But then, after sketching several more numbers (and probably recycling more of *The Tsar's Bride*), Borodin decided to abandon *Prince Igor* in March 1870. We may find at least some of his reasons in his correspondence, where he characterized himself as 'a lyricist and symphonist by nature', fretted over his inability 'to create a libretto which would satisfy both musical and scenic requirements', and wondered whether 'opera (undramatic in the strict sense) was an unnatural sort of thing anyway'. To these concerns we may add the circumstance that his work in chemistry was then at its peak, demanding more attention than ever before. In this very year, for example, he was involved in a sustained controversy with the German chemist Friedrich August Kekulé concerning priority in research on valeraldehyde: on 2/14 October 1869, less than a month after completing 'Yaroslavna's Dream', he presented a formal report on his research in progress to the Russian Chemical Society, in order to establish his own claim of priority and defend his integrity.

Soon after setting *Prince Igor* aside, Borodin returned to the B minor Symphony, assuring Stasov that the 'materials' already created for the opera would go into the newly revived symphony. He composed most of the first movement in April 1870, even though the movement was not written out in piano score until a year later, in spring 1871. Also in spring 1871 he sketched the scherzo and the Andante, that summer he orchestrated the first movement, and in October he drafted the finale. He interrupted his work on the symphony at the beginning of 1872, when the Director of the Imperial Theatres,

Stepan Gedeonov, commissioned him, Cui, Musorgsky and Rimsky-Korsakov to collaborate with the Theatres' staff ballet composer Ludwig Minkus in a fantastic opera-ballet, *Mlada*, with a libretto by Viktor Krïlov. Drawing on more of the music left over from *Prince Igor*, Borodin embraced the project and quickly composed eight numbers for Act 4, his assigned act. Then Gedeonov cancelled *Mlada* because of high production costs; in time, Borodin would recycle five of his eight numbers back into *Prince Igor*.

With *Mlada* now abandoned, Borodin came back to the B minor Symphony once again, working on it as time permitted from spring 1872. In autumn 1872, after years of resistance, the tsar's government finally authorized advanced medical courses for women, to prepare them for practice in obstetrics. Borodin eagerly took a leading part in these classes, volunteering at once to teach chemistry to the new women students and to supervise their work in the laboratory. He joined several societies for the aid of young students, especially women, and was even elected treasurer of one. Despite his many duties, he seems to have finished the B minor Symphony in piano score by May 1873. The following academic year, 1873–4, he made some progress with orchestrating the symphony's final three movements (a task finally finished in 1875), but composed nothing new.

At about the same time, he became bitterly frustrated with the lack of support for his scientific work, and he decided no longer to pursue research in the condensation of aldehydes, leaving the field to better equipped, better financed and better supported western European chemists. In 1873 he published the last of his papers on the aldehydes and returned to his earlier subject, amarine. In 1874 he became director of the Medical-Surgical Academy's laboratory facilities. From that year onwards his laboratory work consisted less of original research than of supervision of student work, a more difficult and less interesting task which took him, year after year, over much the same ground.

In October 1874, Borodin told Stasov that he had taken up *Prince Igor* again. Slightly more than a year later, by the end of 1875, he had composed most of the Polovtsian music (including the well-known 'Polovtsian Dances', no.17 in the Belaïeff first edition), 'Yaroslavna's Lament' from Act 4 (no.25), a 'carousal chorus' for Prince Galitsky's followers (later the foundation for Act 1 scene i), a 'chorus of praise' to Prince Igor (now found in the Prologue, though originally planned for an Epilogue which itself was never realized), and the initial version of Igor's aria in captivity, replaced in 1881 by the present no.13, 'Ni sna, ni otdïkha izmuchennoy dushe' ('No sleep nor rest for my tormented soul'). For the sake of atmospheric verisimilitude, he drew on such exotica as an Arabian melody for the 'Chorus of Polovtsian Maidens', no.7, and a Chuvash melody for Konchak's aria, no.15, justifying the latter's use on the grounds that the Chuvash were the descendents of the Polovtsians. Also in 1875, before 15 April, Borodin sketched his String Quartet in A major 'suggested by a theme of Beethoven' (an interior fragment from the replacement finale of op.130). According to Yekaterina, he worked energetically on the quartet during the summer of 1877; he finally finished it in 1879.

In the autumn of 1876, Borodin learned that the Russian Musical Society wished to perform the B minor Symphony and discovered, to his dismay, that he had mislaid the full score. Though the two middle movements ultimately turned up, he had to reorchestrate the first and last movements, a job finally finished during a short illness. Eduard Nápravník conducted the work's première on 26 February/10 March 1877; it enjoyed 'very moderate' success, according to Rimsky-Korsakov, largely because Borodin had written too heavily (and impractically) for the brass. In June he travelled to Germany in order to enroll his pupils Dianin and Mikhail Yul'yevich Goldstein in Jena University, where they intended to pursue doctorates in chemistry. Still at Jena in July, Borodin took the opportunity to visit Liszt in Weimar, who received him cordially and insisted on playing through both his symphonies with him in four-hand piano arrangements. Liszt's verdict and his advice to Borodin was, 'You are always lucid, intelligent and perfectly original . . . Work in your own way and pay no attention to anyone'. In November, word came from Paris that the singer Pauline Viardot was 'wildly enthusiastic' about the B minor Symphony and was introducing it in her salon. Later in the winter Borodin added two more pieces to *Prince Igor*, Vladimir's recitative and cavatina, 'Medlenno den' ugasal' ('Slowly the daylight fades'), and the love duet of Vladimir and Konchakova. As a joke, perhaps as early as 1874, he had written a polka for piano (three hands) based on a repetitive theme resembling 'Chopsticks'. In 1878, Rimsky-Korsakov, Cui and Lyadov produced a collection of these whimsical pieces which, with three more by Borodin himself, were published under the title *Paraphrases*. Liszt was so amused by the set that he added a short piece of his own to the second edition.

Borodin spent the summer of 1878 in the village of Davïdovo, east of Moscow, as the guest of Pavel Dianin, the father of his favourite pupil. Picking up *Prince Igor* once again (Act 1), he added Skula and Yeroshka, comic *gudok*players in the service of Prince Galitsky, modelling their music on the prose recitative of Varlaam and Misail in Musorgsky's *Boris Godunov*. Vacationing again at Davydovo, in the summer of 1879, Borodin finished most of Act 1 of the opera, including the vivid scene of Yaroslavna and the boyars with which the act concludes. In the winter between these two productive summers, Borodin revised the orchestration of the B minor Symphony, thinning out the brass parts and lightening the texture, and Rimsky-Korsakov successfully introduced the work in its new form at a Free Music School concert on 20 February/4 March 1879. Rimsky-Korsakov also used the concerts of the Free School of Music as a platform from which to launch excerpts from *Prince Igor*: the 'Chorus of Praise' from the prologue was heard on 23 March/4 April 1876, the 'Polovtsian Dances' and the 'Final Chorus' on 27 February/11 March 1879, and three further excerpts on 13/25 November 1879.

3. The Belyayev years. In the winter of 1879–80, Borodin began to serve as chairman of the governing board of the St Petersburg Circle of Music Lovers, an amateur orchestral and choral society. At their meetings he met Mitrofan Petrovich Belyayev, a wealthy timber merchant and music patron around whom a new circle of musicians and composers would gather in the 1880s, replacing the 'Mighty Handful' of the 1860s. (Belyayev's publishing house, which he would establish in Leipzig in 1885 under the name M.P. Belaïeff, would publish posthumously not only *Prince Igor*, in Rimsky-Korsakov and Glazunov's version, but also more than half a dozen

of Borodin's other works, some purchased for reissue from their original publishers.) Early in 1880 Borodin composed a short orchestral work *V sredney Azii* ('In Central Asia'), one of 12 pieces commissioned from Russian composers to accompany a planned production of *tableaux vivants* celebrating the first 25 years of Aleksandr II's reign. After an assassination attempt on the tsar inside the Winter Palace, the authorities cancelled this 'grand scenic presentation' just two weeks before it was to occur. *In Central Asia* finally received its première in April, at a concert of the contralto Darya Leonova, with Rimsky-Korsakov conducting. That summer Borodin wrote very little, merely drafting (for Act 1 of *Prince Igor*) a scene of rebellion for Prince Galitsky and his followers which, though restored in some recent productions, does not appear in the Belaïeff score.

Early in 1881, Borodin arranged an Arabian melody (from Alexandre Christianowitsch's *Esquisse historique de la musique arabe*) in order to fulfil Leonova's request for something special for her jubilee concert. Dissatisfied with giving her a mere arrangement, he withheld the *Arabskaya melodiya* and instead composed and quickly orchestrated a setting of Nekrasov's satiric poem *U lyudey-to v domu* ('At Some Folks' Houses'), which he characterized as a 'genre subject, popular and humorous', written with Leonova's talents in mind. In the summer he completed his String Quartet in D major, attended the festival of the Allgemeiner Deutscher Musikverein in Magdeburg, and spent a few days with Liszt in Weimar, giving him there the dedication of *In Central Asia*, in gratitude for the warmth Liszt continually showed him. He had been deeply moved by Musorgsky's death in March 1881 (as he had been by his mentor Zinin's death the previous year), and in November, following a memorial concert of Musorgsky's music, Borodin composed the song *Dlya beregov otchiznï dal'noy* ('For the Shores of Thy Far Native Land'), to words by Pushkin, in memory of his friend.

During the 1880s it became increasingly difficult for Borodin to find time for music. His wife's ever declining health preyed constantly on his mind. His duties at the Medical-Surgical Academy seemed always to increase, and he found himself forced to devote much time to committees, commissions and paperwork. In the wake of the assassination of Tsar Aleksandr II, the government tried to discontinue the medical classes for women, and Borodin and his colleagues invested enormous energy in saving them. All these obligations inevitably exacted a toll: after 1881 Borodin completed no major works. Although he continued to work intermittently on *Prince Igor* for the last five years of his life, and even began another symphony, in A minor, he was able to finish only a handful of relatively inconsequential occasional pieces. In 1882 he composed a quartet scherzo, in 5/8, for one of the evenings of chamber music at Belyayev's home; in 1886 he collaborated with Rimsky-Korsakov, Lyadov and Glazunov in a string quartet on the motive B–La–F, written as a gift to their patron Belyayev; and during the Christmas holidays of 1884–5 he completed the song *Spes'* ('Pride'), to a text by A.K. Tolstoy, for the opera singer Anna Bichurina.

Also during the 1880s, Borodin was gaining stature in the West. As a consequence of their first meeting in 1877, Liszt had helped to arrange a performance of the E♭ Symphony in Baden-Baden (20 May 1880). Thanks to the patronage of the Belgian Countess Louise de Mercy-Argenteau, whose admiration for the 'New Russian School' was encouraged by her friend Liszt, Borodin soon found himself celebrated in Belgium and France. To protect his copyrights, he joined the French Société des Auteurs, Compositeurs et Editeurs de Musique, and his works – including the A major Quartet, the E♭ and B minor symphonies, *In Central Asia*, excerpts from *Igor*, and a few songs – were performed at Verviers, Liège, Antwerp, Brussels and Paris (1884–5). In gratitude he composed and dedicated to the Countess a *Petite suite*, for piano, and a song to French words, 'Septain' (both 1885); to her associate, the young Belgian conductor Theodore Jadoul, he dedicated the Scherzo in A♭ for piano (also 1885).

*Prince Igor* and the A minor Symphony, by contrast, were destined to remain unfinished. In the late summer and autumn of 1883, Borodin fashioned the opera's Prologue, recycling still more material from *Mlada* (including the eclipse music, originally the 'Apparition of the Phantoms' in the earlier work) and revising sections already prepared (such as the 'Chorus of Praise' from 1875). Having finished the task by late November, the composer then was obliged to set *Igor* aside until the summer of 1884, when he decided to build an additional act (Act 3 of the Belaïeff score) around Igor's escape. Also in 1883–4, he began to plan the A minor Symphony and decided to use his quartet scherzo in 5/8 – with a new trio to be based on a theme discarded from *Igor* – as the symphony's scherzo. In July 1884, while on holiday, he discovered a religious chant of the *bezpopovtsï* sect, which is thought to have been intended for the symphony's slow movement, projected as a theme and variations. He took up the symphony in earnest in the autumn of 1886 and during the Christmas holidays of 1886–7, while visiting Yekaterina in Moscow, jotted down sketches for the first movement. He also continued to work on the opera at the same time, editing and assembling materials that had accumulated over nearly 20 years, while adding still more to the store. He may have considered the overture as late as January 1887, though it was Glazunov who composed it (in his own words) 'roughly according to Borodin's plan'. According to Aleksandr Dianin, he composed (at the piano) the finale of the A minor Symphony on 12–13/24–25 February. But it was too late. On the evening of 15/27 February 1887, Borodin attended a grand candlelight ball organized by the faculty of the Medical-Surgical Academy for their families and friends. Wearing Russian national dress, with dark red shirt, baggy blue trousers, and high boots, he was in high spirits, laughing and joking, when soon after completing a waltz with one of the ladies he collapsed and died of heart failure within seconds. Yekaterina survived him by less than six months.

4. The music. Borodin's earliest works were all chamber and salon pieces, written for use within his circle of friends. In this circumstance, we may find the roots of his lifelong affinity for chamber music, a genre in which the rest of the 'Mighty Handful' had little interest and little success. Many of these youthful works – the 'Adagio patetico' for piano, the early trios, the songs with cello obbligato – are slight, if at times charming. The best of them – the String Quintet in F minor, for example – reveal a well-formed, even precocious, musical personality. Like his great contemporary Musorgsky, Borodin was adept at learning to compose by absorbing the works of Western

masters, in the quintet's case Mendelssohn, whom Borodin continued to admire throughout his career and whose shadow falls across even such late works as the First String Quartet and the Third Symphony. The F minor String Quintet also provides an early paradigmatic instance of Borodin's great misfortune: the difficulty he had in finding the time, owing to the press of his scientific work, to finish the remarkable music he had begun.

A greater degree of assurance and technical fluency, visible in the D minor String Sextet, came into Borodin's music during his residency in western Europe, principally in Heidelberg in 1859–62. Though he later disparaged the sextet as 'written to please the Germans' among whom he was living, the idiomatic handling of the six instruments reveals his experience of playing chamber music. Moreover, his treatment of sonata form in the first movement already shows something of his flair for modifying the design. Having emphasized the first theme in the development, he omits it from the recapitulation, which begins with the second theme. Except for the insertion of 16 climactic new bars, the recapitulation parallels the exposition from the second subject onwards, but the material is redistributed among the instruments in order to enhance the interest of each part. The second movement, the only other one to have surfaced, is a set of variations.

The culminating work (and the one masterpiece) of the years spent abroad is the Piano Quintet in C minor, which illustrates several stylistic features that one meets repeatedly in Borodin's later music. The first movement's principal melody, a conjunct and diatonic tune of elegiac character, contains several ornamental grace notes. It is built by repeating similar melodic cells and rhythmic patterns in a manner suggestive of many Russian folksongs. Its phrases vary in length, and it is given rhythmic suppleness by shifting frequently from 3/4 to 2/4 metre. An underlying modal scale and modally inflected harmonies colour the second movement, the scherzo. The finale has as its main theme a broad diatonic melody, introduces short fragmentary motives as contrasting subjects, and then extends them all in a modified sonata form reaching its principal climax in the coda. Throughout the work, the piano writing is full and resonant (though not especially difficult) and the string writing idiomatic.

Though written under Balakirev's supervision and manifestly not a chamber work, Borodin's E♭ Symphony nonetheless may be seen as a companion piece to the Piano Quintet, marking the end of his apprenticeship. Like the chamber works preceding it, the symphony exhibits a strong (and not entirely predictable) command of sonata form, a few fingerprints of Russian folksong and echoes of European models. The first movement is the most ingenious. Its principal melodic ideas are unfolded in brief fragments and then developed in an apparently clear sonata structure. Only at the end of the movement, in a quiet coda, are these mosaic-like fragments seen to have been the building blocks of a single *cantilena*; the psychological climax – the final synthesis of the entire melody – is thus shifted to the tranquil closing pages of the movement. The scherzo's main section suggests Berlioz's 'Queen Mab' from *Roméo et Juliette*, and its trio is redolent of folksong (alternating triple and duple metre, a repetitive melodic pattern, frequent rising or falling 4ths, a drone bass). The third movement offers another of Borodin's lyrical expressive melodies, decorated by ornamental turns and grace notes. The finale is least successful; its main theme seems borrowed almost directly from the finale of Schumann's D minor Symphony, as do details of the movement's execution: melodic extension through sequence, obvious stress on the lowered seventh degree of the major scale, a transition built from material passed upward from low instruments to high. The symphony's orchestration is Borodin's despite the indication 'revue par N. Rimsky-Korsakov et A. Glazunov' in many editions. This phrase, together with several differences in musical text between the four-hand reduction of 1875 and the full score, led the French critic M.-D. Calvocoressi (D1924–2) to accuse Rimsky-Korsakov and Glazunov of improperly rewriting Borodin's music after his death. In fact, the differences resulted from Borodin's own revision of the work before publication of the first full score in 1882; the phrase hinting at posthumous collaboration by Rimsky-Korsakov and Glazunov was added by the publisher Bessel simply in order to secure copyright (and royalties from performances) in western Europe.

The B minor Symphony is the most important large-scale work to be completed entirely by Borodin himself, and one of his greatest works. It is a close relative of both *Prince Igor* and the abortive *Mlada*, two theatre works which diverted the composer's attention, off and on, during the symphony's extended gestation period. According to memoirs of Nikolay Kashkin, the symphony's striking opening theme originated in an abandoned chorus of Polovtsians, and Borodin's principal Soviet biographer has cited several other instances of melodic congruence between *Igor* or *Mlada* and the symphony (see Dianin, B1963).

The first movement constitutes one of Borodin's most imaginative sonata forms. Its opening theme, brusque and epigrammatic, combines both the major and minor 3rd above the tonic, and except for the E♮ (an upper neighbour) constitutes an octatonic subcollection (see ex.1). Other instances of interplay between major and

minor 3rd, found scattered throughout the symphony, may be traced to this terse opening theme. The four-note cell within the opening theme (marked 'x' in ex.1) occurs with enough frequency in Borodin's music to constitute, in Gerald Abraham's phrase, 'the most personal of Borodin's melodic mannerisms, one so peculiar to him . . . that it almost has the effect of placing his signature to any melody in which it occurs' (Abraham, B1935). The lyrical second theme (first heard in the conventional key of D major) provides effective contrast and acts as a cyclic element in the symphony, easily recognized in the trio of the scherzo, more distantly echoed in the finale. In the recapitulation, Borodin begins this second theme in E♭, an enharmonic major 3rd above B♮, thereby creating a logical counterpoise to the theme's statement in the exposition a minor 3rd above B♮ and extending the interplay between major and minor 3rd to a structural level.

The mercurial scherzo, in F major, draws much of its effect from the rhythmic contrast between the two principal ideas, the first firmly on the beat, the second

syncopated. The Andante begins with one of Borodin's most serene melodies, its second phrase embodying the ornamental grace notes typical of his lyric tunes. This memorable melody is heard in varying orchestrations, in a free sectional design; some of the contrasting material subtly incorporates the interplay between minor and major 3rds found in the first movement. The finale is another sonata movement, freer than the first; perhaps its most striking moment is a whole-tone passage from the development, the theme of which is echoed in both *Mlada* and the prologue of *Prince Igor*. Borodin tinkered with the symphony one last time in 1886, while preparing the manuscript full score for the printer. At that time he incorporated a few further refinements suggested by Rimsky-Korsakov, who, in his capacity as posthumous proofreader, also supplied the score's metronome markings, though these and Rimsky's tempo indications in the Andante may stem from the work's successful second performance, prepared by Rimsky-Korsakov under Borodin's supervision.

The Third Symphony exists only as a torso. Its first movement, though played by Borodin for his musical friends, was never written down beyond a few fragmentary sketches prepared during his last school vacation. Within three months of the composer's death, Glazunov had reconstructed the first movement from his memory of Borodin's performance and the extant sketches, but it is impossible to say with conviction how much of it is Borodin, how much Glazunov. The principal tunes (which are deployed in a clear sonata form) strongly suggest folksong, exhibiting such characteristics as an underlying modal scale, recurring simple melodic patterns, and falling or rising 4ths. The main part of the scherzo is a brisk Mendelssohnian frolic in 5/8 metre, first written for string quartet in 1883. Glazunov orchestrated the quartet scherzo and composed the trio, executing the plan Borodin had said he would follow.

Borodin's shortest orchestral work, the 'musical picture' *In Central Asia*, presents two distinctive tunes designed to combine with one another in counterpoint at the work's climax. The first, simple and diatonically harmonized, is emblematic of Russia. The second – ornate, chromatically harmonized, and scored for english horn – portrays the East, that alluring 'exotic other' which so many 19th-century Russian composers found irresistable. Regarded in the 19th century as one of Borodin's most successful works, *In Central Asia* pays homage to his benefactor Liszt (to whom, it will be recalled, the work is dedicated) by borrowing a distinctive scoring – pizzicato low and high strings, on and off the beat – from the first of Liszt's *Two Episodes from Lenau's Faust*.

During the winter of 1874–5, with the E♭ symphony successfully performed and only scoring of the B minor left to finish, Borodin returned at mid-career to chamber music. His First String Quartet, in A, is a work of consummate craftsmanship, utilizing all four instruments skilfully and idiomatically. Both the first and second movements demonstrate the composer's contrapuntal ingenuity in combining themes; the capstone of the second is an extended fugato comprising the central section of a three-part design. The third movement is one of Borodin's most brilliant gossamer scherzos, making effective use of harmonics and left-hand pizzicato, and the finale is rhythmically energetic. The more rhapsodic Second Quartet, in D, dedicated to the composer's wife, is an affectionate and nostalgic evocation of their first months together in Heidelberg. Its third movement, the Nocturne, is one of Borodin's best-known compositions; his own instrument, the cello, takes the leading role in presenting this lovely tune, imbued with characteristics familiar in his lyric melodies. The two *pièces d'occasion* for piano, which Borodin wrote as gifts for his Belgian patron the Countess de Mercy-Argenteau and her associate Jadoul, are negligible. Though the Scherzo in A♭ is sprightly enough to have been used as a concert encore by Rachmaninov (who also recorded it), the *Petite suite* is simply salon music.

Borodin completed only 16 solo songs, writing the first four (salon romances all) while still a student at the Medical-Surgical Academy. He next took up the genre in 1867 with *The Sleeping Princess*, the first of three songs – the others are *The Sea Princess* and *The False Note* – to make striking use either of 2nds as harmonic coloration or of the whole-tone scale. His *Song of the Dark Forest* artfully evokes a folk idiom through its poetic metre (a modified *kol′tsovskiy stikh*), word repetition, and spare harmony which avoids the leading note. The seven songs composed between 1867 and 1871 conclude with Borodin's second (and final) Heine setting, *Iz slyoz moikh* ('From my Tears'), which is noteworthy for still further effects derived from 2nds. His last five songs belong to the 1880s and are less distinctive than the previous seven. The *Arabian Melody* is just an arrangement, and *For the Shores of Thy Far Native Land*, though beautifully poignant, echoes Schumann's *Ich grolle nicht* (steadily moving quavers in the right hand, a more deliberate bass, the approach to the vocal climax). The most distinguished song in this group is *At Some Folks' Houses*, Borodin's most biting foray into satire and his only orchestral song.

The composer's greatest work, the opera *Prince Igor*, was still far from finished at his death in 1887. Though he had composed many compelling and exotic pages since the work's inception nearly 18 years earlier, he had never prepared a finished libretto to guide its completion. In spring 1885, hoping to push Borodin toward finishing the opera, Rimsky-Korsakov began to assemble a vocal score, bringing the music 'into order' by filling in missing compositional details himself. This circumstance, together with Rimsky-Korsakov's help in preparing such excerpts as the 'Polovtsian Dances' for concert performance in the 1870s, made him the clear choice to serve as Borodin's operatic executor. He enlisted Glazunov's aid, and in short order the two of them prepared *Prince Igor* for performance and publication (fig.3), drawing upon and orchestrating Borodin's manuscripts and filling in lacunae with new music of their own devising. The largest gap was in Act 3, to which Glazunov contributed 1252 bars. The opera finally received its première, in Rimsky-Korsakov and Glazunov's version, on 23 October/4 November 1890 at the Mariinsky Theatre in St Petersburg, but was eclipsed at the time by the season's other illustrious première, Tchaikovsky's *Queen of Spades*. One year later Glazunov described the work he and Rimsky-Korsakov had done on Borodin's behalf (see Abraham, B1939, for a translation), and there the matter of text rested until the 1940s. Then, to mark the 60th anniversary in 1947 of Borodin's death, the Soviet musicologist Pavel Lamm prepared an 'academic edition' of the opera, collated from the known manuscripts. Although neither

3. *Title page of the first edition of the full score of Borodin's 'Prince Igor' (Leipzig: Belaieff, 1896)*

Lamm's score nor his detailed report was published, his principal conclusion – that Rimsky-Korsakov and Glazunov had omitted about a fifth of Borodin's existing music – became well known via a short summary (Lamm, C1948). As a result, a few theatres in recent years have produced new performing versions of *Prince Igor* based in the old score but adding at least some of the missing music, in orchestrations prepared by new posthumous collaborators (for an example, see Malkiel and Barry, C1995). Though these scores have opened up many fine passages, they have also brought fresh controversies. Definitive resolution of the textual issues in *Igor* will be impossible until Lamm's work is published in its entirety and may remain elusive even beyond.

When Borodin first began working on *Prince Igor*, the style of opera endorsed within his circle, principally in the writings of César Cui, was *opéra dialogué*, wherein the highest merit was said to lie in an unbroken recitative setting of an unaltered text. In an oft-quoted letter to the singer Lyubov Karmalina, dated 1/13 June 1876, Borodin set himself apart from Cui's theoretical prescriptions:

> . . . in my outlook on operatic matters I've always been at variance with many of my friends. A purely recitative style has always gone against my instincts and my character. I'm drawn to song and cantilena, not to recitative, although, according to the opinions of knowledgeable people, I'm not too bad at the latter. Besides that, I'm drawn to forms that are more closed, more rounded, grander scaled. My entire manner of treating operatic material is different. In my opinion, in an opera, as in its sets, tiny forms, details, and trifles must have no place; everything must be written in grand strokes – clearly, brilliantly, and as practically as possible for performance, both for voices and orchestra. The voices must be foremost, the orchestra secondary.

Virtually every number in *Prince Igor* embodies this credo, which also suggests Borodin's grasp of lyricism's role in establishing an opera's tone. Richard Taruskin (*GroveO*) has identified two contrasting idioms in the opera, one based largely in Russian folksong and used to portray the Russian characters, the other an exotic 'oriental' idiom, featuring melismatic vocal lines, melodic augmented 2nds, chromatic passing notes, and double-reed wind timbre, used to portray the Polovtsians. The eclipse (and its supernatural significance as a heavenly omen) is depicted with octatonic chord successions, in this case 7th-chords with roots a minor 3rd or tritone apart. Perhaps the clearest European models for the work are French grand operas; like them *Igor* mixes dramatic tableaux (the prologue, the scene between the boyars and Yaroslavna), scenic tableaux (much of the Polovtsian music), and set pieces (Igor's aria, Yaroslavna's lament, Galitsky's aria). The nearest parallel in Russian opera is Mikhail Glinka's *Ruslan and Lyudmila*, but echoes of Musorgsky are present too: tritones used to depict alarm bells in the scene between Yaroslavna and the boyars, the closing measures of Igor's aria (suggesting the closing measures of Act II of *Boris Godunov*), the comic *gudok* players' recitative. An extraordinary work created in nearly impossible conditions, *Prince Igor* clings to a place at the edge of the repertory owing to Borodin's skill in realizing the 'song and cantilena' to which, by his own confession, he was drawn.

WORKS

*published in St Petersburg unless otherwise stated*

STAGE

| *Title* | *Genre, acts* | *Libretto* | *Composition* | *First performance* | *Sources* | *Remarks* |
|---|---|---|---|---|---|---|
| Bogatïri [The Heroic Warriors] | opera-farce, 5 | V.A. Krïlov | 1867 | Moscow, Bol′shoy, 6/18 Nov 1867 | *RUS-SPtob*, *US-Stu* | about a quarter by Borodin; the rest loosely based on excerpts from operas by Rossini, Meyerbeer, Offenbach, Serov, Verdi, Hérold and others; largely orchd by E.N. Merten; 2 choral excerpts ed. A. Nefedov (Moscow, 1977) |
| Tsarskaya nevesta [The Tsar's Bride] | opera | Borodin, after L.A. Mey | 1867–8 | | | sketches only; lost |

| Title | Genre, acts | Libretto | Composition | First performance | Sources | Remarks |

| Mlada | opera-ballet, 4 | Krïlov, after scenario by S.A. Gedeonov | 1872 | | *RUS-Mcm, SPil, SPsc* | Act 4 by Borodin; other 3 acts by Rimsky-Korsakov, Cui and Musorgsky; finale (nos.5–7) arr. and orchd Rimsky-Korsakov (Leipzig, 1892); choral excerpt from finale ed. A. Nefedov (Moscow, 1977) |
| Knyaz' Igor' [Prince Igor] | opera, prol., 4 | Borodin, after scenario by V.V. Stasov | 1869–70, 1874–87 | St Petersburg, Mariinsky, 23 Oct/4 Nov 1890 | *Mcm, SPsc*; (Leipzig, 1888) | unfinished; completed and partly orchd by Rimsky-Korsakov and Glazunov; 4 choral excerpts, not in orig. vs, ed. A. Nefedov (Moscow, 1977) |

ORCHESTRAL

Symphony no.1, E♭, 1862–7, score (1882), arr. pf 4 hands (1875)
Symphony no.2, b, 1869–76, score (1887), arr. pf 4 hands (1877) [score seen through press by Glazunov and Rimsky-Korsakov, after Borodin's death]
V sredney Azii [In Central Asia], musical picture, 1880 (Hamburg, 1882), arr. pf 4 hands (1882)
Symphony no.3, a, 1882, 1886–7 (Leipzig, 1888) [1st and 2nd movts only; completed from Borodin's materials, orchd and arr. pf 4 hands by Glazunov]

CHAMBER

Concerto, D-d, fl, pf, 1847, lost
Trio, G, 2 vn, vc, 1847, lost [based on themes from Meyerbeer's *Robert le diable*]
Trio, G, 2 vn, vc, *c*1850–60, frag., *RUS-SPit*
Quartet, D, fl, ob, va, vc, 1852–6 (Moscow, 1949) [based on a Piano Sonata by Haydn, H XVI:51]
String Quintet, f, 1853–4, (Leningrad, 1960) [finale completed by O. Evlakhov]
Trio, g, 2 vn, vc, 1854–5, ed. P. Lamm (Moscow, 1946) [based on folksong 'Chem tebya ya ogorchila', 'How I did grieve thee']
Grand Trio, G, 2 vn, vc, 1859–62, 1st and 2nd movts (Moscow, 1949) [3rd movt unfinished]
Sonata, b, vc, pf, 1860, ed. M. Goldstein (Hamburg, 1982) [completed by Goldstein; based on a theme from Bach's unacc. Vn Sonata BWV1001]
Piano Trio, D, 1860–61 (Moscow, 1950) [3 movts only]
String Sextet, d, 1860–61, 1st and 2nd movts, ed. P. Lamm (Moscow, 1946) [3rd and 4th movts lost; sketch for finale, *SPsc*]
Piano Quintet, c, 1862 (Moscow, 1938)
String Quartet no.1, A, 1874–9 (Hamburg, 1884)
String Quartet no.2, D, 1881 (Leipzig, 1888)
Scherzo, D, str qt, 1882 (Leipzig, 1899) [incl. as no.3 in the 2nd set of pieces for str qt 'Les vendredis', collab. Glazunov, Rimsky-Korsakov and others; also used in Sym. no.3]
Serenata alla spagnola, d, str qt, 1886 (Leipzig, 1887) [for the qt 'B-la-f', collab. Lyadov, Glazunov and Rimsky-Korsakov]

PIANO

ROBERT WILLIAM OLDANI

**Borodina, Olga** (*b* Leningrad, 29 July 1963). Russian mezzo-soprano. In 1987, while still a student at the Leningrad Conservatory, she joined the Kirov Opera, where her first role was Siebel. She quickly became one of the company's leading members, and television relays of *Boris Godunov* and *War and Peace*, allied to early success in international competitions, brought her to attention in the West. Musorgsky's Marina was also the role of her Paris (1992) and Metropolitan Opera (1998) débuts; she has recorded the part, along with such roles as Marfa (*Khovanshchina*), Hélène Bezukhova (*War and Peace*), Konchakovna (*Prince Igor*), Olga and Preziosilla (in the original version of *La forza del destino*), mostly with the Kirov. Further Russian parts include Lyubasha (*The Tsar's Bride*), Laura (*The Stone Guest*) and the title role of Musorgsky's *Salammbô* (in concert). She is admired in French repertory and since making her Covent Garden début in 1992 as Dalila has sung the part widely, and recorded it. Carmen is another of Borodina's signature roles, and she has also sung Marguerite in *La damnation de Faust*. She sang Angelina (*La Cenerentola*) at Covent Garden (1994) and San Francisco (1995), has recorded Eboli, and undertook her first Amneris on stage in Vienna in 1998. She is also a regular on the recital platform (making her Wigmore Hall début in 2000) and has recorded an admired disc of Tchaikovsky songs. While she is not always specific in her characterizations, her rich, liquid tone makes her one of the most sought-after Russian singers of her generation.

JOHN ALLISON

**Borodin Quartet.** Russian string quartet. It was founded at the Moscow Conservatory in 1945 by the viola virtuoso Rudolf Barshay, with the violinists Rostislav Dubinsky and Vladimir Rabeiy and the cellist Mstislav Rostropovich (soon replaced by Valentin Berlinsky). The ensemble gave its first concert in October 1946 as the Moscow Philharmonic Quartet. Barshay developed a close connection with Shostakovich and the group quickly established itself among the finest interpreters of that composer's chamber music. In 1947 Nina Barshay became the second violinist but in 1952 she was replaced by Yaroslav Aleksandrov; and two years later Rudolf Barshay joined the new Tchaikovsky Quartet, making way for Dmitry Shebalin. In 1955 the group took Borodin's name. At first its activities were curbed by the Soviet regime but in 1955 it was allowed to visit East Germany and Czechoslovakia and in the late 1950s it began to tour widely. Its technical skill and tonal sheen were widely admired, although reservations were expressed about the almost narcissistic quality of some of its interpretations and its blatant use of such devices as *senza vibrato*. In the Schubert, Schumann, Brahms, Dvořák, Franck and Shostakovich piano quintets it was often joined by Svyatoslav Richter. Aleksandrov's illness in 1974 caused his replacement by Andrey Abramenkov and in 1976 Dubinsky defected to the West, the new leader being Mikhail Kopelman. This formation was technically more vulnerable but musically more penetrating; and its interpretation of Shostakovich's 15th Quartet – performed with the stage lit by candles, to focus the concentration of players and audience – was memorable. In 1990–92 the quartet was resident at the Britten-Pears School in Aldeburgh, Suffolk. Yet another change of personnel in 1996 left Berlinsky as the sole survivor of the ensemble's best days: Shebalin retired, to be replaced by Igor Naydin, and Kopelman joined the Tokyo Quartet, Ruben Aharonian coming in as leader. Since 1950 the ensemble has made many recordings, featuring music by Bach, Barber, Szymanowski, Stenhammar and Schoenberg alongside its specialities: Borodin, Tchaikovsky and Shostakovich. Many of its recordings of the Viennese Classics and of French music have also been effective but sometimes it has given the impression of passing its interpretations down through the generations like holy writ. Works have been written for it by Vissarion Shebalin (father of its long-serving viola player), Mosey Wemberg, Anatoly Aleksandrov, Lev Knipper and Alfred Schnittke. In 2000 it began a project of playing the complete Beethoven and Shostakovich quartets in several major centres.

TULLY POTTER

**Boronat, Olimpia** (*b* Genoa, 1867; *d* Warsaw, 1934). Italian soprano. She is believed to have studied with Franco Leoni in Milan and to have begun her operatic career in Italian provincial theatres, later singing in Spain, Portugal and Latin America. She was engaged at the Imperial Opera in St Petersburg from 1890 to 1893, when she married and left the stage. In 1901 she resumed her operatic career and sang in Russia and Poland until 1914. Her voice was exceptional for its crystalline purity and flexibility, ideally displayed in her repertory of lyric soprano roles, which included Thomas's Ophelia, Rosina, Gilda (whose 'Caro nome' she recorded with delicacy and technical brilliance), Violetta and Bellini's Elvira.

HAROLD BARNES/ALAN BLYTH

**Boroni** [Baroni, Borroni, Buroni, Burroni], **Antonio** (*b* Rome, 1738; *d* Rome, 21 Dec 1792). Italian composer. He studied with Martini in Bologna, then in 1757 at the Pietà dei Turchini Conservatory, Naples, with Abos and Lorenzo Fago. In 1758 he returned to Rome, where he gave music lessons to Clementi, to whom he was related. According to Schmidl, his earliest known work was *L'unzione del reale profeta Davidde*, to a text by Goldoni, at whose expense it was performed 'in an apartment' at Venice on 23 March 1760. In 1761 his first comic opera, *La moda*, was performed at Turin (revived Venice, 1769) and he wrote the recitatives and some of the arias for *Demofoonte*, performed in Senigallia in the same year. After producing six operas at Venice (1763–6) he went to Prague with the Bustelli opera company; two new operas by him were put on there (1767–8), and in 1768 the company went to Dresden, where his next opera was performed in 1769 (revived Venice, Carnival 1770).

On 6 May 1770 Boroni arrived in Stuttgart, where he succeeded Jommelli as Kapellmeister; his first contract ran from 18 June 1771 to 18 October 1774 and was renewed for four years. In 1770 a revision of his earlier comic opera *L'amore in musica* was staged there, but the Italian opera in Stuttgart was deteriorating, and while there he composed only *opéras comiques* and perhaps a setting of Metastasio's *L'isola disabitata* (the evidence for this is a score in *D-Bsb* dated 31 December 1775). At the end of 1777 he returned to Rome, where his last opera was staged. On 21 March he was named *maestro di cappella* at S Pietro. Much of Boroni's sacred music was composed during his tenure at S Pietro. According to the libretto of a cantata composed to a text by Vincenzo Monti for the birth of the dauphin in 1782, he was then also *maestro di cappella* at S Luigi dei Francesi. From about 1790 he also held that post at S Apollinare, the church of the Collegio Germanico.

Boroni's career as an opera composer was relatively short and unprolific, but his comic operas were mostly very successful, particularly *L'amore in musica*, which was widely performed. Through a mistake in Gerber's *Lexicon* several operas by G.B. Borghi (*Alessandro in Armenia*, *Ricimero*, *La donna instabile*, *Eumene*) have frequently been attributed to Boroni; because of their dates the second and third of these are sometimes stated to have been composed at Stuttgart.

WORKS

OPERAS

Demofoonte (os, P. Metastasio), Senigallia, 1761 [incl. music not by Boroni]
La moda (dg, P. Cipretti), Turin, 1761, rev. Venice, 1769, *D-Dl*, *I-MOe*

DENNIS LIBBY, JAMES L. JACKMAN

**Borosini.** Italian family of singers.

(1) **Antonio Borosini** [Boresini, Borosino] (*b* Venice or Modena, *c*1655; *d* Vienna, after 1721). Tenor. He sang at S Marco, Venice, 1679–87, then moved to the ducal chapel at Modena, singing in oratorios and at the Teatro Fontanelli (1690, Legrenzi's *Eteocle e Polinice*) and in Parma and Reggio nell'Emilia. In 1688 he was released at the request of the Elector of Hanover to sing in the première of Steffani's *Henrico Leone* (30 January 1689); he returned to Hanover for Carnival 1696. He was appointed to the imperial court at Vienna in 1692 and retired in 1711 (or 1721, according to J.G. Walther's *Musicalisches Lexicon*, Leipzig, 1732). He sang at the S Bartolomeo, Naples (1700, 1706–7), in Turin (1698, 1702), in Venice (1704–7, in serenatas and operas by C.F. Pollarolo and Caldara), in Genoa (1691, 1705, Caldara's *Arminio*) and at Pratolino (1707, Perti's *Dionisio*). His last theatrical appearance may have been in Vienna, in Conti's *Alba Cornelia* (1714). He was usually cast as heroic and solemn characters such as kings or military leaders. He was also a composer; some arias are extant (in *I-MOe*).

(2) **Francesco Borosini** [Borseni] (*b* Modena, *c*1690; *d* after 1747). Tenor, son of (1) Antonio Borosini. A pupil of his father, he probably made his début in Lotti's *Il vincitor generoso* at Venice in 1709. He was engaged for the imperial court at Vienna from 1712 to 1731, and sang there in 11 oratorios by Caldara and a number of operas by Fux, the first (*Orfeo ed Euridice*) in 1715, and Conti. He was in the famous production of Fux's *Costanza e Fortezza* in Prague (1723), and was for a time co-director of the Kärntnertortheater in Vienna. He sang the title role in Gasparini's *Bajazet* (1719, Reggio nell'Emilia), and appeared at Modena (1720) and Parma (1729). He made his London début as Bajazet in Handel's *Tamerlano* at the King's Theatre (1724); he collaborated in Handel's treatment of this subject, and the part was rewritten for him before performance. Borosini sang Sextus (a soprano part rewritten with new music) in *Giulio Cesare* and was the original Grimoaldo in *Rodelinda* (1725); he also

*Francesco Borosini: caricature by Anton Maria Zanetti (i), pen and brown ink (Fondazione Giorgio Cini, Venice)*

appeared in Ariosti's *Artaserse* and *Dario* and the Vinci-Orlandini *Elpidia*. He returned in 1747 to sing in Paradies's *Fetonte* and Terradellas's *Bellerofonte*. A collection of *One Hundred Cantici in Italian after the Manner of English Canons and Catches* by 'Signor Borosini', published in London about this time, is attributed to him.

Borosini was the first great Italian tenor to sing in London. Quantz called him a splendid singer and a fine actor, with a voice 'ausserordentlich biegsam und lebhaft'. The parts Handel composed for him were of exceptional quality and prominence, especially Bajazet, which has a compass of two octaves (*A* to *a'*) and requires a wide range of expression and dramatic power. Gasparini's parts for him extend down to *G*; Fux's are notated in the bass clef. He excelled in a forceful style of singing, with wide leaps and energetic declamation.

(3) **Rosa Borosini** [née d'Ambreville] (*b* Modena, *c*1693; *d* after 1740). Soprano, wife of (2) Francesco Borosini. She was the daughter of the second *maestro di cappella* at Modena, and probably married Borosini in 1722. She sang in opera at Modena (1713–14, 1717 and 1720), Venice (1715–16), Mantua (1718) and Turin (1719). On 1 March 1721 she was engaged for Vienna at a salary of 1800 florins, retiring on a pension in 1740. She sang in a number of oratorios by Caldara and in Fux's *Costanza e Fortezza* at Prague in August 1723. Her sister Anna (wife of the cellist Giovanni Perroni) sang at Bologna (1711), Modena (1713), Venice (1714 and 1726) and Milan (1728). She was engaged for Vienna at the same time as Rosa, but at a lower salary. Both singers sang in Vivaldi's operatic undertakings in Venice and Mantua. Eleonora Borosini, a singer active at Innsbruck, Düsseldorf and Mannheim (1714–23), was not related to Rosa and Anna, but may have been related to (1) Antonio.
